Important Note about Washington Safety Rules

Most of the videos in our collection are commercially produced. They may not completely and accurately reflect workplace safety and health rules specific to Washington State (which are sometimes more stringent than federal rules).

Safety and health rules can also change after videos are published. The production date for each video is listed with its description in this catalog.

You are responsible for previewing a video prior to showing and using it with a knowledgeable instructor.

Welcome

to the Safety and Health Video Library

This catalog contains a complete listing of over a thousand safety and health video titles available in the Washington State Department of Labor and Industries lending library – the largest collection of its kind in the United States.

We are different!

Unlike most other libraries where books and media are on shelves waiting to be loaned, our collection of videos is booked and reserved in advance, sometimes for months, for thousands of borrowers. You can plan your safety meetings and training up to six months in advance. We will do everything in our power to get the video to you for your meeting.

Any Washington employer or resident may check out a video from us, whether for information or to help meet employee safety and health training requirements. Just viewing the video doesn't satisfy training requirements. These programs are intended primarily to assist and supplement training by a qualified instructor. Many programs are also suitable for safety meetings or safety committees. Admission fees, donations or collections may not be collected when borrowed programs are shown.

Keep your video library account current

- An account is set up in the name of an individual.
(Numerous individuals in the same company need to have their own accounts.)
- When your address or phone numbers change, please let us know.
- The borrower ID number is assigned to the individual, not the company.
- Borrowers may not loan videos to others, even within the same company.
- Use Safety and Health Video Library videos often.

TIP: If the name on the mailing label for this catalog isn't yours, fill out the Borrower's Agreement form at the back of the catalog and set up your own account.

How to Borrow Videos

1. **Open an account:** Fill out the Safety and Health Video Library Agreement Form at the back of this catalog and fax it to us. Your application will be accepted and entered by our staff normally within two or three days. You will receive a faxed copy or a phone call with your ID number.
2. **Choose your videos:** Select the videos you wish to borrow from the catalog listing in this booklet. You may borrow up to five videos per show date, one show per week. You will receive the video two days before your show date. If it doesn't arrive by then, call 1-800-574-9881 immediately.
3. **Place your order:** Write your video choices and the date you plan to show them on the Reservation Form, also at the back of this catalog. You may request videos up to six months in advance and at least one week before you plan to show the video. Daily cutoff time is 3 p.m. All requests are confirmed by the method requested (e.g., phone or fax) to let you know if your videos are available.

Fax the completed reservation form to: 360-902-5675

Or

Call us with your order:

Have your borrower ID number, video ID number, show dates ready and alternate video IDs. We will confirm your order. If you don't get confirmation within 2 days, please call us.

1-800-574-9881 *or* 360-902-5444

Or

Send the completed reservation form to:

(If you mail in your reservation, allow at least 15 days advance notice.)

Safety and Health Video Library
Department of Labor and Industries
P.O. Box 44607
Olympia, WA 98504-4607

**There is no charge to borrow the videos.
However, you are responsible for the cost of
return shipping on time.**

Tips for the Successful Borrower ...

- ♦ Return the video on or before the “leave your office” date.
- ♦ Ship the video back to us via traceable means, such as UPS or Media Mail with Delivery Confirmation.
- ♦ Return our calls within two business days.
- ♦ Do not lend the video to anyone else.

Why?

Videos must be returned on time, because they are scheduled for another user. Videos are scheduled many months ahead. Only one day late can make a difference for the next user. When videos are not returned on time, you **will** incur additional shipping costs that can really add up.

Shipping must be sent by traceable means so that you have a tracking number and this protects you. This is your proof that you met your “must leave your office by” shipping date.

Your timely response to a call can mean that the next user will get their scheduled video. That may be you someday.

Accounts are an individual responsibility. To protect yourself, we highly recommend that you do not lend out videos to others since their actions can cost you money and your active borrower status.

NOTE: Please make it a priority to follow these tips. It is our policy to **cancel borrowing privileges for three late returns.**

For the latest information and news from the Safety and Health Video Library, visit our web site at:

Videos.LNI.wa.gov

How to Return Videos

Important: Videos may be borrowed for one week.

1. **Check the “must leave your office by” date on the Packing List:** This is the date by which the video must leave your office and be in the hands of the shipper.
2. **Remove the UPS stickers and barcodes from our shipping container to assure the video reaches us rather than being returned to you.**
 - Put the video tape in its black case.
 - Put the case in the shipping box with any training materials (CDs, booklets, etc.).
 - Fill out the statistics on the packing list.
 - Turn over the shipping card in the window of the shipping box and you'll find the preprinted return address on the back.
3. **Return your video:** Because our videos have an average value of \$500, we require you to use a traceable shipping service.

Send the video via UPS or another traceable shipping service to the address on the reverse side of the shipping label.

Safety and Health Video Library
Department of Labor and Industries
7272 Linderson Way SW
Tumwater, WA 98501

Or

Send the video via US Postal Service Media Mail with Delivery Confirmation to:

TIP: Check with your shipping service to see if an outer wrapper is required and provided for return shipment.

Frequently Asked Questions

What if I lose or accidentally damage a video?

You are responsible for the replacement cost, which averages \$500 per video.

May I duplicate a video I borrow?

No. Copying videos is against the law, unless permission is specifically given in our catalog and on the materials themselves. All of our materials are fully protected by copyright laws under Title 17 of the U.S. Code of Federal Regulations. We must cancel your borrowing privileges if you unlawfully duplicate a video.

There are a few videos you are permitted to copy while you are borrowing them. These are identified on the video and listed on Page 175.

How far in advance can I reserve videos?

There is a seven day advance notice requirement to allow time for shipping to you. You may reserve a video as much as six months in advance. We recommend that you order seasonal videos early, for example, winter and summer topics. Our most popular videos must be reserved months in advance.

May I have a video shipped outside the State of Washington?

No. We only ship to locations within the state.

If I like the video, may I buy it from the library?

Most videos are available for loan only. However, we can provide you with purchasing information. The vendor information and phone number are listed with each video description on our online catalog at Videos.LNI.wa.gov.

How do I get help?

For complete information, visit Videos.LNI.wa.gov

To request and schedule videos, return phone calls or ask about procedures, speak to the **library assistant** at 1-800-574-9881 or 360-902-5444.

To suggest videos or topics to acquire or for information about video content and their condition, please talk to the **librarian** at 360-902-5453.

Visit us on the Internet at **Videos.LNI.wa.gov**

The online video catalog is easier and faster to use than this paper catalog.

- Search all videos in the collection — including recently purchased videos.
- Search by keyword/phrase or by subject.
- Sort the results by production date, video ID or length of program.
- Find vendor information for a video by clicking on the title.

The screenshot shows the Washington State Department of Labor and Industries website. The top navigation bar includes links for Home, Safety, Claims & Insurance, Workplace Rights, and Training. Below this is a search bar with options to 'Find a Law or Rule' or 'Get a Form or Publication'. The left sidebar contains a list of links: Basics, Topic Center, Training, Courses, Videos & Workshops, Online Safety Courses, Video Library, Online Catalog, About the Video Library, Videos Online, Workshops, Governor's Safety & Health Conference, Required Training & Plans, Resources for Trainers, Safety Forms & Publications, Hazard Prevention, Search, and Rules & Policies. The main content area is titled 'Online Catalog' and features a search section. The search criteria are 'By keyword/phrase: accident prevention'. The search is refined to 'Both Title & Description'. A search button is labeled 'Search by keyword/phrase'. Below the search section, it states 'Here are 8 videos with "accident prevention" in title or description (or both)'. A 'Sort results by:' dropdown menu is open, showing options: Title (selected), Time, Copyright, and Video ID. A 'Go!' button is next to the dropdown. Below the dropdown, a table header is visible with columns for 'Title' and 'Description'. The first row of the table shows the title 'Blink : And You Could Lose' and the video ID 'Video ID: V0667'.

Video Descriptions by Subject

ACCIDENT INVESTIGATION

Accident : What To Do V0550

“A. Sylvester Safety” investigates an accident inside a plant. Reviews the basic steps for investigating an accident effectively. CC (©1992 Coastal Video Communications Corp.) 14 min.

Accident Investigation V0151

This program addresses: The accident; The accident process; The accident investigation; and Accident reporting. (©1991 Safetycare, Inc.) 12 min.

Accident Investigation : The Big Picture V0807

Discusses fact gathering and information, evaluating accidents, and writing accident reports. (©1999 Coastal Video Communications Corp.) 17 min.

Accident Reporting And Investigation V0634

Reviews procedures in documenting injury reports and investigations. Details the types of information to gather and include. (©1990 Long Island Productions) 5 min.

Anatomy of an Accident V0910

Stresses safety awareness in the industrial workplace. Documents the choices made by a number of people that lead to an accident. Clearly shows that each person is responsible for identifying, reporting/fixing hazardous situations before a serious injury or accident occurs. CC (©1995 Aurora Pictures) 15 min.

How To Investigate Accidents V0255

Teaches supervisors the basics of accident investigation and the important points to consider when gathering the facts for an accident report. Goes through a scenario of an accident investigation. (©1993 Long Island Productions) 13 min.

Incident Investigation : Proactive Prevention V0438

Designed for supervisors and managers, provides in-depth training on the methods and techniques investigative teams need to discover the true causes of an incident. Explains how to identify and recommend effective corrective actions. (©1995 Summit Training Source, Inc.) 18 min.

Springfield : Lessons Learned V0635

A team at the Springfield site demonstrates the circumstances that surrounded the death of Ron Mills on November 3, 1996. Ron collided with a forklift which he didn't see and was killed while crossing the road. The team explains reliable methods established to prevent reoccurrence of this situation at Weyerhaeuser. (©1997 Weyerhaeuser Company) 13 min.

ACCIDENT PREVENTION

Accidents Aren't Just One of Those Things V1061

If you missed the 2003 Governor's Safety & Health Conference in Seattle, you can still hear the message from keynote speaker, Martin Lesperance in this program! A 20-year veteran firefighter and paramedic, Martin passionately speaks from the emergency medic's point of view on life changing accidents that didn't have to happen. Some of the tragic accidents that didn't have to happen: a paralyzing fall off a ladder; electrocution; head injury and other construction fatalities. (©2003) 20 min.

Charlie Answers the Tough Questions V0836

“What would have made you wear your safety equipment?” and “what do you think of firing someone for a safety violation?” These are just two of the provocative questions Charlie Morecraft answers in this compelling video. Charlie's attitude and behavior, before, and after his accident, motivate employees to act more responsibly. (©1997 Long Island Productions) 23 min.

Charlie Morecraft Story V0324

A compelling true story. Charlie Morecraft almost died in an industrial fire accident. There were times when he wished he had. He tells his story in 20 minutes — it seems like only 10. Charlie explains that — regardless what your job may be — you can't afford an accident, your family can't afford an accident, and your company can't afford an accident. “So now — whenever you do a job — step back, take a look at it and if it isn't safe, — don't do it.” (©1989 Media Resources Inc.) 20 min.

Coaching Safe Behavior, Part One V0542

Reviews safety strategies that should be considered on-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Coaching Safe Behavior, Part Two V0548

Positive work and safety attitudes benefit everyone. Be informed of the hazards of the job, unsafe practices and follow other precautions. Awareness of ones own actions and others will lead to correcting unsafe practices. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Creating The Safety Plan, Part One V0521

Dramatization 1950's style, with Sam Diamond and Lauren McCall discussing developing a safety plan and leading employees' involvement in a safety plan. Elements of programs: Appropriate Action-motivator, Behavior, and Consequences (ABC). (Black & White) Suggested to supplement or as refresher training. Safety Watch Series. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Creating The Safety Plan, Part Two V0526

Sam Diamond and Lauren McCall continue their discussion on effective safety programs. These safety programs get everyone involved in the safety process to identify problems and produce solutions. Three essential areas to a safety plan include: conducting successful safety meetings, observing employee work behaviors, and developing a functional safety committee. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Do Your Employees Understand The Importance Of Safety? V0622

The "Drill Sergeant" and his "Recruits" stress that safety is a function of every employee, not just the Safety Department. Shows how to improve employee awareness with signs, posters and labels plus hazards-specific training. Supports Job Safety Analysis to identify hazardous activities and prevent injury. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1997 Primedia Workplace Learning, Safety Watch) 11 min.

Every Time I Look At My Hand... V0668

Features testimony from workers who have suffered traumatic, disabling hand injuries. Through their testimony, the viewer will learn the importance of taking the time to do a job correctly. Nip points, loose clothing and jewelry, lockout/tagout and using proper tools are all covered.
(©1994 ERI Safety Videos) 15 min.

HAZCOM Case Histories : Learn From Their Mistakes V0336

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." Spanish version on V0799.
(©1994 Coastal Video Communications Corp.) 19 min.

VIDEO TIP:

Please return videos by a traceable shipping service such as UPS. If you use the U.S. Post Office, you must use Delivery Confirmation. Our post office address is on the back cover.

High Impact : Industrial Safety Attitudes (Life and Death Series) V0886

Drama from the perspective of three EMT's responding to industrial accidents to review safety basics. Stresses the importance of preventing accidents by anticipating unsafe situations; adhering to company safety rules, keeping a positive attitude; and taking responsibility for personal safety of self and others. Warning! May be too graphic for some audiences.
(©2000 ERI Safety Videos) 19 min.

High Impact : Staying Alive in Industry V0959

Points covered: Job knowledge, training and authorization, positive attitudes, violence in the workplace, maintaining concentration and using sound judgment. Recreates seven graphic accidents: Hand caught in conveyor belt, Ladder strikes unchained oxygen cylinder causing explosion, Marital problems result in murder-suicide at assembly plant, Employee accidentally slashed with utility blade, Defeated safety feature allows fingers to be amputated by shear, Worker loses eye after neglecting to wear proper PPE and Violating confined space entry procedures results in injury.
(©2000 ERI Safety Videos) 19 min.

I Chose to Look the Other Way V0956

Dramatically tells the story of an employee who failed to speak up when witnessing an unsafe act. By choosing to "look the other way," a co-worker's safety shortcut led to a fatal accident. Based on the popular safety poem by Don Merrell, this program shows how speaking up about unsafe acts can save lives and help develop a positive safety

culture. Filmed in industrial manufacturing and assembly operation locations.
(©2002 ERI Safety Videos) 12 min.

Inspection, Care And Storage Of Slings V0463

Looks at a range of lifting equipment and what fundamental principles should be followed to prevent accidents. Discusses safe operation including pre-use checks; care of equipment; planned periodic inspections; and correct storage of equipment. Covers: Chain slings; Wire rope slings; Fiber slings; and Web slings.
(©1994 Safetycare, Inc.) 16 min.

It Only Takes a Second V0926

Intended as an attention grabber, the graphic accidents dramatized in this program will force employees to think about the personal consequences of unsafe acts and how these actions will also affect the lives of their loved ones. Warning! May be too graphic for some audiences.
(©1995 Aurora Pictures) 3 min.

It Only Takes a Second - Discussion Version V0911

A series of scenarios showing unsafe acts or conditions vs. the safe way. Topics include: driving safely, PPE, slips, trips and falls, machine guarding, and safe operating procedures. Expanded version of V0926.
(©2001 Aurora Pictures) 24 min.

It's Up To Me V1023

Follow up program to "I Chose to Look the Other Way" V0956. Through several injury scenarios, meshed with stanzas from D. Merrell's powerful poem, viewers will see both the right way and wrong way to respond to unsafe situations. After watching this video, employees will be compelled to report or correct unsafe situations and understand that an injury-free workplace is "up to me." Scenes include lockout, guarding, eye protection, and construction sites. Warning! May be too graphic for some audiences.
(©2003 ERI) 14 min.

Life is for the Living V0965

Safety meeting opener gives graphic coverage to 21 accidents that could have been prevented. Dramatically reminds viewers of the long-term consequences. Impact is visual. No spoken words.
(©2000 Aurora Pictures) 4 min.

Prevention Of The Most Common Accidents (Humorous) V0549

In this "Get Smart" format, "Agent Fax" and "Agent 29" meet "Tool Time" helper "Hal" who wants to get safety facts to help other employees understand how potential accidents can be recognized and prevented on a daily basis. Note: slightly offbeat presentation. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Pro-Active Safety Attitudes: Target Zero V0651

The aggressive pursuit of Zero Accidents in the workplace relies not only on knowledge of safe operating procedures and principles, but also in the right attitude among all workers. Covers: Vision and initiative; Creating expectations; Accident prevention; Building trust; and Maintaining leadership. CC
(©1996 Coastal Video Communications Corp.) 18 min.

Recognizing Hazards V1015

Encourages front line workers to have an eye for safety hazards in the workplace; to identify and report to supervisor to prevent accidents. Demonstrates stepping back and looking at the workplace critically using all the senses. Industrial work environment. (©2001 Summit Training Source, Inc.) 5 min.

Remember Charlie V0707

Charlie tells his story. He was an oil refinery worker who was critically injured in an explosion that burned 45% of his body. Those who hear him speak will discard their attitudes of "accidents don't happen to me" and "safety is management's responsibility" and take personal responsibility for their own safety and the safety of their co-workers. (©1994 Summit Training Source, Inc.) 56 min.

Safety On Trial V0485

Drama. Developed to assist project superintendents and project managers in the difficult tasks of establishing work rules to prevent violations of safety and health regulations and to communicate these rules to their employees. Assists the general contractor on multiemployer worksites to better understand their roles and

responsibilities toward worker safety including the employees of subcontractors. Dramatically demonstrates how small incidents on a construction site can devastatingly alter one worker's life and that of his family. May be duplicated. (©1994 Department of Labor and Industries, State of Washington) 35 min.

Seguridad en el Trabajo: Causas Y Prevención Del Accidente - 2nd edition Safety On the Job : Accident Causes and Prevention V0229

A series of dramatizations show how a person's mental or physical condition can affect on-the-job performance and lead to accidents. Stresses identification of risk-producing behaviors to reduce the chance of injury. Illustrates warning signs staff and supervisors should be alert to. Suggests employee assistance programs for help or advice. English Version V0243 (©1984 AIMS Media) 16 min.

Spiral to Disaster V0840

Re-enacts the tragic series of events resulting in the loss of 165 lives and the destruction of one of the largest off-shore oil and gas production platforms in the North Sea, platform Piper Alpha. Covers procedures and equipment to prevent or mitigate the outcome. Discusses Emergency Action Plan (EAP), work permit systems, risk analysis, and communication break downs. CC
(©2000 Coastal Video Communications Corp.) 25 min.

Springfield : Lessons Learned V0635

A team at the Springfield site demonstrates the circumstances that surrounded the death of Ron Mills on November 3, 1996. Ron collided with a forklift which he didn't see and was killed while crossing the road. The team explains reliable methods established to prevent reoccurrence of this situation at Weyerhaeuser. (©1997 Weyerhaeuser Company) 13 min.

Think About This V0830

Safety meeting starter. Graphic accidents reenacted in the program lead employees to think about the personal consequences of unsafe acts and how those actions also affect the lives of loved ones. Warning! May be too graphic for some audiences. (©2000 ERI Safety Videos) 5 min.

ACCIDENTS - NEAR MISSES

Anatomy of an Accident V0910

Stresses safety awareness in the industrial workplace. Documents the choices made by a number of people that lead to an accident. Clearly shows that each person is responsible for identifying, reporting/fixing hazardous situations before a serious injury or accident occurs. CC
(©1995 Aurora Pictures) 15 min.

Close Calls : The Wake Up Call V0555

Clearly demonstrates through scenarios how close calls ignored turn into accidents. Shows how to recognize close calls and "wake up" to the dangers they represent. Emphasizes attitude, awareness and personal responsibility. The message: Pay attention to close calls and take steps to prevent them from becoming serious incidents. (©1995 Aurora Pictures) 14 min.

Close Calls and Near Misses V0957

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. Spanish version V1024. (©2000 ERI Safety Videos) 18 min.

I Felt Comfortable V0460

The tragic true story of Randy Fellhoelter and his narrow escape from death. Randy tells his dramatic story to an audience of co-workers. Safety shortcuts escalate to near misses and up to major or fatal accidents. Taking risks can affect our lives and those of loved ones. Scenes of Randy's injuries were taken at the hospital and during his recovery. For all employees, supervisors, and managers. Warning! May be too graphic for some audiences. (©1994 National Resource Safety Center Inc.) 23 min.

Incident Reporting : You Can Save A Life V0576

Discusses work standard expectations, controlling hazards, reporting incidents, and avoiding accidents.

(©1996 Coastal Video Communications Corp.) 16 min.

Llamadas y Perdidas Cercaras Close Calls and Near Misses V1024

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. Short version. English version is V0957

(©2000 R M Distributors - Hi 5) 9 min.

VIDEO TIP:

Make sure your VCR is clean and in good working order.

No Injury, No Accident V0909

Based on the work of W. H. Heinrich and the "Heinrich Triangle," this video demonstrates the importance of tracking near miss and non injury accidents in order to prevent serious or fatal injuries. CC (©1994 Aurora Pictures) 17 min.

Prevention Of The Most Common Accidents (Humorous) V0549

In this "Get Smart" format, "Agent Fax" and "Agent 29" meet "Tool Time" helper "Hal" who wants to get safety facts to help other employees understand how potential accidents can be recognized and prevented on a daily basis. Note: slightly offbeat presentation. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Shocking Experiences : A Review Of Basic Electrical Hazards In The Workplace V0292

Basic hazards of working with electricity for employees. Four people describe their close calls and suggest preventative solutions.

(©1990 CoreMedia Training Solutions) 20 min.

That Moment in Time V0068

Shows dramatically how there is a "moment in time" when a person may choose to do the "safe" thing instead of an action that is convenient but not safe. Motivates viewers to break the link in the chain of events leading up to an accident. Industrial and office work environments.

(©1988 Charthouse International Learning Corp) 20 min.

Wheel Of Misfortune. Grave Remarks V0545

In game show format, "Wheel of Misfortune," serves to remind us that for every action there are a set of prescribed outcomes. "Grave Remarks" represents worst-case scenarios of losses and accidents... that lead to their final "resting places." Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Working Together For Safety V0596

Explains the relationship between unsafe acts and accidents. Covers a variety of typical safety topics such as personal protective equipment, lockout/tagout, hazard communication, inspections, rules and procedures, accident reporting, protective devices, control measures, accidents and emergencies.

(©1996 Business Training Systems Inc.) 19 min.

AERIAL WORK PLATFORMS

see also Fall Protection

Aerial Lift Safety V0722

Complies with OSHA 29 CFR 1910.67 and ANSI A92.6. Covers safe work practices on platforms and pre-operation inspection. Lifts shown include platform, manlifts, vertical booms, scissor lifts, baskets, etc. Filmed in chemical and manufacturing facilities, refineries and municipalities. Follow up training to this or refresher training on V1044.

(©1998 Summit Training Source, Inc.) 13 min.

Aerial Lift Safety V1044

Refresher training demonstrates safe operation procedures, pre-operation inspection, work site evaluation and best safety practices. For more comprehensive training use V0722.

(©2000) 7 min.

Aerial Work Platforms V0020

Gives employees an overview of the safety considerations required when using self-propelled aerial work platforms. Describes preparations to use an aerial work platform. Explains safety in transporting an aerial work platform. Describes safety when working from an elevated work platform and proper shutdown procedures.

(©1996 Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min.

Boomlifts in Construction V0904

Covers lifting principles, walk around inspection points, controls, and what should be covered in training of specific boomlifts.

(©1996 Coastal Video Communications Corp.) 10 min.

Fall Protection V0561

This program covers the following topics: Ladders; Step bolts and manhole steps; Stairs, ramps and bridging devices; Fall protection systems; Wall openings; Scaffolds; Mobile ladders, stands, and powered industrial platforms. Revised version: V0764.

(©1995 Visionquest Films) 15 min.

Fall Protection & Prevention V0764

(Revised version of V0561 Fall Protection)
Provides the information employees need to make correct choices when working at elevations. Covers basic fall hazards, the potential injuries, identifies the conditions and activities likely to result in a fall, fall protection and fall arrest systems, and suitable anchorage points. Applications to residential construction environment.
(©1998 R M Distributors) 11 min.

Manbaskets in Construction V0903

Covers proper procedures for hoisting using a crane or derrick. Includes Pre-lift meeting, personnel platforms, crane operations, inspection and testing, and loading. CC
(©1997 Coastal Video Communications Corp.) 12 min.

Safety On The Job : Working On Aerial Lifts, Cranes, And Swing Stages V0166

Shows workers how to safely operate aerial lifts, cranes, and swing stages. Details the importance of pre-inspecting aerial equipment each work day, warming up engine and hydraulic systems before operation, maintaining safe clearance from electrical current, wearing hard hats and other safety gear. Shows safe entry and exit procedures of aerial equipment, and demonstrates proper ground-to-equipment hand signals.
(©1988 AIMS Media) 15 min.

Scissor Lifts in Construction V0902

Training includes lifting principles, elements of the walk around inspection, and operation safety. CC
(©1997 Coastal Video Communications Corp.) 9 min.

AGRICULTURAL OPERATIONS AND FARMING

see also Pesticides

Apple Harvest Safety V0297

Covers the equipment used in harvesting apples. Details tractor/trailer and forklift operation, unloading bins, general orchard safety, proper lifting techniques and ladder safety. (Spanish version V0309)
(©1993 University of Arizona, Agricultural Health Promotion System) 16 min.

ATV Safety For Agricultural Operations V0490

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common safety rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards. Spanish version V0376.
(©1993 Visual Education Productions) 14 min.

Carga y Elevación: Una Guía para la Seguridad en la Elevadora de Horquilla Agrícola

Load & Lift : A Guide To Agricultural Lift Truck Safety V0741

In Spanish, covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre-inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. English version V0740.
*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Commercial Grain Handling : Safeguards To Success V0308

Focuses on safety and health in commercial grain handling facilities. Intended audience is management, staff and employees of commercial grain handling operations.
(©1992 Department of Agricultural Communications, Oklahoma State University) 16 min.

Dairy Safety : It's No Accident V0375

A comprehensive look at dairy operation with safety recommendations. Part 1 – “Handling Cattle Safety” Covers safety in: Handling Dams and Calves; Artificial Insemination; Handling Bulls Safely; and Milking Parlor. Part 2 – “General Farm Safety. Covers related topics in safe dairy farm operations: Hazardous Chemicals; Feeding Livestock; Moving Equipment; Physical Facility; Communicable Disease; and Manure Pits and Vertical Silos.
(©1991 Visual Education Productions) 26 min.

Dairy Safety : Now, More Than Ever V0739

Developed to assist employers and employees in the dairy industry to become more aware of occupational hazards on dairy farms. Experience an inspection of a dairy farm inspection with an Oregon OSHA inspector to learn what a safe farm looks like. Lists ten most cited violations for 1991, solutions to fix the problems and the consequences. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1993 Department of Consumer Business & Services, Oregon OSHA) 18 min.

Deadly Dust II V0220

Discusses the hazards that are possible in the grain industries that have “Deadly Dust” potential. Identifies the seven events needed at a precise time to cause a grain dust explosion: Oxygen; Fuel Source (dust); Dust must be fixed or suspended in the air; Minimum concentration of dust is needed; Ignition source; Dry dust; and a confined or closed space where pressure will build up.
(©1990 Cooperative Extension Service, Kansas State University) 30 min.

Deadly Dust III V0440

All employees should view DEADLY DUST II (V0220) before viewing DEADLY DUST III. Featured are two employees who survived major dust explosions, dramatic scenes of an actual explosion, the devastation, injuries and fatalities from major explosions and stop motion demonstrations of how primary and secondary dust explosions occur. CC

(©1995 Department of Communications, Dole Hall, Kansas State University) 22 min.

Drifting Toward Extinction Or ...? V0731

Narrated by Wayne Handley, Ag and Aerobatics pilot. Discusses the problem of spray drifting by ag aviation pilots when they are applying chemical pesticides to crops. (©1997 National Agricultural Aviation Research and Education Foundation) 20 min.

EPA Worker Protection Standard Rules V0747

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English /Spanish version V0749. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Farm And Ranch Electrical Safety**Seguridad con la Electricidad en la Granja y en el Rancho V0150**

Narrated by Wey Simpson, this video demonstrates many daily farm practices with the potential of electrical shocks. Includes handling irrigation equipment, wiring and grounding electrical systems, and emergency procedures.

(©1992 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 19 min.

Farm And Ranch Equipment Safety**Seguridad con el Equipo en la Granja y en el Rancho V0296**

Covers ranch and farm equipment accident prevention. Narrated by Bob Tallman, famous rodeo personality and voice of "The American Farmer" radio program. Emergency Medical Technicians describe accident situations with equipment. Communication strategies for farm and ranch workers are also discussed. Recommended training for all workers on farms and ranches.

(©1990 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 36 min.

Farm Safety : Getting Down To Business V0758

Covers: Hazard Communication; Safety committees; A lockout/tagout program; Emergency planning; Guarding; Tractor & Combine safety equipment; Oxygen/Acetylene bottle storage; Fire extinguishers; Grinder rests & guarding; Eye protection; Electrical precautions; Hand tool maintenance; Chemical hazards; Labeling; and Grain storage units. Produced by Oregon OSHA and Oregon Wheat Grower League. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 23 min.

Harvest Of Danger Season Of Hope V0221

Explores causes of farm-related injuries and illnesses. Features interviews with experts in agricultural safety and rural health; farmers and farm workers. Suggests strategies for reducing the effects of numerous work-related problems ranging from stress to pesticide poisoning.

(©1993 MIBH/NYCAMH/FPP/MARY Imogene Basset Hospital) 18 min.

Hood River Tractor Safety Seminar For The Tree Fruit Industry, Part I, II, III V0750

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. Spanish version V0751. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 42 min.

Load & Lift : A Guide To Agricultural Lift Truck Safety V0740

Covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre-inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. Spanish version V0741. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Pesticide Safety : Worker Protection**Seguridad con los Pesticidas: Protección del Trabajador V0249**

Intended to help meet the requirements set by the EPA for training Agricultural Workers and Pesticide Handlers under the new Worker Protection Standard's regulations. Divided into two sections: Part 1 is for both the Agricultural Worker and Pesticide Handler. Part 2 has additional information for Pesticide Handlers and Early-Entry Workers.

(©1993 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 66 min.

Primero la Seguridad: La Seguridad es Importante **Safety First : Safety Is Important** **V0757**

Pictograms For The Food Processing Plant. A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. English version V0756.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 5 min.

Reglas del Estándar para la Protección del Trabajador **EPA Worker Protection Standard** **Rules V0748**

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English version V0747.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 20 min.

Reglas del Estándar para la Protección de Trabajador - **EPA Worker Protection Standard** **Rules V0749**

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 36 min.

Safety First : Safety Is Important **V0756**

(Pictograms For The Food Processing Plant). A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. Spanish version V0757.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 5 min.

Seguridad durante la Operación del Tractor y la Maquinaria

Safe Tractor and Machinery Operation V0323

Topics include: Proper clothing and footwear for tractor operation; Pre-operation safety checks; and proper mounting/dismounting procedures.

Videotaped seminar. English Version V0322 (©1992 University of Florida, IFAS Publications) 33 min.

Seguridad en la Cosecha de la Manzana

Apple Harvest Safety V0309

Covers the equipment used in harvesting apples. Details tractor/trailer and forklift operation, unloading bins, general orchard safety, proper lifting techniques and ladder safety. English version V0297

(©1993 University of Arizona, Agricultural Health Promotion System) 16 min.

Seguridad en las Operaciones Agrícolas

ATV Safety For Agricultural Operations V0376

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common Safety Rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards.

English version V0490

(©1993 Visual Education Productions) 14 min.

Seminario de Seguridad para el uso del Tractor en la Industria del Arbol Frutal, Partes I, II, III

Hood River Tractor Safety Seminar for the Tree Fruit Industry V0751

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. English version V0750. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 52 min.

VIDEO TIP:

Don't forget the 7-day notice requirement. This means you have to order at least seven days before you want to show your video.

Su seguridad en la Planta de Empaque de Frutas

Your Safety in the Fruit Packing Plant V0746

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries in the workplace. English version V0745.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 10 min.

Trabajando Inteligentemente - no con más Dificultades : Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices.

English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Training Greenhouse Workers To Handle Pesticides Safely V0298

Stresses alertness to the four ways horticultural workers might come into contact with pesticide chemicals. Covers: Handling; Equipment; Mixing; Application; Cleaning; Clothing; Safety gear; and First aid.

(©1986 Visual Media, University of California) 16 min.

Tripod Orchard Ladder Safety V0310

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and proper clothing. Demonstrates how to inspect and set up tripod orchard ladders.

(©1990 Oregon State University, Extension Service) 10 min.

Tripod Orchard Ladder Safety Seguridad en la Huerta usando la Escalera Tripoide V0295

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and proper clothing. Demonstrates how to inspect and set up tripod orchard ladders. In English and Spanish.

(©1990 Oregon State University, Extension Service) 10 min.

Working Smarter — Not Harder : Ergonomics In Agriculture V0801

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices.

Spanish version V0802. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 16 min.

Your Safety In The Fruit Packing Plant V0745

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 10 min.

AIR QUALITY MONITORING

see also Respirator Safety

Air Monitoring : The Purpose V0534

Representatives from management, safety, medical, and an industrial hygienist departments form the occupational hazard team and contribute to setting up operations in developing work practices and training procedures for employees to access potential hazards. Covers the following: contamination elimination procedures; Identifying potential exposure sources, and Implementing local exhaust ventilation operations. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Asbestos : Awareness Exposure V0612

Describes the use of asbestos in buildings and homes, health hazards of asbestos exposure, and precautionary measures such as respirators. Safety Watch Series. Suggested to supplement or as refresher training.

(©1997 Primedia Workplace Learning, Safety Watch) 10 min.

Atmosphere Supplying Respirators V0702

Explains proper use, care and maintenance of atmosphere-supplying respirators.

Defines the terms: "Constant flow," "Demand," "Pressure demand," "Oxygen deficient atmosphere," "Service life" and "IDLH." Identifies situations that require use of atmosphere-supplied respirators.

(©1998 Primedia Workplace Learning, Industrial Training Systems Corporation) 16 min.

VIDEO TIP:

Need a loan extension? Call 1-800-574-9881 to extend for up to a week.

Choosing The Correct Respirator V0547

Defines working environments with hazardous air quality or conditions that require workers to wear respirators. Gives an overview of air purifying respirators (APR); supplied air respirators (SA), and self breathing apparatus along with various filters and cartridges and what types of protection they provide. Tells how lung and bodily damage can be prevented by using the right kind of air purifying respirator. Safety Watch Series. (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Confined Space Atmospheric Testing V0638

Reviews how and when to test, and also what to do when air is unsafe. There are three main tests that will identify the atmospheric hazards of a confined space: Oxygen content; Flammability; and Toxicity. Covers procedures for proper pre-testing. CC (©1993 Coastal Video Communications Corp.) 17 min.

Confined Space Entry : Inside Maneuvers V0639

For employees who work in confined spaces like tanks; vaults; vessels, silos; pits; hoppers, pipe lines, or storage bins. Identifies characteristics in space hazard and covers atmospheric testing and other hazard controls, confined space permit, PPE, communication, rescue equipment, team responsibilities and contractors. Filmed on the USS Atlanta submarine. (©1997 Coastal Video Communications Corp.) 25 min.

Indoor Air Quality V0609

Informs employees of poor air's harmful effects as well as methods to prevent, identify and correct air quality problems. Covers: Sources of air contamination; Adhesives, solvents and vehicle exhaust; Housekeeping, smoking, and humidifiers; and Symptoms and signs of poor air quality. (©1996 Long Island Productions) 13 min.

Indoor Air Report Breathe Easy V0610

Describes sick building syndrome, building related illnesses; and environmental tobacco smoke. NIOSH has found that the primary causes of IAQ problems are: inadequate ventilation; contamination from outside the building; and microbial contamination from building fabrics. (©1994 Coastal Video Communications Corp.) 15 min.

Monitoring Airborne Contaminants V0303

Reliable measurements of airborne contaminants are useful for selecting personal protective equipment, delineating areas where protection is needed, assessing potential health effects of exposure; and determining specific medical monitoring. Covers: measuring instruments; direct-reading instruments; onsite and perimeter monitoring; periodic, personal, and variable monitoring. (©1993 Long Island Productions) 10 min.

Respiratory Protection : Air Purifying Respirators V0724

(Revised 1998.) Deals with the application of air purifying respirators in a respiratory protection program. Trains employees in selection, fit testing, function, limitations and maintenance. (©1998 Summit Training Source, Inc.) 10 min.

ALCOHOL, DRUG AND SUBSTANCE ABUSE

Achieving A Drug-Free Workplace : What Every Employee Needs To Know V0705

Part 1: Yes, We've Already Met; Part 2: Sick Without The Fever; Part 3: The Top 10 Ways To Destroy Your Job; Part 4: This Is Not A Test; Part 5: Just the Facts, Ma'am. Ex-substance abusers and their co-workers share their story on creating a drug free workplace. (©1997 American Training Resources, Inc.) 29 min.

Drivers Alert : Over-the-Counter & Prescription Medications and Impaired Driving V0890

Addresses the growing problem of driving under the influence of legal medications. (©1995 Washington Traffic Safety Commission) 13 min.

Drug Use & Abuse V0486

Discusses the potentially costly problems which could result from drug abuse. Identifies the drugs most commonly used, their symptoms, and the possible long and short-term problems associated with their use and abuse. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

DUI : Choices And Consequences V0340

This dramatization on the consequences of drunk driving features Jack Hamilton, a young college student who decides to unwind from the pressures of school, work and family life by having "a few beers." (©1993 AIMS Media) 33 min.

Maintaining A Drug-Free Workplace : A How-To-Guide For Supervisors V0706

Part 1: It's Up To Us; Part 2: Document, Don't Diagnose; Part 3: Step By Step; Part 4: How Testing Works; Part 5: You're Talkin' To Me. A manager's view and responsibility on identifying, creating and defending a drug free workplace. (©1997 American Training Resources, Inc.) 33 min.

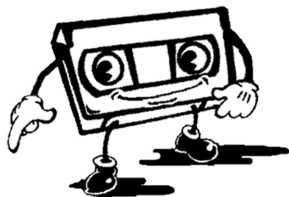

Safer State at .08 : Washington's New Drunk Driving Laws V0857

The legal blood alcohol limit has been reduced to .08 for drivers in Washington. Other Washington Laws include tougher penalties for repeat DUI offenders, fines, and the possibility of doing jail time or being subjected to home monitoring. (©1999 Washington Traffic Safety Commission) 10 min.

Safety Watch Series, Vol. 2, No. 4, July 1995 V0424

Contains these three segments on safety issues: HAZCOM : REDUCING EXPOSURE(V0425), BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426), and UNDER THE INFLUENCE : ALCOHOL IN THE WORKPLACE (V0427). For descriptions of each segment, refer to specific titles and title numbers as listed here.
(©1995 Primedia Workplace Learning, Safety Watch) 26 min.

VIDEO TIP:

Our online catalog offers you four ways to sort your search results: title, length of video, copyright date, or video ID.

Solving Chemical Dependency Problems V0690

Supervisors have a unique role of freeing the workplace of chemical dependency. Covers: Symptoms of cocaine or other drug use on the job, particular during shift work; Complete drug policy notification; and Documentation for chemical dependency problems.
(©1993 Long Island Productions) 7 min.

Under The Influence : Alcohol In The Workplace V0427

Describes the problems of alcohol abuse related to work situations. Impaired judgment, unsteady actions, mood swings, and other effects of alcohol jeopardize not only the safety of the individual abusing alcohol but also the safety of co-workers. Safety Watch Series.
(©1995 Primedia Workplace Learning, Safety Watch) 7 min.

ASBESTOS SAFETY

Asbestos : Awareness Exposure V0612

Describes the use of asbestos in buildings and homes, health hazards of asbestos exposure, and precautionary measures such as respirators. Safety Watch Series. Suggested to supplement or as refresher training.
(©1997 Primedia Workplace Learning, Safety Watch) 10 min.

Asbestos : Controlling The Hazard V0071

An overview of the asbestos hazard for employees with minimal exposure to asbestos. Instruction for removal and/or disposal of asbestos materials. Includes protection measures, engineering controls and monitoring.
(©1985 Comprehensive Loss Management, Inc.) 30 min.

Asbestos Awareness V0362

Looks at the dangers of asbestos through the eyes of a woman whose father has contracted mesothelioma. Compares friable and nonfriable products; explains the proper precautions and methods of containment, maintenance, and/or removal of both types of products. Discusses symptoms and results of mesothelioma as well as environments in which asbestos is a potential threat. Also available on V0382. Safety Watch Series.
(©1994 Primedia Workplace Learning, Safety Watch) 9 min.

Asbestos Awareness : Are You At Risk? V0430

Defines asbestos. Covers five areas required by OSHA standards for asbestos awareness training: forms of asbestos; health effects; possible locations; recognizing damage and deterioration; and housekeeping requirements. CC
(©1994 Coastal Video Communications Corp.) 23 min.

Asbestos Awareness : Controlling Exposure V0431

Coverage under the new OSHA standards is based on exposure levels determined either by atmospheric monitoring of fiber levels or by the nature of any work operations that involve asbestos exposure. Covers: Basic concepts, protective measures, exposure

control programs, and emergency clean-up. CC
(©1994 Coastal Video Communications Corp.) 23 min.

Asbestos Awareness : Understanding the Risk V1034

Introductory asbestos awareness training for employees. Details the risks of exposure and procedures to minimize exposure. Covers: crysotile, amosite and crocidolite; adverse health effects; hazard communication; personal protection; and housekeeping requirements. CC
(©2003) 26 min.

Understanding The Asbestos Hazard V0437

Trains employees in asbestos awareness and abatement techniques. Includes demonstrations of actual asbestos removal from steam pipes using glove bags and isolated space removal. Intended for workers and supervisors in asbestos abatement.
(©1987 Summit Training Source, Inc.) 19 min.

AUTO REPAIR - SAFETY

Lifting It Right V0418

For auto service technicians operating automotive lift. Teaches proper procedure to lift a vehicle without causing injury or property damage. Describes operation of the most common in-ground and surface-mounted lifts.
(©1993 Automotive Lift Institute) 17 min.

Servicing Multi-Piece Rim Wheels V0172

The OSHA standard requires training for all tire servicing employees, utilization of industry-accepted procedures which minimize the potential for employee injury. Describes the use of proper equipment such as clip-on chunks, restraining devices, or barriers to retain the wheel components in the event of an incident during inflation of tires, and the use of compatible components. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1980 U.S. Department of Labor, Occupational Safety and Health Administration, Seattle Office) 10 min.

BACK SAFETY

see also Lifting

A Bit About Backs V0881

One video with three programs: Back Basics - 12 minutes, Risk Factors — 12 minutes, and Prevention Strategies — 15 minutes. Format varies between stand up humor, lecture style, and humorous scenarios about Bob and his back pain. A popular choice for back safety. CC (©1993 Comprehensive Loss Management, Inc.) 41 min.

Back At Home V0065

This video demonstrates that the back is never on vacation. Shows common off-the-job lifting tasks to illustrate incorrect and correct lifting techniques.

(©1987 Visucom Productions, Inc.) 20 min.

Back In Demand V0091

Four principles are combined with a sensible approach toward over-all fitness: Plan the move; Bend the knees; Keep the load close; and Avoid twisting. Demonstrates basic stretches and shows safe lifting techniques for back injury prevention. Narration style. Industrial work environment.

(©1989 CoreMedia Training Solutions) 16 min.

Back Injury Prevention V0365

Discusses what each person can do to reduce the risk of back injury, showing the importance of stretching, maintaining good posture, strengthening back and stomach muscles, and lifting properly. Demonstrates simple yet effective stretching and strengthening exercises. Also available on V0382. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Back Injury Prevention For Construction Workers V0061

A back injury prevention and safety awareness video produced especially for the construction industry. Clearly identifies lifting hazards on the job and explains techniques for safe lifting of construction materials and equipment.

(©1988 CoreMedia Training Solutions) 17 min.

Back Protection : Defending Your Safety Zone V0694

Compares the physical rigors on the job to the physical challenges of professional athletes. Describes: Safe lifting; Proper posture; Exercises; and preventing back injuries. Bonus add-on: a short description on the use of back belts. CC

(©1997 Coastal Video Communications Corp.) 22 min.

Back Safety V0508

Testimony from an injured worker lends credibility to safe lifting techniques demonstrated. Manufacturing work environment. Safety Watch Series. Suggested to supplement or as refresher training. Also on V0790. CC

(©1996 Primedia Workplace Learning, Safety Watch) 5 min.

Back Safety V0790

Testimony from an injured worker lends credibility to safe lifting techniques demonstrated. Manufacturing work environment. Suggested to supplement or as refresher training. Safety Watch Series. CC available on V0508.

(©1996 Primedia Workplace Learning, Safety Watch) 6 min.

Back Safety For Landscape, Maintenance & Custodial Workers V0765

An invaluable guide to the basic steps that landscape, maintenance, warehouse and custodial workers should follow in order to avoid back injuries. Covers: Body mechanics; Lifting; Pushing; Common injuries; and Back braces. Demonstrates stretching exercises.

(©1996 Coastal Video Communications Corp.) 19 min.

Backfire V0049

Covers correct lifting, carrying and general back health, while showing the consequences of a back injury. A classic video.

(©1983 Altschul Group Corporation) 15 min.

Dealing With Manual Handling V0321

Manual handling includes lifting, holding, pushing, pulling, shifting, and levering. Describes handling, problems and injuries, and safety steps for manual handling.

(©1989 Safetycare, Inc.) 11 min.

Good Back Bad Back : It's Your Choice V0675

Uses humor to cover four principles a person can use to protect the back in every day situations: Preserve the curves, Build a bridge; Keep it close; and Lock and lift. (©1997 Core Media Training Solutions) 20 min.

Hazard Alert : Back Safety V0271

Following safe lifting procedures effectively reduce the possibility of back pain. Explains how back injuries can occur with improper lifting techniques. Illustrates the proper methods to use when lifting.

(©1990 Primedia Workplace Learning, Industrial Training Systems Corporation) 5 min.

Safety On The Job : Preventing Back Injury V0234

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Dated, but classic. Spanish version V0235.

(©1987 AIMS Media) 24 min.

Safety Watch Series, Vol. 1, No. 1, April 1994 V0378

Contains these four segments on safety issues: WORKING IN CONFINED SPACES (V0343), RESPIRATORY PROTECTION (V0344), ELECTRICAL HAZARDS (V0345), and SAFE LIFTING (V0346). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 29 min.

Seguridad en el Trabajo : Prevención de Lastimaduras de Espalda

Safety On the Job : Preventing Back Injury V0235

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Mostly industrial setting, but brief segment in office environment. English version V0234

(©1987 AIMS Media) 24 min.

Straight Back Talk V0780

Interviews from victims of workplace back problems. Success stories about protection and prevention strategies are included. Straightforward proper lifting techniques. Office, industrial and luggage handling work environments. Follow up of V0675 "Good Back Bad Back."

(©1997 Coremedia Training Solutions)
10 min.

Take Five : Lifting V0873

In a TV interview format the basics of lifting are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end!
(©1999 Safe Expectations) 9 min.

Take Five : Lifting, Ergonomics & Stretching V0942

Three popular nine minute segments in a unique talk show setting with occupational therapist and injury prevention specialist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs.

(©2000 Comprehensive Loss Management, Inc.) 27 min.

Take Five : Sitting V0874

In a TV interview format the basics of sitting are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! Also available on V1021.

(©1999 Safe Expectations) 9 min.

Take Five : Sitting and Standing V1021

Two nine minute segments in a unique talk show setting with occupational therapist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs.

(©2000 Comprehensive Loss Management, Inc.) 16 min.

Take Five : Standing V0875

In a TV interview format the basics of standing are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! Also available on V1021.
(©1999 Safe Expectations) 9 min.

Working Back : A Guide For Municipal Workers V0140

A guide to back care, with specific focus on work situations faced by municipal workers. Two previously-injured workers share their experiences, while five individual segments address potential back injury hazards.

(©1990 Workers' Compensation Board of British Columbia) 24 min.

BICYCLE SAFETY**Bicycle Safety In Plants & Factories V0535**

Bicyclists training for rules, warning gear for bikes, maintenance, and defensive attitude while biking. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

BIOLOGICAL HAZARDS

see also Bloodborne Pathogens

Anthrax Awareness V0923

Gives an overview of threat of anthrax being used as bio-terrorism. Focuses on Anthrax distribution through the mail system.

Provides general measures to take in identifying or reacting to suspicious letters or packages.

(©2001 Coastal Video Communications Corp.) 13 min.

Biological and Chemical Threats - Closing the Door V0935

For safety management and supervisory personnel, an awareness video describes the potential of biological and chemical attacks. Host Phillip Michael Thomas describes symptoms, and preventative measures for Anthrax, Smallpox, Botulism, Plague, Tularemia and Viral Hemorrhagic Fever. Gives examples of security measures for biological contaminants, air quality, and intrusion by dangerous chemicals. Stresses the importance of developing policies and evacuation plans and procedures.

(©2001 Coastal Video Communications Corp.) 17 min.

Biological Threats in Healthcare - Identify and Respond V0940

For health care professionals. Covers 6 major biological agents (Anthrax, Plague, Botulism, Smallpox, Tularemia, Viral Hemorrhagic Fever); clinical management of infected patients; gives infection prevention measures for healthcare providers, and tips for handling mass exposure emergencies. Emphasizes biological disaster preparedness.

(©2002 Coastal Video Communications Corp.) 17 min.

Protecting Your Health... For Those Who Process, Sort, & Deliver the Mail V0932

Basic information about anthrax, strategies for protecting workers from anthrax exposures, and methods for detecting and responding to a suspicious letter or package. Training for persons who work in a variety of settings, from small mailrooms to large processing and distribution centers. Gives an overview of PPE, engineering controls, and response to suspicious package protocols that employers may consider for mail processing work areas.

(©2001 Center for Disease Control and Prevention) 16 min.

Trabajadores Expuestos : Evitar Enfermedades Contagiosas en el Lugar de Trabajo**Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0263**

Focuses exclusively on non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contact with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. English version V0262 *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0262

For non-medical settings where school workers, building maintenance and janitorial personnel, and hotel house-keepers may come into contract with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. Spanish version V0263. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

Working Safely With Radiation : Fundamentals Of Ionizing Radiation Protection V0595

Basic orientation for laboratory and other technical personnel who will be working with or around radiation sources on the job. Covers the biological effects of radiation, monitoring and dosimetry, techniques for limiting personal exposure, special considerations for pregnant workers, and regulations.

(©1995 Business Training Systems Inc.) 19 min.

BLOODBORNE PATHOGENS

As It Should Be Done : Workplace Precautions Against Bloodborne Pathogens V0143

Overview of the BBP Standard. Does not contain information on Hepatitis C and requirements for use of safer sharps devices. Statistics on HBV, HIV and occupational infection need updating. Targeted primarily to health care workers and related professionals. You can view this program online at: <http://www.osha.gov/SLTC/multimedia.html> *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1992 National Technical Information Service) 24 min.

Bloodborne Pathogens : Case Histories V0492

Concentrates on actual real-life scenarios. Appropriate for orientation for general industry environment. Does not include requirements for use of safer sharps devices and other engineering controls. Covers: Universal Precautions; Work practice control and PPE; Engineering controls; Housekeeping; and HBV vaccine. CC (©1995 Coastal Video Communications Corp.) 21 min.

Bloodborne Pathogens : Know the Risk! V0637

Designed for general industry not healthcare. Explains bloodborne diseases, transmission, appropriate methods to recognize exposure hazards, suggested methods and practices to prevent or reduce exposure and their limitations, and explanation of the types PPE, and the proper use, removal, decontamination and disposal of PPE. CC (©1997 Coastal Video Communications Corp.) 20 min.

Bloodborne Pathogens : Know The Risk! (Updated) V0726

Updated version of V0637. For industrial, manufacturing and custodial work environments. Covers: risk of exposure; HIV, HBV and HCV, transmission of bloodborne diseases; minimizing risk and proper waste disposal. CC (©2002 Coastal Video Communications Corp.) 19 min.

VIDEO TIP:

Remove the UPS shipping sticker on the back of the shipping box before shipping videos back to us. We want your videos to come back to us and not back to you!

Bloodborne Pathogens : Post Exposure Follow Up Part 3 of 3 V0466

In part 3 the X-Files-like drama, the carrier of bloodborne pathogens continues. (see BLOODBORNE PATHOGENS : WHAT ARE THEY? (V0417) and BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426). Throughout the story, this segment shows the processes such as evaluation and immunization which need to take place after a person has been exposed to bloodborne pathogens.

(©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Bloodborne Pathogens : Post Exposure Follow Up Part 3 of 3 V0899

In part 3 the X-Files-like drama, the carrier of bloodborne pathogens continues. (see BLOODBORNE PATHOGENS : WHAT ARE THEY? (V0417) and BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426). Throughout the story, this segment shows the processes such as evaluation and immunization which need to take place after a person has been exposed to bloodborne pathogens. CC

(©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Bloodborne Pathogens : Preparation, Safety and Training (For Medical Transportation Drivers) V1052

Produced by Oregon OSHA with the Ride Connection specifically for community transportation drivers. Covers exposure hazards to bloodborne pathogens, HIV, HBV and HCV; prevention, clean up procedures. Note: Program highlights Oregon OSHA rules which are different than requirements in Washington state. (©2003) 16 min.

Bloodborne Pathogens : Protect Yourself V0304

For all employees. Covers basic bloodborne precautions; HBV, HIV and AIDS, first aid precautions, decontamination procedures; and housekeeping. CC version on V1003; Spanish version on V1004.

(©1992 Coastal Video Communications Corp.) 15 min.

Bloodborne Pathogens : Protect Yourself V1003

(Revised) For all employees. Covers basic bloodborne precautions; HBV, HIV, AIDS and HCV, first aid precautions, decontamination procedures; and housekeeping. Does NOT cover pre-exposure HBV vaccination or the BBP standard. Updated 2002 version of V0304 to include HCV. CC
(©2002 Coastal Video Communications Corp.) 15 min.

Bloodborne Pathogens : Protecting Yourself Part 2 of 3 V0426

In the fashion of the X-Files, this segment continues the story of the mysterious carrier of bloodborne pathogens, begun in BLOODBORNE PATHOGENS: WHAT ARE THEY? (V0417). Stressing the importance of personal protective equipment and safe work practices, this drama shows how to reduce risk of exposure to bloodborne pathogens. Continued by BLOODBORNE PATHOGENS : POST EXPOSURE FOLLOW UP (V0466) or (V0898 CC) This program also available on V0424.
(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Bloodborne Pathogens : Questions and Answers V0833

Covers the OSHA standard and addresses issues and concerns of employees involving potentially infected blood by implementing good housekeeping, safe work practices and warning signs and labels. Key Points : universal precautions; wear latex gloves; barrier device for CPR; wear goggles or face mask; stop the bleeding; and prevent exposure to blood.
(©1999 American Training Resources, Inc.- ERI) 10 min.

Bloodborne Pathogens : Think Before You Act V0930

Overview of hazards and BBP standard requirements for general industry. Includes information on Hepatitis C, latex allergy, and the use of "safer" medical devices. Provides background information for discussion of specific workplace procedures and policies. Includes an instructor guide, handbook, and sample exposure control plan.
(©2002 Primedia Workplace Learning) 20 min.

Bloodborne Pathogens : What Are They? Part 1 of 3 V0417

In the fashion of the X-Files, first in a three part series describing Hepatitis B and C, HIV, and syphilis viruses and the methods of transmitting. Identifies the symptoms of each virus in its various stages of development and its effects on the infected individual. Continued by BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426) and BLOODBORNE PATHOGENS : POST EXPOSURE FOLLOW UP (V0466) or (V0899 CC)
(©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Bloodborne Pathogens : What Would You Do? V0154

Provides training pieces for compliance with OSHA standard 29 CFR 1910.1030. Reviews general information about Bloodborne Pathogens and procedures for the Emergency Response Team to avoid exposure to the viruses. Covers only HIV and HVB. For General Industry and First Aid Responders.
(©1992 CoreMedia Training Solutions) 21 min.

Bloodborne Pathogens : Workplace Precautions For Industry V0288

Demonstrates how universal precautions should be applied during emergency and first aid procedures, clean-up of an accident site, janitorial activities, and waste disposal. Includes training for most requirements of OSHA's Occupational Exposure to Bloodborne Pathogens Standard 29CFR1910.1030.
(©1992 Primedia Workplace Learning, Industrial Training Systems Corporation) 19 min.

Bloodborne Pathogens For First Responders V0185

Explains exposure to bloodborne pathogens; Hepatitis B (HBV) and the Human Immune-deficiency Virus (HIV). Covers: OSHA Standard on BBP and content of employer's exposure control plan; transmission of Bloodborne Pathogens; precautionary measures to reduce exposure, and use of PPE. Lacks information on requirement for use of safer sharps devices. For emergency medical and service personnel.
(©1992 AIMS Media) 19 min.

Bloodborne Pathogens For Law Enforcement V0766

Reviews the essential elements of exposure control: HBV; HIV; and AIDS; Infectious materials; Work controls; Housekeeping; and Personal Protective Equipment.
(©1998 Coastal Video Communications Corp.) 21 min.

Bloodborne Pathogens In The Workplace : Reducing The Risk V0553

Overview of Bloodborne pathogens exposure risks in general industry. Employers will want to refer to state and local regulations. Lacks requirements for use of safer sharps devices and other environmental controls. Covers Hepatitis B and HIV.
(©1992 Safetecare, Inc.) 12 min.

Bloodborne Pathogens, Part 1 of 2 V0546

For general industry employees to learn the risk of exposure and prevent becoming infected by bloodborne pathogens. Describes symptoms of bloodborne pathogens, and awareness of tasks that may involve exposure to blood. (Part 2 - V0597) Safety Watch Series. CC
(©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Bloodborne Pathogens, Part 2 of 2 V0597

Orientation, review and overview focus for first aid response workers. Covers : universal precautions; Infection Control Kits. Does not cover HCV or post exposure treatment interventions. Safety Watch Series. (Part 1 V0546)
(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Controlling Your Risks : HIV in the Research Laboratory V0976

General overview of HIV exposure hazards in the laboratory. Promotes the culture of safety in the lab. Includes guidelines on the appropriate use of PPE, cleaning and disinfection, engineering and workplace controls. Program is a supplement to formal instruction.
(©1994 Howard Hughes Medical Institute) 28 min.

Emergency Responders : Bloodborne Pathogens V0312

Training for police officers, fire professionals, industrial first aid or CPR trained persons, emergency medical technicians, correctional officers or other emergency responders. Covers: Bloodborne Pathogens; An Exposure Control Plan; Engineering Controls; and Personal Hygiene. (©1994 Long Island Productions) 18 min.

For Your Protection V0481

A comprehensive training program on the OSHA regulations on bloodborne pathogens. Covers the OSHA regulations to protect health care workers who are at risk of exposure to bloodborne pathogens. Does not include HCV or treatment for post exposure HIV treatment. (©1992 American Medical Association) 21 min.

Hepatitis C : Diagnosis, Clinical Management, Prevention V0691

Dan Rutz moderates this live satellite video conference from the CDC Atlanta. Covers: Epidemiology and screening; Clinical Evaluation and Management; Specialist's workshop; Prevention and Counseling. Describes: history; risk factors; serological and laboratory tests; treatment options; and effective methods to counsel patients. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1997 Center for Disease Control and Prevention) 150 min.

Los Patógenos De La Sangre : ¡Protégase usted Mismo! Bloodborne Pathogens : Protect Yourself V1004

For all employees. Covers basic bloodborne precautions; HBV, HIV, AIDS and HCV, first aid precautions, decontamination procedures; and housekeeping. Does NOT cover pre-exposure HBV vaccination or the BBP standard. English version is V1003. (©2000 Coastal Video Communications Corp) 15 min.

Mammalian Cell Culture Hazards V0984

For research laboratory workers. Focus is on bloodborne pathogens hazards, increasing the efficiency of procedures and reducing the possibility of contamination. (©1997 Howard Hughes Medical Institute) 8 min.

Ounce of Prevention: Protecting Yourself from Bloodborne Pathogens V0161

Orientation for First Aid and Emergency Responders. Presents overview of the risks of exposure to BBPs in general industry. Includes description of: HIV & Hepatitis B; OSHA's requirements for BBP Standards in work practice and engineering controls, PPE, housekeeping, signs/labels, Hepatitis B vaccination and post exposure managements. (©1992 Comprehensive Loss Management, Inc.) 15 min.

Patógenos transmitidos Por La Sangre: Preparación, Seguridad y Entrenamiento Bloodborne Pathogens : Preparation, Safety and Training for Public Transportation Drivers V1053

Produced by Oregon OSHA with the Ride Connection specifically for community transportation drivers. Covers exposure hazards to bloodborne pathogens, HIV, HBV and HCV; prevention, clean up procedures. Note : Program highlights Oregon OSHA rules which are different than requirements in Washington state. (©2003) 16 min.

Reducing The Risk V0796

Hepatitis B is a potential killer. Three health care workers speak candidly about Hepatitis B and describe this debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced. Vaccinations are available. (©1988 SmithKline Beckman Corp.) 13 min.

Rescue BBP : Nothing To Fear V0652

Covers: Exposure risks ; AIDS and Hepatitis B; Transmission of bloodborne diseases; Transmission of bloodborne pathogens in the workplace; Minimizing exposure; Precautions; Preventive work practices; Protective barriers; and CPR. (©1997 Coastal Video Communications Corp.) 22 min.

Safety Watch Series, Vol. 2, No. 2, May 1995 V0413

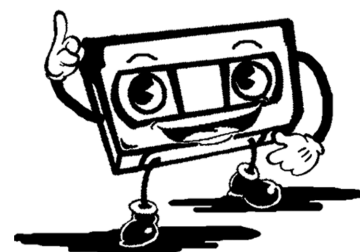

Contains these four segments on safety issues: OFF THE JOB SAFETY (V0414), CONFINED SPACE : USING CHEMICALS (V0415), HOUSEKEEPING FOR SAFETY (V0416), and BLOODBORNE PATHOGENS : WHAT ARE THEY? (V0417). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 41 min.

Safety Watch Series, Vol. 2, No. 4, July 1995 V0424

Contains these three segments on safety issues: HAZCOM : REDUCING EXPOSURE (V0425), BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426), and UNDER THE INFLUENCE : ALCOHOL IN THE WORKPLACE (V0427). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 26 min.

VIDEO TIP:

You will receive your videos 2 working days before your show date. Call us immediately if they haven't arrived.

CARBON MONOXIDE

Dangers Of Carbon Monoxide V0337

Teaches employees the nature of carbon monoxide (CO), and safety hazards. Identifies the symptoms and levels of carbon monoxide poisoning; explains the special hazards, and safe practices. Covers exposure control methods, and first aid procedures.
(©1990 ERI Safety Videos) 14 min.

CHAINSAW SAFETY

Chainsaw Leg Protection V0969

A brief, but graphic demonstration of the devastating effects of the chainsaw on various materials; jeans; old chaps; state of the art chaps. L&I Production; may be duplicated.
(©2002 Department of Labor and Industries, State of Washington) 4 min.

Chainsaw Maintenance And Safety V0217

Includes components of the chainsaw; selection and sharpening; and maintenance functions of sharpening, depth gauge, guide bar, chain assembly and tension. Personal and operational safety training is also covered.
(©1993 Safetycare, Inc.) 16 min.

Chainsaw Safety V0176

A two part video on the safe use of chainsaws in sawmills. Discusses tips to safe chainsaw use in: saw selection, inspection, operations and hazards and PPE. Part 2 covers: hazardous environments in sawmills; log decks, edgers, conveyors and sorters.
(©1993 Workers' Compensation Board of British Columbia) 20 min.

Chainsaw Safety in the Sawmill V0968

Part 1: (12 min.) Covers inspection and maintenance of the chainsaw. Stresses wearing proper protective equipment when handling a chainsaw in the mill environment. Part 2: (8 min.) Chainsaw Maintenance. Details maintenance including cleaning, and inspection of chainsaw parts and proper body mechanics.
(© Forest Industry Safety & Training Alliance, Inc.) 20 min.

Every Twelve Seconds V0084

Takes a candid look at how accidents changed the lives of five permanently disabled workers associated with the FOREST INDUSTRY. Shows that accidents can be prevented and the workers needs to take responsibility for their actions.
(©1987 Workers' Compensation Board of British Columbia) 29 min.

Landscape Power Tools V0905

Concentrates on three tools; chainsaws, string trimmers, and gas powered blowers. For each type of tool the training format includes the elements of safety check and inspection before use, importance of PPE for feet, hands, head, eye, and ear protection. Gives safety precautions and techniques to prevent injury to the operator and others in the area.
(©1992 Coastal Video Communications Corp.) 23 min.

CHEMICAL SAFETY

Anhydrous Ammonia V0449

This dramatic training program goes straight to the scene of actual emergencies, to teach vital life-saving lessons. Training includes where anhydrous ammonia is found, describes its properties, caustic effects, and emergency procedures.
(©1994 Media Resources Inc.) 27 min.

Anhydrous Ammonia V0491

Covers basic facts, personal protective equipment, emergency response and effects of ammonia on the body. Emphasizes the dangers of exposure and how to prevent release.
(©1995 Coastal Video Communications Corp.) 19 min.

Assessing Risks of Toxic Chemicals V0983

Introduction to hazardous chemicals in laboratory and requirements of WAC 296-62 Part Y. Geared to the research rather than clinical laboratory.
(©1997 Howard Hughes Medical Institute) 11 min.

Benzene, Toulene and Xylene V0552

Explains how aromatic hydrocarbons react with other substances and discusses the short and long term effects on exposure. Tells where aromatic hydrocarbons may be found, discusses principal properties, and

outlines basic safety techniques for emergency action in the event of an uncontrolled release or fire. Includes actual footage of a tank truck accident involving toluene and xylene.
(©1996 Media Resources Inc.) 28 min.

Chemical Emergency Preparedness & Procedures V0613

Describes chemical spill emergencies and procedures including reporting the incident, location of spill control equipment and first aid, MSDS, and cleanup. Safety Watch Series. Suggested to supplementor as refresher training.
(©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Chemical Handling : Flammables V0606

Developed to familiarize employees with the types of flammables in their workplace. Helps to recognize flammable hazards that can occur and ways to eliminate them and to identify warning labels associated with flammable materials. Covers: Flammables and combustibles; Labeling/MSDSs; Ignition; Storage; Handling; and Emergency response.
(©1996 Coastal Video Communications Corp.) 14 min.

Chemical Handling : General Principles V0611

An in-depth training program on safe work practices for handling hazardous chemicals. Covers: Safety procedures; Flammables, corrosives, and solvents. This video can be used to help satisfy training requirements of the Hazard Communication Standard.
(©1996 Coastal Video Communications Corp.) 16 min.

Chemical Handling : Solvents V0607

Developed to teach employees about solvents. Describes the hazards of solvents on the body; danger of explosion, Safe storage, Treating emergencies; Labeling and MSDSs; and PPE and Ventilation.
(©1996 Coastal Video Communications Corp.) 12 min.

Chemical Handling Safety : Basic Principles (Updated General Principles) V1036

A comprehensive overview of the Chemical Handling Series with general information about reading labels and material safety data sheets; classification of flammables, toxics, corrosives and reactives; compressed gas storage and handling; chemical storage and handling; chemical hazard identification; and DOT labels. Describes the types of exposure risks associated with chemicals. Emphasizes the importance of PPE and proper emergency response. Updated version of V0611 (©2003) 17 min.

Chemical Handling Safety : Flammables (Updated) V1038

Describes flammables and their safe handling and storage. Gives overview of DOT labels, NFPA labels and material safety data sheets. Also covers fire basics, recognition of ignition sources and emergency response. Completely revised V0606. CC (©2003) 17 min.

Chemical Handling Safety : Solvents V1039

(Updated) Identifies and classifies various solvents. Explains the hazards of solvents; how to handle and transport solvents safely. Describes the importance of preventing exposure to solvents with PPE and engineering controls. Reviews emergency response. Complete revision of V0607. CC (©2003) 17 min.

Chemical Handling Safety: Corrosives V1037

(Updated) Describes corrosive materials; how to identify and classify by label. Includes corrosive solids, liquids, and gasses; emergency procedures; storage and safe handling. Explains hazards to skin and eyes, and appropriate PPE. **DISCLAIMER:** Not appropriate for agricultural training, because tractors are shown without rollover protection, a code violation. CC (©2003) 17 min.

Chemical Hazard Communication : Your Right To Know V0040

Discusses Chemical Hazard Communication Programs, MSDS, and labeling. Divided into three parts, this video covers; Part 1: Right-to-Know. (8 min.) Part 2: Material Safety Data Sheets. (12 min.) Part 3: Hazardous Materials Identification System. (18 min.) Old production, poor technical quality. (©1986 Department of Social and Health Services and the Department of Corrections) 38 min.

Chemical Hazards V0981

Demonstrates the safety principles that apply to working with hazardous chemicals in the biological laboratory. Covers the protocols phenol-chloroform extraction and ethanol precipitation. (©1994 Howard Hughes Medical Institute) 10 min.

Chemical Hygiene Plan : Laboratory Standard Training (3 Parts) V0136

THE CHEMICAL HYGIENE STANDARD : WHAT IT MEANS TO YOU [Pt. 1] gives employees working in the laboratory a plain language overview of the OSHA Standard. (11 min.) CHEMICAL HYGIENE IN THE LABORATORY : KEEPING YOU SAFE AND HEALTHY [Pt.2] for employees working in labs and handling chemicals. (22 min.) . CHEMICAL HYGIENE PLANS : PUTTING IT ALL TOGETHER [Pt 3] for managers and supervisors who must develop and administer the Chemical Hygiene Plan required by the Standard. Offers a template to simplify the process of setting up the Plan. (17 min.) (©1990 Tracom) 50 min.

Chemical Safety V0247

Excellent refresher course for those that have had "chemical right-to-know" training. Demonstrates the use of Material Safety Data Sheets and other forms of recordkeeping. (©1990 Industrial Training, Inc.) 21 min.

Chemical Safety : Hazard Communication V0081

Refresher course for those that have had "chemical right-to-know" training. Demonstrates the use of Material Safety Data Sheets and other forms of recordkeeping. (©1988 Industrial Training, Inc.) 21 min.

Chemical Storage Hazards V0978

Reviews the basic principles of safe chemical storage in research laboratories. (©1995 Howard Hughes Medical Institute) 11 min.

Chlorine V0554

Covers the hazards of chlorine and response tactics for discharges and fires. Shows that chlorine is a powerful irritant which reacts with body moisture to form hydrochloric acid — a corrosive which can harm eyes, damage lungs, and be fatal. Shows the priorities for emergency responders when fire threatens chlorine containers. (©1989 Media Resources Inc.) 25 min.

Chlorine : Treat With Respect V0727

Outlines the health hazards associated with chlorine and tells how to prevent exposure. Covers proper response to chlorine emergencies, storage and handling, transportation, spills, leaks, fires, and explosion hazards. (©1996 Coastal Video Communications Corp.) 26 min.

Common Toxicology Terms Of An MSDS V0601

The study of how different materials affect the human body is known as toxicology. Describes terms such as toxicity, LD 50, LC 50, exposure limits, and physiological effects. Emphasizes the importance of Material Safety Data Sheets. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Dealing With Chemical Safety V0156

Chemicals: The physical form, the dose, the risks, the hazards and methods of entry into the body are some of the subjects addressed in this video. Defines allergens, corrosives, carcinogens, mutagens, and teratogens. Addresses control measures to minimize the hazards ranging from elimination and substitution through to the role of personal protective equipment are detailed. Narration with Australian accent. (©1989 Safetecare, Inc.) 15 min.

Elements Of Safety : The OSHA Formaldehyde Standard V0283

Provides the training required by the new standard, including: safe work practices, personal protective equipment, spill/clean-up procedures, medical surveillance programs and more.
(©1993 Long Island Productions) 10 min.

Flammable Liquids Safety V0257

Through a presentation which educates and motivates this video covers all pertinent information for employees who work with flammable liquids. Defines LEL, UEL, and flash points.
(©1993 Long Island Productions) 9 min.

HAZCOM : Corrosives V0420

Focuses on hazards specific to corrosive chemicals. Discusses importance of using personal protective equipment and storing corrosive chemicals in containers specifically designed for them. Safety Watch Series.
(©1995 Primedia Workplace Learning, Safety Watch) 8 min.

HAZWOPER : Your Role As A First Responder V0603

Awareness training for two levels of response to a hazardous substance emergency. The first is to recognize the incident, and the second is containment and clean up of the hazardous substances. Defines the steps a first responder should take. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1997 Primedia Workplace Learning, Safety Watch) 15 min.

Historias des Casos sobre la Comunicación del Peligro HAZCOM

Case Histories : Learn From Their Mistakes V0799

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." English version V0336.
(©1994 Coastal Video Communications Corp.) 19 min.

Household Hazardous Waste V0059

Demonstrates how common chemicals found around the home can create accidental poisoning of our environment. Shows the proper disposal methods for a variety of substances.
(©1988 Department of Ecology, Solid and Hazardous Waste Program) 15 min.

Housekeeping : It Ain't Like The Movies V0574

Reviews the importance of good housekeeping and what to look for in your facility. CC
(©1995 Coastal Video Communications Corp.) 15 min.

Hydrogen Sulfide V0575

Provides an in-depth examination of safe handling techniques as well as action to take in the event of a leak or fire. Combines footage of actual incidents with realistic training scenarios.
(©1996 Media Resources Inc.) 28 min.

Hydrogen Sulfide : A Matter Of Life Or Death V0649

Whether working in a manufacturing plant, laboratory, mine or for a public utility, employees' health depends on understanding the potential hazards of hydrogen sulfide. Teaches safe work practices necessary to avoid injury; defines hydrogen sulfide, lists effects of hydrogen sulfide, aid monitoring requirements, personal protective equipment, and emergency response/first aid procedures.
(©1993 Coastal Video Communications Corp.) 20 min.

Key to Laboratory Safety : Handling Hazardous Chemicals V0113

Discusses the health and physical hazards present in the laboratory and detection methods. Safe work practices, personal protective equipment, and emergency response procedures are explained.
(©1991 Industrial Training, Inc.) 23 min.

Ounce Of Prevention (Module 1) V0752

Designed for Veterinary practice owners to develop safety and health hazard communication programs. Covers: Responsibilities of the practice owner/operator; and Consequences of non-compliance. Includes hazardous materials present in veterinary practices, potential risks such as exposure to pesticides, hazardous gases, photochemicals, disinfectants, cleaners, radiation, needles, scapulas, heavy lifting, and animal bites.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Gives health and safety information for veterinary employees and encourages their involvement in an ongoing health and safety program. Covers: Hazards and hazardous materials; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Process Safety Management : Process Safety Information V0191

Provides practical information about the types of information needed and where to get it. Includes aspects of toxicity, MSDS, thermal and chemical stability.
(©1993 Video Training Source) 17 min.

Propane, Butane And Propylene (Version 2) V0450

Identifies dangerous properties of LPG, safe storage and handling, and safe response to emergencies involving leaks and fires. Tells where propane, butane and propylene may be found, covers basic techniques for safe storage and handling, and suggests procedures for emergency action in the event of uncontrolled releases or fires.
(©1997 Media Resources Inc.) 29 min.

Properties of DOT Class 8 : Corrosives V1035

Defines corrosives and describes the specific traits associated with DOT Class 8. Intended audience: emergency responders. (©1998) 13 min.

RCRA Large Quantity Generators : A Commitment To The Future V0584

Defines large quantity generator. Covers hazardous waste activity notification, waste accumulation and storage requirements, transportation procedures, setting up a waste minimization program, and emergency plans/recordkeeping. (©1994 Coastal Video Communications Corp.) 24 min.

Safe Handling Of Gases V0203

Compressed gas cylinders supply a wide variety of gases for a multitude of different industrial, medical, and domestic purposes. Covers: types of gases, hazards; safe handling and storage of gases; transportation of cylinders; leak testing; emergency procedures; and Material Safety Data Sheets. (©1992 Safetycare, Inc.) 19 min.

Small Spill Clean Up V0617

Using the "Mission Impossible" format, Mr. Phipps's along with his "Spill Clean-Up Force" existing of John Kragen, Mac Hunter, Blaire Williamson, and Steven Hart's mission: to inform employees of substance identification and hazard evaluation, communication with the appropriate personnel, ensuring personal protection as well as control procedures, containment, and cleanup. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 18 min.

Sodium Hydroxide & Potassium Hydroxide V0589

Covers the hazards of handling caustics; emergency procedures; toxicity, and reactivity of caustics. (©1995 Media Resources Inc.) 25 min.

Sulfuric Acid And Hydrochloric Acid V0591

Teaches fundamental lessons about identifying corrosives, the hazards of these acids, occupancies where these acids are found, reactivity problems, the danger of water, neutralization operations, emergency medical treatment, decontamination, and environmental concerns. (©1987 Media Resources Inc.) 26 min.

Take Home Toxics V0404

Teaches awareness of the potential hazards of materials at work, practicing good hygiene habits, and using the necessary personal protective equipment can keep your family and associates safe from exposure to toxic substances. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Warning Labels And Signs : Get The Message V0656

Identifies and defines various signs and tags. Describes HAZCOM, NFPA, HMIS, HAZMAT, SMARTRTK labeling systems. (©1996 Coastal Video Communications Corp.) 17 min.

What's Wrong With This Picture? V0012

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. For Closed Caption version see: V0783. (©1989 Aurora Pictures) 17 min.

What's Wrong With This Picture? V0783

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emer-

gency evacuation and warning signs. CC (©1989 Aurora Pictures) 17 min.

CLIMATIC CONDITIONS

Survival! V0592

Reviews hypothermia and heat stress, hiking and backpacking, and four-wheeling. (©1980 Coastal Video Communications Corp.) 28 min.

Washington Disasters: Are You Ready ? V0788

How to prepare before the emergency. Covers: Earthquakes; Fires; Wind storms; Winter storms; Hazardous materials spills; Volcanic eruptions; and Flooding. CC (©1994 Department of Community, Trade & Economic Development) 80 min.

When Lightning Strikes V0331

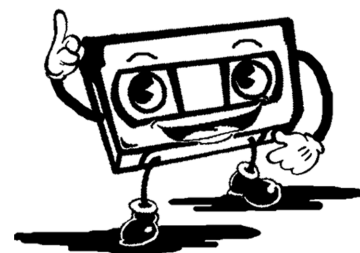

Presents specific actions and precautions employees can take to avoid hazardous lightning and electrical storm conditions including lightning warning signals, conditions for lightning, safe and unsafe locations; and emergency treatment for victims. (©1992 ERI Safety Videos) 14 min.

Without Power : How to Understand and Cope with Electric Outages V0859

Describes the electrical distribution system to businesses and homes. Gives suggestions for disaster preparedness measures in case of a power shutdown. (©1997 Washington Water Power) 19 min.

VIDEO TIP:

Last minute requests may be impossible to fill. Plan ahead! Our most popular videos are often reserved many months out.

COLD STRESS

Cold Stress V0406

Offers many tips for avoiding cold stress, recognizing symptoms of cold stress, and recovering from cold stress. Also suggests clothing choices for protection against cold, wet, or windy conditions. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Hypothermia V0326

Explains how to recognize and treat hypothermia. Shows the major symptoms, step-by-step instructions for treating the victim, and the "help" and "body-to-body warming" methods. May be duplicated.

(©1983 National Technical Information Service) 15 min.

Hypothermia : Outdoor Enemy #1 V0011

Two case study dramatizations reveal the causes, symptoms and dangers of hypothermia. Covers preventative measures and treatment of a hypothermia. For anyone who engages in outdoor activities. Sensible outdoor tips for all seasons are offered.

(©1984 Beacon Films) 24 min.

Surviving The Cold V0066

A winter safety film including: recognizing and treating hypothermia; preparing the home for winter emergencies; winter travel; and blizzard survival.

(©1984 Pyramid Film & Video) 16 min.

Winter Safety V0391

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Covers: Signs of hypothermia and frostbite; Treatment; and Off-the-job winter safety.

(©1993 Coastal Video Communications Corp.) 14 min.

COMPRESSED AIR

see also Gas Cylinders

Abrasive Blasting V1030

Covers the topics associated with sandblasting and other abrasive blasting including PPE, equipment setup and inspection, safe operating procedures, jobsite conditions, and bystander safety. Note: The paper dust mask shown in this video is not approved for protection against any workplace contaminants.

(©2003 R M Distributors - Safety Source) 12 min.

Proper Use Of Compressed Air V0510

Gives safety tips for using both breathable and work-related compressed air. Shows proper transporting, storing, and use of compressed air tanks. Offbeat opening when substitute teacher, Mr. Tylor, decides to show his film on compressed air safety, instead of the literature lesson. Silly.

Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 7 min.

Safe Handling Of Gases V0203

Compressed gas cylinders supply a wide variety of gases for a multitude of different industrial, medical, and domestic purposes. Covers: types of gases, hazards; safe handling and storage of gases; transportation of cylinders; leak testing; emergency procedures; and Material Safety Data Sheets.

(©1992 Safetycare, Inc.) 19 min.

CONFINED SPACE HAZARDS

see also Respirators

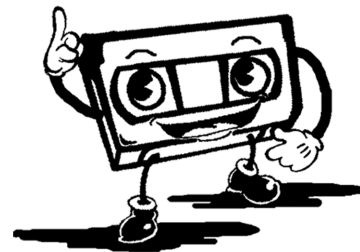

B. P. Oil Shipyard Safety V0729

Provides a broad overview of shipyard health and safety hazards so that shipyard personnel and ship crews can recognize and control them. Covers enclosed and confined space entry, fire prevention, health hazards and PPE, and emergency response procedures.

(© B.P. Oil Shipping Co., USA) 30 min.

VIDEO TIP:

Easy returns! The backside of your shipping box label has the Safety & Health Video Library address; just turn it over.

Commercial Grain Handling : Safeguards To Success V0308

Focuses on safety and health in commercial grain handling facilities. Intended audience is management, staff and employees of commercial grain handling operations.

(©1992 Department of Agricultural Communications, Oklahoma State University) 16 min.

Confined Space : Air Monitoring V0473

Describes how a confined space becomes oxygen deficient and types of monitoring equipment recommended for permit-required confined space monitoring.

Explains differences between a local exhaust ventilation system and a general ventilation system. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Confined Space : Non-Entry Rescue V0640

Reviews the dangers of confined spaces, responsibilities of the attendant and how to get someone out without endangering yourself. Also covers the written permit, getting yourself out, and the retrieval system. CC

(©1993 Coastal Video Communications Corp.) 21 min.

Confined Space : Using Chemicals V0415

Explains the dangers of chemicals in confined spaces and the steps to take before entering any confined space. Describes monitoring entry procedures, ventilation, and types of respirators (SCBA, air purifying, supplied air, and powered air purifying), and other personal protection. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Confined Space Atmospheric Testing V0638

Reviews how and when to test, and also what to do when air is unsafe. There are three main tests that will identify the atmospheric hazards of a confined space: Oxygen content; Flammability; and Toxicity. Covers procedures for proper pre-testing. CC (©1993 Coastal Video Communications Corp.) 17 min.

Confined Space Case Histories V0495

Motivate employees to follow proper procedures by showing them an actual accident — what went wrong and how that tragedy could have been avoided. Scenarios re-enacted provide powerful training for both new and veteran employees. Covers: Atmospheric testing; Adequate ventilation; and Controlling contaminants. (©1995 Coastal Video Communications Corp.) 14 min.

Confined Space Entry : (Final Rule) V0190

Describes confined spaces and their hazards. With an explanation of the requirements of the OSHA Permit required Confined Spaces Standard. Followed by a step-by-step description of a typical permit space job. The program is intended for laborers, maintenance technicians, and others who must enter confined spaces to perform inspection, maintenance, or other work. (©1993 Primedia Workplace Learning, NUS Training Corporation) 18 min.

Confined Space Entry : Inside Maneuvers V0639

For employees who work in confined spaces like tanks; vaults; vessels, silos; pits; hoppers, pipe lines, or storage bins. Identifies characteristics in space hazard and covers atmospheric testing and other hazard controls, confined space permit, PPE, communication, rescue equipment, team responsibilities and contractors. Filmed on the submarine USS Atlanta. (©1997 Coastal Video Communications Corp.) 25 min.

Confined Space Hotwork : Checklist To Safety V0698

Describes the hazards of confined space hotwork and the proper precautions. Covers: The hotwork permit; atmosphere testing; preparation of confined space; safety equipment; fire watch; and emergency rescue. (©1993 Coastal Video Communications Corp.) 20 min.

Confined Space Rescue V0188

A two-part program that covers procedures and techniques for the proper rescue of persons within a confined space. Part 1: Covers rescue equipment, PPE, rescue techniques, and hazards associated with confined spaces. Part 2: Technical rescue techniques, mechanical and engineering controls, and rescue systems. CC version V0728. (©1993 Coastal Video Communications Corp.) 34 min.

Confined Space Rescue V0728

A two-part program that covers procedures and techniques for the proper rescue of persons within a confined space. Part 1: Covers rescue equipment, PPE, rescue techniques, and hazards associated with confined spaces. Part 2: Technical rescue techniques, mechanical and engineering controls, and rescue systems. CC (©1993 Coastal Video Communications Corp.) 31 min.

Confined Space Safety V0189

Training intended for workers, contractors, supervisors and work monitors. Highlights are: Work monitoring a work-site inspection; Environmental containment testing and ventilation; Pre-entry atmospheric testing; Avoiding toxic gas and fire hazards; Emergency rescue; and Monitoring for heat stress. (©1993 Video Training Source) 21 min.

Confined Space Safety V0837

Defines confined space and hazardous atmospheres. Describes confined space entry permit. Examples of confined spaces include tanks, vessels, vats, ducts, storage bins, containers, tunnels, wells, pipes, sewers, mills, crushers, boilers, and trenches. CC (©1999 Safetycare, Inc.) 13 min.

Confined Space Safety Part 1 : Confined Space Entry V0192

(Revised Version) Types of confined spaces and the importance of control measures are discussed in detail. Protective equipment and rescue techniques are demonstrated. (©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min.

Confined Space Safety Part 2 : Testing Confined Spaces V0193

(Revised Version) Addresses a variety of methods for testing confined spaces. Gas detector tubes and electronic gas detectors are fully explained and demonstrated. The dangers of flammable gases and the proper ways to detect them are discussed. (©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min.

Confined Space Safety Part 3 : Working Inside Confined Spaces V0194

(Revised Version) Concentrates on safe work practices when working in confined spaces. Demonstrates ways avoidance of common hazards such as falls, noise, and temperature extremes. Purging, ventilation and PPE are covered. (©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 22 min.

Confined Space Ventilation V0641

Special safety precautions required for confined space ventilation is reviewed in this video program. Illustrates how and when to ventilate, safety precautions, atmospheric hazard ventilations trouble shooting, and ventilation techniques. CC (©1993 Coastal Video Communications Corp.) 15 min.

Confined Spaces : Your Training V0395

Permit-required confined spaces can contain many dangers. Before entry, everyone involved should sign the work permit. Workers must receive training before doing confined space work and demonstrateskill and understand of the hazards and duties of the job. Each confined space is different, so review written plans before entering. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Confined Spaces and the Entry Permit System V0954

Gives the definition of a confined space, the written confined space entry program, explains the difference between permit and non-permit required spaces, confined space hazards and the entry permit system. Also covered are the responsibilities of each of the confined space entry team members: the entry supervisor, the standby attendant and the entrants. Filmed in a variety of industrial environments with tanks, silos, pits, vessels and other confined spaces.

(©2002 ERI Safety Videos) 20 min.

Confined Spaces Deadly Spaces V0177

Explores some of the safety hazards of working in sewers, pipes, wet wells, manholes and other enclosed spaces and provides important safety guidelines for workplace preparation and testing. Presented in the style of a news documentary, this program illustrates health and safety hazards of confined spaces in underground operations.

(©1993 Workers' Compensation Board of British Columbia) 13 min.

Containers And Confined Spaces V0079

Recognizes hazards in various work situations. Demonstrates precautions and protective devices to safeguard the welder. Discusses the potential dangers encountered in welding on containers and in confined spaces.

(©1986 Beacon Films) 11 min.

Death Trap : Permit-Required Spaces V0311

Training for entrants, attendants, supervisors, and general personnel who may encounter permit-required confined spaces on the job. Begins with case study and covers proper procedures for identifying confined spaces, isolating and securing for entry and performing the actual entry procedure. Defines the roles of entry supervisor, attendant and entrant. Stresses the importance of following the written program. CC

(©1993 Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min.

Death Trap : Permit-Required Spaces V0787

Training for entrants, attendants, supervisors, and general personnel who may encounter permit-required confined spaces on the job. Begins with a case study and covers proper procedures for identifying confined spaces, isolating and securing for entry and performing the actual entry procedure. Defines the roles of entry supervisor, attendant and entrant. Stresses the importance of following the written program.

(©1993 Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min.

NFPA 86 Ovens And Furnaces (1990 edition) Explosion Vents V0216

Explosion and fires in fuel fired electric and other heat utilization equipment constitutes a loss potential in terms of life, property, and production. While the cause of most furnace failures can be traced back to human failure including inadequate training of operators, lack of proper maintenance or improper application of equipment, the oven design itself also plays a sufficient role in the safe operation of ovens that contain flammable liquids, vapors, or gases. Nowhere is this more important than the design and placement of explosive vents. These vents give the blast of an accidental explosion an escape route, thus minimizing the risk to employees and damage to plant equipment. Describes the National Fire Protection Association Standards for Oven and Furnace Explosion Vents.

(©1993 Publisher Unknown) 5 min.

OSHA Confined Space Regulation Enforcement (Two Parts) V0397

A cooperative effort between Kirkwood Community College in Iowa and OSHA to bring you a live interactive video conference on OSHA Confined Space Regulation Enforcement. Features Don Parker (708-297-4810 ext. 142) and Linda Surling (708-297-4810 ext. 174), two of OSHA's senior instructors. Provides an overview of the regulation and clarifies some issues that have arisen since the regulation was promulgated on January 14, 1993 and discuss it's eforcement. Introduction from Joseph A. Dear, Asst. Secretary of Labor, OSHA. (©1994 National Technical Information Service) 150 min.

Permit Required Confined Space Entry V0436

The dramatic opening for this program makes a lasting impression illustrating the hazards of working in a confined space and the importance of following proper procedures. Defines confined space, associated hazards, proper entry procedures and permits, monitoring and PPE, and emergency rescue procedures. (©1993 Summit Training Source, Inc.) 21 min.

Safety Watch Series, Vol. 1, No. 1, April 1994 V0378

Contains these four segments on safety issues: WORKING IN CONFINED SPACES (V0343), RESPIRATORY PROTECTION (V0344), ELECTRICAL HAZARDS (V0345), and SAFE LIFTING (V0346). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1994 Primedia Workplace Learning, Safety Watch) 29 min.

VIDEO TIP:

Preview your video before presenting to others! You will get your video 2 days before your show date.

Why Permits Are Important V0388

Two co-workers show the importance of the team effort in entering and working in confined spaces. Stresses the significance of the attendant's role and the need for concentration and reliability on the part of both the worker within the confined space and the attendant who "signs on" the job when signing the permit. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 9 min.

Working In Confined Spaces V0343

Describes the types of atmospheres which can threaten human life in a confined space and outlines steps to be followed before and during entry into a confined space. Defines the role of the attendant and stresses its importance. Safety Watch Series. Suggested to supplement or as refresher training. (Also available on V0378.) (©1994 Primedia Workplace Learning, Safety Watch) 9 min.

CONSTRUCTION EQUIPMENT

Back Injury Prevention For Construction Workers V0061

A back injury prevention and safety awareness video produced especially for the construction industry. Clearly identifies lifting hazards on the job and explains techniques for safe lifting of construction materials and equipment. (©1988 CoreMedia Training Solutions) 17 min.

Boomlifts in Construction V0904

Covers lifting principles, walk around inspection points, controls, and what should be covered in training of specific boomlifts. (©1996 Coastal Video Communications Corp.) 10 min.

Manbaskets in Construction V0903

Covers proper procedures for hoisting using a crane or derrick. Includes Pre-lift meeting, personnel platforms, crane operations, inspection and testing, and loading. CC (©1997 Coastal Video Communications Corp.) 12 min.

Powder Actuated Fastening Tools V0761

Demonstrates the use of explosive powered hand held fastening tools. Covers: Tool characteristics — direct acting standard velocity tools and indirect acting low velocity tools); Explosive charges; Personal Safety; PPE; Operational safety; Preparing a low velocity and standard velocity tools for use; Firing the tool; Fasteners and their selection; Fixing to concrete; and Fixing to steel. (©1992 Safetycare, Inc.) 14 min.

Residential Construction Series in English and Spanish (6 video set) V0816

Contains six Dept. of Labor and Industries "Residential Construction Series" programs: Residential Construction — Roofing Safety V0737; Residential Construction — Roofing Safety and Spanish Version: (La Seguridad En El Techado V0785); Residential Construction — Siding Safety V0811 and Spanish Version (La Seguridad En El Acabado De Tablas De Forro, Tambien Conocido Como "Siding" V0813). Framing Safety V0850; and Spanish version (Construcción Residencial: Seguridad en el Armazon V0851). For descriptions of each segment, refer to specific titles and title numbers as listed here. These L&I produced videos can be duplicated or send a blank video (VHS 160) and we will make a copy for you. CC (©1999 Department of Labor and Industries, State of Washington) 78 min.

Rigging and Lifting with Mobile Construction Equipment V0951

Includes proper load rigging techniques on the jobsite such as PPE and pre inspection. Shows correct rigging and handling when excavation and earthmoving equipment are used to sling and move loads. (©1997 R M Distributors - Vista) 28 min.

Scissor Lifts in Construction V0902

Training includes lifting principles, elements of the walk around inspection, and operation safety. CC (©1997 Coastal Video Communications Corp.) 9 min.

CONSTRUCTION WORK ENVIRONMENT

Best Strategy : Personal Protective Equipment V0906

Stresses the responsibility of safety for using PPE. Covers head protection, hearing conservation, eye protection, respiratory protection, hand protection, fall protection and life jackets at the construction site. (©1995 Comprehensive Loss Management, Inc.) 11 min.

Boomlifts in Construction V0904

Covers lifting principles, walk around inspection points, controls, and what should be covered in training of specific boomlifts. (©1996 Coastal Video Communications Corp.) 10 min.

Cave-In! Trenching & Shoring Safety V0434

Details proper trenching procedures and describes soil types. Seattle footage. Covers: evaluating an excavation site; effective worker protection systems; general safety practices; and emergency response. (©1994 Coastal Video Communications Corp.) 18 min.

Conciencia De La Silicatosis En Sitios De Construcción Silicosis Awareness on the Construction Site V1025

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. English version is V1012 *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Electric Circular Handsaws V0107

Provides on-the-job examples safe operations of various types of saws and their accessories. Basic instruction for novice and experienced users on the residential construction jobsite or in the shop. (©1986 International Film Bureau Inc.) 19 min.

Handling Structural Steel - Unloading, Sorting, Rigging V0953

For steel workers. Shows unloading, sorting and making the lifts. Covers various hitches, hooks and their load limits. Effectively demonstrates the dangers of shortcutting safety procedures.

(©1999 R M Distributors - Vista) 26 min.

Hearing Conservation for At Risk Workers V0895

Focuses on hearing protection in road construction. Extensive supplemental materials including tests and PowerPoint presentation on CD-ROM. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2001 Department of Consumer Business & Services, Oregon OSHA) 15 min.

How to Develop an Effective Safety Program V0900

(Revised)Emphasizes the importance of training for supervisors and employees. Includes components of a safety program, safety committees and suggested resources. Shows footage of warehouse, retail and construction workplaces. Revision of V0186.

(©1995 R M Distributors) 20 min.

Lifting Safely in Construction V0901

Construction work environment. Covers the mechanics of the spine, demonstrates turns and bends that can cause injury. Shows safe lifting techniques and explains the 10:1 lever ration.

(©1993 R M Distributors - Safety Source) 9 min.

Manbaskets in Construction V0903

Covers proper procedures for hoisting using a crane or derrick. Includes Pre-lift meeting, personnel platforms, crane operations, inspection and testing, and loading. CC

(©1997 Coastal Video Communications Corp.) 12 min.

Meaningful Hazard Communication : The Hazard Communication Standard : West Program Unit 18 V0090

Clearly explains the OSHA Hazard Communication Standard. Covers: MSDS; Labeling; and Right-to-know. Construction work environment.

(©1989 National Construction Association) 10 min.

On Your Guard : Power Tool Safety V0907

Discusses general safety precautions for working with power tools. Covers the circular saw, radial arm saw, table saw, portable drill, portable sanders, bench grinder, angle grinder, and reciprocating saw. Construction site environment.

(©1992 Comprehensive Loss Management, Inc.) 14 min.

Play It Smart, Play It Safe V0917

Promotes safe work practices for contractors and workers who handle fiberglass, rock and slag wool insulation products. Lively format uses two insulation installers, fresh off the basketball court. Endorsed by OSHA.

(©2000 North American Insulation Manufacturers Association) 16 min.

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use such as screwdrivers, pliers, wrenches, hammers, tools. Demonstrates the correct methods of use and PPE. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home.

(©1987 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Power Fastening Safety and You: A Partnership V0916

Testimonials to a safety attitude with air power tools in the residential construction work environment. Stresses the importance of using the correct trigger system for the job, keeping the finger off the trigger, wearing safety goggles, reading and heeding the instructions.

(©2001 International Staple, Nail and Tool Association) 15 min.

Powered Hand Tool Safety: Handle with Care V0839

Emphasizes the basic safety principles with direct application to powered hand tools on and off the job. Discusses: Hazards and safety measures; Proper use of PPE; and Tool pre-inspection. Specific tools include saws, drills, pneumatic tools, and powder-actuated tools. CC

(©2000 Coastal Video Communications Corp.) 22 min.

Residential Construction : Roofing Safety V0737

Focus on residential construction workplace safety. Covers job prep, walk-around safety inspection, ladder safety/safe access, fall protection, roofing hazards, and job completion housekeeping. Spanish version V0785. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Residential Construction : Siding Safety V0811

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. Spanish version V0813. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. CC

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Residential Construction: Framing Safety V0850

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov Spanish version V0851. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Labor and Industries, State of Washington) 13 min.

Safety On Trial V0485

Drama. Developed to assist project superintendents and project managers in the difficult tasks of establishing work rules to prevent violations of safety and health regulations and to communicate these rules to their employees. Assists the general contractor on multi-employer worksites to better understand their roles and responsibilities toward worker safety including the employees of subcontractors. Dramatically demonstrates how small incidents on a construction site can devastatingly alter one worker's life and that of his family. May be duplicated. (©1994 Department of Labor and Industries, State of Washington) 35 min.

Scissor Lifts in Construction V0902

Training includes lifting principles, elements of the walk around inspection, and operation safety. CC (©1997 Coastal Video Communications Corp.) 9 min.

Seguridad en las Grúas durante Impactos Altos High Impact : Crane Safety V0776

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. English version V0775. (©1998 ERI Safety Videos) 18 min.

Series de la Construcción Residencial - La Seguridad en el Acabado de Tablas de Forro, También Conocido Como "Siding" Residential Construction : Siding Safety V0813

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. English version V0811. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - La Seguridad en el Techado**Residential Construction : Roofing Safety V0785**

Intended to help provide employees and employers with the tools to make the residential workplace safe. Provides examples to meet to safety requirements. The construction employer is required to provide a safety program tailored to the operation and types of hazards involved; safety meetings; first aid training and kits; personal protective equipment necessary to do the job safely; code requirements; and how to work safely during the roofing phase of residential construction. Covers: Job prep; Walk-around safety inspection; Ladder safety/safe access; Anchorages; Roofing; and Job completion. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - Seguridad en el Armazón**Residential Construction : Framing Safety V0851**

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov English version V0850. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2000 Department of Labor and Industries, State of Washington) 13 min.

Silicosis Awareness on the Construction Site V1012

Training for prevention of silicosis among cement masons. Defines silicosis and risk factors. Describes hazardous working conditions, safety procedures, and PPE. Produced by Oregon and SW Washington Cement Masons Apprenticeship Program. May be duplicated. Spanish version V1025. (©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Stairways And Ladders : The First Step V0275

Outlines methods of personal fall protection and safe work practices for elevated surfaces. Describes types and safe use of portable, extension, and fixed ladders. Covers: OSHA 1910.23-25; Set-up and use; and Inspection and maintenance. Bonus 4 minute segment on job-made ladders on the construction site (1926.150, 60) (©1991 Coastal Video Communications Corp.) 18 min.

Stationary Scaffolds in Construction V0654

Provides training in proper scaffold use covering stationary scaffold assembly, the role of the competent person, recognizing hazards and proper materials handling. (©1997 Coastal Video Communications Corp.) 12 min.

Suspension Scaffolds In Construction V0655

Provides training in scaffold assembly, the role of the competent person, inspection, hoisting, electrical hazards, access, fall protection, and safe work practices. Each section looks at recognizing hazards and proper materials handling. (©1997 Coastal Video Communications Corp.) 11 min.

Trenching & Excavation Safety V0196

Live footage and computer graphics provide clear explanation of the hazards created by digging trenches and excavations. Shows how these hazards are reduced by sloping, shielding, and shoring. Emphasis on personal and work safety. (©1987 Zomar Productions, Ltd) 18 min.

Whose Job Is It Anyway? V0102

Produced in Canada, this video shows a supervisor on a construction site where good housekeeping habits are ignored and the consequences. Gives solutions for a safe workplace. (©1988 International Film Bureau Inc.) 12 min.

CONSTRUCTION

see also Fall Protection, Excavation

Abrasive Blasting V1030

Covers the topics associated with sandblasting and other abrasive blasting including PPE, equipment setup and inspection, safe operating procedures, jobsite conditions, and bystander safety. Note: The paper dust mask shown in this video is not approved for protection against any workplace contaminants. (©2003 R M Distributors - Safety Source) 12 min.

Arc Welding : Safety And Operations V0025

Describes the arc welder and emphasizes safety procedures including PPE. Names the five types of electrodes and tells how to put the electrodes into the holder. Correct and faulty welds are shown. (©1970 AIMS Media) 13 min.

Back Injury Prevention For Construction Workers V0061

A back injury prevention and safety awareness video produced especially for the construction industry. Clearly identifies lifting hazards on the job and explains techniques for safe lifting of construction materials and equipment. (©1988 CoreMedia Training Solutions) 17 min.

Backhoe Safety V0152

Focusing on tractor-loader backhoes (rubber tired with a front loading bucket), this program puts the emphasis on safe operation techniques such as: Pre-inspection/start-up hazards; Problems to look for and how to handle them; Safely loading and unloading trailers; Proper positioning of the backhoe; Digging techniques near underground and overhead utilities; and Safe work practices for crew personnel when working around a backhoe. (©1992 Zomar Productions, Ltd) 18 min.

Best Strategy : Personal Protective Equipment V0906

Stresses the responsibility of safety for using PPE. Covers head protection, hearing conservation, eye protection, respiratory protection, hand protection, fall protection and life jackets at the construction site. (©1995 Comprehensive Loss Management, Inc.) 11 min.

Building Your Business...In Washington State V0517

Information about setting up a new business in Washington State. To hire workers, contractors or subcontractors there are certain legal requirements to meet. Covers: Business Application; Maintaining records, quarterly reports, and workers' compensation premium payments; Written accident prevention program, Review of minimum wage, overtime and child labor laws, Assistance from your local L&I service center, and bonding and insurance, contractor registration form and meeting prevailing wage requirements for public works projects. (Open Captioned) (©1996 Department of Labor and Industries, State of Washington) 12 min.

Contractor Safety : Building A Partnership V0200

Provides a step-by-step process designed to open lines of communication between facility owner's employees and contractors and to develop a mutually supportive approach to safety. Based on OSHA's regulation for Process Safety Management of Highly Hazardous Chemicals, techniques can be applied successfully to a wide range of jobs where contractors are used. (©1992 CoreMedia Training Solutions) 23 min.

Fall Protection & Prevention V0764

(Revised version of V0561 Fall Protection) Provides the information employees need to make correct choices when working at elevations. Covers basic fall hazards, the potential injuries, identifies the conditions and activities likely to result in a fall, fall protection and fall arrest systems, and suitable anchorage points. Applications to residential construction environment. (©1998 R M Distributors) 11 min.

Grove Manlift Product Familiarization V0279

Discusses safety with Grove Manlift products and familiarizes the operator with various applications and machines manufactured by Grove. Based on safety in the workplace with Manlift products and brings to the forefront the many important aspects of using construction equipment properly. (©1994 Grove Worldwide Company) 22 min.

Head Protection V0454

Describes requirements for protective helmets and shows various work environments and the helmet styles required for each. Compares ANSI designations of Class A, Class B, and Class C helmets. Covers the selection and maintenance of helmets for optimum protection. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Hearing Protection : HCP & PPE V0352

Demonstrates the proper insertion and the use of numerous types of canal caps, ear plugs, and ear muffs. Hearing protection should not interfere with conversation although it can prevent damaging noise levels. Reviews hearing protection in light of OSHA's Hearing Conservation amendments, but does not cover audiometric testing. Pairs with V0347, also a Safety Watch program. (©1994 Primedia Workplace Learning, Safety Watch) 11 min.

VIDEO TIP:

Need a loan extension? Call 1-800-574-9881 to extend for up to a week.

High Impact : Fall Prevention V0669

The 10 accidents shown in this video graphically demonstrate shortcuts and other common safety mistakes leading to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. Warning! May be too graphic for some audiences. Spanish version V0777. (©1997 ERI Safety Videos) 19 min.

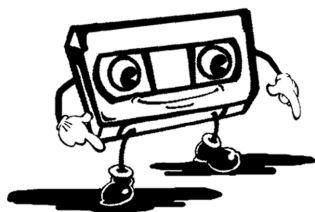

Keep The Lead Out V0214

Filmed in multiple industrial and construction locations. Training for workers on: potential hazards of lead, and how it enters the body. Describes the requirements for regulated areas, engineering controls, and personal protective equipment. For all employees exposed to lead on-the-job... manufacturing, chemical, petroleum, maintenance, utilities, and construction industries. (©1993 Summit Training Source, Inc.) 13 min.

Machine Guarding V0252

Emphasizes individual responsibility when working on or around machines and equipment. Demonstrates lockout/tag-out, machine guarding requirements and personal responsibility. (©1993 Long Island Productions) 13 min.

VIDEO TIP:

Videos are easy to return. Just turn over the shipping label for the L&I address label!

On Your Guard : Power Tool Safety V0907

Discusses general safety precautions for working with power tools. Covers the circular saw, radial arm saw, table saw, portable drill, portable sanders, bench grinder, angle grinder, and reciprocating saw. Construction site environment. (©1992 Comprehensive Loss Management, Inc.) 14 min.

OSHA Lead Standards For Construction And General Industry : An Employee Training Program V0260

Especially useful to building/construction companies, manufacturers, public-sector organizations, recyclers and hospital maintenance staffs. Explains lead overexposure; symptoms and effects on the body. Describes how to assess lead exposure. Shows how engineering, work practice and administration controls can be used to limit lead exposure; personal protective equipment; and the Medical Surveillance Program. (©1993 International Film Bureau Inc.) 24 min.

Play It Smart, Play It Safe V0917

Promotes safe work practices for contractors and workers who handle fiberglass, rock and slag wool insulation products. Lively format uses two insulation installers, fresh off the basketball court. Endorsed by OSHA. (©2000 North American Insulation Manufacturers Association) 16 min.

Powered Hand Tool Safety: Handle with Care V0839

Emphasizes the basic safety principles with direct application to powered hand tools on and off the job. Discusses: Hazards and safety measures; Proper use of PPE; and Tool pre-inspection. Specific tools include saws, drills, pneumatic tools, and powder-actuated tools. CC (©2000 Coastal Video Communications Corp.) 22 min.

Residential Construction : Roofing Safety V0737

Focus on residential construction workplace safety. Covers job prep, walk-around safety inspection, ladder safety/safe access, fall protection, roofing hazards, and job completion housekeeping. Spanish version V0785. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Labor and Industries, State of Washington) 13 min.

Residential Construction : Siding Safety V0811

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. Spanish version V0813. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. CC (©1999 Department of Labor and Industries, State of Washington) 13 min.

Residential Construction Series in English and Spanish (6 video set) V0816

Contains six Dept. of Labor and Industries "Residential Construction Series" programs: Residential Construction – Roofing Safety V0737; Residential Construction – Roofing Safety and Spanish Version: (La Seguridad En El Techado V0785); Residential Construction – Siding Safety V0811 and Spanish Version (La Seguridad En El Acabado De Tablas De Forro, Tambien Conocido Como "Siding" V0813). Framing Safety V0850; and Spanish version (Construcción Residencial: Seguridad en el Armazon V0851). For descriptions of each segment, refer to specific titles and title numbers as listed here. These L&I produced videos can be duplicated or send a blank video (VHS 160) and we will make a copy for you. CC (©1999 Department of Labor and Industries, State of Washington) 78 min.

Residential Construction: Framing Safety V0850

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov Spanish version V0851. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Labor and Industries, State of Washington) 13 min.

Rigging Safety : Selection & Care Of Rigging Equipment V0121

Introduces slings and hardware commonly used for overhead lifting in industrial situations. The program covers characteristics of the equipment and proper care and handling to protect the equipment from damage.

(©1989 Primedia Workplace Learning, Tel-A-Train, Inc.) 15 min.

Safety Guidelines For Tube & Clamp/System Scaffolds V0141

An instructional tool for learning the basic safety guidelines for using, erecting, and dismantling tube and clamp/system scaffolds.

(©1991 Scaffold Industry Association) 20 min.

Safety On The Job : Working On Aerial Lifts, Cranes, And Swing Stages V0166

Shows workers how to safely operate aerial lifts, cranes, and swing stages. Details the importance of pre-inspecting aerial equipment each work day, warming up engine and hydraulic systems before operation, maintaining safe clearance from electrical current, wearing hard hats and other safety gear. Shows safe entry and exit procedures of aerial equipment, and demonstrates proper ground-to-equipment hand signals.

(©1988 AIMS Media) 15 min.

Safety On The Job : Working With Electricity V0241

Details the hazards associated with using electricity on the job. Illustrates the importance of knowing standard procedures for common electrical problems. Common hazards explored in this program: insufficient wire insulation, faulty breakers, dirty casings, overloaded outlets, and work with power tools around water. Work environments include warehouses, manufacturing plants, and construction areas.

(©1989 AIMS Media) 16 min.

Series de la Construcción Residencial - La Seguridad en el Acabado de Tablas de Forro, También Conocido Como "Siding"

Residential Construction : Siding Safety V0813

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. English version V0811. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - La Seguridad en el Techado

Residential Construction : Roofing Safety V0785

Intended to help provide employees and employers with the tools to make the residential workplace safe. Provides examples to meet to safety requirements. The construction employer is required to provide a safety program tailored to the operation and types of hazards involved; safety meetings; first aid training and kits; personal protective equipment necessary to do the job safely; code requirements; and how to work safely during the roofing phase of residential construction. Covers: Job prep; Walk-around safety inspection; Ladder safety/safe access; Anchorages; Roofing; and Job completion. *Permission is granted to duplicate this tape in its entirety

only for non-commercial purposes. (©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - Seguridad en el Armazón

Residential Construction : Framing Safety V0851

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov English version V0850. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Labor and Industries, State of Washington) 13 min.

Trench Emergency V0433

Alerts workers to the importance of using proper protection during excavation work and emergency procedures for trench collapses. Illustrates the dangers posed by trenches, shoring, and shielding.

(©1993 Coastal Video Communications Corp.) 16 min.

Vibration Syndrome V0144

Discusses the hazards of hand held vibrating tools such as chainsaws and jackhammers. Covers: Etiology; Symptomatology; Assessment; and Treatment. Includes a brief introduction to the physics of vibration, and an examination of different assessment techniques. Produced for medical professionals. Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1981 National Technical Information Service) 27 min.

Welding Safety V0170

Shows how to recognize hazards that accompany various welding work situations. Discusses precautions and protective devices to safeguard the welder and others in the workplace.

(©1986 Beacon Films) 11 min.

Welding Safety V0219

Today welders use highly technical welding processes that can create dangerous conditions in the workplace. Shows: How to identify welding hazards; Evaluating hazards in the workplace; Workshop controls; Work practice controls; and Personal Protective Equipment.

(©1990 Safetycare, Inc.) 16 min.

Working With Lead Exposure In Construction And General Industry V0258

Meets the General Industrial Standard & Interim Final Rule for Construction.

Describes measurement concepts (PEL, TWA, Action Levels); exposure assessment; monitoring; methods of compliance; hygiene and housekeeping; and medical surveillance.

(©1993 Long Island Productions) 15 min.

CRANE SAFETY

see also Aerial Work Platforms

Aerial Lift Safety V0722

Complies with OSHA 29 CFR 1910.67 and ANSI A92.6. Covers safe work practices on platforms and pre-operation inspection.

Lifts shown include platform, manlifts, vertical booms, scissor lifts, baskets, etc. Filmed in chemical and manufacturing facilities, refineries and municipalities. Follow up training to this or refresher training on V1044.

(©1998 Summit Training Source, Inc.) 13 min.

Crane And Sling Safety : The Inspection And Safe Use Of Cranes And Slings V0201

A training program on the inspection and safe use of overhead and jib boom cranes and slings with two objectives: to teach crane operators the daily inspection of the equipment, and demonstrate safelifting procedures. Primary audience: operators, also mechanics and engineers.

(©1992 CoreMedia Training Solutions) 19 min.

Crane Operation Safety V0598

Covers the two primary types of cranes, overhead cranes and booms. Rigging practices and equipment, communication signals, environmental conditions and maintenance practices. Includes operator qualification, crane operation, pre-lift check, rigging and general guidelines for sling maintenance. Safety Watch Series. (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Crane Safety V0914

Training in three parts. Part 1: Description of crane types, safety precautions and procedures. Part 2: Procedures to perform before proceeding with and during a lift. Part 3: Necessary shutdown procedures. (©2001 Shipbuilders Council of America) 38 min.

Crane Safety : Inspections V0245

Differentiates between a pre-use and periodic inspection. Explains how both types of inspections are made and documented. Training intended for new and experienced employees. Objectives of this program: Demonstrate and explain how to conduct and document a pre-use inspection of a crane; and Differentiate between a pre-use inspection and a periodic inspection. (©1993 Primedia Workplace Learning, NUS Training Corporation) 14 min.

Drums, Blocks, Sheaves & Wire Rope Terminations V0929

Emphasizes the importance of understanding rigging and wire rope manufacturers' specific operational criteria and incorporating it into a methodic inspection and maintenance program. Features live footage and instruction on wire rope installation, hook block selection and reeving, wire rope terminations (clips, wedges), fleet angles, calculating parts of line. Hardware inspection criteria is provided for several types of cranes and hoists.

(©2001 Moxie Media) 29 min.

Grove Manlift Product Familiarization V0279

Discusses safety with Grove Manlift products and familiarizes the operator with various applications and machines manufactured by Grove. Based on safety in the workplace with Manlift products and brings to the forefront the many important aspects of using construction equipment properly. (©1994 Grove Worldwide Company) 22 min.

High Impact : Crane Safety V0775

Features re-enactments of accidents involving indoor cranes. Includes: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. Spanish version V0776. (©1998 ERI Safety Videos) 18 min.

Inspection, Care And Storage Of Slings V0463

Looks at a range of lifting equipment and what fundamental principles should be followed to prevent accidents. Discusses safe operation including pre-use checks; care of equipment; planned periodic inspections; and correct storage of equipment. Covers: Chain slings; Wire rope slings; Fiber slings; and Web slings. (©1994 Safetycare, Inc.) 16 min.

Let's Talk About Safety V0708

A safety video designed for hard-boiled longshoremen. Half of all longshoremen are numb to safety messages yet work in one of the most dangerous environments on earth. This video was shown to them and they loved it. The unique approach to safety training woke the sleepers and actually got them talking about safety.

(©1998 CSI Multimedia, Gonzer Video Division) 18 min.

Manbaskets in Construction V0903

Covers proper procedures for hoisting using a crane or derrick. Includes Pre-lift meeting, personnel platforms, crane operations, inspection and testing, and loading. CC

(©1997 Coastal Video Communications Corp.) 12 min.

Overhead Cranes : Safe Operation V0289

Designed for operators, focuses on the basic procedures for the safe operation of overhead cranes. Operators are provided with the information needed to conduct daily walkarounds and operational checks prior to using the crane. Special considerations are addressed, such as working in less than ideal situations and communication with a signal person. Industrial work environment. (©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 18 min.

Proper Use Of Suspended Personnel Platforms V0047

Describes the OSHA requirement for the proper use of suspended personnel platforms or manbaskets. Shows condition of the Crane, platform design and specifications, trial lift inspection and proof testing, and traveling the Crane. (©1991 Lifting Technology, Inc.) 20 min.

Putting Slings to Work: Hitch, Capacity & Hardware Selection V0928

Training for the Rigger in how to apply slings and rigging hardware to the load. Gives complete explanation of the terms: vertical load, working load limit, proof load, proof test, ultimate strength and design factor. Describes rigging hardware (shackles, hooks, wire rope slings, nylon slings, chain) and hitch types (Single leg, Vertical, Bridle, Basket, Choker and Double Wraps). Identifies PPE and safe rigging practices. (©2001 Moxie Media) 32 min.

Real Key To Crane Safety V0261

Reviews safety procedures for various mobile cranes, the importance of operator training on specific cranes; preparation and pre-inspections, and performing safe lifts. Intended for use as a training supplement or review of safe crane operation practices. (©1993 Grove Worldwide Company) 22 min.

Rigging Safety : Selection & Care Of Rigging Equipment V0121

Introduces slings and hardware commonly used for overhead lifting in industrial situations. The program covers characteristics of the equipment and proper care and handling to protect the equipment from damage. (©1989 Primedia Workplace Learning, Tel-A-Train, Inc.) 15 min.

Safe Operation Of Overhead Cranes V0585

Crane accidents can occur and if they do happen they can be tragic and attributed to operator error and the failure to adhere to safe work procedures. Most accidents stem from: Lack of adequate inspections and checks; Overloading the crane beyond recommended capacities; and Lack of knowledge of critical information by the operator. Covers the five major steps that must be used to insure safe use of overhead cranes: pre-operational check; operational checks; planning the lift; operational rules; and shutdown procedures. (©1995 Safetycare, Inc.) 17 min.

Safety On The Job : Working On Aerial Lifts, Cranes, And Swing Stages V0166

Shows workers how to safely operate aerial lifts, cranes, and swing stages. Details the importance of pre-inspecting aerial equipment each work day, warming up engine and hydraulic systems before operation, maintaining safe clearance from electrical current, wearing hard hats and other safety gear. Shows safe entry and exit procedures of aerial equipment, and demonstrates proper ground-to-equipment hand signals. (©1988 AIMS Media) 15 min.

Seguridad en las Grúas durante Impactos Altos High Impact : Crane Safety V0776

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. English version V0775. (©1998 ERI Safety Videos) 18 min.

Setup For Safety V0927

Demonstrates safety operations including setting the crane up on firm, level ground, using hardwood mats or blocking when necessary under outriggers. Discusses hazards, using barricades to prevent entry into lift area, and inspecting setup and operation. Illustrates how the crane imposes force on the ground. Also includes site preparation, blocking under outriggers, use of mats for soft surfaces and how to level crane. Animation used to illustrate significant safety information. (©1993 Crane Institute of America) 18 min.

CRIME PREVENTION

HazMat Transportation - Security Depends on You V0939

Combines safe driving procedures with the added responsibility of transporting hazardous materials. Covers: personal preparations including heightened sense of awareness and observation of environment and personnel, pre-trip inspection, security while on the road, and procedures at the delivery site. Emphasizes safety and security procedures with a post 9/11 attitude. V0244 (Safety Training for Handling & Transporting Hazardous Materials) and V0608 (Hazardous Materials Transportation) give more emphasis on HazMat training and transportation. (©2002 Coastal Video Communications Corp.) 20 min.

Homicide In The Workplace V0256

Statistics are outdated, but clearly explains the dangers homicide in the workplace. Good for safety committees, supervisors, and employees. (©1993 Long Island Productions) 17 min.

Is It Worth Your Life? V0148

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-832-200 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated. (©1992 Department of Labor and Industries, State of Washington) 18 min.

Is It Worth Your Life? V0531

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-24CC0203 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated. CC

(©1992 Department of Labor and Industries, State of Washington) 18 min.

Targeting Workplace Violence : A Video For Front-line Workers V0630

Ann Schatz, a KOIN-TV news anchor reports her part in a workplace violence story. A lone gunman entered the Coin Tower where her station was located and held a number of hostages on the ground floor. Challenges viewers to identify factors leading up to a violent incident and ways to avoid or defuse it. Appropriate for retail and public workers, especially those who deal with high stress situations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1997 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Violence : Reducing Your Risk V0278

How to avoid potentially violent situations and form a plan of action for escape or defense if violence occurs. Experts in personal safety and law enforcement demonstrate simple yet and effective methods everyone can use to reduce their risk and defuse threatening situations.

(©1994 Video Training Inc.) 28 min.

Violence In The Workplace V0439

To prevent violence recognize the problem, define the cause and recognize early signs. Gives instructions on dealing with violence in the workplace and personal security.

(©1995 American Training Resources, Inc.) 10 min.

Violence In The Workplace : A Strategy For Prevention V0446

How to spot and defuse potentially explosive situations.

(©1995 Visionquest Films) 14 min.

Violence In The Workplace, Part One V0523

Curlos Arauz, Personnel Director, City of Phoenix, covers the major "Steps for Prevention" of workplace violence, they are: strategies, training; and programs to address the issues of violence in the workplace. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 16 min.

Violence In The Workplace, Part One V0789

Curlos Arauz, Personnel Director, City of Phoenix, covers the major "Steps for Prevention" of workplace violence, they are: strategies, training; and programs to address the issues of violence in the workplace. Safety Watch Series. Suggested to supplement or as refresher training.

Available in CC on V0523
(©1996 Primedia Workplace Learning, Safety Watch) 16 min.

Violence In The Workplace, Part Two V0540

Curlos Arauz, Personnel Director for the City of Phoenix, continues covering "Steps for Prevention" of workplace violence. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Workplace Violence V0411

Statistics (in 1995) reveals robbery is the most common form of workplace violence. Identifies high-risk occupations (retail, hotel, hospital, taxi drivers) and gives tips for recognizing potentially violent behavior in situations involving external customers. Also describes warning signals of potential internal violence in situations involving company personnel. Safety Watch Series.

(©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Workplace Violence : First Line Of Defense V0277

Interviews a convicted perpetrator and dramatization to show the impact of violence. Increases awareness of the warning signs, examines the legal issues in dealing with these individuals, and outlines steps to manage these situations. Shows how to protect employees through a managed organizational response.

(©1994 Video Training Inc.) 30 min.

Workplace Violence : Recognizing And Defusing Aggressive Behavior V0633

Familiarizes supervisors and managers with the warning signs of dysfunctional behavior that can lead to violence. Teaches intervention techniques for supervisors to approach troubled employees. Suggests techniques and tactics for defusing immediate threats of violence.

(©1994 R M Distributors – Aims) 26 min.

Workplace Violence : The Calm Before The Storm V0335

Increases awareness of the warning signs which may lead to workplace violence. Author/expert Joseph A. Kinney interviews a victim of workplace violence. Covers: characteristics of a potentially violent employee; establishing a violence prevention program; stress management, conflict resolution; hiring and firing; and response. Does not give intervention techniques. CC

(©1994 Coastal Video Communications Corp.) 25 min.

DISASTER PREPAREDNESS**Disaster Readiness V0995**

Careful planning and training are the keys to preparing for the unexpected whether it be fire, earthquake, chemical release, or workplace violence. Covers: reporting an emergency, variables to consider for proper preparation, elements of an emergency response plan, and best procedures for various emergency situations. Includes scenarios depicting real life emergencies and drills.

(©2002 Summit Training Source, Inc.) 13 min.

Emergency Evacuation : Getting Out Alive V0879

Addresses emergency building evacuation procedures for fire, earthquake, hazardous chemical spills, explosion disasters and the importance of developing an emergency plan. CC

(©2000 Coastal Video Communications Corp.) 16 min.

Emergency Preparedness V0359

Stresses the importance of a comprehensive disaster planning phase to improve the response phase and reduce stress at the time of disaster. Discusses the need to have plans in place and roles defined for all types of business and geographical area. Outlines the major considerations in creating a disaster plan as well as the essential actions to take during a disaster. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Facility Security — The Critical Link V0936

Designed to create an awareness of threats and danger in the workplace. Includes how to eliminate the opportunity of cyber crime, bomb and biological threats, industrial espionage, and arson. Intended for general audiences.

(©2001 Coastal Video Communications Corp.) 18 min.

Fire Safety Review (Humorous) V0374

Max Monday, the safety cop, is on the worksite to coach fire safety. Shows how to minimize disaster by fire with: safety attitude; monitoring of emergency exits and equipment; a plan, and frequent evacuation drills. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

High Impact: Emergency Action Plan V0958

Dramatic examples of five emergencies: a fire, workplace violence, a tornado, chemical release, and possible exposure to bloodborne pathogens. Reviews the major guidelines for each emergency. Industrial work environments.

(©2001 ERI Safety Videos) 20 min.

VIDEO TIP:

Observe the copyright laws. Videos may not be copied!

Protecting Your Health... For Those Who Process, Sort, & Deliver the Mail V0932

Basic information about anthrax, strategies for protecting workers from anthrax exposures, and methods for detecting and responding to a suspicious letter or package. Training for persons who work in a variety of settings, from small mailrooms to large processing and distribution centers. Gives an overview of PPE, engineering controls, and response to suspicious package protocols that employers may consider for mail processing work areas.

(©2001 Center for Disease Control and Prevention) 16 min.

Special Report - Disaster Preparedness V0937

In the aftermath of the attack on the World Trade Center on 9/11/02, this dramatic and special report by the Safety and Environmental Affairs Journal was produced. Focus is on disaster prevention in the workplace. Covers: emergency action plans, fire drills, fire safety procedures, and package bombs. (©2001 Coastal Video Communications Corp.) 20 min.

Washington Disasters: Are You Ready? V0788

How to prepare before the emergency. Covers: Earthquakes; Fires; Wind storms; Winter storms; Hazardous materials spills; Volcanic eruptions; and Flooding. CC (©1994 Department of Community, Trade & Economic Development) 80 min.

Weathering The Storm : Disaster Planning V0435

Generic guidelines for various disasters : Floods – Hurricanes – Tornadoes – Earthquakes. Covers: planning, and preparation for human needs; security; update and revise the disaster plan regularly.

(©1994 Coastal Video Communications Corp.) 13 min.

When Lightning Strikes V0331

Presents specific actions and precautions employees can take to avoid hazardous lightning and electrical storm conditions including lightning warning signals, conditions for lightning, safe and unsafe locations; and emergency treatment for victims.

(©1992 ERI Safety Videos) 14 min.

Without Power : How to Understand and Cope with Electric Outages V0859

Describes the electrical distribution system to businesses and homes. Gives suggestions for disaster preparedness measures in case of a power shutdown.

(©1997 Washington Water Power) 19 min.

DOG BITES

Dog Bite Prevention V0893

Illustrates techniques for recognizing dangerous dogs and how to avoid confrontation.

(©1998 Long Island Productions) 5 min.

Watch That Dog! V0743

Explains basic protection and provides insight into the mannerisms of various types of dogs. Tells how to protect yourself from possible attack and injury. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1995 Department of Consumer Business & Services, Oregon OSHA) 15 min.

DRIVING SAFETY

see also Road Rage

A Sudden Change of Plans V1055

Intended for teen driver education with emphasis on driving safety through road construction work zones.

(©1998) 7 min.

ATV Rider's Guide To Safety V0031

Designed to introduce the correct and safe use of all-terrain vehicles (ATVs) to both the novice and the experienced rider. Offers tips on operating on all-terrain vehicles. (800-447-4700)

(©1986 Specialty Vehicle Institute of America) 19 min.

ATV Safety For Agricultural Operations V0490

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common safety rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards. Spanish version V0376. (©1993 Visual Education Productions) 14 min.

Bicycle Safety In Plants & Factories V0535

Bicyclists training for rules, warning gear for bikes, maintenance, and defensive attitude while biking. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Blindfold Effect V0696

Interactive video features three unforgettable crashes at intersections. At pause points, viewers identify the factors that contributed to each crash. Gives practical techniques to prevent these types of collisions. (©1997 Aurora Pictures) 20 min.

Combination Vehicles And Endorsements V0556

Practical for new and seasoned drivers with Class A endorsements. Covers: Double and triple trailers; Passenger vehicles and buses; and Tank vehicles. (©1990 Coastal Video Communications Corp.) 28 min.

Controlling The Vehicle V0211

Explores what the driver can and can not control, and explains how the "Natural Laws" of Friction, Energy of Motion, and Force of Impact affect driving. Teaches drivers how to stop safely in inclement weather and other situations. From the "It's No Accident" series. Others from this series: V0178 (Staying out of Harm's Way) V0212 (See and Be Seen), and V0213 (You're In Control). (©1992 Visucom Productions, Inc.) 13 min.

Defensive Driving : A Crash Course V0642

Describes the attributes of a defensive driver: know the route; pre-trip and routine vehicle inspections; eliminate unnecessary distractions; and avoid alcohol or drugs. Reviews practical driving procedures in the city, highway, and rural areas. (©1996 Coastal Video Communications Corp.) 16 min.

Defensive Driving : Prepared for the Worst V0643

Covers conditions which create hazardous driving situations — snow, ice, rain and fog; preventive maintenance; precautionary measures; breakdown basics; accidents; road construction zones; and personal security. CC (©1996 Coastal Video Communications Corp.) 18 min.

Defensive Driving Tactics (3rd edition) V0180

Two professional drivers demonstrate the difference between defensive driving and aggressive driving as they participate in a safe driving test on city streets and highways. (©1989 AIMS Media) 16 min.

Department Of Transportation HM 126F General Awareness Training : Handling And Transporting Hazardous Materials Safely V0158

For employees who handle or transport hazardous materials. Includes: DOT's new regulations on handling and transporting hazardous materials; identification of hazardous materials; Regulations; Awareness of protection measures for working with hazardous materials; Accident prevention and emergency procedures. (©1992 AIMS Media) 27 min.

Distracted Driving V0944

Distracted Driving discusses five major types of distractions: cell phones and other gadgets, children, aggressive drivers, drowsiness, and traveling away from home. In each segment, dramatic reenactments illustrate the dangers, as well as the use of safe driving techniques. Good judgment, alertness, and patience are stressed as the basics of safe driving. Provides realistic solutions to common problems. (©2002 R M Distributors — Aims) 16 min.

Driven Driver V0300

Uses testimonials to motivate and educate employees to change attitudes and behavior while driving. Complies with OSHA's proposed Occupant Protection in Motor Vehicles Standard. Covers: driving skills; peripheral vision; vehicle familiarity; seat belts; loading the vehicle; parking and backing up; and effects of Alcohol and Drugs. (©1994 Summit Training Source, Inc.) 13 min.

Drivers Alert : Over-the-Counter & Prescription Medications and Impaired Driving V0890

Addresses the growing problem of driving under the influence of legal medications. (©1995 Washington Traffic Safety Commission) 13 min.

Driving in the Rain V0991

Emphasizes keeping vehicles well maintained. Describes hydroplaning and safe procedures in rainy weather or on flooded roads. Reviews basic driving skills; keeping safe distance and speed, skid control, and using ABS or manual braking. (©2003 R M Distributors - Safety Shorts) 6 min.

Driving Safety V0538

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver. Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Driving Safety V0663

Covers: Inspection of vehicles and adjustment of equipment; Use of seatbelts; Mental preparation and concentration; Use of a "Safety Cushion;" Driving tips: passing, night driving, adverse weather, skidding and hydroplaning; and Accident procedures. (©1995 Long Island Productions) 16 min.

Driving Safety V0791

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver. Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Drowsy Driving : Shattered Lives V0858

Fatigue is a major cause of fatal collisions in Washington State. Along with testimonials from victims of drivers asleep at the wheel, this video explores issues related to drowsiness and driving, including sleep disorders. (©1998 Washington Traffic Safety Commission) 13 min.

DUI : Choices And Consequences V0340

This dramatization on the consequences of drunk driving features Jack Hamilton, a young college student who decides to unwind from the pressures of school, work and family life by having "a few beers." (©1993 AIMS Media) 33 min.

HazMat Transportation - Security Depends on You V0939

Combines safe driving procedures with the added responsibility of transporting hazardous materials. Covers: personal preparations including heightened sense of awareness and observation of environment and personnel, pre-trip inspection, security while on the road, and procedures at the delivery site. Emphasizes safety and security procedures with a post 9/11 attitude. V0244 (Safety Training for Handling & Transporting Hazardous Materials) and V0608 (Hazardous Materials Transportation) give more emphasis on HazMat training and transportation. (©2002 Coastal Video Communications Corp.) 20 min.

Highway Construction And Maintenance Safety V0511

Gives guidelines for safe traffic control and safe work practices for flaggers and all other workers close to roadways. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Icy Road Ahead V1022

Extensive winter driving demonstrations show how to control and correct a skid on ice, and the importance of tire grip and traction, vehicle behavior, driving techniques, and emergency techniques. The program supplements Driver Education and Driver Training courses, covering rules, safety and techniques. (©1995 R M Distributors – Aims) 23 min.

License To Drive V0577

Reviews crucial information covered in the CDL test that will make drivers safer and smarter. Covers: Commercial classes and endorsements; Safety inspections; Air brakes; Driving skills; and Handling cargo. Also covers: Testing drivers on skills to operate commercial vehicles safely; Getting problem drivers off the road; and Keeping commercial drivers from getting more than one license. (©1990 Coastal Video Communications Corp.) 25 min.

Night Driving Tactics (2nd edition) V0022

Dramatizes just how the physics of light, mass, and motion combine with the physiology of vision and reaction time to make fast night-time driving life-threatening behavior. Emergency procedures for fog and breakdowns, and ways to fight drowsiness are described. Dated, but content is still good. (©1984 AIMS Media) 13 min.

Night Driving Tactics, (3rd Edition) V1032

Updated version of Night Driving Tactics (V0022). Focuses on the increased risks associated with nighttime driving, dawn and dusk. Describes pre-travel inspection checklist and essential items for an emergency kit. Explains the importance of slower speeds, proper use of headlights, and good vehicle maintenance. Discusses the dangers of driving too fast for weather conditions, driving while drowsy, and being

distracted while driving. (©2001 R M Distributors – Aims) 17 min.

Reversing The Trend : Driver Compliance V0268

Teaches employees safe driving techniques, driving in hazardous conditions, skid control techniques, safe distances, the adverse effects of alcohol and seatbelt safety. (©1992 Summit Training Source, Inc.) 19 min.

Road Rage V0817

Identifies the term road rage and potential hazards. Gives steps for reducing the risk and what actions to take if confronted by an aggressive driver. (©1999 Summit Training Source, Inc.) 16 min.

Road Rage : Combating Aggressive Driving in Washington State V0856

Law enforcement officers across Washington state are using innovative approaches to combat increasing acts of road rage and aggressive driving. Viewers learn the consequences of road rage, plus driving strategies to employ when encountering aggressive driving. View online at www.wtsc.wa.gov/videos.html (©2000 Washington Traffic Safety Commission) 11 min.

Safe Driving V0350

One key to safe driving is being prepared for emergencies by inspecting your vehicle and following simple maintenance routines. Also, using all the senses to constantly monitor safe driving conditions. Safety Watch Series. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Safe Driving Habits : A State of Mind V1051

Produced for Washington State workers who drive on the job or to the job. See three powerful stories behind tragic driving accidents that emphasize the need to minimize distractions and remain fully focused on driving and the conditions of the road. Outlines trip plans to make driving safer. Applicable to business and personal travel. May be duplicated. View online at www.ofm.wa.gov/rmd/loss/videos.htm CC (©2004) 16 min.

Safe Driving In Hazardous Conditions V0270

Defines techniques for driving in rain, fog, snow and ice.

(©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min.

Safe Winter Driving V0339

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Topics include basic emergency equipment, rain, snow and icy conditions, what to do when stopped and stranded.

(©1993 Coastal Video Communications Corp.) 17 min.

Safer State at .08 : Washington's New Drunk Driving Laws V0857

The legal blood alcohol limit has been reduced to .08 for drivers in Washington. Other Washington Laws include tougher penalties for repeat DUI offenders, fines, and the possibility of doing jail time or being subjected to home monitoring.

(©1999 Washington Traffic Safety Commission) 10 min.

Safety On The Job : Van And Truck Driving V0239

The program teaches drivers the fundamentals of pro-driving procedures habits that anyone who drives for a living should adopt. Stresses safety attitude. Spanish Version V0240.

(©1986 AIMS Media) 23 min.

Safety Watch Series, Vol. 1, No. 2, May 1994 V0379

Contains these four segments on safety issues: INTRODUCTION TO HEARING PROTECTION (V0347), FALL ARREST SYSTEMS (V0348), HAZCOM : REVIEW (V0349), and SAFE DRIVING (V0350). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1994 Primedia Workplace Learning, Safety Watch) 30 min.

Seatbelt Safety V0829

Dramatic footage of auto accidents motivates workers to wear seat belts. This video covers federal regulations for seat belt safety and disproves arguments against wearing seat belts. CC

(©1998 Summit Training Source, Inc - Valley Videos) 5 min.

See and Be Seen V0212

Demonstrates techniques for identifying hazards, how to get and maintain SPACE, and ways to communicate the driver's presence and intent. Improves observation skills for defensive driving and suggestions for eliminating physical distractions before getting on the road. From the "It's No Accident" series. Others from this series: V0211 (Controlling the Vehicle) V0178 (Staying out of Harm's Way), and V0213 (You're In Control).

(©1992 Visucom Productions, Inc.) 12 min.

Seguridad en el Trabajo : Manejando la Camioneta y el Camión

Safety On The Job : Van and Truck Driving V0240

The program teaches drivers the fundamentals of pro-driving procedures habits that anyone who drives for a living should adopt. Stresses safety attitude.

English Version V0239

(©1986 AIMS Media) 23 min.

Seguridad en las Operaciones Agrícolas

ATV Safety For Agricultural Operations V0376

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common Safety Rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards.

English version V0490

(©1993 Visual Education Productions) 14 min.

Staying Out Of Harm's Way V0178

Defensive driving techniques are demonstrated for these Danger Zones: intersections; merging lanes and highway/rail road crossings. Describes techniques for avoiding danger with the weaver; tailgater; speeder; turtle; and impaired or intoxicated driver. From the "It's No Accident" series. Others from this series: V0211 (Controlling the Vehicle) V0212 (See and Be Seen), and V0213 (You're In Control).

(©1992 Visucom Productions, Inc.) 15 min.

Tarp Smart : Protect Your Load... And Ourselves V0738

Covers safe tarping procedures for square and odd shaped loads. Illustrates several different hazards to which drivers are exposed during tarping procedures and how to eliminate or minimize the hazards. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1995 Department of Consumer Business & Services, Oregon OSHA) 11 min.

Today's Workplace : Workplace Traffic Safety V0784

Does traffic safety play an important role in the workplace? "Today's Workplace" investigates this question. By interviewing seven experts and taking an in-depth look at the key areas of traffic safety: environment, operation and maintenance, other drivers, trucks, passengers, "Today's Workplace" finds some interesting answers. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Consumer Business & Services, Oregon OSHA) 31 min.

Top Driver: Defensive Driving Skills V0820

A comprehensive driving course in eight parts, about ten minutes each. Interest is heightened by tips from professional racers and stunt drivers. Covers driving basics, safety checks, driver attitude, rules & signs, over and understeering, hydroplaning, anti-lock braking systems, driving distractions, rural driving, bad driving conditions (snow, ice, wet, night), and handling dangerous situations. Parts can be used separately. (©1998 Group 7, Inc.) 75 min.

VIDEO TIP:

Let us know what you think. Feedback about videos is welcomed.

Ultimate Driving Challenge V0703

Hosted by well-known celebrities, Craig T. Nelson and Paula Zahn, with guest appearances by: Tim Allen, Annie Potts, Danny Sullivan, Deidre Hall, and Barbara Mandrell. Covers a series of live demonstrations of difficult and dangerous driving situations and how to correctly handle each one safely.
(©1994 American Training Resources, Inc.—Aims) 30 min.

Vehicle Safety V0524

Adam West the “Safety Crusader” confronts “Rudy the Reckless” in a spin-off from the old TV show “Batman.” West narrates this video which covers safety rules for driving on an industrial site. SafetyWatch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 14 min.

Washington Give ‘em a Brake V0868

Contains a clip of the Public Service Announcement for driver’s awareness to safety throughout road construction zones. Work zone safety series.
(©1995 Washington State Department of Transportation; RXL Pulitzer) 9 min.

When You Least Expect It! V0171

Stresses developing a defensive driving attitude, practicing defensive driving techniques and paying attention. Dramatic accidents are executed by professional stunt drivers from the Joie Chitwood Thrill Show. Emphasizes seatbelt use, observe drivers behind, anticipate activity ahead and behind. Motivates viewers to avoid distractions while driving. Narrated by McLean Stevenson. Graphic collisions.
(©1990 Aurora Pictures) 22 min.

Winter Driving V0594

Teaches driver training techniques for utility and truck drivers. Uses live video sequences to illustrate loss of control situations. Covers winter driving techniques and preparation of vehicles for winter travel.
(©1995 Video Training Source) 18 min.

Winter Driving V1020

Refresher training gives tips on driving hazards in snowy conditions. Gives vehicle inspection checklist for winter condition driving and tips on winter driving skills.
(©1998 Summit Training Source, Inc.) 8 min.

Winter Driving Update V0179

There are many safety precautions, preventive measures, and tactics to learn before driving in wintery conditions. Methods for driving safely in snow and ice are demonstrated. The importance of being prepared in the event of a breakdown is emphasized.
(©1991 AIMS Media) 15 min.

You’re In Control V0213

Motivates people to drive only when they are in good physical and mental condition. Explains “Cool Down” strategies for recognizing and dealing with mental and emotional distractions such as anger and anxiety; demonstrates how alcohol affects driving performance; and reinforces safety belt usage.
(©1992 Visucom Productions, Inc.) 17 min.

Zero Tolerance : You Don’t Have To Be Buzzed To Be Busted V0889

Intended for the teen audience. However, parents of teens should also view this video’s drama of teens getting caught with alcohol in the car and the legal and financial consequences.
(©1999 Washington Traffic Safety Commission) 11 min.

DUST EXPLOSIONS

Commercial Grain Handling : Safeguards To Success V0308

Focuses on safety and health in commercial grain handling facilities. Intended audience is management, staff and employees of commercial grain handling operations.
(©1992 Department of Agricultural Communications, Oklahoma State University) 16 min.

Deadly Dust II V0220

Discusses the hazards that are possible in the grain industries that have “Deadly Dust” potential. Identifies the seven events needed at a precise time to cause a grain dust explosion: Oxygen; Fuel Source (dust); Dust must be fixed or suspended in the air; Minimum concentration of dust is needed; Ignition source; Dry dust; and a confined or closed space where pressure will build up.
(©1990 Cooperative Extension Service, Kansas State University) 30 min.

Deadly Dust III V0440

All employees should view DEADLY DUST II (V0220) before viewing DEADLY DUST III. Featured are two employees who survived major dust explosions, dramatic scenes of an actual explosion, the devastation, injuries and fatalities from major explosions and stop motion demonstrations of how primary and secondary dust explosions occur. CC
(©1995 Department of Communications, Dole Hall, Kansas State University) 22 min.

VIDEO TIP:

You will receive your videos 2 working days before your show date. Call us immediately if they haven’t arrived.

EARTHQUAKE PREPAREDNESS

Earthquake : Some Were Prepared V0057

Uses the aftermath of the October, 1989 earthquake in the San Francisco area as a background for this discussion of earthquake preparedness. Outlines plans specific ways in which families and communities can prepare for the possibility of earthquakes. Shows what people should do if they are in their home, car or large structure when an earthquake occurs. (©1990 R M Distributors – Aims) 30 min.

Hágase usted una Promesa: Estado de Preparación en Contra de Terremotos para Usted y su Comunidad Make Yourself a Promise : Earthquake Preparedness For You V0342

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making your home/ workplace earthquake safe; and Organizing a neighborhood response plan. (©1990 TODCO) 27 min.

Make Yourself A Promise : Earthquake Preparedness For Yourself And Your Community V0341

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making your home/ workplace earthquake safe; and Organizing a neighborhood response plan. (©1990 TODCO) 27 min.

Preparing Your Office for an Earthquake V1040

Training identifies hazards and mitigates damage in the office with simple preventative measures. Lists items for emergency kits. Has clips showing damage from the 2001 Nisqually Earthquake. CC. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. CC (©2001) 7 min.

Surviving The Big One V0328

Henry Johnson, fire and safety specialist with the Los Angeles City Fire Department, visits major earthquake sites from California to Alaska and shows how the key to survival is knowing what to do before, during and after a major quake. Discusses: disaster planning; disaster supplies kit, hazards; utilities; and preparing family members. CC (©1989 KCET Videofinders) 58 min.

Washington Disasters: Are You Ready ? V0788

How to prepare before the emergency. Covers: Earthquakes; Fires; Wind storms; Winter storms; Hazardous materials spills; Volcanic eruptions; and Flooding. CC (©1994 Department of Community, Trade & Economic Development) 80 min.

ELECTRICAL SAFETY

see also *Lockout/Tagout*

Climbing Poles Safely V0329

This program explains: Hitch-Hiking” and “Free Hand” climbing methods; Electrical Hazards while climbing and working on poles; Inspecting poles and equipment; and the importance of your “Safety Attitude.” (©1992 ERI Safety Videos) 14 min.

Electrical Emergencies: Proper Response V0883

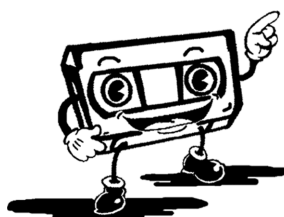

Designed for employee training. This video examines: Effects and levels of electric shock; First aid procedures for electric shock victims; Electrical fires; Procedures for fighting Class C fires. CC (©2000 Coastal Video Communications Corp.) 13 min.

Electrical Grounding : A Vital Precaution V0557

Proper grounding techniques for employees who work around potentially deadly electrical power. Covers: Grounding, Installing and removing grounds, Choosing the right equipment. (©1995 Coastal Video Communications Corp.) 13 min.

VIDEO TIP:

Please return our phone messages regarding overdue videos within 48 hours.

Electrical Hazards V0345

Clearly describes what causes electrical shocks. Through a series of examples, illustrates electrical hazards common to many worksites. Each example includes the precautions needed to minimize risk. Safety Watch Series. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 5 min.

Electrical Hazards : Common Mistakes V0373

The three most common hazards associated with electricity — electrical shock, fire, and explosion — are discussed. Many hazards can be avoided by ensuring that cords are in good condition; electricity has protective guards; electrical equipment is properly labeled; plugs and terminals are properly handled; and electrical equipment is frequently inspected. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Electrical High Voltage : Know The Hazards V0558

“There were three of us down there. My friend was closer to the breaker — all of a sudden he was a ball of flames...” So begins this video program describing OSHA’s Electric Power Generation, Transmission and Distribution Standard. For workers in electrical utilities operations. Covers: PPE and fall protection; Overhead lines; Enclosed spaces; Proper use of tools; Working on or near exposed energized parts; and Testing and test facilities. (©1996 Coastal Video Communications Corp.) 28 min.

Electrical Maintenance V0422

Basic terminology and process of electricity. Identifies primary causes of electrical shocks and burns. Discusses precautions essential for electrical maintenance personnel, such as when to use GFCI's and personal protective equipment. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Electrical Safety V0302

Covers basic safety rules when working with electrical equipment. For employees in manufacturing, construction, utilities, and industrial environments. (©1993 Long Island Productions) 9 min.

Electrical Safety : Basic Principles V0884

Developed to create a better understanding of electricity and how it travels, this program examines basic principles of electricity, reviews safe work conditions and procedures, and demonstrates the correct response to emergencies. Key points: Electrical circuits; Insulators and conductors; Electrical paths; Grounding; and Circuit protection. CC (©2000 Coastal Video Communications Corp.) 16 min.

Electrical Safety : Beware the Bite! V0644

Covers: Levels of protection; Engineering controls; Safe work practices; Lockout/tagout; Energizing electrical systems; Qualified electrical workers; Working with energized systems; Personal protective equipment; Working with overhead Emergency rescue; and First aid. CC (©1996 Coastal Video Communications Corp.) 20 min.

Electrical Safety : Down To The Wire V0204

Basic awareness video identifies electrical hazards and shows how to follow simple electrical safety rules. Covers electrical hazards that can cause fires, burns, shock, and other injuries; outlines the steps take to protect themselves and others from harm; and stresses electrical safety. (©1991 Coronet/MTI Film & Video) 15 min.

Electrical Safety : Real, Real-Life V0805

Tim Write, host, provides important information about safe work practices when working with or around electricity. Tells how employees can protect themselves from injuries — or even fatalities. Covers: Conductivity; Safe work practices; PPE; and Using GFCI's. (©1998 Coastal Video Communications Corp.) 12 min.

Electrical Safety In The Workplace V0709

Reviews electrical basic facts; characteristics of conductors and insulators. Factual discussion of electrical currents and formulas for calculating electrical current. Includes hazards and hazard control. (©1998 Safetycare, Inc.) 23 min.

Electricity - Handle With Care! V0064

Discusses basic safety precautions surrounding the use of electricity in the home. Describes circuit breakers and fuses, proper wiring, the principle of grounding, and the problems of extension cords. Although dated, the principles are presented with clarity. (©1988 Handle Film Corporation) 19 min.

Electromagnetic Field Awareness V0394

The research on Electromagnetic fields (EMF) is inconclusive. Discusses what objects emit EMF when in use and the ways to limit exposure to EMF. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 5 min.

Farm And Ranch Electrical Safety**Seguridad con la Electricidad en la Granja y en el Rancho V0150**

Narrated by Wey Simpson, this video demonstrates many daily farm practices with the potential of electrical shocks. Includes handling irrigation equipment, wiring and grounding electrical systems, and emergency procedures. (©1992 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 19 min.

Fatal Shock Electrical Case Histories V0496

Introduces workers to the principles of electricity, shows how to avoid the dangers of electrical shock and explains correct responses to electrical emergencies. Covers: Importance of following proper procedures; Reporting unsafe electrical working conditions; Personal protective equipment; and Personal verification of lockout/tagout. (©1993 Coastal Video Communications Corp.) 24 min.

High Impact : Electrical Safety V0571

Demonstrates electrical safety lessons in ten recreated accidents. Highlights importance of teach importance of qualified electricians to maintain electrical equipment; lock-out / tagout; proper distance, ladder safety and safe work practices. Warning! May be too graphic for some audiences. (©1995 ERI Safety Videos) 18 min.

Pole Topping Safety (High Voltage Electrical Pole Topping Safety) V0887

For public and private utility workers, and linemen. Shows examples of acceptable and effective safe pole top removal practices. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2000 Department of Labor and Industries, State of Washington) 10 min.

PPE : Electrical V0477

Basic rules when working with electricity. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 12 min.

Preventing Electrical Accidents : Safe Work Practices V0162

Designed to help employers meet training requirements of the electrical safety related work practices standard (29CFR 1910.331-335). Discusses different ways to approach energized versus de-energized equipment, differences between qualified and non-qualified workers, and safe work practices on or near overhead electric lines (©1992 Industrial Training, Inc.) 23 min.

Safety On The Job : Working With Electricity V0241

Details the hazards associated with using electricity on the job. Illustrates the importance of knowing standard procedures for common electrical problems. Common hazards explored in this program: insufficient wire insulation, faulty breakers, dirty casings, overloaded outlets, and work with power tools around water. Work environments include warehouses, manufacturing plants, and construction areas.
(©1989 AIMS Media) 16 min.

Safety Watch Series, Vol. 1, No. 1, April 1994 V0378

Contains these four segments on safety issues: WORKING IN CONFINED SPACES (V0343), RESPIRATORY PROTECTION (V0344), ELECTRICAL HAZARDS (V0345), and SAFE LIFTING (V0346). For descriptions of each segment, refer to specific titles and title numbers as listed here.
(©1994 Primedia Workplace Learning, Safety Watch) 29 min.

Shocking Experiences : A Review Of Basic Electrical Hazards In The Workplace V0292

Basic hazards of working with electricity for employees. Four people describe their close calls and suggest preventative solutions.
(©1990 CoreMedia Training Solutions) 20 min.

Static Electricity V0818

In the work environment uncontrolled static electricity can have severe and dramatic consequences. Covers: static electricity, potentials hazards; engineering controls and best safety practices.
(©1999 Summit Training Source, Inc.) 15 min.

Take Electricity Seriously : Shock — Fire - Explosion : Developing Awareness V0803

Increases awareness of electrical hazards and builds positive safety attitudes toward electricity at work and at home. Discusses positive safety attitudes toward electricity, electrical incident and injury reduction, and increased safety performance.
(©1993 E. I. Du Pont De Nemours) 14 min.

Temporary Grounding Seminar V0677

Classroom instruction by Lonnie Bell, hot line tools specialist and demonstrator, covers single-point, dual point and personal grounding practices in Part 1: Principles and Development of Methods, and Part 2: Equipment Selection, Research Testing and Application Simulations on a working model of a three-phase line.
(© Hubbell Power Systems) 50 min.

What Is Electricity? V0762

Designed to train both qualified and non-qualified employees. Includes: How electricity works; Associated hazards; Personal protective equipment; Fundamentals of grounding; Determining energized parts, Determining nominal voltage, Lockout and tagout procedures; Equipment start-up and operation; and Safe usage.
(©1994 Summit Training Source, Inc.) 14 min.

When Lightning Strikes V0331

Presents specific actions and precautions employees can take to avoid hazardous lightning and electrical storm conditions including lightning warning signals, conditions for lightning, safe and unsafe locations; and emergency treatment for victims.
(©1992 ERI Safety Videos) 14 min.

Working Safely With Electricity. Part 1 : Electricity Can Kill V0441

Details what happens when current flows through the body. Explains the disruption of the body's internal electrical system. Shows physical symptoms associated with electric shock.
(©1992 Bergwall Productions Inc.) 18 min.

Working Safely With Electricity. Part 2 : The Shock Emergency V0442

Explains the danger of such common practices as locating a hot wire by touch and engaging in horseplay in the work area. Describes the appropriate dress for working with electricity. Emphasizes the importance of maintaining a safe environment. Examines generation/transmission of electrical energy.
(©1992 Bergwall Productions Inc.) 14 min.

Working Safely With Electricity. Part 3 : The Importance Of Grounding V0443

Defines grounding. Explains proper grounding and the color-code system of identifying electrical wires. Describes ground fault circuit interrupters. Demonstrates use of multimeter — solenoid-type tester. Introduces Lockout/Tagout procedures.
(©1992 Bergwall Productions Inc.) 15 min.

EMERGENCY RESPONSE

Bloodborne Pathogens : What Would You Do? V0154

Provides training pieces for compliance with OSHA standard 29 CFR 1910.1030. Reviews general information about Bloodborne Pathogens and procedures for the Emergency Response Team to avoid exposure to the viruses. Covers only HIV and HVB. For General Industry and First Aid Responders.
(©1992 CoreMedia Training Solutions) 21 min.

Confined Space Rescue V0188

A two-part program that covers procedures and techniques for the proper rescue of persons within a confined space. Part 1: Covers rescue equipment, PPE, rescue techniques, and hazards associated with confined spaces. Part 2: Technical rescue techniques, mechanical and engineering controls, and rescue systems. CC version V0728.
(©1993 Coastal Video Communications Corp.) 34 min.

Confined Space Safety V0189

Training intended for workers, contractors, supervisors and work monitors. Highlights are: Work monitoring a work-site inspection; Environmental containment testing and ventilation; Pre-entry atmospheric testing; Avoiding toxic gas and fire hazards; Emergency rescue; and Monitoring for heat stress.
(©1993 Video Training Source) 21 min.

Decontamination : A Matter Of Life! V0305

Helps satisfy training requirements for the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA. Covers: tool drop; wash/rinse; cloth/equipment removal; shower/dry/redress; and recordkeeping. (©1992 Coastal Video Communications Corp.) 17 min.

Emergency Response (in the Laboratory) V0982

Reviews procedures for responding to laboratory fire, radiation, chemical spills and biological spills. Includes personal injuries and eyewash stations and showers. (©1994 Howard Hughes Medical Institute) 12 min.

HAZMAT Spills : Are You Ready? V0363

Emphasizes the importance of knowing how to keep a spill from happening, how to identify a chemical spill, when to handle a chemical spill, and when to alert trained personnel. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Rappelling V0583

A rescue worker trained in rappelling techniques is often the only one able to reach a victim trapped in a high or awkward position. Detailed directions about this crucial skill are spelled out in this video program. Covers: Bottom/body belays; Safety-line belays; Equipment; Prusik knots/Munter hitches; Rappelling procedures; and Safety precautions/emergency procedures. (©1995 Coastal Video Communications Corp.) 15 min.

Tuberculosis In The First Responder Environment V0313

Discusses: Epidemiology of TB; Latent, Active and Multi-Drug Resistant; Signs and symptoms of TB; High risk Groups and the reasons for the rise in TB cases. Regulatory aspects of TB: CDC Guidelines and OSHA Enforcement Policy; Workplace risks: Modes of transmission, Post-Exposure Management; and Exposure Control Plan. (©1994 Long Island Productions) 20 min.

ENVIRONMENTAL REGULATIONS

Decontamination : A Matter Of Life! V0305

Helps satisfy training requirements for the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA. Covers: tool drop; wash/rinse; cloth/equipment removal; shower/dry/redress; and recordkeeping. (©1992 Coastal Video Communications Corp.) 17 min.

Environmental Awareness : Recipe For A Cleaner World V0620

Covers an alphabet soup of agencies. Gives an overview of Clean Air Act, Clean Water Act, SDWA; Resource Conservation & Recovery Act, Toxic Substances Control Act, SCA, FIFRA, TSD, CERCLA, EPCRA, SARA, etc. (©1997 Coastal Video Communications Corp.) 22 min.

Hazardous Waste Operations And Emergency Response : HAZWOPER : [Awareness Level] V0306

Will help viewers comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: legislative background; hazardous materials definitions; activities and workers covered by the HAZWOPER standard; and awareness-level training. (©1990 Coastal Video Communications Corp.) 20 min.

Hazardous Waste Operations And Emergency Response : HAZWOPER : Response Levels V0307

Will help viewers comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: Operations-levels training; Hazard and risk assessment; Personal protective equipment; Control, containment, confinement; Decontamination; Standard operating procedures. (©1990 Coastal Video Communications Corp.) 22 min.

HAZWOPER : Role Of The First Responder V0488

Overview of Hazwop requirements and the specific responsibilities of the first responder. To be successful in this role, the first responder must be prepared for emergencies, be familiar with all hazardous materials on site, be observant of the environment and use the proper PPE when responding to a problem. Safety Watch Series. CC (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

RCRA Large Quantity Generators : A Commitment To The Future V0584

Defines large quantity generator. Covers hazardous waste activity notification, waste accumulation and storage requirements, transportation procedures, setting up a waste minimization program, and emergency plans/recordkeeping. (©1994 Coastal Video Communications Corp.) 24 min.

Resource Conservation and Recovery Act V0624

The concept "cradle to grave" implies that the producer is responsible for hazardous waste throughout a chemical's life and to its final disposition. Defines the RCRA as established in 1977. Describes hazardous waste, small and large quantity generators. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 8 min.

Waste Minimization V0405

Discusses ways to minimize waste by source reduction, by recycling, and by substituting non-hazardous or less hazardous materials for hazardous materials. Shows how to participate in this effort and the benefits from waste reduction. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

ERGONOMICS

Adventures Of Ergoman : A Custodial Ergonomics Video V0812

The Custodian Quality Improvement Team, or CQIT, is a management-empowered team made up of custodians and supervisors. Safety Engineer Jack Tolley and Industrial Hygienist David Zalk were invited to work with CQIT to design a section on ergonomics. Slightly offbeat approach to ergonomic alternatives for performing custodial tasks. (©1997 CQIT Production) 29 min.

Carpal Tunnel Syndrome & Other Upper Extremity Disorders for Arborists V0970

Develops awareness of musculoskeletal disorders and techniques for arborists to use to minimize risks. Shows how to vary work activities, take stretch breaks, change or modify tools and equipment handles, proper postures and how to minimize exposure to vibration. (©2000 Forest Industry Safety & Training Alliance, Inc.) 13 min.

Carpal Tunnel Syndrome & Other Upper Extremity Disorders In the Logging Industry V0971

Describes how to prevent musculoskeletal disorders while performing typical logging activities. Gives examples of early symptoms and suggestions to correct problems before a severe injury develops. (©1998 Forest Industry Safety & Training Alliance, Inc.) 13 min.

CTD Prevention for Employees V0131

Helps employees to understand cumulative trauma disorders, their causes and, most importantly, how to prevent the injury from occurring. Discusses the elements of good job design, proper body mechanics and the importance of physical fitness. Recommended for awareness training. CC version. Formerly: Cumulative Trauma : Reducing The Risk. CC (©1990 Comprehensive Loss Management, Inc.) 16 min.

Elements of an Ergonomics Program V0849

For managers and supervisors establishing an ergonomics program, this video shows the steps in designing an action plan, goals, communication and training. CC (©2001 Comprehensive Loss Management, Inc.) 14 min.

Elements of Ergonomics : Basics of Ergonomics V0848

General awareness video educates employees and management on basic ergonomics in the workplace. Pairs with V0849 which is for managers and supervisors establishing an ergonomics program. Covers the risk factors of awkward posture, repetition, vibration, high hand force, and contact stress. CC (©2001 Comprehensive Loss Management, Inc.) 9 min.

Ergonomic F.I.T. : Looking At The Signals, Video 2 V0782

Explores the signs, symptoms and solutions for common ergonomic-related injuries. Tells workers to develop an ergonomic eye to recognize risk factors and physical signs in order to preventing injuries and take action early. Shows office and industrial environments. CC (©1995 CoreMedia Training Solutions) 13 min.

Ergonomic F.I.T. : Focusing on the Action Tools, Video 4 V0913

A training video for ergonomic solutions. Presents nine jobs for job analysis. Viewers can then practice identifying risk factors and solutions. CC (©1995 CoreMedia Training Solutions) 46 min.

Ergonomic F.I.T. : Picturing the Process, Video 1 V0781

Explains the seven key actions that guide a successful ergonomics program. These include creating a team which includes employee participation, keeping open channels of communication, a strategy to determine most serious jobs, locate the causes and develop solutions. Motivational. CC (©1995 CoreMedia Training Solutions) 17 min.

Ergonomic F.I.T. : Seeing with an Ergonomic Eye, Video 3 V0912

The Action Team works to identify work risk factors by job analysis, gathering data, and record keeping. Training for employers. CC (©1995 CoreMedia Training Solutions) 13 min.

Ergonomic Programs that Work V0681

Ergonomics is the science of designing the workplace and work organization to fit the worker or the employee. Key elements of a successful ergonomics program are: Management commitment; Worker involvement; Worksite analysis; Medical management; Training and education; and Ongoing evaluation. This video may be duplicated. CC (©1998 U.S. Department of Labor, Occupational Safety and Health Administration) 21 min.

Ergonomic Task Analysis : Module 1 Survey and Analyze V0846

For ergonomics teams. Teaches basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in an industrial or manufacturing setting. Covers the Cumulative Trauma Disorder risk factors and identifies other risk factors in the workplace. CC (©1992 Comprehensive Loss Management, Inc.) 14 min.

Ergonomic Task Analysis : Module 2 Focus and Eliminate V0847

Part 2 Teaches members of the ergonomics team the basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in a manufacturing setting. This video builds on V0846 to use the findings of the analysis and create an action plan to make effective ergonomic improvements. CC (©1992 Comprehensive Loss Management, Inc.) 14 min.

Ergonomic Tools (Humorous) V0487

In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders. Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Ergonomics - The Practical Approach V0853

Suitable for all workers for an introduction to the science of ergonomics. Discusses the general principles for ergonomic solutions. Includes: work space design; static and muscular effort; and controls and displays. (©1993 Safetycare, Inc.) 17 min.

Ergonomics : A Weight Off Your Shoulders V0877

Instructs employees to use the science of ergonomics to develop safe lifting techniques and limit repetitions. Includes stretching exercises. Industrial work environment. CC (©1995 Coastal Video Communications Corp.) 13 min.

Ergonomics : Break the RMI Habit V0768

Focuses on repetitive motions of the shoulders, back, arms, wrists and hands which may cause injuries. Gives suggestions for modifying workstations and minimize excessive movement in the industrial and office environments. Demonstrates five stretches. CC (©1997 Coastal Video Communications Corp.) 13 min.

Ergonomics : Job Safety Analysis (Humorous) V0507

The Safety Watch Squares game show has ergonomic Q&A to recognize potential problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Ergonomics : Solving the Puzzle V0835

Describes the signs, causes, and symptoms of musculoskeletal disorders and gives common solutions to prevent injury. Covers the proposed OSHA standard 64 FR 65767. CC (©2000 Coastal Video Communications Corp.) 19 min.

Ergonomics : The 24-Hour Body V0825

Teaches employees how to use the ergonomic principles learned at work when working at home. Covers: Practical solutions to potential strains and Off-the-job safety procedures. CC (©1998 Coastal Video Communications Corp.) 20 min.

Ergonomics : Your Body At Work V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. CC (©1991 Coastal Video Communications Corp.) 20 min.

Ergonomics Awareness Education : For Employees in Caution Zone Jobs and Their Supervisors V0924

Describes musculoskeletal disorders and the importance of early reporting of symptoms. Explains work related causes of musculoskeletal disorders (WMSDs) including the "caution zone" risk factors. Identifies hazards and common measures to reduce them. *Permission is granted to duplicate this tape. CC (©2002 Department of Labor and Industries, State of Washington) 26 min.

Ergonomics: Taking Matters into Your Own Hands V0769

Describes cumulative trauma disorder injuries to the arms, wrists and hands. In an industrial work environment, stresses neutral positions, workstation modification, and proper hand tools. Demonstrates techniques to minimize force, reduce repetition and eliminate direct pressure. Includes wrist and hand exercises. CC (©1995 Coastal Video Communications Corp.) 14 min.

Industrial Ergonomics V0361

Discusses causes and symptoms of cumulative trauma disorders (or work related musculoskeletal disorders — WMSDs) Gives specific ergonomic strategies for reducing risk factors or caution zone jobs. Shows both employer and individual employees need to consider ergonomics in arranging work environment and scheduling tasks with risk factors. Solutions oriented for the light manufacturing workplace. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Office Ergo V1017

Brief overview including the science of ergonomics; musculoskeletal disorders associated with the office environment and best safety practices to reduce exposure to injury. Short version follow up to V1002. (©2001 Summit Training Source, Inc.) 5 min.

Office Ergonomics : It's Your Move V0878

Intended audience: office workers. Defines musculoskeletal disorders. Describes signs of MSDs, risk factors and solutions to correct them. CC (©2001 Coastal Video Communications Corp.) 17 min.

Office Safety (Ergonomics) V1002

Focus is on ergonomic risk factors that may be present in workstations. Outlines preventative measures to avoid musculoskeletal injury. Briefly touches on recognizing other hazards in the office including falls, electrical cords, and using office equipment safely. CC (©2001 Summit Training Source, Inc.) 12 min.

VIDEO TIP:

*You can borrow
5 videos for 5 working days.*

Prevenga Los Trastornos Musculoesqueléticos Understanding Musculoskeletal Disorders V0925

Spanish Version. Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to the Washington Rule. Includes industrial, light manufacturing and construction workplaces. English version V0898.

(©2001 Comprehensive Loss Management, Inc.) 15 min.

Principles of Office Ergonomics V0880

Focuses on office environments with several specific ergonomic solutions. Defines musculoskeletal disorders, symptoms and how to prevent injuries. Training for employees includes stretching and warmup activities for shoulders, arms and back. Accompanied by forms and overhead templates on disk. CC

(©2001 Comprehensive Loss Management, Inc.) 16 min.

Safe Lifting in the Warehouse V0852

Purpose: to prevent back injury in the warehouse environment by using proper lifting techniques, back exercises, warmups, and stretching. Various solutions in brief scenarios. Risk Analysis and suggested workstation modification.

(©1998 VOCAMM) 22 min.

Safe Workstation Is No Accident V0254

By following these guidelines, comfortable working environment is created to help reduce the risks of serious body aches or eyestrain.

(©1993 Executect Office Services, Inc.) 14 min.

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment. Focus is on the impact of system and environmental design of daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques.

(©1989 CoreMedia Training Solutions) 13 min.

Shipyard Ergonomics V1014

Filmed in Seattle. Covers ergonomic solutions to prevent injuries in a variety of tasks in the shipyard environment, including welding, confined spaces, and lifting. Identifies risk factors of awkward posture, repetition, forces and weight, vibration, duration, static muscle loading, contact stress, and environment.

(©2003 Shipbuilders Council of America) 27 min.

Take Five : Ergonomics V0872

In a TV interview format the basics of neutral postures, minimizing forces, reducing repetitions; adjusting workstations to fit the worker and working smarter not harder are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end!

(©1999 Safe Expectations) 9 min.

Take Five : Lifting, Ergonomics & Stretching V0942

Three popular nine minute segments in a unique talk show setting with occupational therapist and injury prevention specialist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs.

(©2000 Comprehensive Loss Management, Inc.) 27 min.

Take Five : Sitting V0874

In a TV interview format the basics of sitting are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! Also available on V1021.

(©1999 Safe Expectations) 9 min.

Take Five : Sitting and Standing V1021

Two nine minute segments in a unique talk show setting with occupational therapist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs.

(©2000 Comprehensive Loss Management, Inc.) 16 min.

Take Five : Standing V0875

In a TV interview format the basics of standing are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! Also available on V1021.

(©1999 Safe Expectations) 9 min.

Trabajando Inteligentemente - no con más Dificultades: Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices.

English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Understanding & Preventing Musculoskeletal Injury in Sonography V0888

Prevent injury while scanning. Describes major causes and risk factors for Musculoskeletal Injury (MSI) specific to sonography. Covers the symptoms of scanning-related MSI's with suggestions for preventative measures. Includes a segment of stretching exercises.

(©2000 Agilent Technologies) 28 min.

Understanding MSDs (Musculoskeletal Disorders) V0898

Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to Washington.

Includes industrial, light manufacturing and construction workplaces. Highly recommended. Spanish version V0925 CC (©2001 Comprehensive Loss Management, Inc.) 15 min.

Valve Safety V0871

Describes the different types of valves and associated hazards; importance of risk assessment. Reviews use of PPE and safety measures. Special emphasis on ergonomics; avoiding awkward postures and demonstrating proper lifting techniques. Program footage with scenes on site at a refinery and ships. The content is applicable to any industrial environment utilizing valves and pipes such as water, utilities, or petroleum. (©2001 Summit Training Source, Inc.) 17 min.

Way We Work : A User's Guide To Office Ergonomics and Body Mechanics V0169

Explains Cumulative Trauma Disorders; identifies risk factors of repetition, force and posture; and shows how to analyze and correct problems at the workstation. (©1991 Comprehensive Loss Management, Inc.) 18 min.

Working Smarter - Not Harder : Ergonomics In Agriculture V0801

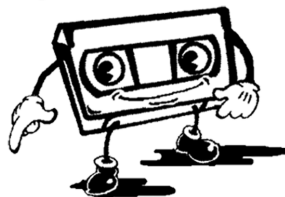

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts. Demonstrates correct work practices. Spanish version V0802. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1998 Department of Consumer Business & Services, Oregon OSHA) 16 min.

Working With Display Screen Equipment V0276

Details on the following points: Basic Ergonomics; Layout and Working Environment; Common Hazards; Musculoskeletal problems, Visual fatigue, and Stress. (©1993 Safetycare, Inc.) 17 min.

Workplace Ergonomics: A Better Way to Work V0559

Employee education. Covers four common cumulative trauma disorders, causes, and early symptoms and steps to take to minimize the risk factors associated with cumulative trauma disorders. (©2000 Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min.

VIDEO TIP:

Remove the UPS shipping sticker on the back of the shipping box before shipping videos back to us. We want your videos to come back to us and not back to you!

ERGONOMICS - EMPLOYEE EDUCATION**Elements of Ergonomics : Basics of Ergonomics V0848**

General awareness video educates employees and management on basic ergonomics in the workplace. Pairs with V0849 which is for managers and supervisors establishing an ergonomics program. Covers the risk factors of awkward posture, repetition, vibration, high hand force, and contact stress. CC (©2001 Comprehensive Loss Management, Inc.) 9 min.

Ergonomic Task Analysis : Module 1 Survey and Analyze V0846

For ergonomics teams. Teaches basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in an industrial or manufacturing setting. Covers the Cumulative Trauma Disorder risk factors and identifies other risk factors in the workplace. CC (©1992 Comprehensive Loss Management, Inc.) 14 min.

Ergonomics - The Practical Approach V0853

Suitable for all workers for an introduction to the science of ergonomics. Discusses the general principles for ergonomic solutions. Includes: work space design; static and muscular effort; and controls and displays. (©1993 Safetycare, Inc.) 17 min.

Ergonomics : A Weight Off Your Shoulders V0877

Instructs employees to use the science of ergonomics to develop safe lifting techniques and limit repetitions. Includes stretching exercises. Industrial work environment. CC (©1995 Coastal Video Communications Corp.) 13 min.

Ergonomics : Your Body At Work V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. CC (©1991 Coastal Video Communications Corp.) 20 min.

Ergonomics Awareness Education : For Employees in Caution Zone Jobs and Their Supervisors V0924

Describes musculoskeletal disorders and the importance of early reporting of symptoms. Explains work related causes of musculoskeletal disorders (WMSDs) including the "caution zone" risk factors. Identifies hazards and common measures to reduce them. *Permission is granted to duplicate this tape. CC (©2002 Department of Labor and Industries, State of Washington) 26 min.

Industrial Ergonomics V0361

Discusses causes and symptoms of cumulative trauma disorders (or work related musculoskeletal disorders — WMSDs) Gives specific ergonomic strategies for reducing risk factors or caution zone jobs. Shows both employer and individual employees need to consider ergonomics in arranging work environment and scheduling tasks with risk factors. Solutions oriented for the light manufacturing workplace. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Prevenga Los Trastornos Musculoesqueléticos Understanding Musculoskeletal Disorders V0925

Spanish Version. Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to the Washington Rule. Includes industrial, light manufacturing and construction workplaces. English version V0898. (©2001 Comprehensive Loss Management, Inc.) 15 min.

Principles of Office Ergonomics V0880

Focuses on office environments with several specific ergonomic solutions. Defines musculoskeletal disorders, symptoms and how to prevent injuries. Training for employees includes stretching and warmup activities for shoulders, arms and back. Accompanied by forms and overhead templates on disk. CC (©2001 Comprehensive Loss Management, Inc.) 16 min.

Understanding MSDs (Musculoskeletal Disorders) V0898

Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to Washington. Includes industrial, light manufacturing and construction workplaces. Highly recommended. Spanish version V0925. CC (©2001 Comprehensive Loss Management, Inc.) 15 min.

Workplace Ergonomics: A Better Way to Work V0559

Employee education. Covers four common cumulative trauma disorders, causes, and early symptoms and steps to take to minimize the risk factors associated with cumulative trauma disorders. (©2000 Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min.

ERGONOMICS - EMPLOYER EDUCATION**Elements of an Ergonomics Program V0849**

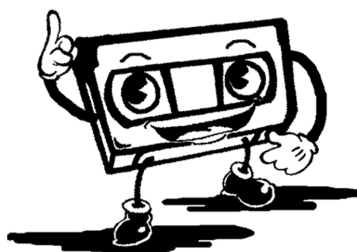

For managers and supervisors establishing an ergonomics program, this video shows the steps in designing an action plan, goals, communication and training. CC (©2001 Comprehensive Loss Management, Inc.) 14 min.

Elements of Ergonomics : Basics of Ergonomics V0848

General awareness video educates employees and management on basic ergonomics in the workplace. Pairs with V0849 which is for managers and supervisors establishing an ergonomics program. Covers the risk factors of awkward posture, repetition, vibration, high hand force, and contact stress. CC (©2001 Comprehensive Loss Management, Inc.) 9 min.

VIDEO TIP:

The best time to request summer videos is in January and the best time to order winter videos is in July.

**Ergonomic F.I.T. : Looking At The Signals, Video 2 V0782**

Explores the signs, symptoms and solutions for common ergonomic-related injuries. Tells workers to develop an ergonomic eye to recognize risk factors and physical signs in order to preventing injuries and take action early. Shows office and industrial environments. CC (©1995 CoreMedia Training Solutions) 13 min.

Ergonomic F.I.T. : Focusing on the Action Tools, Video 4 V0913

A training video for ergonomic solutions. Presents nine jobs for job analysis. Viewers can then practice identifying risk factors and solutions. CC (©1995 CoreMedia Training Solutions) 46 min.

Ergonomic F.I.T. : Picturing the Process, Video 1 V0781

Explains the seven key actions that guide a successful ergonomics program. These include creating a team which includes employee participation, keeping open channels of communication, a strategy to determine most serious jobs, locate the causes and develop solutions. Motivational. CC (©1995 CoreMedia Training Solutions) 17 min.

Ergonomic F.I.T. : Seeing with an Ergonomic Eye, Video 3 V0912

The Action Team works to identify work risk factors by job analysis, gathering data, and record keeping. Training for employers. CC (©1995 CoreMedia Training Solutions) 13 min.

Ergonomic Programs that Work V0681

Ergonomics is the science of designing the workplace and work organization to fit the worker or the employee. Key elements of a successful ergonomics program are: Management commitment; Worker involvement; Worksite analysis; Medical management; Training and education; and Ongoing evaluation. This video may be duplicated. CC (©1998 U.S. Department of Labor, Occupational Safety and Health Administration) 21 min.

Ergonomic Task Analysis : Module 1 Survey and Analyze V0846

For ergonomics teams. Teaches basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in an industrial or manufacturing setting. Covers the Cumulative Trauma Disorder risk factors and identifies other risk factors in the workplace. CC

(©1992 Comprehensive Loss Management, Inc.) 14 min.

Ergonomic Task Analysis : Module 2 Focus and Eliminate V0847

Part 2 Teaches members of the ergonomics team the basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in a manufacturing setting. This video builds on V0846 to use the findings of the analysis and create an action plan to make effective ergonomic improvements. CC

(©1992 Comprehensive Loss Management, Inc.) 14 min.

Ergonomics : Job Safety Analysis (Humorous) V0507

The Safety Watch Squares game show has ergonomic Q&A to recognize potential problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment. Focus is on the impact of system and environmental design of daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques.

(©1989 CoreMedia Training Solutions) 13 min.

Way We Work : A User's Guide To Office Ergonomics and Body Mechanics V0169

Explains Cumulative Trauma Disorders; identifies risk factors of repetition, force and posture; and shows how to analyze and correct problems at the workstation.

(©1991 Comprehensive Loss Management, Inc.) 18 min.

ERGONOMICS - INDUSTRIAL ENVIRONMENT

CTD Prevention for Employees V0131

Helps employees to understand cumulative trauma disorders, their causes and, most importantly, how to prevent the injury from occurring. Discusses the elements of good job design, proper body mechanics and the importance of physical fitness. Recommended for awareness training. CC version.

Formerly: Cumulative Trauma : Reducing The Risk CC

(©1990 Comprehensive Loss Management, Inc.) 16 min.

Ergonomic F.I.T. : Seeing with an Ergonomic Eye, Video 3 V0912

The Action Team works to identify work risk factors by job analysis, gathering data, and record keeping. Training for employers. CC

(©1995 CoreMedia Training Solutions) 13 min.

Ergonomic Tools (Humorous) V0487

In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders.

Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Ergonomics - The Practical Approach V0853

Suitable for all workers for an introduction to the science of ergonomics. Discusses the general principles for ergonomic solutions. Includes: work space design; static and muscular effort; and controls and displays.

(©1993 Safetycare, Inc.) 17 min.

Ergonomics : A Weight Off Your Shoulders V0877

Instructs employees to use the science of ergonomics to develop safe lifting techniques and limit repetitions. Includes stretching exercises. Industrial work environment. CC

(©1995 Coastal Video Communications Corp.) 13 min.

Ergonomics: Taking Matters into Your Own Hands V0769

Describes cumulative trauma disorder injuries to the arms, wrists and hands. In an industrial work environment, stresses neutral positions, workstation modification, and proper hand tools. Demonstrates techniques to minimize force, reduce repetition and eliminate direct pressure.

Includes wrist and hand exercises. CC

(©1995 Coastal Video Communications Corp.) 14 min.

Industrial Ergonomics V0361

Discusses causes and symptoms of cumulative trauma disorders (or work related musculoskeletal disorders — WMSDs) Gives specific ergonomic strategies for reducing risk factors or caution zone jobs. Shows both employer and individual employees need to consider ergonomics in arranging work environment and scheduling tasks with risk factors. Solutions oriented for the light manufacturing workplace. Safety Watch Series.

Safe Lifting in the Warehouse V0852

Purpose: to prevent back injury in the warehouse environment by using proper lifting techniques, back exercises, warmups, and stretching. Various solutions in brief scenarios. Risk Analysis and suggested workstation modification.

(©1998 VOCAMM) 22 min.

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment. Focus is on the impact of system and environmental design of daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques.

(©1989 CoreMedia Training Solutions) 13 min.

Understanding MSDs (Musculoskeletal Disorders) V0898

Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to Washington. Includes industrial, light manufacturing and construction workplaces. Highly recommended. Spanish version V0925 CC (©2001 Comprehensive Loss Management, Inc.) 15 min.

ERGONOMICS - INDUSTRY SPECIFIC

Adventures Of Ergoman : A Custodial Ergonomics Video V0812

The Custodian Quality Improvement Team, or CQIT, is a management-empowered team made up of custodians and supervisors. Safety Engineer Jack Tolley and Industrial Hygienist David Zalk were invited to work with CQIT to design a section on ergonomics. Slightly offbeat approach to ergonomic alternatives for performing custodial tasks.

(©1997 CQIT Production) 29 min.

Shipyard Ergonomics V1014

Filmed in Seattle. Covers ergonomic solutions to prevent injuries in a variety of tasks in the shipyard environment, including welding, confined spaces, and lifting. Identifies risk factors of awkward posture, repetition, forces and weight, vibration, duration, static muscle loading, contact stress, and environment.

(©2003 Shipbuilders Council of America) 27 min.

Trabajando Inteligentemente - no con más Dificultades: Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices.

English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Understanding & Preventing Musculoskeletal Injury in Sonography V0888

Prevent injury while scanning. Describes major causes and risk factors for Musculoskeletal Injury (MSI) specific to sonography. Covers the symptoms of scanning-related MSI's with suggestions for preventative measures. Includes a segment of stretching exercises.

(©2000 Agilent Technologies) 28 min.

Valve Safety V0871

Describes the different types of valves and associated hazards; importance of risk assessment. Reviews use of PPE and safety measures. Special emphasis on ergonomics; avoiding awkward postures and demonstrating proper lifting techniques. Program footage with scenes on site at a refinery and ships. The content is applicable to any industrial environment utilizing valves and pipes such as water, utilities, or petroleum.

(©2001 Summit Training Source, Inc.) 17 min.

Working Smarter - Not Harder : Ergonomics In Agriculture V0801

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices.

Spanish version V0802. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 16 min.

ERGONOMICS - OFFICE ENVIRONMENT

Office Ergo V1017

Brief overview including the science of ergonomics; musculoskeletal disorders associated with the office environment and best safety practices to reduce exposure to injury. Short version follow up to V1002.

(©2001 Summit Training Source, Inc.) 5 min.

Office Ergonomics : It's Your Move V0878

Intended audience: office workers. Defines musculoskeletal disorders. Describes signs of MSDs, risk factors and solutions to correct them. CC

(©2001 Coastal Video Communications Corp.) 17 min.

Office Safety (Ergonomics) V1002

Focus is on ergonomic risk factors that may be present in workstations. Outlines preventative measures to avoid musculoskeletal injury. Briefly touches on recognizing other hazards in the office including falls, electrical cords, and using office equipment safely. CC

(©2001 Summit Training Source, Inc.) 12 min.

Principles of Office Ergonomics V0880

Focuses on office environments with several specific ergonomic solutions. Defines musculoskeletal disorders, symptoms and how to prevent injuries. Training for employees includes stretching and warmup activities for shoulders, arms and back. Accompanied by forms and overhead templates on disk. CC
(©2001 Comprehensive Loss Management, Inc.) 16 min.

Safe Workstation Is No Accident V0254

By following these guidelines, comfortable working environment is created to help reduce the risks of serious body aches or eyestrain.
(©1993 Executect Office Services, Inc.) 14 min.

Take Five : Sitting V0874

In a TV interview format the basics of sitting are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! Also available on V1021.
(©1999 Safe Expectations) 9 min.

Take Five : Sitting and Standing V1021

Two nine minute segments in a unique talk show setting with occupational therapist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs.
(©2000 Comprehensive Loss Management, Inc.) 16 min.

Take Five : Standing V0875

In a TV interview format the basics of standing are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! Also available on V1021.
(©1999 Safe Expectations) 9 min.

Way We Work : A User's Guide To Office Ergonomics and Body Mechanics V0169

Explains Cumulative Trauma Disorders; identifies risk factors of repetition, force and posture; and shows how to analyze and correct problems at the workstation.
(©1991 Comprehensive Loss Management, Inc.) 18 min.

Working With Display Screen Equipment V0276

Details on the following points: Basic Ergonomics; Layout and Working Environment; Common Hazards; Musculoskeletal problems, Visual fatigue, and Stress.
(©1993 Safetycare, Inc.) 17 min.

EXCAVATION

Cave-In Response V0199

Knowing how to safely respond when a cave-in occurs can be the difference between life and death, especially for the rescuers. Designed for both people on the site and rescue personnel. Examines the basic considerations involved in responding safely to a cave-in emergency.
(©1990 Zomar Productions, Ltd) 24 min.

Cave-In! Trenching & Shoring Safety V0434

Details proper trenching procedures and describes soil types. Seattle footage. Covers: evaluating an excavation site; effective worker protection systems; general safety practices; and emergency response.
(©1994 Coastal Video Communications Corp.) 18 min.

Competent Person & Soils Testing V0155

Opens with an OSHA inspector showing up at a jobsite. Defines the role and responsibilities of the "competent person"; Simple explanations of the new soil classifications system; Field tests for determining soil types, including a pocket penetrometer; and Preparing for an OSHA inspection.
(©1992 Zomar Productions, Ltd) 27 min.

Digging Dangers IV : Accident Avalanche V0774

Shows the catastrophic damage that can happen when powered excavation equipment hits an underground gas pipeline or power cable. Documentary account of various accidents.
(©1992 Underground Focus Magazine) 7 min.

Excavation, Trenching And Shoring V0187

Assists employers of the State of Washington to provide the required competent person at trenching and excavation projects. Details all sections of the applicable code Part "N" trenching and excavation. Sections include: Definitions; General Protection Requirements; Protective System Options; and Soils Classification.
(©1991 Washington Water Power) 153 min.

Gopher Guide to Dig Safety V0838

Digging safely requires knowledge of precautions and advance notice requirements. Lists a variety of additional materials made available by Washington State to promote worker and utility safety. Potential safety hazards to excavation work such as fiber optic cables, gas and telephone lines, are dramatized with safe procedures demonstrated. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©2000 Washington Utilities Coordinating Council) 8 min.

Highway Work Zone Safety : Utility Safety in Work Zones V0866

For Road Construction worker training. Shows the different marking indications for telecommunications, electric, gas, water, and sewer lines. Note: Some footage contains Washington State Code violations! See also V0838 Gopher Guide to Dig Safety.
(©1999 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 14 min.

Shoring Safely V0195

Shows how to install timber, screwjack and hydraulic shoring systems, as well as simple techniques for determining A, B, and C type soils, sheeting designs, and safety hazards unique to trenching. Perfect for foreman, crew leaders, or anyone that needs up-to-date information on how to safely install shoring.
(©1990 Zomar Productions, Ltd) 24 min.

Trench Emergency V0433

Alerts workers to the importance of using proper protection during excavation work and emergency procedures for trench collapses. Illustrates the dangers posed by trenches, shoring, and shielding. (©1993 Coastal Video Communications Corp.) 16 min.

Trenching & Excavation Safety V0196

Live footage and computer graphics provide clear explanation of the hazards created by digging trenches and excavations. Shows how these hazards are reduced by sloping, shielding, and shoring. Emphasis on personal and work safety. (©1987 Zomar Productions, Ltd) 18 min.

Trenching And Shoring : Hydraulic Shoring Installation V0771

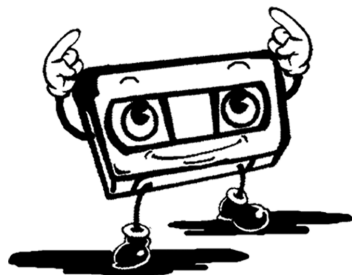

One type of trench protection is hydraulic shoring. Hydraulic shoring prevents failure of trench walls, is easy to install, and is easily pressure checked, and can be used around crossing utilities. Covers: Definition of vertical shores; Benefits of vertical shores; What are hydraulic walers; and Benefits of hydraulic walers. (©1996 Coastal Video Communications Corp.) 13 min.

Trenching And Shoring : Trench Box Installation V0767

Developed to teach employees how to understand trench hazards. Includes: Competent person; Trench shields; Selection of shield; Unloading; Assembly; Cohesion and soil, and Protective systems. (©1996 Coastal Video Communications Corp.) 14 min.

VIDEO TIP:

*Did you know?
You can reserve videos up
to six months in advance.*

**EXERCISE, PHYSICAL FITNESS****Back Injury Prevention V0365**

Discusses what each person can do to reduce the risk of back injury, showing the importance of stretching, maintaining good posture, strengthening back and stomach muscles, and lifting properly. Demonstrates simple yet effective stretching and strengthening exercises. Also available on V0382. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Back Safety For Landscape, Maintenance & Custodial Workers V0765

An invaluable guide to the basic steps that landscape, maintenance, warehouse and custodial workers should follow in order to avoid back injuries. Covers: Body mechanics; Lifting; Pushing; Common injuries; and Back braces. Demonstrates stretching exercises. (©1996 Coastal Video Communications Corp.) 19 min.

Controlling High Blood Pressure V0616

Describes in a drama the ways to reduce the risk of high blood pressure, reduce stress, exercise options and choosing a healthier lifestyle. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 13 min.

Diet For Energy V0621

"June Honda" and "Roseanne" explain how to have balance in diet and exercise. Discusses weight maintenance, the importance of maintaining good habits for eating and exercise. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 8 min.

Eight Minute Workplace Stretch V0967

Stretch program designed for general workplaces in two parts. Pt. 1 Eight minute follow along stretch program. Pt. 2 In depth exercises follow-up for training the exercise leader. (©2002 Optimum Health Fitness Consulting) 22 min.

Ergonomics : Break the RMI Habit V0768

Focuses on repetitive motions of the shoulders, back, arms, wrists and hands which may cause injuries. Gives suggestions for modifying workstations and minimize excessive movement in the industrial and office environments. Demonstrates five stretches. CC (©1997 Coastal Video Communications Corp.) 13 min.

Making Healthy Choices : Safe & Healthy Lifestyles V0421

Outlines some of the keys to selecting a healthy diet such as reading nutrition labels, limiting fat intake, and increasing complex carbohydrates. Shows the benefits of exercise. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Muscle Strains and Sprains V0963

Describes how the body moves and provides twelve stretches that can be performed in an industrial setting. Identifies risk factors that may develop into injuries. (©2002 Summit Training Source, Inc.) 20 min.

Personal Health & Fitness V0544

In this "Rocky" spin-off, physical fitness expert "Stocky" tells Pauly and Adrian why good exercise serves at least three important purposes: Maintaining or increasing strength and endurance; Preparing musculoskeletal frame for work demands through proper stretching; and Strengthening the mind and body connection. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Silver Stretch V0048

Kathy Norman, a nationally certified instructor and trainer and founder of Aeroflex, suggests this daily stretching program intended to increase your flexibility and range of motion as well as reduce the chance of injury. To receive booklets addressed in the video call the current phone number: 800-352-5173. (©1990 Purple Cross, Prairie States Life Insurance) 20 min.

Stretching Out At Work V0943

A program designed to motivate employees to reduce workplace injuries by demonstrating stretching techniques and proper body mechanics. Stretches are shown in a many work environments. Narration by Michael Melnik after a humorous lead in by the nutty professor. (©2001 Comprehensive Loss Management, Inc.) 12 min.

Stretchout : A Guide To Stretching In The Workplace V0120

Avoid muscle pulls, discomfort caused by repetitive motion, and strain due to tedious assembly work by teaming the basics of stretching. Explains the physiology of stretching, and illustrates the benefits of a regular stretching program. Includes 12 minute program with 17 minute demonstration. (©1989 CoreMedia Training Solutions) 27 min.

Summer Sports : Safety Wins! V0713

Through demonstrations and interviews with athletes and experts, explains how to enjoy the maximum benefits of sports, exercise, and avoid injuries. Demonstrates proper warm-up techniques. CC (©1997 Coastal Video Communications Corp.) 13 min.

Take Five : Lifting, Ergonomics & Stretching V0942

Three popular nine minute segments in a unique talk show setting with occupational therapist and injury prevention specialist, Michael Melnik. Each segment focuses on an individual topic demonstrating proper body mechanics and prevention techniques. Also available on V0874 and V0875 as separate programs. (©2000 Comprehensive Loss Management, Inc.) 27 min.

Take Five : Stretching V0876

In a TV interview format the basics of stretching are discussed in an efficient straightforward manner. Stay tuned for the black and white "commercial" and out takes at the end! (©1999 Safe Expectations) 9 min.

Trabajando Inteligentemente - no con más Dificultades: Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

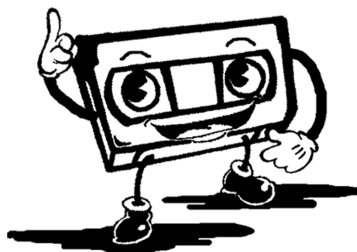

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts. Demonstrates correct work practices. English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Working Smarter - Not Harder : Ergonomics In Agriculture V0801

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts. Demonstrates correct work practices. Spanish version V0802. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1998 Department of Consumer Business & Services, Oregon OSHA) 16 min.

VIDEO TIP:

If a video is lost in transit, you must provide proof of shipping within seven days of the return due date.

**EYE SAFETY**

see also Personal Protective Equipment

Alto Impacto El Seguridad De Los Ojos**High Impact : Eye Safety V1042**

Graphic incidents motivate workers to wear proper eye protection. Covers: different types of eye protection, using eyewashes and emergency care for eye injuries. Intended for safety meetings. English version V1041. Warning! May be too graphic for some audiences. (©1998) 6 min.

Eye Injuries V0333

Injuries to the eye can happen in an instant. Graphically depicts injuries that can be suffered when proper eye care is ignored. (©1988 Safety Short Production, Inc.) 5 min.

Eye Protection : Why Gamble? V0710

Describes how the eye works, reviews workplace hazards to eyes, shows actual eye injuries. Describes various types of goggles and other eye protection. Motivates workers to wear protective eyewear. Industrial work environment. CC (©1991 Coastal Video Communications Corp.) 13 min.

Eyewash Showers & Stations V0472

Clearly demonstrates how to use eyewash showers, types of eyewash stations and proper locations. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

High Impact : Eye Safety V0695

Graphic reenactments of accidents: A hammer that sends a nail into the eye; Flying metal particles; Electrical flash from a short circuit; Popping slag while welding; Sulfuric acid that sprays a worker; A line-breaking accident. Warning! May be too graphic for some audiences. (©1994 ERI Safety Videos) 19 min.

High Impact : Eye Safety V1041

Graphic incidents motivate workers to wear proper eye protection. Covers: different types of eye protection, using eyewashes and emergency care for eye injuries. Intended for safety meetings. Short version of V0695. Warning! May be too graphic for some audiences. (©1998) 6 min.

I Am Joe's Eye V0128

Provides a comprehensive overview of the human eye at work. Alternating sequences of live action and colorful clay animation show the eye's structure and function. Describes signs that signal loss of vision. Information about the eye rather than eye safety in the workplace. (©1988 Pyramid Film & Video) 26 min.

Laser Safety V0994

Training for employees working with industrial lasers. Covers: Identifies different types of lasers, safety precautions to prevent eye injury and burns, proper eyewear protections, preventing secondary injury from indirect laser exposure, and potential hazards when working with lasers. CC (©2001 Summit Training Source, Inc.) 12 min.

Low-Power Lasers : Be Aware Of The Hazards V0479

Designed to provide employees with an awareness of the potential hazards of low power lasers. Reviews the hazard categories of lasers, describes the specific hazards of Class 2 and 3a lasers and explains the safety precautions that should be exercised when using them. (©1995 Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min.

Power Fastening Safety and You: A Partnership V0916

Testimonials to a safety attitude with air power tools in the residential construction work environment. Stresses the importance of using the correct trigger system for the job, keeping the finger off the trigger, wearing safety goggles, reading and heeding the instructions. (©2001 International Staple, Nail and Tool Association) 15 min.

PPE : Electrical V0477

Basic rules when working with electricity. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 12 min.

Pro-Active Safety Attitudes : Looking Out For Number One V0580

Underscores the importance of safety and safety training, using PPE, safety habits, and all employees take personal responsibility for safety. Covers: Safety affects workers and their families; Re-enactments of real-life accidents motivating workers to take precautions; and interviews with workers. CC (©1994 Coastal Video Communications Corp.) 15 min.

Protecting Your Eyesight V0988

Dramatic examples showing eye protection by any safety goggles or regular glasses compared to goggles stamped ANSI Z87. Title on label "Eye Protection." An L&I WISHA production. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2003 Department of Labor and Industries, State of Washington) 7 min.

Safety Showers & Eye Washes V0251

Reviews situations where safety showers/eye washes should be used and how to use them. Describes different types and how to operate, chemical splashes, first aid, assisting a victim, and maintenance and testing. (©1994 Long Island Productions) 12 min.

Your Eyes Are Different : A New Approach To Eye Safety V0458

A program in four parts on eye protection. Part 1: Why Your Eyes Are Different; Part 2: Eye Protection Works; Part 3: Procedures and Controls; and Part 4: First Aid. (29 CFR 1910.133) (©1994 CoreMedia Training Solutions) 16 min.

FALL PROTECTION

Fall Protection V0561

This program covers the following topics: Ladders; Step bolts and manhole steps; Stairs, ramps and bridging devices; Fall protection systems; Wall openings; Scaffolds; Mobile ladders, stands, and powered industrial platforms. Revised version: V0764. (©1995 Visionquest Films) 15 min.

Fall Protection & Prevention V0764

Provides the information employees need to make correct choices when working at elevations. Covers basic fall hazards, the potential injuries, identifies the conditions and activities likely to result in a fall, fall protection and fall arrest systems, and suitable anchorage points. Applications to residential construction environment. (Revised version of V0561 Fall Protection) (©1998 R M Distributors) 11 min.

Fall Protection Systems Training V0157

Shows proper use of fall protection equipment as required in OSHA's Personal Protective Equipment standard for general industry. Included is training on Fall Arrest Systems, Work Positioning Systems and Climbing Protection Systems. (©1992 CoreMedia Training Solutions) 20 min.

Personal Fall Protection : Hook Up! V0579

FACT: this video program actually saved a worker's life. A worker who had not been using his fall protection correctly, saw this program, made the adjustments and survived a major fall as a result. Complies with OSHA's proposed 1910.128.131. Covers: Equipment anchorage; Tie-off and use; and Body belts and harnesses. (©1995 Coastal Video Communications Corp.) 18 min.

Prevencción De Caídas High Impact : Fall Prevention V0777

The 10 accidents are shown to remind workers about short cuts and other common safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aeriallifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. English version V0669
(©1997 ERI Safety Videos) 19 min.

Residential Construction : Roofing Safety V0737

Focus on residential construction workplace safety. Covers job prep, walk-around safety inspection, ladder safety/safe access, fall protection, roofing hazards, and job completion housekeeping. Spanish version V0785. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1999 Department of Labor and Industries, State of Washington) 13 min.

Residential Construction: Framing Safety V0850

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov Spanish version V0851. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©2000 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - La Seguridad en el Techado

Residential Construction : Roofing Safety V0785

Intended to help provide employees and employers with the tools to make the residential workplace safe. Provides examples to meet to safety requirements. The construction employer is required to provide a safety program tailored to the operation and types of hazards involved; safety meetings; first aid training and kits; personal protective equipment necessary to

do the job safely; code requirements; and how to work safely during the roofing phase of residential construction. Covers: Job prep; Walk-around safety inspection; Ladder safety/safe access; Anchorages; Roofing; and Job completion. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - Seguridad en el Armazón

Residential Construction : Framing Safety V0851

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov English version V0850. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©2000 Department of Labor and Industries, State of Washington) 13 min.

FIRE DETECTORS

Fire Safety In The Home V0537

"Fire Marshal Bob" (Jim Carrey look alike) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 13 min.

VIDEO TIP:

Training booklets provided must be returned.

FIRE EXTINGUISHERS

Fire Extinguisher Safety V0564

Teaches fire extinguisher basics, types of fires and extinguishers, and proper techniques for an emergency in the office or industrial environments. CC
(©1996 Coremedia Training Solutions) 11 min.

Fire Extinguishers V0536

Fire safety procedures and use of fire extinguishers. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Fire Protection In Long Term Care Facilities : Responding To A Fire V0566

Basic procedures to determine priorities in attending to the fire, moving patients, and notification of facilities staff and the fire department.
(©1989 Media Resources Inc.) 19 min.

Fire Safety : Extinguishers V0387

In a relay race, team members demonstrate the use of fire extinguishers for distinct types of fire, showing the importance of being able to quickly assess the situation, choose the right extinguishers, and properly operate the right extinguishers for that situation. Safety Watch Series.
(©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Fire Safety : There's No Second Chance V0645

Discusses the elements of the fire, classes of fire, fire prevention, fire extinguishers, and Emergency Action Plan. CC
(©1996 Coastal Video Communications Corp.) 24 min.

Fire Safety In The Home V0537

"Fire Marshal Bob" (Jim Carrey look alike) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Fire Safety: Real, Real-Life V0804

Covers all the important basics regarding fire safety: classes of fires; extinguishing a fire; Emergency Action Plan (EAP); Awareness, Attitude, Action; and Real-life situations. CC

(©1998 Coastal Video Communications Corp.) 15 min.

Preventing Burns And Fires : Program 2 (Restaurant Safety) V0793

Food service is a hot service in more ways than one; every source of heat represents a hazard. Covers: Being prepared to work with the hot equipment found in a food service industry; How to avoid burns around the fryers, burners, and heat lamps; Fire prevention and hazard awareness; and Fire emergency procedures.

(©1992 National Restaurant Association, The Educational Foundation) 12 min.

Stop It Burning V0590

Systematically looks at types of fires, extinguishing agents, types of extinguishers and uses of each type of extinguisher.

Reviews the four main types of fires: Class A, B, C, & D.

(©1991 Safetycare, Inc.) 17 min.

Stop it Burning V0990

(Update of V0590.) Systematically looks at types of fires, extinguishing agents, types of extinguishers and uses of each type of extinguisher. Reviews the four main types of fires: Class A, B, C, & D. CC

(©2000 Safetycare, Inc.) 17 min.

FIRE SAFETY

Charlie Morecraft Story V0324

A compelling true story. Charlie Morecraft almost died in an industrial fire accident. There were times when he wished he had. He tells his story in 20 minutes — it seems like only 10. Charlie explains that — regardless what your job may be — you can't afford an accident, your family can't afford an accident, and your company can't afford an accident. "So now — whenever you do a job — step back, take a look at it and if it isn't safe, — don't do it."

(©1989 Media Resources Inc.) 20 min.

Electrical Emergencies: Proper Response V0883

Designed for employee training. This video examines: Effects and levels of electric shock; First aid procedures for electric shock victims; Electrical fires; Procedures for fighting Class C fires. CC

(©2000 Coastal Video Communications Corp.) 13 min.

Fire Awareness V0563

Appropriate for all audiences. Covers the nature, causes, and behavior of fire with emphasis on fire safety management.

(©1995 Safetycare, Inc.) 18 min.

Fire Hazard Recognition V0539

Reviews procedures to prevent fires including awareness of chemical and electrical hazards, and proper house-keeping. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Fire Prevention & Safety V0224

Explains what to do in case of fire and fire prevention. Discusses common causes of workplace fires; the importance of good housekeeping and other fire prevention measures. Shows various types of fire extinguishers, their use; and building evacuation procedures.

(©1991 AIMS Media) 15 min.

Fire Prevention V0482

(Humorous) Follow Jim Carrey look-a-like "Safe Indura," fire detective, through an investigation of an electrical fire. Fires can occur at any facility so a pre-fire plan should be established. Follow good housekeeping practices, practice proper handling of flammable liquids, and practice proper extinguisher use and evacuation procedures. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1995 Primedia Workplace Learning, Safety Watch) 16 min.

Fire Protection In Long Term Care Facilities : Moving Patients To Safety V0565

Shows patient-moving techniques in a fire emergency. Demonstrates options to safely move ambulatory and non-ambulatory patients to an area of refuge.

(©1989 Media Resources Inc.) 17 min.

Fire Protection In Long Term Care Facilities : Responding To A Fire V0566

Basic procedures to determine priorities in attending to the fire, moving patients, and notification of facilities staff and the fire department.

(©1989 Media Resources Inc.) 19 min.

Fire Safety : There's No Second Chance V0645

Discusses the elements of the fire, classes of fire, fire prevention, fire extinguishers, and Emergency Action Plan. CC

(©1996 Coastal Video Communications Corp.) 24 min.

Fire Safety In The Home V0537

"Fire Marshal Bob" (Jim Carrey look alike) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Fire Safety Review V0374

(Humorous) Max Monday, the safety cop, is on the worksite to coach fire safety. Shows how to minimize disaster by fire with: safety attitude; monitoring of emergency exits and equipment; a plan, and frequent evacuation drills. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Fire Safety: Real, Real-Life V0804

Covers all the important basics regarding fire safety: classes of fires; extinguishing a fire; Emergency Action Plan (EAP); Awareness, Attitude, Action; and Real-life situations. CC

(©1998 Coastal Video Communications Corp.) 15 min.

Flammable Liquids Safety V0257

Through a presentation which educates and motivates this video covers all pertinent information for employees who work with flammable liquids. Defines LEL, UEL, and flash points.

(©1993 Long Island Productions) 9 min.

Hotel Safety : A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back.

(©1996 Coastal Video Communications Corp.) 30 min.

Housekeeping : It Ain't Like The Movies V0574

Reviews the importance of good house-keeping and what to look for in your facility. CC

(©1995 Coastal Video Communications Corp.) 15 min.

NFPA 86 Ovens And Furnaces (1990 edition) Explosion Vents V0216

Explosion and fires in fuel fired electric and other heat utilization equipment constitutes a loss potential in terms of life, property, and production. While the cause of most furnace failures can be traced back to human failure including inadequate training of operators, lack of proper maintenance or improper application of equipment, the oven design itself also plays a sufficient role in the safe operation of ovens that contain flammable liquids, vapors, or gases. Nowhere is this more important than the design and placement of explosive vents. These vents give the blast of an accidental explosion an escape route, thus minimizing the risk to employees and damage to plant equipment. Describes the National Fire Protection Association Standards for Oven and Furnace Explosion Vents.

(©1993 Publisher Unknown) 5 min.

Preventing Burns And Fires : Program 2 (Restaurant Safety) V0793

Food service is a hot service in more ways than one; every source of heat represents a hazard. Covers: Being prepared to work with the hot equipment found in a food service industry; How to avoid burns around the fryers, burners, and heat lamps; Fire prevention and hazard awareness; and Fire emergency procedures.

(©1992 National Restaurant Association, The Educational Foundation) 12 min.

Remember Charlie V0707

Charlie tells his story. He was an oil refinery worker who was critically injured in an explosion that burned 45% of his body. Those who hear him speak will discard their attitudes of "accidents don't happen to me" and "safety is management's responsibility" and take personal responsibility for their own safety and the safety of their co-workers.

(©1994 Summit Training Source, Inc.) 56 min.

Stop It Burning V0590

Systematically looks at types of fires, extinguishing agents, types of extinguishers and uses of each type of extinguisher.

Reviews the four main types of fires: Class A, B, C, & D.

(©1991 Safetycare, Inc.) 17 min.

FIREFIGHTER TRAINING

Propane, Butane And Propylene (Version 2.) V0450

Identifies dangerous properties of LPG, safe storage and handling, and safe response to emergencies involving leaks and fires. Tells where propane, butane and propylene may be found, covers basic techniques for safe storage and handling, and suggests procedures for emergency action in the event of uncontrolled releases or fires.

(©1997 Media Resources Inc.) 29 min.

Rapid Intervention Teams / Firefighter Survival Series : Part 1 V0821

Segment 1: causes of firefighter fatalities and defines rapid intervention. Segment 2 : reviews tools used by RIT units and staffing. Segment 3: basic training. Segment 4 : thermal imaging camera demonstration. Segment 5: live burn simulation.

(©1997 Working Fire Emergency Training Systems) 54 min.

Rapid Intervention Teams / Firefighter Survival Series : Part 2 V0822

Segment 1: Air-pack bottle change-overs using both MSA and MMR air pack systems. Segment 2: Auxiliary Air Lines. Segment 3: PASS devices. Segment 4: Two-person search, without using a lifeline, where a downed firefighter is located with disarmed device. Segment 5: Four-person search locates a downed firefighter, using a search rope. Emphasis in this scenario is on deployment and team management.

(©1998 Working Fire Emergency Training Systems) 49 min.

Rapid Intervention Teams / Firefighter Survival Series : Part 3 V0823

Segment 1: Basic skill stations; entanglement, air bag procedures, and hydraulic tools stations. Segment 2: Interior breaching station. Segment 3: Exterior breaching. Segment 4: Air Pack Removal techniques.

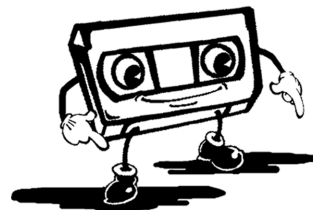

(©1998 Working Fire Emergency Training Systems) 46 min.

Rapid Intervention Teams / Firefighter Survival Series : Part 4 V0824

Segment 1: Enlarged opening technique demonstration. Segment 2: Scenario briefing. Segment 3: Mini-course for college credit options toward a degree in fire science.

(©1998 Working Fire Emergency Training Systems) 58 min.

VIDEO TIP:

Videos are easy to return. Just turn over the shipping label for the L&I address label!

FIRST AID

Basic First Aid V0153

Shows how to recognize the types of injuries that occur most frequently in workplace situations, and basic first aid techniques. Includes simple treatment for: shock; burns; eye injuries; simple and compound fractures; CPR; sprains; muscle pulls; lacerations; bleeding; and broken bones. Industrial work environment. (©1991 R M Distributors – Aims) 14 min.

Basic First Aid V0368

Various first aid treatments are demonstrated, emphasizing the need for careful assessment of the environmental dangers to the injured person and to the assisting person. Stresses the need to follow company policy and to know when to administer first aid and when to call for expert help. Also available on V0384. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Beat The Heat : Preventing & Treating Heat Disorders V0551

For those workers who must perform their jobs in the heat. Heat can cause bodily illness or injury, worksite accidents and even death. Covers: Thermo-regulation of the body; Importance of replenishing fluids; and Prevention and treatment. (©1995 Coastal Video Communications Corp.) 17 min.

Bloodborne Pathogens, Part 2 of 2 V0597

Orientation, review and overview focus for first aid response workers. Covers: universal precautions; Infection Control Kits. Does not cover HCV or post exposure treatment interventions. Safety Watch Series. (Part 1 V0546) (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Cold Stress V0406

Offers many tips for avoiding cold stress, recognizing symptoms of cold stress, and recovering from cold stress. Also suggests clothing choices for protection against cold, wet, or windy conditions. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

CPR : A Training Tape : Family And Community Version V0223

Covers assessments, one rescuer CPR and obstructed airway for the adult (Heimlich Maneuver). This part of the program is 18 minutes. A nine minute pediatric segment (infant and child CPR and obstructed airway) is also included. Also a short segment on who to call for help and prudent heart living. (©1993 Kinetic Inc.) 27 min.

CPR : A Training Tape : Professional Version V0225

Covers all aspects of Basic Life Saving including airway adjuncts, barrier devices and disease transmission during training. (©1993 Kinetic Inc.) 34 min.

CPR : A Training Tape : Renewal Version V0227

This renewal (re-certification) tape was developed to highlight the new changes within the context of reviewing all the major skills of the Basic Life Saving training and introduce the new standards. (©1993 Kinetic Inc.) 15 min.

Electrical Emergencies: Proper Response V0883

Designed for employee training. This video examines: Effects and levels of electric shock; First aid procedures for electric shock victims; Electrical fires; Procedures for fighting Class C fires. CC (©2000 Coastal Video Communications Corp.) 13 min.

First Aid : CPR Review V0478

Suggested to supplement or as refresher training. Safety Watch Series. CC (©1995 Primedia Workplace Learning, Safety Watch) 12 min.

First Aid : Hands And Fingers V0392

Discusses the kinds of work conditions that could cause injuries to the hands and fingers. Teaches workers to be prepared to respond to a medical emergency and the steps to take. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

First Aid Basics : Unit 2 : Victim Assessment & Treatment V0674

Unit two covers how to recognize injuries and illnesses that require first aid and their appropriate treatment. To assess the situation look for signs, listen to complaints and ask questions. Covers: Shock; Traumatic Injuries; Burns; Sudden Illness; Temperature Extremes; and Poisoning. (©1993 Coremedia Training Solutions) 54 min.

First Aid In The Wilderness V0032

Explains basic first aid procedures when medical help is not immediately available after an outdoor accident. Dramatizations demonstrate the essential primary steps, proper emergency care and carefully planned evacuation of the injured person in two different situations. (©1984 Beacon Films) 22 min.

First Aid in the Workplace V1005

May be used in conjunction with a formal first aid training course, but is NOT a substitute for training as required by WAC 296-800CC5005. Gives an overview of the role and responsibilities of the first person at the scene of an emergency. Tells how to contact help and what to do until help arrives. Covers minor first aid techniques and reviews basic CPR. CC (©1994 Summit Training Source, Inc.) 17 min.

First Aid On The Job : Initial Response V0567

Designed for those who may not be first-aid certified, but may be first on the scene of an accident. Emphasizes primary assessment of various illnesses and injuries on the job. Includes techniques for moving a victim, stopping bleeding, and precautions against bloodborne pathogens. Hosted by Bobby Sherman. CC version: V1001. Spanish Version V0533. (©1994 Coastal Video Communications Corp.) 26 min.

First Aid on the Job : Initial Response V1001

Designed for those who may not be first-aid certified, but may be first on the scene of an accident. Emphasizes primary assessment of various illnesses and injuries on the job. Includes techniques for moving a victim, stopping bleeding, and precautions against bloodborne pathogens. Hosted by Bobby Sherman. CC version of V0567 CC (©1994 Coastal Video Communications Corp.) 26 min.

First Response : ABCD's of CPR (Adult Version) V1057

Trains techniques for rescue breathing, cardiopulmonary resuscitation (CPR) and clearing airway obstructions in choking victims are demonstrated and described on adults. Describes heart attack and stroke recognition and treatment as well as the principles and implementation of the automated external defibrillator (AED). Designed to provide community and non-professional rescuers with the knowledge and skills required to deal with life-threatening emergencies. Effective support for Health units on emergency first aid, injury prevention and safety as well as staff training in these lifesaving procedures. (©2004) 32 min.

First Response : Bleeding and Soft Tissue Injuries V1056

Prepares viewer for emergency situations when the injured is bleeding, burned, cut or in shock and basic first aid techniques. Video allows time for discussion or practice. Stresses good infection control practice and AAA approach. Note: The graphic images in this program may not be suitable for all viewers. (©2004) 26 min.

First Response : Head & Spinal and Musculoskeletal Injuries V1058

Reviews how to help an accident victim who may have sustained a head or spinal injury or a broken bone. Explains how to recognize symptoms, ways of lessening pain, and splinting the injured body part. Using the acronym RICE, viewers learn how to help a victim rest, to immobilize the injury, put on cold compresses, and elevate the injured area. Note: The graphic images in this program may not be suitable for all viewers. (©2004) 22 min.

First Response : Medical Conditions and Poisoning V1059

Reviews response to victims who have experienced poisoning, severe allergic reaction, asthma, and other respiratory conditions, and diabetic crises and seizure. Training points: Be prepared. Have a first aid response plan in place. (©2004) 28 min.

Groundskeeping Safety : Dealing With Bugs And Critters V0806

Designed especially for public works, utility, government employees or anyone whose job function includes grounds maintenance or outdoor responsibilities, is essential for a safe work environment where you are exposed to pests — flying, creeping, crawling critters that can bite, sting and cause serious harm. Covers: Basic PPE; Snakes, wasps, bees, fire ants; Poison ivy/oak; Hantavirus; and First aid. CC (©1999 Coastal Video Communications Corp.) 16 min.

How To Stop Bleeding V0284

Features a medical doctor explaining the basics of how to stop or control bleeding in an emergency. Includes the precautions necessary to prevent transmitting HIV or HBV by contact with contaminated blood. Includes life saving emergency procedures needed at work or in the home. (©1993 R M Distributors - Safety Shorts) 7 min.

Los Primeros Auxilios en el Trabajo : Reacción Inicial First Aid On the Job : Initial Response V0533

Designed specifically for those who may not be first-aid certified, but may be first on the scene of an accident. Covers moving a victim, stopping bleeding, and precautions against bloodborne pathogens. Hosted by Bobby Sherman. English version V0567 (©1994 Coastal Video Communications Corp.) 27 min.

Medical Emergencies - Citizen Responder V0934

For all employees. Trains how to recognize emergencies such as heart attack, stroke, choking, asthma, diabetic emergency, and seizure. Shows warning signs, but not to do, and demonstrates what can be done until help arrives. Includes using defibrillators and Heimlich Maneuver. (©2000 Coastal Video Communications Corp.) 16 min.

Ounce of Prevention: Protecting Yourself from Bloodborne Pathogens V0161

Orientation for First Aid and Emergency Responders. Presents overview of the risks of exposure to BBPs in general industry. Includes description of: HIV & Hepatitis B; OSHA's requirements for BBP Standards in work practice and engineering controls, PPE, housekeeping, signs/labels, Hepatitis B vaccination and post exposure managements. (©1992 Comprehensive Loss Management, Inc.) 15 min.

Preventing Burns And Fires : Program 2 (Restaurant Safety) V0793

Food service is a hot service in more ways than one; every source of heat represents a hazard. Covers: Being prepared to work with the hot equipment found in a food service industry; How to avoid burns around the fryers, burners, and heat lamps; Fire prevention and hazard awareness; and Fire emergency procedures. (©1992 National Restaurant Association, The Educational Foundation) 12 min.

Recreational Safety V0226

Emphasizes the importance of performing warm-up exercises, using the right type of equipment, and wearing suitable clothing. Provides safety rules for hiking, climbing, and other sports activities, and demonstrates proper procedures for using trailers, motor homes, and recreational vehicles. Includes first aid tips and a list of organizations to consult for information on recreational safety issues. (©1988 AIMS Media) 20 min.

Rescue BBP : Nothing To Fear V0652

Covers: Exposure risks ; AIDS and Hepatitis B; Transmission of bloodborne diseases; Transmission of bloodborne pathogens in the workplace; Minimizing exposure; Precautions; Preventive work practices; Protective barriers; and CPR.
(©1997 Coastal Video Communications Corp.) 22 min.

Safety Showers & Eye Washes V0251

Reviews situations where safety showers/eye washes should be used and how to use them. Describes different types and how to operate, chemical splashes, first aid, assisting a victim, and maintenance and testing.
(©1994 Long Island Productions) 12 min.

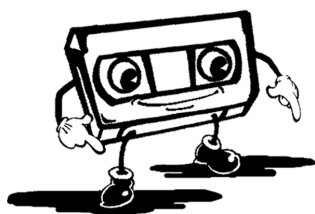

Stress Relief : The Heimlich Method V0026

Dr. Heimlich explains what stress is, how it works, and gives strategies for cooling off stressful situations and changing habits that invite stress.
(©1983 AIMS Media) 18 min.

Surviving The Cold V0066

A winter safety film including: recognizing and treating hypothermia; preparing the home for winter emergencies; winter travel; and blizzard survival.
(©1984 Pyramid Film & Video) 16 min.

VIDEO TIP:

For contact information on video vendors, look at the full video description on our web site.

FLAGGING SAFETY

Flagging Operations and Procedures V0869

Produced by Washington State DOT with The American Traffic Safety Services Association. Part five from the WORK ZONE SAFETY for Maintenance Operations on Rural Highways. Instructional in proper flagging basic skills of stopping, releasing, and slowing traffic. Also, teaches: one flagger/one direction, emergency situations, and night flagging operations.
(© Washington State Department of Transportation) 18 min.

Flagging: You're the Director V0730

Reviews vital flagging procedures, proper clothing and equipment, flagger position, stopping, releasing traffic and slowing traffic and unusual situations. CC
(©1994 Coastal Video Communications Corp.) 18 min.

Highway Construction And Maintenance Safety V0511

Gives guidelines for safe traffic control and safe work practices for flaggers and all other workers close to roadways. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Highway Work Zone Safety : One Step From Death V0862

Safety Awareness and general orientation for road construction workers. Through a series of dramatizations of accidents causing injury or death, the program emphasizes the importance of personal responsibility for safety in road construction work zones. Emphasizes the hazards of heavy equipment, work vehicles, and on coming traffic. Note: Some footage contains Washington State Code violations!
(©1995 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 11 min.

Highway Work Zone Safety : Traffic Control Safety V0865

Procedures for installing and maintaining effective traffic control through a highway work zone. Alerts construction workers to dangerous situations related to traffic movement. Note: Some footage contains Washington State Code violations!
(©1996 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 10 min.

Traffic Control - Danger in the Work Zone (Safety in the Work Zone) V0867

Discussion format narrated by Rick Olson, WSDOT, Director of Communications. Training discussion of flagging safety issues; includes a video within a video (11 min.). The training video segment includes : Pre-Plan; Setting up Traffic Control; Flagger Safety; Taking Down Traffic Control. Produced by WSDOT and The Laborers' International Union of North America.
(©1996 Washington State Department of Transportation & Laborers' International Union of North America) 30 min.

Traffic Control Thru Work Zones V0445

Shows set up traffic controls for short-term jobs. Clear and simple demonstrations explain step-by-step installation of the five traffic control areas, including: basic flagging techniques; safe taper lengths; positioning of channelizing devices; flashing arrow signs; and detailed work practices. Please note production date and check current rules.

(©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Washington Give 'em a Brake V0868

Washington State Law regarding Flaggers. Contains a clip of the Public Service Announcement for driver's awareness to safety throughout road construction zones. WORK ZONE SAFETY SERIES.
(©1995 Washington State Department of Transportation; RXL Pulitzer) 9 min.

FOOD SERVICES SAFETY

Hotel Safety : A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back.
(©1996 Coastal Video Communications Corp.) 30 min.

Kitchen Safety V0159

Addresses hygiene, personal protective equipment, manual handling, use of knives, slips, trips, and falls, dealing with kitchen fires and general hazards.
(©1990 Safetycare, Inc.) 15 min.

Preventing Burns And Fires : Program 2 (Restaurant Safety) V0793

Food service is a hot service in more ways than one; every source of heat represents a hazard. Covers: Being prepared to work with the hot equipment found in a food service industry; How to avoid burns around the fryers, burners, and heat lamps; Fire prevention and hazard awareness; and Fire emergency procedures.
(©1992 National Restaurant Association, The Educational Foundation) 12 min.

Preventing Cuts And Lacerations : Program 4 (Restaurant Safety) V0795

Food Service work environment. Covers: Preparing to use knives and the machinery. Shows the proper way to handle knives as well as how to clean and store; proper use of machinery such as slicers and grinders; and other hazards.
(©1992 National Restaurant Association, The Educational Foundation) 15 min.

Preventing Slips, Falls And Lifting Injuries : Program 3 (Restaurant Safety) V0794

Covers: Preventing slips and falls, reducing hazards, Lifting techniques; Ladder safety. Food Service work environment.
(©1992 National Restaurant Association, The Educational Foundation) 13 min.

Protecting Yourself And Your Customers : Program 1 (Restaurant Safety) V0792

Everyday in the food service industry employees work with tools and equipment that can cause serious injuries: a kitchen knife, a burner, a fryer, even a slip or fall can lead to a cut, burn or back injury. Covers: Hazards; Cost of accidents; and Benefits of accident prevention.
(©1992 National Restaurant Association, The Educational Foundation) 12 min.

Restaurant HazCom V0660

(Former Title: Hazard Communications.) Designed to help employees in restaurants meet OSHA training requirements. Describes Material Data Safety Sheets in detail. Covers: Hazardous material definition and effects; Importance of labeling, reading and following directions; Material Safety Data Sheets; and dangers of mixing chemicals.
(©1996 Long Island Productions) 13 min.

Restaurant Safety : Preventing Lifting and Carrying Injuries Preveniendo Lesiones al Levantar y Cargar Cosas Pesadas V0946

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers techniques for safe lifting of trays, boxes and other objects. Teen appeal. CC in English version only.
(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Preventing Slips, Trips, and Falls Preveniendo Resbalones, Tropezones y Caidas V0945

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers awareness of potential hazards, attention to details; proper footwear; safe lifting tips; hand washing, cleaning up spills, keeping pathways free of obstacles, and safety attitude. Teen appeal. CC in English version only.
(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Robbery Prevention and Awareness Cómo Prevenir Robos V0947

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers security precautions, closing procedures and presents several scenarios to show proper actions to take during robbery. These safety principles also apply in convenience stores or other businesses. Teen appeal. CC in English version only. CC
(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Teens Teaching Teens : Food Service Safety Tips V0961

Locally produced by Washington Restaurant Association with the WRA Education Foundation and L&I. Excellent orientation program by teens covering and the essentials of food service work environment. Includes teen rights, slips and falls, safe lifting, proper footwear, knife and blade safety, preventing burns.
(©2002 National Restaurant Association / Washington Restaurant Association) 10 min.

FOOT PROTECTION

see also Personal Protective Equipment

Because It's Your Foot V0964

Designed as a meeting opener for a foot protection or PPE presentation. Grabs attention, is fast paced, and has no spoken script. Visual. Industrial and construction work environments.
(©2001 Aurora Pictures) 4 min.

Complete Line Of Footwear V0513

OSHA requires the use of safety footwear when working in and around hazards. Examines appropriate types of work shoe based on the job and hazards; and should provide balance and support while protecting feet from impact and compression related injuries. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Foot Protection V0372

Shows examples of many styles of safety shoes and boots for many hazardous situations including dangers of explosive atmospheres; chemical spills; or nails, and glass or metal filings. Advises viewers how to pick the most appropriate safety footwear, using the American National Safety Institute (ANSI) label. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Safety Gear : Foot Protection V0099

Narrated by Martin Kove, this program explains proper safety shoes and their applications in both light and heavy industry.

(©1989 AIMS Media) 11 min.

FORKLIFT SAFETY**Alto Impacto : Montacargas Entrenamiento de Operadores High Impact : Forklift Operator Training V1043**

Forklift accidents re-created in this video show operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. English version V0778. Warning! May be too graphic for some audiences.

(©1998) 9 min.

Bicycle Safety In Plants & Factories V0535

Bicyclists training for rules, warning gear for bikes, maintenance, and defensive attitude while biking. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Carga y Elevación: Una Guía para la Seguridad en la Elevadora de Horquilla Agrícola**Load & Lift : A Guide To Agricultural Lift Truck Safety V0741**

In Spanish, covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre-inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity.

Includes standard and rough-terrain forklifts. English version V0740.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Color Of Danger V0053

Uses stop-action and coloring book techniques to give forklift operators a solid indoctrination on safe practices and the consequences of not looking for possible danger. Shows the dangers of poor forklift operation in various industrial settings, including docks, sawmills and warehouses.

(©1968 Barr Films) 16 min.

Forklift Case Histories : Serious Business V0497

Shows actual accidents — what went wrong and how that tragedy could have been avoided. Demonstrates the dangers of improper use of forklifts. Covers important safety rules to remember when driving or working around forklifts, including platforms, loading, and transporting. CC (©1995 Coastal Video Communications Corp.) 18 min.

Forklift Fundamentals : Get the Facts V0797

Meets the 1999 Washington Rule. Covers: Understanding forklift design, controls and instrumentation; Conducting a comprehensive pre-use inspection before each use; and Understanding forklift stability and the factors that affect it. CC

(©1998 Coastal Video Communications Corp.) 22 min.

Forklift Handling : Safety In Dangerous Situations V0826

This program reviews techniques for forklift operators in special situations such as slippery surfaces, heavy traffic areas, loading docks, ramps, and inside trailers/ramps. CC (©1999 Coastal Video Communications Corp.) 18 min.

Forklift Loading V0423

Detailed tips on safe loading, emphasizing the importance of assessing loads prior to lifting and of always being aware of the lift truck's center of gravity. Disclaimer: Forklift drivers must wear seatbelts. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 6 min.

Forklift Operations : Carry The Load V0798

Meets the 1999 Washington Rule. Covers: Surface conditions; Various loads and load stability; Lifting and putting down a load; Working with stacks; Traveling tips; Special hazards; and Operating safety. CC (©1998 Coastal Video Communications Corp.) 21 min.

Forklift Pedestrian Safety V1013

Intended for those on foot who work in areas where forklifts are being used. Dramatic footage gives those watching a new awareness of view from the driver's seat and realize that they cannot assume that the driver can always see them. Also illustrates how differences in handling and turning between forklifts and other vehicles. May be duplicated.

(©2003 L&I WISHA) 10 min.

Forklift Safety V0282

Explains OSHA operating requirements and operator maintenance. Stresses employee responsibility for safety and details the engineering principles of the forklift. Covers: Pre-operation safety inspections; Picking up a load; Driving with and setting down a load. Designed to ensure safe driving habits for all lift truck operators. (©1994 Long Island Productions) 12 min.

Forklift Safety V1047

General training for forklift operators. Gives an overview of forklift characteristics, handling techniques, stability and load limits, picking up and placing loads including elevated loads. Also covers pedestrian safety and working around other forklifts. Larry dramatizes disastrous mistakes. (©2004) 20 min.

Forklift Safety V1054

Three parts on one video. Part 1 : Basic Orientation (13 min) Covers various lift trucks, typical controls and features, pre-inspection. Part 2 : Best Operating Practices (14 min) Covers hazard awareness, pedestrian traffic, loading techniques, and stability triangle. Part 3 : Refueling Procedures (11 min.) Covers power sources for forklifts, safe removal and charging batteries, and PPE. CC (©2002) 39 min.

Forklift Safety (4 Parts on one Video) V0896

Update of V0116. Part 1 Operation 10 min. Trains drivers for pre-operation inspection, safe operation, types of forklifts, load handling, and the stability triangle. Part 2 Driving Skills 12 min. Covers principles of the stability triangle, load handling techniques, and hazard awareness; Part 3 The Professional Driver 11 min. Trains drivers to maintain a professional attitude to navigate through difficult situations. Part 4 Battery Changing / Refueling 6 min. Teaches techniques for changing batteries in electric-powered lift trucks and procedures for refueling gas, diesel and liquefied petroleum models (©1999 Summit Training Source, Inc.) 38 min.

Forklift Safety : The Responsible Operator V0301

Part 1: OPERATIONS: Forklift operations; refueling and battery changing; load capacity; stability triangle; and pre-operation inspection. Part 2: SAFE DRIVING SKILLS: driving skills; interaction with pedestrian traffic; proper load handling techniques; and hazard awareness in the driving environment. (©1994 Summit Training Source, Inc.) 25 min.

Forklift Training Video Video de Entrenamiento para la Elevadora de Horquilla V0429

Discusses the proper procedures of safe forklift operations. The forklift operator is responsible for inspection of the forklift and for reporting necessary maintenance. Recommended equipment inspection involves going through a pre-shift checklist: engine and operator compartments; controls; and gauges. (©1995 Northwest Environmental Services & Training) 20 min.

High Impact : Forklift Operator Training V0778

The eight forklift accidents re-created in this video shows operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. Warning! May be too graphic for some audiences. (©1998 ERI Safety Videos) 19 min.

High Impact : Forklift Safety Training V0334

Covers the importance of forklift operators and pedestrians following rules, the 13 most common accidents with lift trucks, characteristics and limitations of trucks, tip overs and stability, operating guidelines, visibility, loading docks and trailers, and operator attitude. Warning! May be too graphic for some audiences. (©1994 ERI Safety Videos) 19 min.

Load & Lift : A Guide To Agricultural Lift Truck Safety V0740

Covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. Spanish version V0741. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Powered Low-Lift Trucks : Walkies & Walkie/Rider Safety V0827

When OSHA issued its revised rule (1910.178), powered low-lift trucks were included in the new training requirements. Goes over training for operators of walkies and walkie/riders, transporters, pallet trucks, and platform trucks. Covers: Characteristics; Load handling; Pedestrian traffic; and PPE. CC (©1999 Coastal Video Communications Corp.) 17 min.

Safety On The Job : Powered Equipment In The Warehouse V0134

Illustrates proper techniques for handling equipment on loading docks, including checking trailer wheels, inspecting dock boards, working inside a rail car, operating forklifts and conveyer belts. Safety rules for stacking and picking orders are reviewed. Gives tips for the safe operation of hoists and conveyors. Motivates workers to wear appropriate PPE and utilize chemical safety precautions. (©1990 AIMS Media) 12 min.

Safety Watch Series, Vol. 2, No. 3, June 1995 V0419

Contains these four segments on safety issues: HAZCOM : CORROSIVES (V0420), MAKING HEALTHY CHOICES : SAFE AND HEALTHY LIFESTYLES (V0421), ELECTRICAL MAINTENANCE (V0422), and FORKLIFT LOADING (V0423). For descriptions of each segment, refer to specific titles numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 38 min.

Springfield : Lessons Learned V0635

A team at the Springfield site demonstrates the circumstances that surrounded the death of Ron Mills on November 3, 1996. Ron collided with a forklift which he didn't see and was killed while crossing the road. The team explains reliable methods established to prevent reoccurrence of this situation at Weyerhaeuser. (©1997 Weyerhaeuser Company) 13 min.

Warehouse Safety V0504

Focuses on careful use of industrial powered trucks and also shows tips for avoiding fire and other hazards that may be found in warehouse settings. Safety Watch Series. Suggested to supplement or as refresher training. Note: Forklift drivers must wear seatbelts. (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

VIDEO TIP:

Last minute requests may be impossible to fill. Plan ahead! Our most popular videos are often reserved many months out.

GAS CYLINDERS

Compressed Gas Cylinders V0407

Demonstrates techniques for proper handling, storing, and transporting compressed gas cylinders. Also covers tips on cylinder labels, consequences of a cylinder mishandled or knocked over, and some injuries when working incorrectly with cylinders. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Compressed Gases : Safe Handling V0800

Outlines the types of compressed gasses, proper storage and handling procedures, and safety precautions. Discusses the hazards of flammable, non-flammable, oxidizers and toxic gasses. CC (©1995 Coastal Video Communications Corp.) 18 min.

Compressed Gases Safe Handling V0494

Outlines the types of compressed gasses, proper storage and handling procedures, and safety precautions. Discusses the hazards of flammable, non-flammable, oxidizers and toxic gasses. (©1995 Coastal Video Communications Corp.) 18 min.

Cutting Torch Safety V0664

Trains employees about hazards associated with cutting torches. Covers: Safe cutting locations and ventilation concerns; Confined space and compressed gas cylinders; Personal Protective Equipment; Fire prevention and safety tips; and Equipment: parts, threading of attachments, inspection, and procedures. (©1995 Safety Source) 10 min.

Gas Cylinders V1019

Depicts hazards that can result of gases contained in cylinders are handled improperly. Describes how to properly store and handled many types of gases contained in cylinders. (©1995 Summit Training Source, Inc.) 6 min.

Oxy Acetylene Welding : Safety And Operations V0024

Defining gas welding, this video explains: procedures for opening regulator valves; and preparing a torch for use. (©1970 AIMS Media) 15 min.

Oxy-Acetylene Cutting V0208

Shows the safe use of oxy-acetylene cutting equipment. Includes: equipment and workshop safety; gas and gas cylinders, types and flow rates; cutting torch types and applications of the tips; equipment knowledge and maintenance. Also includes techniques for setting-up, cutting of metals, and closing down. (©1989 Safetycare, Inc.) 14 min.

Propane Safety V0657

Includes properties of propane, approved transport cylinders, proper use, refilling tanks and cylinders, and hazards of escaping propane. (©1994 R M Distributors - Safety Source) 11 min.

Proper Use Of Compressed Air V0510

Gives safety tips for using both breathable and work-related compressed air. Shows proper transporting, storing, and use of compressed air tanks. Offbeat opening when substitute teacher, Mr. Tylor, decides to show his film on compressed air safety, instead of the literature lesson. Silly. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 7 min.

Safe Handling Of Gases V0203

Compressed gas cylinders supply a wide variety of gases for a multitude of different industrial, medical, and domestic purposes. Covers: types of gases, hazards; safe handling and storage of gases; transportation of cylinders; leak testing; emergency procedures; and Material Safety Data Sheets. (©1992 Safetycare, Inc.) 19 min.

GENERAL SAFETY

see also Safety Orientation

Department Of Labor and Industries Videos (11 Programs) V0457

Contains eleven Department of Labor and Industries produced videos: Back Your Back : Back & Muscle Injury Prevention; Building Your Business in Washington State; Governor's Safety and Health Conference; Is It Worth Your Life? (CC and non CC); Lockout Tagout Safety Procedures; Making Claims Work (Open Captioned and Spanish Version — Que Debe De Saber De Su Reclamo); Oop's Your Office Is Showing: An Office Safety Program; Staying a Step Ahead; and Taking Charge of Claims for Your Business. For descriptions of each segment, refer to specific titles. You may make a copy of them or send 2 blank videos (VHS 120) and we will make a copy of all for you. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Labor and Industries, State of Washington) 161 min.

Department Of Labor and Industries Videos (3 Programs) V0456

Contains the first three Dept. of Labor and Industries produced videos: Back Your Back : Back & Muscle Injury Prevention; Lockout Tagout Safety Procedures; and Oop's Your Office is Showing : An Office Safety Program. For descriptions of each segment, refer to specific title. You may make a copy of them for your convenience or send a blank video (VHS 120) and we will make a copy for you.

(©1992 Department of Labor and Industries, State of Washington) 51 min.

Environmental Awareness : Recipe For A Cleaner World V0620

Covers an alphabet soup of agencies. Gives an overview of Clean Air Act, Clean Water Act, SDWA; Resource Conservation & Recovery Act, Toxic Substances Control Act, SCA, FIFRA, TSD, CERCLA, EPCRA, SARA, etc. (©1997 Coastal Video Communications Corp.) 22 min.

Goofy's Plant Safety Championships (Humorous) V0083

Features potential safety hazards and specific preventive measures to avoid serious accidents or injury in plant settings. Goofy as safety trainer, turns the real workplace into an athletic competition to illustrate the techniques for safe loading, emergency procedures for heavy lifting, avoiding slips and falls, handling chemical spills, and dealing with fires. Some animation.

(©1990 Disney Educational Productions) 13 min.

Governor's Industrial Safety And Health Conference (Open Captioned) V0625

The conference is rooted in a rich tradition of helping to make people aware of the latest ideas and technology in the fields of accident prevention and industrial hygiene. Here's a close-up look showing how safety and health experts can help you with your questions.

(©1997 Governor's Industrial Safety and Health Advisory Board, L&I, State of Washington) 6 min.

Hazardous Waste Operations And Emergency Response : HAZWOPER : (Awareness Level) V0306

Will help viewers comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: legislative background; hazardous materials definitions; activities and workers covered by the HAZWOPER standard; and awareness-level training.

(©1990 Coastal Video Communications Corp.) 20 min.

High Impact : Safety Awareness V0671

Covers 24 specific safety topics from ladder safety to lockout; stresses employee responsibility for personal safety; proper training and authorization for designated tasks; following procedures and company policy. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 21 min.

It Only Takes a Second V0926

Intended as an attention grabber, the graphic accidents dramatized in this program will force employees to think about the personal consequences of unsafe acts and how these actions will also affect the lives of their loved ones. Warning! May be too graphic for some audiences. (©1995 Aurora Pictures) 3 min.

It Only Takes a Second - Discussion Version V0911

A series of scenarios showing unsafe acts or conditions vs. the safe way. Topics include: driving safely, PPE, slips, trips and falls, machine guarding, and safe operating procedures. Expanded version of V0926. (©2001 Aurora Pictures) 24 min.

Pro-Active Safety : The Self-Inspection V0582

Teach employees how to stay safe and healthy by teaching them how to keep an eye out for danger signals on the job.

Covers: Identification; Assessment; Intervention; Maintenance; Task exposure analysis; Self-inspection during the maintenance step; and Making the most of self-inspections. (©1996 Coastal Video Communications Corp.) 15 min.

Pro-Active Safety Attitudes : Looking Out For Number One V0580

Underscores the importance of safety and safety training, using PPE, safety habits, and all employees take personal responsibility for safety. Covers: Safety affects workers and their families; Re-enactments of real-life accidents motivating workers to take precautions; and interviews with workers. CC (©1994 Coastal Video Communications Corp.) 15 min.

Remember Charlie V0707

Charlie tells his story. He was an oil refinery worker who was critically injured in an explosion that burned 45% of his body. Those who hear him speak will discard their attitudes of "accidents don't happen to me" and "safety is management's responsibility" and take personal responsibility for their own safety and the safety of their co-workers.

(©1994 Summit Training Source, Inc.) 56 min.

Safety Watch Series, Vol. 1, No. 3, June 1994 V0380

Contains these four segments on safety issues: HAZCOM : LABELS AND MSDSs (V0351), HEARING PROTECTION : HCP & PPE (V0352), PORTABLE POWER TOOLS (V0353), and GROUNDS KEEPING : LAWN MOWER SAFETY (V0354). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 35 min.

Safety Watch Series, Vol. 1, No. 5, August 1994 V0382

Contains these four segments on safety issues: EMERGENCY PREPAREDNESS (V0359), LOCKOUT/TAGOUT (V0360), INDUSTRIAL ERGONOMICS (V0361), and ASBESTOS AWARENESS (V0362). For descriptions of each segment, refer to specific titles and title numbers as listed here.

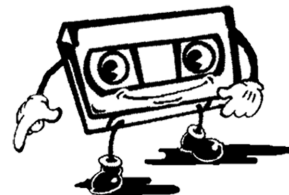

(©1994 Primedia Workplace Learning, Safety Watch) 31 min.

Safety Watch Series, Vol. 1, No. 6, September 1994 V0383

Contains these four segments on safety issues: HAZMAT SPILLS : ARE YOU READY? (V0363), EYE PROTECTION (V0364), BACK INJURY PREVENTION (V0365), and LEAD AWARENESS (V0366). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 34 min.

VIDEO TIP:

Remove the UPS shipping sticker on the back of the shipping box before shipping videos back to us. We want your videos to come back to us and not back to you!

Safety Watch Series, Vol. 1, No. 7, October 1994 V0384

Contains these four segments on safety issues: RESPIRATOR MAINTENANCE (V0367), BASIC FIRST AID (V0368), HAZARDOUS WASTE AWARENESS (V0369), and LOCKOUT/TAGOUT : THE BASICS (V0370). For descriptions of each segment, refer to specific titles and titles numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 28 min.

Safety Watch Series, Vol. 1, No. 8, November 1994 V0385

Contains these four segments on safety issues: HAZARD RECOGNITION (V0371), FOOT PROTECTION (V0372), ELECTRICAL HAZARDS : COMMON MISTAKES (V0373), and FIRE SAFETY REVIEW (V0374). For descriptions of each segment, refer to specific title numbers as listed here. (©1994 Primedia Workplace Learning, Safety Watch) 29 min.

Safety Watch Series, Vol. 1, No. 9, December 1994 V0386

Contains these four segments on safety issues: FIRE SAFETY : EXTINGUISHERS (V0387), WHY PERMITS ARE IMPORTANT (V0388), FORKLIFT SAFETY (V0389), and WELDING AND CUTTING (V0390). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 34 min.

Safety Watch Series, Vol. 1, No. 10, January 1995 V0396

Contains these four segments on safety issues: FIRST AID : HANDS AND FINGERS (V0392), PORTABLE HAND TOOLS (V0393), ELECTROMAGNETIC FIELD AWARENESS (V0394), and CONFINED SPACES : YOUR TRAINING (V0395). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 29 min.

Safety Watch Series, Vol. 1, No. 11, February 1995 V0398

Contains these four segments on safety issues: SLIPS, TRIPS & FALLS (V0399), HANDLING HAZARDOUS MATERIALS (V0400), STRESS IN THE WORKPLACE (V0401), and MACHINE GUARDING (V0402). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 37 min.

Springfield : Lessons Learned V0635

A team at the Springfield site demonstrates the circumstances that surrounded the death of Ron Mills on November 3, 1996. Ron collided with a forklift which he didn't see and was killed while crossing the road. The team explains reliable methods established to prevent recurrence of this situation at Weyerhaeuser.

(©1997 Weyerhaeuser Company) 13 min.

What The ISO Standards Mean To Safety Managers V0618

The International Organization for Standardization is a non-governmental organization that sets standards so that participating countries can count on materials, products, processes and services to meet a specified standard in the global market. Describes the concepts, focus, and benefits. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 10 min.

GRAIN ELEVATORS

Commercial Grain Handling : Safeguards To Success V0308

Focuses on safety and health in commercial grain handling facilities. Intended audience is management, staff and employees of commercial grain handling operations. (©1992 Department of Agricultural Communications, Oklahoma State University) 16 min.

Deadly Dust II V0220

Discusses the hazards that are possible in the grain industries that have "Deadly Dust" potential. Identifies the seven events needed at a precise time to cause a grain dust explosion: Oxygen; Fuel Source (dust); Dust must be fixed or suspended in the air; Minimum concentration of dust is needed; Ignition source; Dry dust; and a confined or closed space where pressure will build up. (©1990 Cooperative Extension Service, Kansas State University) 30 min.

Deadly Dust III V0440

All employees should view DEADLY DUST II [V0220] before viewing DEADLY DUST III. Featured are two employees who survived major dust explosions, dramatic scenes of an actual explosion, the devastation, injuries and fatalities from major explosions and stop motion demonstrations of how primary and secondary dust explosions occur. CC

(©1995 Department of Communications, Dole Hall, Kansas State University) 22 min.

GRINDING

High-Impact : Metal Working Safety V0670

Re-creates ten industrial accidents involving metal working to illustrate the necessity of following proper safety procedures. Reviews safety issues that are important for operating brake presses, grinders, metal cutting shears and other machines. Major points: Understand machine operations and potential hazards; Receive training and authorization before operating any tool or machine; Use the appropriate PPE; and observe operating procedures at all times. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 22 min.

Machine Cutting, Grinding And Sanding V0489

Don't get caught in the Hazard Zone! Discusses unique hazards in operating heavy equipment. Shows preventative measures for ensuring safe operation of grinding, cutting, and sanding equipment. SafetyWatch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Safe And Effective Grinding V0218

Shows how to operate an off-hand grinding machine safely and efficiently. Includes: Types of grinding machines; Components of a grinding machine; Types of abrasive wheels; Abrasive wheel identification; Inspecting abrasive wheels; Fitting a new wheel; Personal safety; Dressing and truing abrasive wheels; How to use an off-hand grinding machine; and Sharpening a twist drill. (©1991 Safetycare, Inc.) 18 min.

HAND SAFETY

see also Personal Protective Equipment

Blink : And You Could Lose Your Hand V0667

Recounts the story of Calvin, a mill worker who suffered a severe hand injury while operating a paper making machine. Topics include: the injury; effects on Calvin's family; and accident prevention around nip points. (©1997 ERI Safety Videos) 18 min.

Ergonomic Tools V0487

(Humorous) In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders. Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Essential Elements Of Hand Safety V0679

Comprehensive coverage of: Hand safety awareness; Hand hazards (mechanical hazards, chemical hazards, thermal hazards, other general hazards); Safe work procedures and practices; Engineering and administrative controls; and Personal protective equipment. Shows a wide variety of industrial work environments. (©1996 Safetycare, Inc.) 13 min.

Every Time I Look At My Hand... V0668

Features testimony from workers who have suffered traumatic, disabling hand injuries. Through their testimony, the viewer will learn the importance of taking the time to do a job correctly. Nip points, loose clothing and jewelry, lockout/tagout and using proper tools are all covered. (©1994 ERI Safety Videos) 15 min.

First Aid : Hands And Fingers V0392

Discusses the kinds of work conditions that could cause injuries to the hands and fingers. Teaches workers to be prepared to respond to a medical emergency and the steps to take. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Give Safety A Hand : Knife And Blade Safety V0568

Describes safe procedures in office and industrial environments when handling knives, blades, and box cutters. (©1994 Coastal Video Communications Corp.) 9 min.

Hand Protection V0356

Discusses the uses of gloves for hazard protection, illustrating a wide variety of glove designs suited for many different circumstances. Describes the situations which call for cleaning and storing gloves for future use. Also covers the basics of glove care for all situations. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Hand Protection : Lessons for a Lifetime V0700

Features testimonials from workers with severe hand injuries. Covers hazard assessment, hand, machine, and electrical hazards, glove selection and maintenance. Motivational. Warning! May be too graphic for some audiences. CC (©1995 Coastal Video Communications Corp.) 22 min.

Hand Safety V0096

Includes interviews with actual victims, and a medical expert to point out dangers to hands when using equipment improperly. Discusses the hazards of pinch points, hot spots, rotating surfaces, automated machinery and jewelry / loose clothing. Explains proper use of hand tools, wrenches, screwdrivers, and knives. Emphasises the safety of machine guards. (©1987 Coastal Video Communications Corp.) 15 min.

Hand Safety The Irreplaceable Tools V0250

This program identifies the three important steps in guarding against hand injury: potential hazards; safe work procedures; and correct use of protective personal equipment. Aimed at the general workforce. (©1989 Safetycare, Inc.) 10 min.

Hand, Wrist And Finger Safety V0602

In the "Safety Watch News" format, covers activities that involve constant, repetitive motion of the hands, fingers, or wrists that can result in injury to those extremities over time. Also, covers machine guards, following lockout/tagout procedures; and using proper personal protective equipment. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 14 min.

Hazards of Long Hair, Loose Clothing, and Jewelry V0834

Rotating shafts, moving machinery and other objects in industrial operations can unexpectedly "bite" much like a creature in the wild. Shows how to reduce the chance of such an injury by controlling long hair, not wearing loose clothing, dangers of gloves, and hazard awareness of wearing jewelry at work. (©1999 ERI Safety Videos) 10 min.

VIDEO TIP:

Need a loan extension? Call 1-800-574-9881 to extend for up to a week.

High Impact : Hand Safety V0330

This "Real World" video was produced on factory floors of the following industries: Paper Making, Meat Packing, Metal Working, Heavy Assembly, Foundry Operations, Sheet Metals Forming, and Industrial Maintenance. Topics covered: Pinch points; Hot surfaces; Arm Protectors; Long hair; Lock-out; Pinch points; Hot running nips; Loose clothing; and Guards. Warning! May be too graphic for some audiences.

(©1994 ERI Safety Videos) 19 min.

Latex Allergies : A Closer Look V0808

Explains the routes of exposure and self-protection. Covers: Allergies; Who's at risk; Personal protective equipment; Office supplies; Foods; Housekeeping; Allergic reactions; Irritant and allergic contact dermatitis; and Immediate Hypersensitivity. (©1998 Long Island Productions) 10 min.

Machine Cutting, Grinding And Sanding V0489

Don't get caught in the Hazard Zone! Discusses unique hazards in operating heavy equipment. Shows preventative measures for ensuring safe operation of grinding, cutting, and sanding equipment. SafetyWatch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Portable Hand Tools (Humorous) V0393

(Humorous) Join Tom, the Tool Guy, and his assistant, Bob, for a touch of humor while reviewing the basics of using hand tools. Emphasizes proper use and transporting tools correctly, PPE, inspection, types of hand tools (hammers, screw drivers, pliers), ergonomics, and choosing the proper tool for the job. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use such as screwdrivers, pliers, wrenches, hammers, tools. Demonstrates the correct methods of use and PPE. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home.

(©1987 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Powered Hand Tool Safety: Handle with Care V0839

Emphasizes the basic safety principles with direct application to powered hand tools on and off the job. Discusses: Hazards and safety measures; Proper use of PPE; and Tool pre-inspection. Specific tools include saws, drills, pneumatic tools, and powder-actuated tools. CC

(©2000 Coastal Video Communications Corp.) 22 min.

Preventing Cuts And Lacerations : Program 4 (Restaurant Safety) V0795

Food Service work environment. Covers: Preparing to use knives and the machinery. Shows the proper way to handle knives as well as how to clean and store; proper use of machinery such as slicers and grinders; and other hazards.

(©1992 National Restaurant Association, The Educational Foundation) 15 min.

HANTAVIRUS

New Hantavirus V0528

Where did the illness come from and how can we prevent it? Discusses the outbreak, clinical description, laboratory diagnosis, treatment, surveillance, and prevention. Virus is linked to the Deer Mouse and the Cotton Rat. Produced for medical professionals. CDC production; can be duplicated.

(©1993 Center for Disease Control and Prevention) 57 min.

Preventing Hantavirus Disease V0527

See a still presentation of this video at <http://www.cdc.gov/ncidod/diseases/hanta/html/hv94cont.htm> During 1993, a new hantavirus was identified in the United States. The virus causes Hantavirus Pulmonary Syndrome (HPS) and is

transmitted by the Deer Mouse and the Cotton Rat. Doctors and scientists discuss facts covering the following topics: Symptoms; Transmission; Risk factor; Treatment; and Prevention. Produced for the general public. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Center for Disease Control and Prevention) 26 min.

HAZARD COMMUNICATION

Chemical Handling : General Principles V0611

An in-depth training program on safe work practices for handling hazardous chemicals. Covers: Safety procedures; Flammables, corrosives, and solvents. This video can be used to help satisfy training requirements of the Hazard Communication Standard.

(©1996 Coastal Video Communications Corp.) 16 min.

Chemical Handling Safety : Basic Principles (Updated General Principles) V1036

A comprehensive overview of the Chemical Handling Series with general information about reading labels and material safety data sheets; classification of flammables, toxics, corrosives and reactives; compressed gas storage and handling, chemical storage and handling; chemical hazard identification; and DOT labels. Describes the types of exposure risks associated with chemicals. Emphasizes the importance of PPE and proper emergency response.

Updated version of V0611

(©2003) 17 min.

Chemical Hazard Communication : Your Right To Know V0040

Divided into three parts, this video covers: Part 1: (8 min.) Right-to-Know. Discusses Chemical Hazard Communication Programs, MSDS, and labeling. Part 2: (12 min.) Material Safety Data Sheets. Part 3: (18 min.) Hazardous Materials Identification System. Old production, poor technical quality.

(©1986 Department of Social and Health Services & the Department of Corrections) 38 min.

Handling Hazardous Materials V0400

Offers tips for the safe use of hazardous materials emphasizing the importance of proper containers, container labeling, and storage of flammable and corrosive materials. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Hazard Communication : Learning The System V0013

Introduction to the hazard communication act for employees. Stresses: individual responsibility, identification of dangerous chemicals, labeling, MSDS's, physical & health hazards, and routes of absorption. (©1986 Comprehensive Loss Management, Inc.) 16 min.

Hazard Communication : Signs of Safety V1010

Catchy intro music will stick with workers as they learn to identify chemical warning labels, review chemical hazards, signs and the elements of Material Safety Data Sheets. CC (©2003 Summit Training Source, Inc.) 13 min.

Hazard Communication : The Right-To-Know, The Right-To-Understand, Part 1 : Awareness And Identification V0732

OSHA's standard 1910.1200 is about communication: Part One covers chemical inventory, a written Hazard Communication Program, employee training responsibilities, basic hazards associated with blocks of chemicals — Flammables, combustibles, oxidizers, reactives, and heavy concentration of interpreting labels and labeling.

(©1995 Industrial Training, Inc.) 9 min.

Hazard Communication : The Road To Safety V0647

Outlines the training requirements of the HAZCOM standard. Explains various physical and health hazards, using warning labels and MSDSs, and identifies potential hazards. CC

(©1995 Coastal Video Communications Corp.) 16 min.

VIDEO TIP:

Late videos must be shipped by overnight delivery service.

Hazard Communication : Your Safety Net V0770

Gives overview of types of chemicals in the workplace. Explains the requirements of OSHA's Hazard Communications Standard. Describes physical and health hazards. Explains exposure limits and describes how engineering controls and PPE are used to keep exposure to safe levels. Lists the information found on Material Safety Data Sheets and labels.

(©1998 Coastal Video Communications Corp.) 19 min.

Hazard Communication Standard For Construction : 29 CFR 1926.59 V0174

Describes a typical hazardous communication inspection. Procedures include: identification of all hazardous chemicals on site; all containers properly labeled; MSDS for chemicals are available to employees; and awareness training in hazards of the chemicals.

(©1993 National Technical Information Service) 14 min.

Hazard Communications - Your Right To Know! V0684

Teaches awareness of health and physical hazards; First aid procedures; Spill cleanup procedures; Material data safety sheets; and Employees "right-to-know" about workplace chemicals.

(©1993 Long Island Productions) 4 min.

HAZCOM : Labels & MSDSs V0351

Identifies the pieces of information needed for all hazardous chemical labels and discusses the benefits of these labels. Details the specific informational requirements of the MSDS document. Emphasizes the importance of each individual knowing where the MSDS sheets can be found at the jobsite and how to use them. Safety Watch Series. Suggested to supplement or as refresher training.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

HAZCOM : Reducing Exposure V0425

Engineering controls, administrative controls or safe work practices, and personal protective equipment are the three main ways to reduce hazardous chemical exposure. Gives examples and reviews PEL's and MSDS's for chemicals exposure. Safety Watch Series.

(©1995 Primedia Workplace Learning, Safety Watch) 10 min.

HAZCOM : Review V0349

Reviews the solid, liquid, and gas forms which chemicals come in and the methods by which chemicals enter the body. Outlines the basic requirements of the OSHA Hazard Communication Standard which is designed to minimize dangerous exposures. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

HAZCOM : Training V0357

Shows the elements of training for recognition of hazards and preventing chemical overexposure. Staff must be familiar with specific physical chemical hazards and health hazards in their work environment and must follow safe work practices. This frequently includes the use of personal protective equipment. Safety Watch Series. Suggested to supplement or use as refresher training.

(©1994 Primedia Workplace Learning, Safety Watch) 9 min.

HAZCOM Case Histories : Learn From Their Mistakes V0336

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." Spanish version on V0799.

(©1994 Coastal Video Communications Corp.) 19 min.

HAZWOPER : Role Of The First Responder V0488

Overview of Hazcom requirements and the specific responsibilities of the first responder. To be successful in this role, the first responder must be prepared for emergencies, be familiar with all hazardous materials on site, be observant of the environment and use the proper PPE when responding to a problem. Safety Watch Series. CC

(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Historias des Casos sobre la Comunicación del Peligro HAZCOM Case Histories : Learn From Their Mistakes V0799

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." English version V0336.

(©1994 Coastal Video Communications Corp.) 19 min.

Ounce Of Prevention (Module 1) V0752

Designed for Veterinary practice owners to develop safety and health hazard communication programs. Covers: Responsibilities of the practice owner/operator; and Consequences of non-compliance. Includes hazardous materials present in veterinary practices, potential risks such as exposure to pesticides, hazardous gases, photochemicals, disinfectants, cleaners, radiation, needles, scapulas, heavy lifting, and animal bites. (©1994 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Gives health and safety information for veterinary employees and encourages their involvement in an ongoing health and safety program. Covers: Hazards and hazardous materials; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1994 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Recognition Evaluation And Control Of Hazards V0678

This program's object is to examine the options available and suggest strategies that can be used in all work places. Areas covered are: Recognition; Evaluation; and Control. With the control measure the following points are covered: Elimination; Substitution; Administrative controls; Engineering controls; and Personal protective equipment.

(©1991 Safetycare, Inc.) 14 min.

Recognizing Hazards V1015

Encourages front line workers to have an eye for safety hazards in the workplace; to identify and report to supervisor to prevent accidents. Demonstrates stepping back and looking at the workplace critically using all the senses. Industrial work environment. (©2001 Summit Training Source, Inc.) 5 min.

Restaurant HazCom V0660

(Former Title: Hazard Communications) Designed to help employees in restaurants meet OSHA training requirements. Describes Material Data Safety Sheets in detail. Covers: Hazardous material definition and effects; Importance of labeling, reading and following directions; Material Safety Data Sheets; and dangers of mixing chemicals. (©1996 Long Island Productions) 13 min.

Right To Know : Workers & The Community V0476

In an old television sitcom format describes how the local Emergency Planning Committee can tell what chemicals are in the community and how to respond to a chemical emergency. Companies must provide MSDS's to the local fire departments on all chemicals that meet or exceed the EPA's threshold reporting criteria. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Safety First : Safety Is Important V0756

(Pictograms For The Food Processing Plant) A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. Spanish version V0757.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 5 min.

Safety Watch Series, Vol. 1, No. 2, May 1994 V0379

Contains these four segments on safety issues: INTRODUCTION TO HEARING PROTECTION (V0347), FALL ARREST SYSTEMS (V0348), HAZCOM : REVIEW (V0349), and SAFE DRIVING (V0350). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 30 min.

Safety Watch Series, Vol. 2, No. 3, June 1995 V0419

Contains these four segments on safety issues: HAZCOM : CORROSIVES (V0420), MAKING HEALTHY CHOICES : SAFE AND HEALTHY LIFESTYLES (V0421), ELECTRICAL MAINTENANCE (V0422), and FORKLIFT LOADING (V0423). For descriptions of each segment, refer to specific titles numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 38 min.

Safety Watch Series, Vol. 2, No. 4, July 1995 V0424

Contains these three segments on safety issues: HAZCOM : REDUCING EXPOSURE (V0425), BLOODBORNE PATHOGENS : PROTECTING YOURSELF (V0426), and UNDER THE INFLUENCE : ALCOHOL IN THE WORKPLACE (V0427). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 26 min.

Small Spill Clean Up V0617

Using the "Mission Impossible" format, Mr. Phipps's along with his "Spill Clean-Up Force" existing of John Kragen, Mac Hunter, Blaire Williamson, and Steven Hart's mission: to inform employees of substance identification and hazard evaluation, communication with the appropriate personnel, ensuring personal protection as well as control procedures, containment, and cleanup. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 18 min.

Warning Labels And Signs : Get The Message V0656

Identifies and defines various signs and tags. Describes HAZCOM, NFPA, HMIS, HAZMAT, SMARTTK labeling systems. (©1996 Coastal Video Communications Corp.) 17 min.

What's Wrong With This Picture? V0012

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection & use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. For Closed Caption version see: V0783. (©1989 Aurora Pictures) 17 min.

What's Wrong With This Picture? V0783

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. CC (©1989 Aurora Pictures) 17 min.

You're In Control : A Hazard Communication Review V0205

A refresher for employees previously trained on right-to-know hazard communication or as initial hazard communication training for new employees. Includes basic responsive procedures: container labels and the MSDS; hazards associated with the chemicals; controlling the hazards; and emergency preparedness.. (©1992 Comprehensive Loss Management, Inc.) 18 min.

HAZARDOUS SUBSTANCES/MATERIALS**Anhydrous Ammonia V0491**

Covers basic facts, personal protective equipment, emergency response and effects of ammonia on the body. Emphasizes the dangers of exposure and how to prevent release. (©1995 Coastal Video Communications Corp.) 19 min.

Asbestos : Controlling The Hazard V0071

An overview of the asbestos hazard for employees with minimal exposure to asbestos. Instruction for removal and/or disposal of asbestos materials. Includes protection measures, engineering controls and monitoring. (©1985 Comprehensive Loss Management, Inc.) 30 min.

Asbestos Awareness : Are You At Risk? V0430

Defines asbestos. Covers five areas required by OSHA standards for asbestos awareness training: forms of asbestos; health effects; possible locations; recognizing damage and deterioration; and housekeeping requirements. CC (©1994 Coastal Video Communications Corp.) 23 min.

Bloodborne Pathogens In The Workplace : Reducing The Risk V0553

Overview of Bloodborne pathogens exposure risks in general industry. Employers will want to refer to state and local regulations. Lacks requirements for use of safer sharps devices and other environmental controls. Covers Hepatitis B and HIV. (©1992 Safetycare, Inc.) 12 min.

Chemical Handling : General Principles V0611

An in-depth training program on safe work practices for handling hazardous chemicals. Covers: Safety procedures; Flammables, corrosives, and solvents. This video can be used to help satisfy training requirements of the Hazard Communication Standard. (©1996 Coastal Video Communications Corp.) 16 min.

Chlorine : Treat With Respect V0727

Outlines the health hazards associated with chlorine and tells how to prevent exposure. Covers proper response to chlorine emergencies, storage and handling, transportation, spills, leaks, fires, and explosion hazards. (©1996 Coastal Video Communications Corp.) 26 min.

Combination Vehicles And Endorsements V0556

Practical for new and seasoned drivers with Class A endorsements. Covers: Double and triple trailers; Passenger vehicles and buses; and Tank vehicles. (©1990 Coastal Video Communications Corp.) 28 min.

Decontamination : A Matter Of Life! V0305

Helps satisfy training requirements for the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA. Covers: tool drop; wash/rinse; cloth/equipment removal; shower/dry/redress; and recordkeeping. (©1992 Coastal Video Communications Corp.) 17 min.

Hazardous Materials V0666

Defines hazardous materials. Gives thorough presentation of MSDS information and use of labels. Covers: PPE; rules for use and storage of flammables and fuels; spill and accident procedures including fire safety; and special shop/maintenance fluids and materials: batteries, solvents, corrosives, glues, paint, exhaust, and metal grindings. (©1997 Long Island Productions) 23 min.

Hazardous Materials Transportation : What You Don't Know Can Hurt You V0608

Everyone involved in shipping, handling, transporting, and/or storing of hazardous materials must be trained in HAZMAT procedures. This video will help supervisors and employees understand the DOT regulation and comply with OSHA's 49CFR 171CC80 standard. Covers: Scope of hazardous materials regulations; Defines terms and requirements; and Initial response to the HAZMAT incidents. (©1996 Coastal Video Communications Corp.) 20 min.

Hazardous Waste : Helping Small Business Understand The Law V0058

Created by the Department of Ecology, this video identifies hazardous chemicals and steps to take to prevent accidental leakage of chemicals. (©1988 Department of Ecology, State of Washington) 25 min.

Hazardous Waste Awareness V0369

Discusses the properties of ignitable, corrosive, reactive, and toxic waste and the processes involved with determining proper handling and storage of hazardous material. Outlines the activities which need to occur in all hazardous waste management programs. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Hazardous Waste Operations And Emergency Response : HAZWOPER : (Awareness Level) V0306

Will help viewers comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 910.120 and RCRA training requirements. Covers: legislative background; hazardous materials definitions; activities & workers covered by the HAZWOPER standard; and awareness-level training. (©1990 Coastal Video Communications Corp.) 20 min.

Hazardous Waste Operations And Emergency Response : HAZWOPER : Response Levels V0307

Will help viewers comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 910.120 and RCRA training requirements. Covers: Operations-levels training; Hazard and risk assessment; Personal protective equipment; Control, containment, confinement; Decontamination; Standard operating procedures. (©1990 Coastal Video Communications Corp.) 22 min.

HAZMAT Spills : Are You Ready? V0363

Emphasizes the importance of knowing how to keep a spill from happening, how to identify a chemical spill, when to handle a chemical spill, and when to alert trained personnel. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

HazMat Transportation - Security Depends on You V0939

Combines safe driving procedures with the added responsibility of transporting hazardous materials. Covers: personal preparations including heightened sense of awareness and observation of environment and personnel, pre-trip inspection, security while on the road, and procedures at the delivery site. Emphasizes safety and security procedures with a post 9/11 attitude. V0244 (Safety Training for Handling & Transporting Hazardous Materials) and V0608 (Hazardous Materials Transportation) give more emphasis on HazMat training and transportation. (©2002 Coastal Video Communications Corp.) 20 min.

HAZWOPER : Your Role As A First Responder V0603

Awareness training for two levels of response to a hazardous substance emergency. The first is to recognize the incident, and the second is containment and clean up of the hazardous substances. Defines the steps a first responder should take. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 15 min.

Household Hazardous Waste V0059

Demonstrates how common chemicals found around the home can create accidental poisoning of our environment. Shows the proper disposal methods for a variety of substances. (©1988 Department of Ecology, Solid and Hazardous Waste Program) 15 min.

Ounce Of Prevention (Module 1) V0752

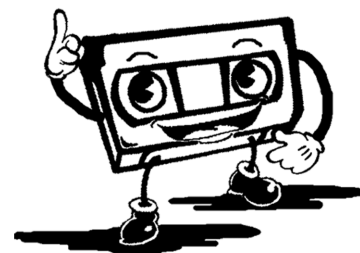

Designed for Veterinary practice owners to develop safety and health hazard communication programs. Covers: Responsibilities of the practice owner/operator; and Consequences of non-compliance. Includes hazardous materials present in veterinary practices, potential risks such as exposure to pesticides, hazardous gases, photochemicals, disinfectants, cleaners, radiation, needles, scapulas, heavy lifting, and animal bites. (©1994 Department of Consumer Business & Services, Oregon OSHA) 17 min.

RCRA Large Quantity Generators : A Commitment To The Future V0584

Defines large quantity generator. Covers hazardous waste activity notification, waste accumulation and storage requirements, transportation procedures, setting up a waste minimization program, and emergency plans/recordkeeping. (©1994 Coastal Video Communications Corp.) 24 min.

VIDEO TIP:

Easy returns! The backside of your shipping box label has the Safety & Health Video Library address; just turn it over.

Resource Conservation and Recovery Act V0624

The concept "cradle to grave" implies that the producer is responsible for hazardous waste throughout a chemical's life and to its final disposition. Defines the RCRA as established in 1977. Describes hazardous waste, small and large quantity generators. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 8 min.

Respiratory Protection : Another World V0499

When respiratory protection is needed, be sure to use the right respirator for each job. Covers: Your lungs and how they work; Respiratory hazards; Types of respirators; Emergency use of respirators; Respirator fit testing; Respirator maintenance; Inspections; Decontamination; and Storage. (©1995 Coastal Video Communications Corp.) 19 min.

Safety Training For Handling And Transporting Hazardous Materials : A Safety Training Program For DOT HMCC26F V0244

Safety training section of the regulation for employees. Covers: Materials Safety Data Sheets review before moving hazardous materials, accident prevention, personal protection equipment; and emergency first aid. (©1993 AIMS Media) 19 min.

Silica V0046

Identifies common types of silica and the health problems that can result from exposure. Work processes that can create airborne silica include: Tunneling; Metal foundries; Stone; Clay; Glass production; and Abrasive cleaning or sandblasting. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1990 National Technical Information Service) 22 min.

Waste Minimization V0405

Discusses ways to minimize waste by source reduction, by recycling, and by substituting non-hazardous or less hazardous materials for hazardous materials. Shows how to participate in this effort and the benefits from waste reduction. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Working Safely With Radiation : Fundamentals Of Ionizing Radiation Protection V0595

Basic orientation for laboratory and other technical personnel who will be working with or around radiation sources on the job. Covers the biological effects of radiation, monitoring and dosimetry, techniques for limiting personal exposure, special considerations for pregnant workers, and regulations.

(©1995 Business Training Systems Inc.) 19 min.

HEAD PROTECTION

see also Personal Protective Equipment

Head Protection V0454

Describes requirements for protective helmets and shows various work environments and the helmet styles required for each. Compares ANSI designations of Class A, Class B, and Class C helmets. Covers the selection and maintenance of helmets for optimum protection. Safety Watch Series.

(©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Heads Up! Hard Hat Safety V0569

Topics covered : OSHA 1910.135; Head hazards; Classes of hard hats; and Hard hat care and maintenance. Details true stories of accidents involving head injuries. CC (©1994 Coastal Video Communications Corp.) 21 min.

Pro-Active Safety Attitudes : Looking Out For Number One V0580

Underscores the importance of safety and safety training, using PPE, safety habits, and all employees take personal responsibility for safety. Covers: Safety affects workers and their families; Re-enactments of real-life accidents motivating workers to take precautions; and interviews with workers. CC (©1994 Coastal Video Communications Corp.) 15 min.

Safety Watch Series, Vol. 2, No. 5, August 1995 V0451

Contains these four segments on safety issues: CONFLICT RESOLUTION (V0452), SMOKING AT WORK (V0453), HEAD PROTECTION (V0454), and LOCKOUT/TAGOUT: JUST DO IT (V0455). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 30 min.

HEALTH CARE WORKERS - PROTECTION

Anthrax : What Every Clinician Should Know V0921

Discussion aired on TV 10CC8-01 in context of bio-terrorism activities occurring in USA. Provides physicians, nurse clinicians and other licensed health care professionals with an clinical overview. Not for general audiences. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2001 Center for Disease Control and Prevention) 100 min.

VIDEO TIP:

*What are the newest videos since this catalog was printed? Check our web site:
Videos.LNI.wa.gov*

As It Should Be Done : Workplace Precautions Against Bloodborne Pathogens V0143

Overview of the BBP Standard. Does not contain information on Hepatitis C and requirements for use of safer sharps devices. Statistics on HBV, HIV and occupational infection need updating. Targeted primarily to health care workers and related professionals. You can view this program online at: <http://www.osha.gov/SLTC/multimedia.html> *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1992 National Technical Information Service) 24 min.

Biological Threats in Healthcare - Identify and Respond V0940

For health care professionals. Covers 6 major biological agents (Anthrax, Plague, Botulism, Smallpox, Tularemia, Viral Hemorrhagic Fever); clinical management of infected patients; gives infection prevention measures for healthcare providers, and tips for handling mass exposure emergencies. Emphasizes biological disaster preparedness. (©2002 Coastal Video Communications Corp.) 17 min.

Fire Protection In Long Term Care Facilities : Moving Patients To Safety V0565

Shows patient-moving techniques in a fire emergency. Demonstrates options to safely move ambulatory and non-ambulatory patients to an area of refuge. (©1989 Media Resources Inc.) 17 min.

Fire Protection In Long Term Care Facilities : Responding To A Fire V0566

Basic procedures to determine priorities in attending to the fire, moving patients, and notification of facilities staff and the fire department. (©1989 Media Resources Inc.) 19 min.

Hepatitis C : Diagnosis, Clinical Management, Prevention V0691

Dan Rutz moderates this live satellite video conference from the CDC Atlanta. Covers: Epidemiology and screening; Clinical Evaluation and Management; Specialist's workshop; Prevention & Counseling. Describes: history; risk factors; serological and laboratory tests; treatment options; and effective methods to counsel patients. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1997 Center for Disease Control and Prevention) 150 min.

Lift With Care V0101

For health care workers. Shows how lifting a patient requires complex planning, careful execution, and input from the patient and/or their records to avoid injury to either the patient or their care-giver. (©1987 Visucom Productions, Inc.) 30 min.

Mantoux Tuberculin Skin Test V0987

Provides a clear detailed demonstration of the steps involved in administering and reading the Mantoux tuberculin skin test. For health care professionals. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2002 Center for Disease Control and Prevention) 30 min.

Needlestick Prevention V1027

Focus is on prevention of contaminated sharps injuries in the health care setting. Also covers techniques and engineering controls to reduce risk of bloodborne infection. Program describes needlestick prevention as a proposed bill. It has since been adopted. For more information see www.lni.wa.gov/wisha/rules/bbpathogens/ (©2000 R M Distributors - Safety Source) 9 min.

Nursing Homes : Hazards and Solutions V0692

Covers nursing home dangers: lost work time; over exertion; other potential hazards. Demonstrates procedures to lift and move residents, suggested ergonomic improvements; OSHA inspections and evaluations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (Open

Captioned)

(©1998 U.S. Department of Labor, The Division of Audiovisual, Communication Services) 16 min.

Prevention Is Proactive : Part IV - Crisis Diffusion V0755

Discusses strategies to diffuse a crisis. Main goals of crisis intervention: To assure the safety of everyone involved; and To help the person in crisis regain control of himself. Designed to reduce the incidence of on-the-job injuries sustained by rehabilitation staff working with people having physical, mental, or emotional impairments. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1991 Department of Consumer Business & Services, Oregon OSHA) 22 min.

Reducing The Risk V0796

Hepatitis B is a potential killer. Three health care workers speak candidly about Hepatitis B and describe this debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced. Vaccinations are available. (©1988 SmithKline Beckman Corp.) 13 min.

Respirators: Your TB Defense V0938

The use of respirators in health care is an important step in preventing the transmission of tuberculosis. Narrator, Loretta Swit, gives an overview of TB in the past and describes the use of various air-purifying and atmosphere-supplying respirators. Describes elements required in a training program. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2000 Center for Disease Control and Prevention) 16 min.

Safe Patient Lifting V0089

Paced for viewer input, this program is concerned with proper techniques for lifting and transferring patients. For health-care workers. (©1989 Center for Training and Development, State Compensation Fund) 17 min.

Understanding & Preventing Musculoskeletal Injury in Sonography V0888

Prevent injury while scanning. Describes major causes and risk factors for Musculoskeletal Injury (MSI) specific to sonography. Covers the symptoms of scanning-related MSI's with suggestions for preventative measures. Includes a segment of stretching exercises.
(©2000 Agilent Technologies) 28 min.

Universal Precautions V1028

Discusses the use of universal precautions to prevent exposure to blood and body fluids. Most appropriate for health care students and non-licensed health care workers. Not a bloodborne pathogens training program.
(©1993 R M Distributors - Safety Source) 8 min.

HEARING CONSERVATION

see also Personal Protective

Hear For A Lifetime! V0291

Aimed at satisfying OSHA regulations for hearing conservation, this video examines the causes and prevention of hearing loss at work and in the home environment. It presents inner ear anatomy, noise controls, testing procedures, and use and benefit of personal devices.
(©1988 CoreMedia Training Solutions) 16 min.

Hearing Conservation V0253

Introduces the basic elements of the plan required by OSHA for work areas that meet or exceed the OSHA action level. The program explains various types of hearing protection equipment and how they are rated. Designed as an introduction for new employees and as a refresher for experienced personnel.
(©1993 Primedia Workplace Learning, NUS Training Corporation) 11 min.

Hearing Conservation V0287

Takes the creative approach to hearing conservation to help your employees be motivated to wear hearing protection on the job. At the same time, you will be able to comply with OSHA's Occupational Noise Exposure Standard 29 CFR1910.95. Covers: Hearing Mechanics; Hearing Loss; Audiometric Testing; Use and Maintenance of Hearing Protectors; and Symptoms of Hearing Loss.
(©1994 Comprehensive Loss Management, Inc.) 12 min.

Hearing Conservation for At Risk Workers V0895

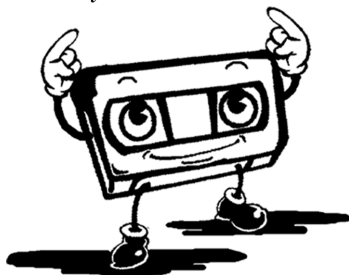

Focuses on hearing protection in road construction. Extensive supplemental materials including tests and PowerPoint presentation on CD-ROM. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©2001 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Hearing Loss Prevention : Employee Training V0841

Examines the importance of hearing protection in noise hazardous environments. Covers: Hearing loss symptoms, dangers of off-job noise, how the ear works; noise assessment, selection and use of hearing protections; and hearing tests.
(©1999 American Training Resources, Inc.) 14 min.

VIDEO TIP:

Be sure to fill out and return the packing list with the videos and any materials.

Hearing Protection : HCP & PPE V0352

Demonstrates the proper insertion and the use of numerous types of canal caps, ear plugs, and ear muffs. Hearing protection should not interfere with conversation although it can prevent damaging noise levels. Reviews hearing protection in light of OSHA's Hearing Conservation amendments, but does not cover audiometric testing. Pairs with V0347, also a Safety Watch program.
(©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Hearing Protection : It Makes Sense V0699

Teaches workers the hazards of noise and how to protect themselves from hearing loss. Covers: The human ear; how hearing loss occurs; audiometric testing; engineering and administrative controls; and PPE. Spanish version V0973. CC
(©1995 Coastal Video Communications Corp.) 23 min.

Hearing Protection : Sounds Good To Me V0701

Features country music legend, Charlie Daniels and covers the importance of proper hearing protection. It discusses the effect noise has on the human ear, personal protective equipment and controlling harmful noise. Describes anatomy of the ear, how to reduce high noise levels, and audiometric testing.
(©1998 Coastal Video Communications Corp.) 15 min.

Hearing Protection : Sounds Good to Me V0897

Features country music legend, Charlie Daniels and covers the importance of proper hearing protection. It discusses the effect noise has on the human ear, personal protective equipment and controlling harmful noise. Describes anatomy of the ear, how to reduce high noise levels, and audiometric testing. CC
(©1998 Coastal Video Communications Corp.) 14 min.

Hearing Safety V0197

Explains the hearing process, how excessive noise damages hearing, how to choose, fit, and care for hearing protection. Good general orientation for new employees or refresher for employees in the use and need for protective equipment.

(©1990 Industrial Training, Inc.) 16 min.

Hearing Video V0960

Emphasizes the importance of preserving hearing and the permanence of hearing loss in an entertaining fashion by using vintage film clips, computer animation and noise defying stunts. Shows viewers the effects of noise on hearing and explains audiometric testing. Covers choosing the right protection, proper use and maintenance of hearing protection.

(©1997 Workers' Compensation Board of British Columbia) 17 min.

I Am Joe's Ear V0067

An introduction to the construction of the ear and its functions, plus an explanation of hearing loss and the importance of hearing tests. Although dated, the video presents a strong message to those who don't realize their hearing has diminished and what they can do about it.

(©1986 Pyramid Film & Video) 23 min.

Introduction To Hearing Protection (Also available on V0379) V0347

How can noise hurt you? What can be done to reduce noise exposure? These and other questions are answered in this video. Cites the OSHA requirement relating to Hearing Conservation Programs; shows selection of the correct device for the job requires the involvement of employer and employee. Good for re-training when paired with V0352, also a Safety Watch program.

(©1994 Primedia Workplace Learning, Safety Watch) 6 min.

La Protección del Sistema Auditivo : Tiene Sentido Hearing Protection : It Makes Sense V0973

Teaches workers the hazards of noise and how to protect themselves from hearing loss. Covers: The human ear; how hearing loss occurs; audiometric testing; engineering and administrative controls; and PPE. English version V0699.

(©1995 Coastal Video Communications Corp.) 22 min.

Safety Watch Series, Vol. 1, No. 2, May 1994 V0379

Contains these four segments on safety issues: INTRODUCTION TO HEARING PROTECTION (V0347), FALL ARREST SYSTEMS (V0348), HAZCOM : REVIEW (V0349), and SAFE DRIVING (V0350). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1994 Primedia Workplace Learning, Safety Watch) 30 min.

HEAT STRESS**Beat The Heat : Preventing & Treating Heat Disorders V0551**

For those workers who must perform their jobs in the heat. Heat can cause bodily illness or injury, worksite accidents and even death. Covers: Thermo-regulation of the body; Importance of replenishing fluids; and Prevention and treatment.

(©1995 Coastal Video Communications Corp.) 17 min.

Heat Stress V0358

Heat stress ranges from relatively minor problems of heat rash to more severe problems of heat cramps, heat exhaustion, and the true medical emergency of heat stroke. Covers symptoms of each type of heat stress and shows what individuals' and employers' responsibilities are in reducing potential of heat-related illnesses. Suggests a variety of methods for avoiding heat stress. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Heat Stress V0648

Focuses on preventing illnesses and minimizing safety hazards hot weather / hot environment working conditions. Complies with NIOSH & OSHA recommendations. Covers: hot environment hazards; First aid; Heat stress disorders and treatment; and controlling heat stress. CC

(©1988 Coastal Video Communications Corp.) 16 min.

Heat Stress V1046

Follow up to V0092, a longer version of Heat Stress. Covers the effects of heat on the human body, health hazards caused by heat stress, and preventative measures.

(©2001) 6 min.

Heat Stress - Don't Lose Your Cool V0931

Instruction for those who work outdoors in hot working conditions such as construction workers, groundskeepers, public safety officers or indoors in foundries, bakeries or kitchens, manufacturing plants, and workers who wear full body protective suits. Describes the effect of heat on the body and heat stress disorders such as sunburn, heat cramps, heat shock and heat stroke. Training covers measures to prevent and treat heat stress.

(©2000 Coastal Video Communications Corp.) 15 min.

Heat Stress (Safety Watch Series Ken Topple - "Safeline") V0514

Ken Topple of "Safeline" has two guests, "Dr. Kepe M. Kool" Heat Stress Expert and "Safe Endura" Prevention Specialist, who discuss what heat stress is. Shows the signs and symptoms of heat stress and when symptoms appear; gives immediate corrective actions. Safety Watch Series. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Heat Stress Prevention V0092

Shows the effects of heat on the body. Teaches how to prevent and recognize symptoms of heat related disorders as: heat cramps, exhaustion, fainting and heat stroke. Explains what to do until medical help arrives. Shows a variety of hot work environments. CC

(©1998 Summit Training Source, Inc.) 13 min.

Working Safely in Hot Environments V0955

Shows viewers how to prevent and respond to various heat-related problems by using prevention techniques; how to recognize the signs and symptoms of heat stress; and, what first aid procedures to administer when assisting victims of specific heat-related illnesses.

(©2002 ERI Safety Videos) 15 min.

HEPATITIS

Hepatitis C : Diagnosis, Clinical Management, Prevention V0691

Dan Rutz moderates this live satellite video conference from the CDC Atlanta. Covers: Epidemiology and screening; Clinical Evaluation and Management; Specialist's workshop; Prevention and Counseling. Describes: history; risk factors; serological and laboratory tests; treatment options; and effective methods to counsel patients. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1997 Center for Disease Control and Prevention) 150 min.

Reducing The Risk V0796

Hepatitis B is a potential killer. Three health care workers speak candidly about Hepatitis B and describe this debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced. Vaccinations are available.

(©1988 SmithKline Beckman Corp.) 13 min.

HIGH IMPACT VIDEOS

Alto Impacto : Montacargas Entrenamiento de Operadores High Impact : Forklift Operator Training V1043

Forklift accidents re-created in this video show operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. English version V0778. Warning! May be too graphic for some audiences.

(©1998) 9 min.

Every Time I Look At My Hand... V0668

Features testimony from workers who have suffered traumatic, disabling hand injuries. Through their testimony, the viewer will learn the importance of taking the time to do a job correctly. Nip points, loose clothing and jewelry, lockout/tagout and using proper tools are all covered.

(©1994 ERI Safety Videos) 15 min.

High Impact : Crane Safety V0775

Features re-enactments of accidents involving indoor cranes. Includes: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. Spanish version V0776. (©1998 ERI Safety Videos) 18 min.

High Impact : Electrical Safety V0571

Demonstrates electrical safety lessons in ten recreated accidents. Highlights importance of teach importance of qualified electricians to maintain electrical equipment; lock-out / tagout; proper distance, ladder safety and safe work practices. Warning! May be too graphic for some audiences.

(©1995 ERI Safety Videos) 18 min.

High Impact: Emergency Action Plan V0958

Dramatic examples of five emergencies: a fire, workplace violence, a tornado, chemical release, and possible exposure to bloodborne pathogens. Reviews the major guidelines for each emergency. Industrial work environments.

(©2001 ERI Safety Videos) 20 min.

High Impact : Eye Safety V0695

Graphic reenactments of accidents: A hammer that sends a nail into the eye; Flying metal particles; Electrical flash from a short circuit; Popping slag while welding; Sulfuric acid that sprays a worker; A line-breaking accident. Warning! May be too graphic for some audiences.

(©1994 ERI Safety Videos) 19 min.

High Impact : Eye Safety V1041

(Short version of V0695.) Graphic incidents motivate workers to wear proper eye protection. Covers: different types of eye protection, using eyewashes and emergency care for eye injuries. Intended for safety meetings. Warning! May be too graphic for some audiences.

(©1998) 6 min.

High Impact : Fall Prevention V0669

The 10 accidents shown in this video graphically demonstrate shortcuts and other common safety mistakes leading to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. Warning! May be too graphic for some audiences. Spanish version V0777.

(©1997 ERI Safety Videos) 19 min.

High Impact : Forklift Operator Training V0778

The eight forklift accidents re-created in this video shows operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. Warning! May be too graphic for some audiences.

(©1998 ERI Safety Videos) 19 min.

High Impact : Forklift Safety Training V0334

Covers the importance of forklift operators and pedestrians following rules, the 13 most common accidents with lift trucks, characteristics and limitations of trucks, tip overs and stability, operating guidelines, visibility, loading docks and trailers, and operator attitude. Warning! May be too graphic for some audiences.

(©1994 ERI Safety Videos) 19 min.

High Impact : Hand Safety V0330

This "Real World" video was produced on factory floors of the following industries: Paper Making, Meat Packing, Metal Working, Heavy Assembly, Foundry Operations, Sheet Metals Forming, and Industrial Maintenance. Topics covered: Pinch points; Hot surfaces; Arm Protectors; Long hair; Lock-out; Pinch points; Hot running nips; Loose clothing; and Guards. Warning! May be too graphic for some audiences.

(©1994 ERI Safety Videos) 19 min.

High Impact : Industrial Safety Attitudes (Life and Death Series) V0886

Drama from the perspective of three EMT's responding to industrial accidents to review safety basics. Stresses the importance of preventing accidents by anticipating unsafe situations; adhering to company safety rules, keeping a positive attitude; and taking responsibility for personal safety of self and others. Warning! May be too graphic for some audiences.

(©2000 ERI Safety Videos) 19 min.

High Impact : Industrial Safety Attitudes (Short version) V1011

Drama of safety basics from the perspective of three EMT's who respond to industrial accidents. Focus is on the importance of preventing accidents by anticipating unsafe situations; adhering to company safety rules, keeping a positive attitude; and taking responsibility for personal safety of self and others. CC. Warning! May be too graphic for some audiences. Long version is V0886. CC (©2000 R M Distributors - Hi 5) 9 min.

High Impact : Lockout/Tagout Safety V0779

Features eight accident recreations to demonstrate the importance of following all prescribed lockout/tagout procedures. The viewer will also learn the responsibilities and safe work procedures of those who are affected by lockout/tagout as well as those that are authorized to service machines and perform lockout/tagout procedures. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 19 min.

High Impact : Lockout/Tagout Safety (Life and Death Series) V0843

Dramatic presentation: Martha, a veteran plant employee, discovers Ralph unconscious and bleeding beside the turning dryer. As this mystery unfolds, the co-workers recall other lockout mistakes that have caused serious injuries and deaths. Key points: employee complacency; training and authorization; isolating energy sources; lockout devices; and verification. Life and Death Series. Warning! May be too graphic for some audiences.

(©1999 American Training Resources, Inc.- ERI) 19 min.

High Impact : Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. Warning! May be too graphic for some audiences.

(©1995 ERI Safety Videos) 19 min.

High Impact : Safety Awareness V0671

Covers 24 specific safety topics from ladder safety to lockout; stresses employee responsibility for personal safety; proper training and authorization for designated tasks; following procedures and company policy. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 21 min.

High Impact : Staying Alive in Industry V0959

Points covered: Job knowledge, training and authorization, positive attitudes, violence in the workplace, maintaining concentration and using sound judgment. Recreates seven graphic accidents: Hand caught in conveyer belt, Ladder strikes unchained oxygen cylinder causing explosion, Marital problems result in murder-suicide at assembly plant, Employee accidentally slashed with utility blade, Defeated safety feature allows fingers to be amputated by shear, Worker loses eye after neglecting to wear proper PPE and Violating confined space entry procedures results in injury. (©2000 ERI Safety Videos) 19 min.

High Impact : Welding Safety V0672

Illustrates the hazards that apply to welding and safety procedures. Covers: Areas where welding may be prohibited; Sparks and fire prevention; Hazardous fumes in breathing zones; Maintaining healthy breathing zones; Eye protection; Personal protective equipment; Safeguards for electrical arc welding; Conducting oxy-fuel operations safely; and General welding safety tips. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 17 min.

High-Impact : Metal Working Safety V0670

Re-creates ten industrial accidents involving metal working to illustrate the necessity of following proper safety procedures. Reviews safety issues that are important for operating brake presses, grinders, metal cutting shears and other machines. Major points: Understand machine operations and potential hazards; Receive training and authorization before operating any tool or machine; Use the appropriate PPE; and observe operating procedures at all times. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 22 min.

It Only Takes a Second V0926

Intended as an attention grabber, the graphic accidents dramatized in this program will force employees to think about the personal consequences of unsafe acts and how these actions will also affect the lives of their loved ones. Warning! May be too graphic for some audiences.

(©1995 Aurora Pictures) 3 min.

It Only Takes a Second - Discussion Version V0911

A series of scenarios showing unsafe acts or conditions vs. the safe way. Topics include: driving safely, PPE, slips, trips & falls, machine guarding, and safe operating procedures. Expanded version of V0926. (©2001 Aurora Pictures) 24 min.

Prevención De Caídas High Impact : Fall Prevention V0777

The 10 accidents are shown to remind workers about short cuts and other common safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. English version V0669

(©1997 ERI Safety Videos) 19 min.

Seguridad en las Grúas durante Impactos Altos High Impact : Crane Safety V0776

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. English version V0775. (©1998 ERI Safety Videos) 18 min.

Think About This V0830

Safety meeting starter. Graphic accidents reenacted in the program lead employees to think about the personal consequences of unsafe acts and how those actions also affect the lives of loved ones. Warning! May be too graphic for some audiences. (©2000 ERI Safety Videos) 5 min.

HOTEL SAFETY

Hotel Safety : A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back. (©1996 Coastal Video Communications Corp.) 30 min.

Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0262

For non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contact with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. Spanish version V0263. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

Workplace Violence V0411

Statistics (in 1995) reveals robbery is the most common form of workplace violence. Identifies high-risk occupations (retail, hotel, hospital, taxi drivers) and gives tips for recognizing potentially violent behavior in situations involving external customers. Also describes warning signals of potential internal violence in situations involving company personnel. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

HOUSEKEEPING

Adventures Of Ergoman : A Custodial Ergonomics Video V0812

The Custodian Quality Improvement Team, or CQIT, is a management-empowered team made up of custodians and supervisors. Safety Engineer Jack Tolley and Industrial Hygienist David Zalk were invited to work with CQIT to design a section on ergonomics. Slightly offbeat approach to ergonomic alternatives for performing custodial tasks. (©1997 CQIT Production) 29 min.

Back Safety For Landscape, Maintenance & Custodial Workers V0765

An invaluable guide to the basic steps that landscape, maintenance, warehouse and custodial workers should follow in order to avoid back injuries. Covers: Body mechanics; Lifting; Pushing; Common injuries; and Back braces. Demonstrates stretching exercises. (©1996 Coastal Video Communications Corp.) 19 min.

Bloodborne Pathogens : Case Histories V0492

Concentrates on actual real-life scenarios. Appropriate for orientation for general industry environment. Does not include requirements for use of safer sharps devices and other engineering controls. Covers: Universal Precautions; Work practice control and PPE; Engineering controls; Housekeeping; and HBV vaccine. CC (©1995 Coastal Video Communications Corp.) 21 min.

Bloodborne Pathogens : Questions and Answers V0833

Covers the OSHA standard and addresses issues and concerns of employees involving potentially infected blood by implementing good housekeeping, safe work practices and warning signs and labels. Key Points : universal precautions; wear latex gloves; barrier device for CPR; wear goggles or face mask; stop the bleeding; and prevent exposure to blood. (©1999 American Training Resources, Inc.- ERI) 10 min.

Bloodborne Pathogens For Law Enforcement V0766

Reviews the essential elements of exposure control: HBV; HIV; and AIDS; Infectious materials; Work controls; Housekeeping; and Personal Protective Equipment. (©1998 Coastal Video Communications Corp.) 21 min.

Bloodborne Pathogens In The Workplace : Reducing The Risk V0553

Overview of Bloodborne pathogens exposure risks in general industry. Employers will want to refer to state and local regulations. Lacks requirements for use of safer sharps devices and other environmental controls. Covers Hepatitis B and HIV. (©1992 Safetycare, Inc.) 12 min.

Custodial Staff Safety V0543

General orientation of safety hazards for custodial and maintenance personnel. Includes proper basic safety procedures such as lifting; slips and trips, ladder safety, and proper precautions when working with chemicals, and biological hazards. Emphasises the need for additional BBP training. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

VIDEO TIP:

Let us know what you think. Feedback about videos is welcomed.

Employee Performed Safety Inspections V0623

Cid Cisco "In Harm's Way" game show host and game show participants; Carol Simmons, Paul Dodson, and Martin Lewis attempt to tell us why employee participation provides buy-in to the safety program by employees. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Ergonomics : The 24-Hour Body V0825

Teaches employees how to use the ergonomic principles learned at work when working at home. Covers: Practical solutions to potential strains and Off-the-job safety procedures. CC (©1998 Coastal Video Communications Corp.) 20 min.

Fire Extinguisher Safety V0564

Teaches fire extinguisher basics, types of fires and extinguishers, and proper techniques for an emergency in the office or industrial environments. CC (©1996 Coremedia Training Solutions) 11 min.

Fire Hazard Recognition V0539

Reviews procedures to prevent fires including awareness of chemical and electrical hazards, and proper housekeeping. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Fire Prevention V0482

(Humorous) Follow Jim Carrey look-a-like "Safe Indura," fire detective, through an investigation of an electrical fire. Fires can occur at any facility so a pre-fire plan should be established. Follow good housekeeping practices, practice proper handling of flammable liquids, and practice proper extinguisher use and evacuation procedures. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 16 min.

Fire Safety In The Home V0537

"Fire Marshal Bob" (Jim Carrey look alike) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Give Safety A Hand : Knife And Blade Safety V0568

Describes safe procedures in office and industrial environments when handling knives, blades, and box cutters. (©1994 Coastal Video Communications Corp.) 9 min.

Hazard Communications - Your Right To Know! V0684

Teaches awareness of health and physical hazards; First aid procedures; Spill cleanup procedures; Material data safety sheets; and Employees "right to know" about workplace chemicals. (©1993 Long Island Productions) 4 min.

Health And Safety Orientation : The Competitive Edge V0570

New employee orientation or refresher training for seasoned workers, provides an overview of OSHA-required health and safety practices and procedures. Covers: Personal protective equipment; Sign, tags, and labels; Confined spaces; Lockout/-tagout; Hazardous materials; Safe lifting; Housekeeping; Emergency preparedness; and Fire protection. CC (©1994 CoreMedia Training Solutions) 24 min.

Hotel Safety : A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back. (©1996 Coastal Video Communications Corp.) 30 min.

Housekeeping : It Ain't Like The Movies V0574

Reviews the importance of good housekeeping and what to look for in your facility. CC (©1995 Coastal Video Communications Corp.) 15 min.

Housekeeping For Safety V0416

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Housekeeping For Safety V0627

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Kitchen Safety V0159

Addresses hygiene, personal protective equipment, manual handling, use of knives, slips, trips, and falls, dealing with kitchen fires and general hazards. (©1990 Safetycare, Inc.) 15 min.

Latex Allergies : A Closer Look V0808

Explains the routes of exposure and self-protection. Covers: Allergies; Who's at risk; Personal protective equipment; Office supplies; Foods; Housekeeping; Allergic reactions; Irritant and allergic contact dermatitis; and Immediate Hypersensitivity. (©1998 Long Island Productions) 10 min.

Machine Shop Safety V0519

Covers the hazards associated with machine shops; emphasizes safe work practices; wearing appropriate personal protective clothing and stresses good housekeeping practices. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Maintenance Person Safety V0338

Covers many topics briefly. Reviews: personal protective equipment and clothing, housekeeping, electrical safety, fire protection, and working with flammable materials. Also, safe lifting, ladders, hand and power tools.

(©1989 ERI Safety Videos) 16 min.

Maintenance Person Safety V0685

The definition of a maintenance person goes like this: "An individual who is expected to do the impossible, in the shortest time, at the least expense, and to keep doing it day-after-day, year-after-year, without complaining, and never achieving the recognition deserved for keeping the organization in good operating condition." Covers: Hazardous materials; MSDS; PPE; Machine guarding; Lockout/Tagout; Electrical safety; and Fire prevention. (©1989 Long Island Productions) 6 min.

Maintenance Person Safety V1029

Designed for mechanics and maintenance persons. Orientation of the more important safety requirements of these positions. Covers: electrical safety, fire extinguishers, machine guarding and PPE. (©1998 R M Distributors - Safety Source) 13 min.

Materials Handling & Storage V0484

In a news show format, "Wide World of Safety", Howard Containment and Paula Prevention highlight the hazards of materials handling and storage. Improper storage can lead to spills, tripping conditions, and slipping conditions. These conditions can result in injury to humans and damage to materials being stored. Suggested to supplement or as refresher training. Safety Watch Series. CC (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Safety Watch Series, Vol. 2, No. 2, May 1995 V0413

Contains these four segments on safety issues: OFF THE JOB SAFETY (V0414), CONFINED SPACE : USING CHEMICALS (V0415), HOUSEKEEPING FOR SAFETY (V0416), and BLOODBORNE PATHOGENS : WHAT ARE THEY? (V0417). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 41 min.

Trabajadores Expuestos : Evitar Enfermedades Contagiosas en el Lugar de Trabajo

Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0263

Focuses exclusively on non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contract with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. English version V0262 *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

Whose Job Is It Anyway? V0102

Produced in Canada, this video shows a supervisor on a construction site where good housekeeping habits are ignored and the consequences. Gives solutions for a safe workplace. (©1988 International Film Bureau Inc.) 12 min.

Work Surface Safety V0475

Everyday housekeeping is important to work surface safety. Training points: work surface areas must be clear of obstructions; spills must be cleaned up quickly and marked with warning signs. Emphasizes the importance of monitoring and keeping the work surfaces clean and clear. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 6 min.

Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0262

For non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contract with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. Spanish version V0263. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

HUMOROUS

Adventures Of Ergoman : A Custodial Ergonomics Video V0812

The Custodian Quality Improvement Team, or CQIT, is a management-empowered team made up of custodians and supervisors. Safety Engineer Jack Tolley and Industrial Hygienist David Zalk were invited to work with CQIT to design a section on ergonomics. Slightly offbeat approach to ergonomic alternatives for performing custodial tasks. (©1997 CQIT Production) 29 min.

Case of the Ladder Bandit V1031

Perk up ladder safety training with this humorous dramatic investigation by the Mayberry Deputy. At first it seems a bit corny, but hang in there by the end of the program viewers will remember ladder basics. Topics include: Ladder inspection; maintain three points of contact; the belt buckle rule; safety precautions for step ladders, straight and extension ladders; and the consequences of taking shortcuts. (©2002 R M Distributors - Hi 5) 10 min.

Elevated Work Safety V0520

(Humorous) Safety hero, "Captain Safetyman," points out elevated work surface hazards, and the use of a fall protection plan. Overview of various elevated platforms, scaffolds and roofs. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Ergonomic Tools V0487

(Humorous) In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders. Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Ergonomics : Job Safety Analysis V0507

(Humorous) The Safety Watch Squares game show has ergonomic Q&A to recognize potential problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Fire Prevention V0482

(Humorous) Follow Jim Carrey look-a-like "Safe Indura," fire detective, through an investigation of an electrical fire. Fires can occur at any facility so a pre-fire plan should be established. Follow good housekeeping practices, practice proper handling of flammable liquids, and practice proper extinguisher use and evacuation procedures. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 16 min.

Good Back Bad Back : It's Your Choice V0675

Uses humor to cover four principles a person can use to protect the back in everyday situations: Preserve the curves, Build a bridge; Keep it close; and Lock and lift. (©1997 Coremedia Training Solutions) 20 min.

Heat Stress (Safety Watch Series Ken Topples - "Safeline") V0514

Ken Topples of "Safeline" has two guests, "Dr. Kepe M. Kool" Heat Stress Expert and "Safe Endura" Prevention Specialist, who discuss what heat stress is. Shows the signs and symptoms of heat stress and when symptoms appear; gives immediate corrective actions. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Job Safety Analysis V0501

In a game show format, Safety Watch Squares, "celebrities" discuss the elements and requirements of job safety analysis. Shows an example of a JSA and demonstrates its benefits for planning work and identifying hazards. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 17 min.

Lockout/Tagout V0360

(Humorous) A safety-conscious family views home video of their vacation, but instead sees lockout/tagout programs at various facilities. Covers purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. Suggested to supplement or as refresher training. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 9 min.

Lockout/Tagout V0629

(Humorous) A safety-conscious family views home video of their vacation but instead sees lockout/tagout programs at various facilities. Covers purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Lockout/Tagout : The Basics V0370

Game show format. Identifies roles and responsibilities of both the "authorized" employee and the "affected" employee. Explains the purpose of lockout/tagout procedures and the dangers if those procedures are not followed. Describes the four types of energy which may be locked or tagged out. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 10 min.

Office Safety V0516

(Humorous) A zany dramatization. Foster Safewell, fictional world renowned Office Safety Expert from the British Isles, discusses how people survive in such an untamed environment as the office. Shows how to spot and take corrective action to remove office hazards. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Portable Hand Tools V0393

(Humorous) Join Tom, the Tool Guy, and his assistant, Bob, for a touch of humor while reviewing the basics of using hand tools. Emphasizes proper use and transporting tools correctly, PPE, inspection, types of hand tools (hammers, screw drivers, pliers), ergonomics, and choosing the proper tool for the job. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Prevention Of The Most Common Accidents V0549

(Humorous) In this "Get Smart" format, "Agent Fax" and "Agent 29" meet "Tool Time" helper "Hal" who wants to get safety facts to help other employees understand how potential accidents can be recognized and prevented on a daily basis. Note: slightly offbeat presentation. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Putting Your Best Foot Forward V0103

(Humorous) Illustrates the common sense approach to combating accidents caused by slips and falls in the office, warehouse, snow and ice, and in the parking lot. Some animation with D. Duck, Goofy and Mickey. (©1988 Coronet/MTI Film & Video) 16 min.

Risky Business V0093

(Humorous) A hilarious look at the serious business of office safety. Entertaining yet informative format. A stuntman poses as an office worker to expose hazards in the office through the course of a routine day. (©1989 CoreMedia Training Solutions) 20 min.

Safe And Awake V0062

Using humor as a vehicle for motivating employees, this video demonstrates lifting techniques, good housekeeping habits, and a proper attitude. Industrial work environment. (©1981 Long Island Productions) 15 min.

Safety Committee Participation : A Safety Carol V0470

The Ghost of Safety Committees Past arrives after the members of the safety committee die of boredom. Gives tips for making the safety meetings come alive and productive. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Safety Orientation : Don't Be a Zombie V0772

Spooky Dramatization; industrial setting. Covers: PPE; Back injuries; Slips, trips and falls; Hazard communication; Bloodborne pathogens; Lockout-tagout; and Fire safety. CC (©1996 Coastal Video Communications Corp.) 23 min.

Slips, Trips & Falls V0399

(Humorous) A visiting congressman tours a worksite and nearly destroys the company's excellent safety record as he tries to help employees do their work. Safety precautions for avoiding commonplace accidents are shown. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Surviving The Cold And Flu Season V0468

(Humorous) Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Surviving The Cold And Flu Season V0819

(Humorous) Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

INDOOR AIR QUALITY

Indoor Air Quality V0609

Informs employees of poor air's harmful effects as well as methods to prevent, identify and correct air quality problems. Covers: Sources of air contamination; Adhesives, solvents and vehicle exhaust; Housekeeping, smoking, and humidifiers; and Symptoms and signs of poor air quality. (©1996 Long Island Productions) 13 min.

Indoor Air Report Breathe Easy V0610

Describes sick building syndrome, building related illnesses; and environmental tobacco smoke. NIOSH has found that the primary causes of IAQ problems are: inadequate ventilation; contamination from outside the building; and microbial contamination from building fabrics. (©1994 Coastal Video Communications Corp.) 15 min.

VIDEO TIP:

Preview your video before presenting to others! You will get your video 2 days before your show date.

INDUSTRIAL HYGIENE

Hazardous Waste Awareness V0369

Discusses the properties of ignitable, corrosive, reactive, and toxic waste and the processes involved with determining proper handling and storage of hazardous material. Outlines the activities which need to occur in all hazardous waste management programs. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Hazardous Waste Awareness V0626

Discusses the properties of ignitable, corrosive, reactive, and toxic waste and the processes involved with determining proper handling and storage of hazardous material. Outlines the activities which need to occur in all hazardous waste management programs. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Industry Hygiene For The Safety Manager V0614

The terms "recognize," "evaluate," and "control," represent a conceptual framework that the Industrial Hygienist uses to deal with hazardous agents. "Recognize" addresses the ability to anticipate hazardous conditions. "Evaluate" addresses assessment by using monitoring tools. "Control" considers conditions to remove agents harmful to workers. Safety Watch Series. Suggested to supplement or as refresher training. (©1997 Primedia Workplace Learning, Safety Watch) 5 min.

Reducing The Risk V0796

Hepatitis B is a potential killer. Three health care workers speak candidly about Hepatitis B and describe this debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced. Vaccinations are available. (©1988 SmithKline Beckman Corp.) 13 min.

Reglas del Estándar para la Protección de Trabajador EPA Worker Protection Standard Rules V0749

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 36 min.

Rescue BBP : Nothing To Fear V0652

Covers: Exposure risks ; AIDS and Hepatitis B; Transmission of bloodborne diseases; Transmission of bloodborne pathogens in the workplace; Minimizing exposure; Precautions; Preventive work practices; Protective barriers; and CPR.

(©1997 Coastal Video Communications Corp.) 22 min.

What's Wrong With This Picture? V0783

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. CC (©1989 Aurora Pictures) 17 min.

VIDEO TIP:

Are you a state employee? You have to return videos by commercial traceable shipper and on time.

INDUSTRIAL PAINTING

Health & Safety Training For The Painting Environment V0744

Produced in partnership with International Brotherhood of Painters and Allied Trades to provide accurate information relative to the health hazards of the painting profession. Discusses the diagnosis of occupational toxic conditions. Focuses on the hazards and symptoms of overexposure, the use of personal protective equipment (PPE), the hierarchy of hazard control, and the proper selection, fit and maintenance of respirators. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 44 min.

INDUSTRIAL SAFETY

Charlie Morecraft Story V0324

A compelling true story. Charlie Morecraft almost died in an industrial fire accident. There were times when he wished he had. He tells his story in 20 minutes — it seems like only 10. Charlie explains that — regardless what your job may be — you can't afford an accident, your family can't afford an accident, and your company can't afford an accident. "So now — whenever you do a job — step back, take a look at it and if it isn't safe, — don't do it."

(©1989 Media Resources Inc.) 20 min.

Confined Space Safety V0189

Training intended for workers, contractors, supervisors and work monitors. Highlights are: Work monitoring a work-site inspection; Environmental containment testing and ventilation; Pre-entry atmospheric testing; Avoiding toxic gas and fire hazards; Emergency rescue; and Monitoring for heat stress.

(©1993 Video Training Source) 21 min.

Confined Space Safety Part 1 : Confined Space Entry V0192

(Revised Version) Types of confined spaces and the importance of control measures are discussed in detail. Protective equipment and rescue techniques are demonstrated. (©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min.

Confined Space Safety Part 2 : Testing Confined Spaces V0193

(Revised Version) Addresses a variety of methods for testing confined spaces. Gas detector tubes and electronic gas detectors are fully explained and demonstrated. The dangers of flammable gases and the proper ways to detect them are discussed.

(©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min.

Confined Space Safety Part 3 : Working Inside Confined Spaces V0194

(Revised Version) Concentrates on safe work practices when working in confined spaces. Demonstrates ways avoidance of common hazards such as falls, noise, and temperature extremes. Purging, ventilation and PPE are covered.

(©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 22 min.

Containers And Confined Spaces V0079

Recognizes hazards in various work situations. Demonstrates precautions and protective devices to safeguard the welder. Discusses the potential dangers encountered in welding on containers and in confined spaces.

(©1986 Beacon Films) 11 min.

Driving Safety V0538

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver.

Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Driving Safety V0791

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver.

Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Emergency Responders : Bloodborne Pathogens V0312

Training for police officers, fire professionals, industrial first aid or CPR trained persons, emergency medical technicians, correctional officers or other emergency responders. Covers: Bloodborne Pathogens; An Exposure Control Plan; Engineering Controls; and Personal Hygiene. (©1994 Long Island Productions) 18 min.

Employee Performed Safety Inspections V0623

Cid Cisco "In Harm's Way" game show host and game show participants; Carol Simmons, Paul Dodson, and Martin Lewis attempt to tell us why employee participation provides buy-in to the safety program by employees. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Industrial Safety Overview V0892

New employee orientation or quick refresher. Covers thirty industrial safety topics from crane safety to MSDS to PPE to welding. Stresses safety attitude. (©2000 Long Island Productions) 11 min.

Vehicle Safety V0524

Adam West the "Safety Crusader" confronts "Rudy the Reckless" in a spin-off from the old TV show "Batman." West narrates this video which covers safety rules for driving on an industrial site. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 14 min.

Wheel Of Misfortune. Grave Remarks V0545

In game show format, "Wheel of Misfortune," serves to remind us that for every action there are a set of prescribed outcomes. "Grave Remarks" represents worst-case scenarios of losses and accidents... that lead to their final "resting places." Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Why Star Quality V0828

Hosted by former ABC Anchor Steve Bell. An intensive overview of OSHA's Voluntary Protection Programs. Covers elements of VPP: Management Leadership, Employee Involvement, Hazard Recognition and control, and Safety and Health Training. (©1998 Voluntary Protection Programs Participants' Association, Inc.; VPPPA) 45 min.

JOB SAFETY ANALYSIS

Coaching Safe Behavior, Part One V0542

Reviews safety strategies that should be considered on-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Do Your Employees Understand The Importance Of Safety? V0622

The "Drill Sergeant" and his "Recruits" stress that safety is a function of every employee, not just the Safety Department. Shows how to improve employee awareness with signs, posters and labels plus hazards-specific training. Supports Job Safety Analysis to identify hazardous activities and prevent injury. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 11 min.

Ergonomics : Job Safety Analysis (Humorous) V0507

The Safety Watch Squares game show has ergonomic Q&A to recognize potential problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Job Safety Analysis V0501

In a game show format, Safety Watch Squares, "celebrities" discuss the elements and requirements of job safety analysis. Shows an example of a JSA and demonstrates its benefits for planning work and identifying hazards. Safety Watch Series. Suggested to supplement or as refresher training. CC

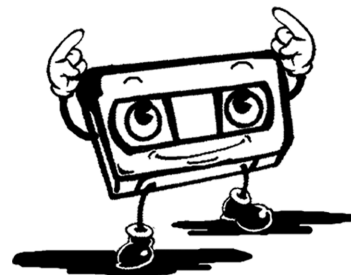

(©1996 Primedia Workplace Learning, Safety Watch) 17 min.

Task Exposure Analysis : Beginning The Pro-Active Safety Process V0593

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. CC (©1995 Coastal Video Communications Corp.) 19 min.

VIDEO TIP:

*What is the "only you" rule?
Don't loan out videos to others.*

LAB SAFETY

Assessing Risks of Toxic Chemicals V0983

Introduction to hazardous chemicals in laboratory and requirements of WAC 296-62 Part Y. Geared to the research rather than clinical laboratory. (©1997 Howard Hughes Medical Institute) 11 min.

Centrifugation Hazards V0977

Reviews good laboratory practices for safe use of centrifuges. (©1995 Howard Hughes Medical Institute) 9 min.

Chemical Hazards V0981

Demonstrates the safety principles that apply to working with hazardous chemicals in the biological laboratory. Covers the protocols phenol-chloroform extraction and ethanol precipitation.

(©1994 Howard Hughes Medical Institute) 10 min.

Chemical Hygiene Plan : Laboratory Standard Training (3 Parts) V0136

THE CHEMICAL HYGIENE STANDARD : WHAT IT MEANS TO YOU [Pt. 1] gives employees working in the laboratory a plain language overview of the OSHA Standard. (11 min.) CHEMICAL HYGIENE IN THE LABORATORY :KEEPING YOU SAFE AND HEALTHY [Pt.2] for employees working in labs and handling chemicals. (22 min.) . CHEMICAL HYGIENE PLANS : PUTTING IT ALL TOGETHER [Pt 3] for managers and supervisors who must develop and administer the Chemical Hygiene Plan required by the Standard. Offers a template to simplify the process of setting up the Plan. (17 min.)

(©1990 Tracom) 50 min.

Chemical Storage Hazards V0978

Reviews the basic principles of safe chemical storage in research laboratories. (©1995 Howard Hughes Medical Institute) 11 min.

Common Toxicology Terms Of An MSDS V0601

The study of how different materials affect the human body is known as toxicology. Describes terms such as toxicity, LD 50, LC 50, exposure limits, and physiological effects. Emphasizes the importance of Material Safety Data Sheets. Safety Watch Series. CC

(©1997 Primedia Workplace Learning, Safety Watch) 12 min.

VIDEO TIP:

What are the newest videos since this catalog was printed? Check our web site:

Videos.LNI.wa.gov

Controlling Your Risks : HIV in the Research Laboratory V0976

General overview of HIV exposure hazards in the laboratory. Promotes the culture of safety in the lab. Includes guidelines on the appropriate use of PPE, cleaning and disinfection, engineering and workplace controls. Program is a supplement to formal instruction.

(©1994 Howard Hughes Medical Institute) 28 min.

Emergency Response (in the Laboratory) V0982

Reviews procedures for responding to laboratory fire, radiation, chemical spills and biological spills. Includes personal injuries and eyewash stations and showers. (©1994 Howard Hughes Medical Institute) 12 min.

Eyewash Showers and Stations V0972

Clearly demonstrates how to use eyewash showers, types of eyewash stations and proper locations. Suggested to supplement or as refresher training. Safety Watch Series. Same as V0472. CC

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Glassware Washing Hazards V0979

Demonstrates correct glassware washing and sterilization techniques in the research laboratory.

(©1995 Howard Hughes Medical Institute) 10 min.

Hydrogen Sulfide : A Matter Of Life Or Death V0649

Whether working in a manufacturing plant, laboratory, mine or for a public utility, employees' health depends on understanding the potential hazards of hydrogen sulfide. Teaches safe work practices necessary to avoid injury; defines hydrogen sulfide, lists effects of hydrogen sulfide, aid monitoring requirements, personal protective equipment, and emergency response/first aid procedures. (©1993 Coastal Video Communications Corp.) 20 min.

Key to Laboratory Safety : Handling Hazardous Chemicals V0113

Discusses the health and physical hazards present in the laboratory and detection methods. Safe work practices, personal protective equipment, and emergency response procedures are explained. (©1991 Industrial Training, Inc.) 23 min.

Lab Safety For Non-Laboratory Personnel V0525

Get a dose of what lab safety is all about from "Dr. Chemical Imbalance." Covers safety measures, the labels on chemicals, and response procedures to follow in an emergency. Notice: slightly offbeat presentation. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Laboratory Safety : The Finer Points V0999

Reviews hazardous chemicals and lamps, chemical fume hoods, emergency showers, eye wash stations, chemical storage and safe chemical use. CC

(©2002 Coastal Video Communications Corp.) 17 min.

Mammalian Cell Culture Hazards V0984

For research laboratory workers. Focus is on bloodborne pathogens hazards, increasing the efficiency of procedures and reducing the possibility of contamination. (©1997 Howard Hughes Medical Institute) 8 min.

Practicing Safe Science (in the Laboratory) V0975

Focuses on safety in the molecular biology laboratory, demonstrates safe practices, features reenactments of actual laboratory accidents, and poses challenging questions to help the viewer recognize risks associated with scientific protocols. Intended for use as an aid to the promotion of laboratory safety, not as a safety training program. (©1992 Howard Hughes Medical Institute) 29 min.

Radionuclide Hazards V0980

For the research laboratory scientist. Reviews the types of emission and associated hazards of the most common radionuclides used in biomedical research. (©1994 Howard Hughes Medical Institute) 12 min.

Safety Showers & Eye Washes V0251

Reviews situations where safety showers/eye washes should be used and how to use them. Describes different types and how to operate, chemical splashes, first aid, assisting a victim, and maintenance and testing. (©1994 Long Island Productions) 12 min.

Working Safely With Radiation : Fundamentals Of Ionizing Radiation Protection V0595

Basic orientation for laboratory and other technical personnel who will be working with or around radiation sources on the job. Covers the biological effects of radiation, monitoring and dosimetry, techniques for limiting personal exposure, special considerations for pregnant workers, and regulations. (©1995 Business Training Systems Inc.) 19 min.

X-Ray Diffraction Hazards V0985

Basic statement of the hazards associated with x-ray diffraction and the need to exercise deliberate precautions during its use. (©1997 Howard Hughes Medical Institute) 9 min.

LADDER SAFETY

see also Scaffolds

Case of the Ladder Bandit V1031

Perk up ladder safety training with this humorous dramatic investigation by the Mayberry Deputy. At first it seems a bit corny, but hang in there by the end of the program viewers will remember ladder basics. Topics include: Ladder inspection; maintain three points of contact; the belt buckle rule; safety precautions for step ladders, straight and extension ladders; and the consequences of taking shortcuts. (©2002 R M Distributors - Hi 5) 10 min.

High Impact : Fall Prevention V0669

The 10 accidents shown in this video graphically demonstrate shortcuts and other common safety mistakes leading to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. Warning! May be too graphic for some audiences. Spanish version V0777 (©1997 ERI Safety Videos) 19 min.

High Impact : Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. Warning! May be too graphic for some audiences. (©1995 ERI Safety Videos) 19 min.

Ladder Safety V0462

Discusses how falls could have been avoided if the proper safety procedures were followed. Gives basic guidelines for working on ladders and rolling scaffolds. Covers: Step ladders; General maintenance; Selecting the right ladder; Lifting & carrying of ladders; erecting securing and positioning of ladders. Two minute segment on rolling scaffolds including inspection and maintenance. (©1994 Safetycare, Inc.) 13 min.

Ladder Safety V0355

(Humorous) Dragnet show spoof. Max Monday, safety cop, shows the importance of training in ladder safety, inspecting ladders, using the correct ladder for the job, and the proper positioning and securing of ladders. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Ladder Safety Training V0316

Attention getting introduction featuring a humorous silent movie segment ala Charlie Chaplin ladder gymnasts. Describes types and ratings of ladders, instructions for inspecting and maintaining ladders, methods for evaluating the site, setting up, and securing ladders for stability. (©1992 Ladder Safety and Supply) 21 min.

Prevención De Caídas High Impact : Fall Prevention V0777

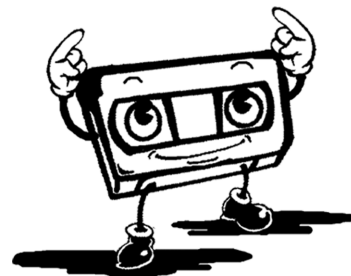

The 10 accidents are shown to remind workers about short cuts and other common safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. English version V0669. (©1997 ERI Safety Videos) 19 min.

Safety Guidelines For Tube & Clamp/System Scaffolds V0141

An instructional tool for learning the basic safety guidelines for using, erecting, and dismantling tube and clamp/system scaffolds. (©1991 Scaffold Industry Association) 20 min.

VIDEO TIP:

*Did you know?
You can reserve videos up
to six months in advance.*

Stairways And Ladders : The First Step V0275

Outlines methods of personal fall protection and safe work practices for elevated surfaces. Describes types and safe use of portable, extension, and fixed ladders. Covers: OSHA 1910.23-25; Set-up and use; and Inspection and maintenance. Bonus 4 minute segment on job-made ladders on the construction site (1926.150, 60) (©1991 Coastal Video Communications Corp.) 18 min.

Tripod Orchard Ladder Safety V0310

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and proper clothing. Demonstrates how to inspect and set up tripod orchard ladders. (©1990 Oregon State University, Extension Service) 10 min.

Tripod Orchard Ladder Safety Seguridad en la Huerta usando la Escalera Trípode V0295

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and proper clothing. Demonstrates how to inspect and set up tripod orchard ladders. In English and Spanish (©1990 Oregon State University, Extension Service) 10 min.

LANDSCAPING/NURSERY SAFETY

Breathe Easy V0759

A training video covering respiratory protection for workers in nurseries. Shows how to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. Spanish Version V0760.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Carpal Tunnel Syndrome & Other Upper Extremity Disorders for Arborists V0970

Develops awareness of musculoskeletal disorders and techniques for arborists to use to minimize risks. Shows how to vary work activities, take stretch breaks, change or modify tools and equipment handles, proper postures and how to minimize exposure to vibration. (©2000 Forest Industry Safety & Training Alliance, Inc.) 13 min.

Grounds Keeping : Lawn Mower Safety V0354

Points out precautions that need to be taken for safe lawn mowing, such as familiarizing yourself with the features of your mower and the area to be mowed, wearing protective clothing, cleaning and maintaining the mower, and having the mower professionally serviced. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Groundskeeper Safety Including Pesticides V0509

Many safety issues for groundskeepers are discussed, including working in hot and cold weather, working with power equipment, using appropriate PPE, lifting correctly, avoiding insect bites, and working with pesticides. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Groundskeeping Safety : Be A Pro! V0646

A professional groundskeeper knows that maintaining lawns, trees, and shrubs day-after-day requires use of potentially dangerous equipment and chemicals. Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and push mowers; trim and brush cutting equipment and blowers; checklist for hazardous materials. (©1996 Coastal Video Communications Corp.) 17 min.

Groundskeeping Safety : Be a Pro! V0997

Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and pushmowers; trim and brush cutting equipment and blowers; checklist for hazardous materials. CC version CC (©1996 Coastal Video Communications Corp.) 17 min.

Groundskeeping Safety : Dealing With Bugs And Critters V0806

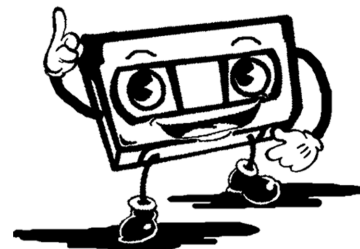

Designed especially for public works, utility, government employees or anyone whose job function includes grounds maintenance or outdoor responsibilities, is essential for a safe work environment where you are exposed to pests — flying, creeping, crawling critters that can bite, sting and cause serious harm. Covers: Basic PPE; Snakes, wasps, bees, fire ants; Poison ivy/oak; Hantavirus; and Firstaid. CC (©1999 Coastal Video Communications Corp.) 16 min.

Landscape Power Tools V0905

Concentrates on three tools; chainsaws, string trimmers, and gas powered blowers. For each type of tool the training format includes the elements of safety check and inspection before use, importance of PPE for feet, hands, head, eye, and ear protection. Gives safety precautions and techniques to prevent injury to the operator and others in the area. (©1992 Coastal Video Communications Corp.) 23 min.

VIDEO TIP:

Easy returns! The backside of your shipping box label has the Safety & Health Video Library address; just turn it over.

Manejadores de Pesticidas y el Estándar de Protección de Trabajador

Pesticide Handlers and the Worker Protection Standard V0845

Meets the Federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some key points: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing & loading pesticides; Cleaning up spills; Cleaning & disposal of pesticide containers; Pesticide application; Cleaning up; and Working safely with pesticides. (English version V0844) (©1994 Michigan State University Extension) 50 min.

Pesticide Handlers and the Worker Protection Standard V0844

Meets the federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some of the segments: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing & Cleaning up spills; Cleaning & disposal of pesticide containers; Applying pesticides; Cleaning up; and Working safely with pesticides. (Spanish version V0845) (©1994 Michigan State University Extension) 50 min.

Pesticide Safety : Worker Protection

Seguridad con los Pesticidas: Protección del Trabajador :Trabajadores V0249

Intended to help meet the requirements set by the EPA for training Agricultural Workers and Pesticide Handlers under the new Worker Protection Standard's regulations. Divided into two sections: Part1 is for both the Agricultural Worker and Pesticide Handler. Part 2 has additional information for Pesticide Handlers and Early-Entry Workers.

(©1993 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 66 min.

Respire Fácilmente Breathe Easy V0760

A training video covering respiratory protection for workers in nurseries. Shows: How to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. English version V0759.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Training Greenhouse Workers To Handle Pesticides Safely V0298

Stresses alertness to the four ways horticultural workers might come into contact with pesticide chemicals. Covers: Handling; Equipment; Mixing; Application; Cleaning; Clothing; Safety gear; and First aid. (©1986 Visual Media, University of California) 16 min.

LASER SAFETY

Laser Safety V0994

Training for employees working with industrial lasers. Covers: Identifies different types of lasers, safety precautions to prevent eye injury and burns, proper eyewear protections, preventing secondary injury from indirect laser exposure, and potential hazards when working with lasers. CC (©2001 Summit Training Source, Inc.) 12 min.

Low-Power Lasers : Be Aware Of The Hazards V0479

Designed to provide employees with an awareness of the potential hazards of low power lasers. Reviews the hazard categories of lasers, describes the specific hazards of Class 2 and 3a lasers and explains the safety precautions that should be exercised when using them.

(©1995 Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min.

LATEX ALLERGIES

Latex Allergies : A Closer Look V0808

Explains the routes of exposure and self-protection. Covers: Allergies; Who's at risk; Personal protective equipment; Office supplies; Foods; Housekeeping; Allergic reactions; Irritant and allergic contact dermatitis; and Immediate Hypersensitivity. (©1998 Long Island Productions) 10 min.

VIDEO TIP:

Remove the UPS shipping sticker on the back of the shipping box before shipping videos back to us. We want your videos to come back to us and not back to you!

LEAD SAFETY

He's Not the Man I Married... Could it be Lead ?

No es el Hombre con quien Me Case.... Sera el plomo V0894

Bilingual video in drama format illustrates the hazards of lead in the industrial workplace.

(©1991 California Department of Health Services) 17 min.

Keep The Lead Out V0214

Filmed in multiple industrial and construction locations. Training for workers on: potential hazards of lead, and how it enters the body. Describes the requirements for regulated areas, engineering controls, and personal protective equipment. For all employees exposed to lead on-the-job... manufacturing, chemical, petroleum, maintenance, utilities, and construction industries.

(©1993 Summit Training Source, Inc.) 13 min.

Lead Awareness V0366

(Humorous) Through the game show, "It's Your Job" format, this video describes major sources of lead exposure and methods by which lead can enter the body. Identifies the parts of the body most adversely by excessive levels of lead. Lead poisoning symptoms and protective measures are outlined, including medical monitoring. Suggested to supplement or use as refresher training. Safety Watch Series. CC (©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Lead Awareness V0628

(Humorous) Through the game show, "It's Your Job" format, describes major sources of lead exposure and methods by which lead can enter the body. Identifies the parts of the body most adversely by excessive levels of lead. Lead poisoning symptoms and protective measures are outlined, including medical monitoring. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 11 min.

OSHA Lead Standards For Construction And General Industry : An Employee Training Program V0260

Especialy useful to building/construction companies, manufacturers, public-sector organizations, recyclers and hospital maintenance staffs. Explains lead overexposure; symptoms and effects on the body. Describes how to assess lead exposure. Shows how engineering, work practice and administration controls can be used to limit lead exposure; personal protective equipment; and the Medical Surveillance Program.

(©1993 International Film Bureau Inc.) 24 min.

Working With Lead Exposure In Construction And General Industry V0258

Meets the General Industrial Standard & Interim Final Rule for Construction. Describes measurement concepts (PEL, TWA, Action Levels); exposure assessment; monitoring; methods of compliance; hygiene and housekeeping; and medical surveillance.

(©1993 Long Island Productions) 15 min.

LIFTING

see also Back Safety

Back Protection : Defending Your Safety Zone V0694

Compares the physical rigors on the job to the physical challenges of professional athletes. Describes: Safe lifting; Proper posture; Exercises; and preventing back injuries. Bonus add-on: a short description on the use of back belts. CC

(©1997 Coastal Video Communications Corp.) 22 min.

Back Safety V0790

Testimony from an injured worker lends credibility to safe lifting techniques demonstrated. Manufacturing work environment. Suggested to supplement or as refresher training. Safety Watch Series. CC available on V0508.

(©1996 Primedia Workplace Learning, Safety Watch) 6 min.

Back Your Back : Back & Muscle Injury Prevention V0146

Explains the potential causes of back injuries, and discusses ways to prevent back pain. Covers establishing load capabilities and proper positioning. Slides to Video format.

(©1992 Department of Labor and Industries, State of Washington) 19 min.

Ergonomics : A Weight Off Your Shoulders V0877

Instructs employees to use the science of ergonomics to develop safe lifting techniques and limit repetitions. Includes stretching exercises. Industrial work environment. CC

(©1995 Coastal Video Communications Corp.) 13 min.

Ergonomics : Break the RMI Habit V0768

Focuses on repetitive motions of the shoulders, back, arms, wrists and hands which may cause injuries. Gives suggestions for modifying workstations and minimize excessive movement in the industrial and office environments. Demonstrates five stretches. CC

(©1997 Coastal Video Communications Corp.) 13 min.

Ergonomics : The 24-Hour Body V0825

Teaches employees how to use the ergonomic principles learned at work when working at home. Covers: Practical solutions to potential strains and Off-the-job safety procedures. CC

(©1998 Coastal Video Communications Corp.) 20 min.

Ergonomics : Your Body At Work V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. CC

(©1991 Coastal Video Communications Corp.) 20 min.

Good Back Bad Back : It's Your Choice V0675

Uses humor to cover four principles a person can use to protect the back in everyday situations: Preserve the curves, Build a bridge; Keep it close; and Lock and lift. (©1997 Coremedia Training Solutions) 20 min.

Lift It Right V0016

Gives workers the proper techniques for: Lifting; Avoiding injuries; Carry it safely; and Use the legs to avoid undue stress to the back. (©1989 Bureau of Business Practice, Prentice Hall) 11 min.

Lift With Care V0101

For health care workers. Shows how lifting a patient requires complex planning, careful execution, and input from the patient and/or their records to avoid injury to either the patient or their care-giver. (©1987 Visucom Productions, Inc.) 30 min.

Lifting It Right V0418

For auto service technicians operating automotive lift. Teaches proper procedure to lift a vehicle without causing injury or property damage. Describes operation of the most common in-ground and surface-mounted lifts. (©1993 Automotive Lift Institute) 17 min.

Lifting Safely in Construction V0901

Construction work environment. Covers the mechanics of the spine, demonstrates turns and bends that can cause injury. Shows safe lifting techniques and explains the 10:1 lever ration. (©1993 R M Distributors - Safety Source) 9 min.

Nursing Homes : Hazards and Solutions V0692

Covers nursing home dangers: lost work time; over exertion; other potential hazards. Demonstrates procedures to lift and move residents, suggested ergonomic improvements; OSHA inspections and evaluations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (Open Captioned) (©1998 U.S. Department of Labor, The Division of Audiovisual, Communication Services with Oppix & Hider,) 16 min.

Preventing Slips, Falls And Lifting Injuries : Program 3 (Restaurant Safety) V0794

Covers: Preventing slips and falls, reducing hazards, Lifting techniques; Ladder safety. Food Service work environment. (©1992 National Restaurant Association, The Educational Foundation) 13 min.

Safe Lifting V0346

Limited to proper lifting techniques when manual lifting is required. Demonstrates safe lifting procedures for industrial and materials handling setting. Variation of proper neck posture; head up vs. neck tucked. Safety Watch Series. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Safe Lifting For The Trucking & Warehouse Industry V0665

Covers: Back mechanics: structure and function; Lifting principles and techniques: load and counterload, 10 to 1 ratio, palm grip, load in close, leg power; and Techniques for awkward positions. (©1996 Long Island Productions) 9 min.

Safe Patient Lifting V0089

Paced for viewer input, this program is concerned with proper techniques for lifting and transferring patients. For health-care workers. (©1989 Center for Training and Development, State Compensation Fund) 17 min.

Safety On The Job : Manual Load Handling In The Warehouse V0133

About two-thirds of warehouse injuries are caused by improper lifting, carrying, or handling materials. Describes how to correctly inspect a load. Provides safety rules for using special tools in the warehouse. (©1990 AIMS Media) 12 min.

Smart Lift V0742

Designed to reduce the number, incidence and severity of lifting and twisting injuries in the retail industry through an updated, accurate program to educate employees in proper and safe techniques for lifting and moving heavy objects. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 8 min.

Straight Back Talk V0780

Interviews from victims of workplace back problems. Success stories about protection and prevention strategies are included. Straightforward proper lifting techniques. Office, industrial and luggagehandling work environments. Follow up of V0675 "Good Back Bad Back." (©1997 Coremedia Training Solutions) 10 min.

Workplace Ergonomics: A Better Way to Work V0559

Employee education. Covers four common cumulative trauma disorders, causes, and early symptoms and steps to take to minimize the risk factors associated with cumulative trauma disorders. (©2000 Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min.

LOCKOUT/TAGOUT

Caution Lockout For Life! V0493

An effective way to motivate employees to follow proper procedures is by showing them an actual accident — what went wrong and how that tragedy could have been avoided. Details correct procedures for locking and tagging all energy sources. Includes: Dramatic reenactments of actual incidents; Hazards of uncontrolled energy; Equipment shutdown and isolation; and Review of procedures. (©1992 Coastal Video Communications Corp.) 20 min.

Fatal Shock Electrical Case Histories V0496

Introduces workers to the principles of electricity, shows how to avoid the dangers of electrical shock and explains correct responses to electrical emergencies. Covers: Importance of following proper procedures; Reporting unsafe electrical working conditions; Personal protective equipment; and Personal verification of lockout/tagout. (©1993 Coastal Video Communications Corp.) 24 min.

High Impact : Electrical Safety V0571

Demonstrates electrical safety lessons in ten recreated accidents. Highlights importance of teach importance of qualified electricians to maintain electrical equipment; lock-out / tagout; proper distance, ladder safety and safe work practices. Warning! May be too graphic for some audiences.
(©1995 ERI Safety Videos) 18 min.

High Impact : Lockout/Tagout Safety V0779

Features eight accident recreations to demonstrate the importance of following all prescribed lockout/tagout procedures. The viewer will also learn the responsibilities and safe work procedures of those who are affected by lockout/tagout as well as those that are authorized to service machines and perform lockout/tagout procedures. Warning! May be too graphic for some audiences.
(©1996 ERI Safety Videos) 19 min.

High Impact : Lockout/Tagout Safety (Life and Death Series) V0843

Dramatic presentation: Martha, a veteran plant employee, discovers Ralph unconscious and bleeding beside the turning dryer. As this mystery unfolds, the co-workers recall other lockout mistakes that have caused serious injuries and deaths. Key points: employee complacency; training and authorization; isolating energy sources; lockout devices; and verification. Life and Death Series. Warning! May be too graphic for some audiences.
(©1999 American Training Resources, Inc.- ERI) 19 min.

Line Breaking : Use A Permit! V0432

Every day lines and equipment must be opened for different reasons. Safely managing the materials flowing through that pipeline system is the focus of this program. Covers: Line and equipment opening (LEO); establishing an effective safety program; LEO permits; Lockout/Tagout; line breaking procedures/post procedures; and emergency response.
(©1994 Coastal Video Communications Corp.) 16 min.

Lockout For Life! V0733

Reviews critical procedures such as hazards of uncontrolled energy, equipment shutdown and isolation. Dramatic re-enactments of actual incidents.
(©1992 Coastal Video Communications Corp.) 22 min.

Lock-Out Procedure V0815

Covers: Planning; Methods of lockout; Lockout sequence; The try; and Return to operational status.
(©1993 Safetycare, Inc.) 10 min.

Lockout/Tagout V0315

Describes the process of locking equipment; terms for lockout/tagout; and identifies the specific training for lockout.
(©1994 Comprehensive Loss Management, Inc.) 12 min.

Lockout/Tagout V0360

(Humorous) A safety-conscious family views home video of their vacation, but instead sees lockout/tagout programs at various facilities. Covers purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. Suggested to supplement or as refresher training. Safety Watch Series.
(©1994 Primedia Workplace Learning, Safety Watch) 9 min.

Lockout/Tagout V0629

(Humorous) A safety-conscious family views home video of their vacation but instead sees lockout/tagout programs at various facilities. Covers purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Lockout/Tagout : A Life Is On The Line V0502

Details the steps in the lockout/tagout procedures. Discusses the importance of employee training, pre-planning and review, notification of impacted employees, and identification of energy sources. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 7 min.

Lockout/Tagout : Controlling Hazardous Energy V0448

Unexpected start-up or energization can result in workers being crushed, cut, electrocuted, burned, maimed or even killed. Describes lockout/tagout procedures from various energy sources, and the procedural steps to lockout/tagout. CC
(©1995 Industrial Training, Inc.) 20 min.

Lockout/Tagout : Controlling the Beast V0734

A roaring Bengal tiger helps demonstrate the power of uncontrolled energy and motivates employees to use the proper lockout/tagout procedures. Graphically demonstrates energy's dangers. Complies with OSHA 1910.147. CC
(©1994 Coastal Video Communications Corp.) 19 min.

Lockout/Tagout : Just Do It V0455

Sit in on a safety meeting discussion of lockout /tagout. Reviews the basic lockout/tagout procedures and stresses the importance of taking time to protect self and co-workers. Safety Watch Series. CC
(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Lockout/Tagout : The Basics V0370

(Humorous) Game show format. Identifies roles and responsibilities of both the "authorized" employee and the "affected" employee. Explains the purpose of lockout/tagout procedures and the dangers if those procedures are not followed. Describes the four types of energy which may be locked or tagged out. Safety Watch Series.
(©1994 Primedia Workplace Learning, Safety Watch) 10 min.

Lockout/Tagout : When Everyone Knows V0870

Trains for compliance of OSHA 1910.147 by explaining critical lock-out/tag-out procedures. Video contains reenactments and wrong way/right way scenarios that clearly illustrate the importance of energy control and proper procedures. (©2000 Aurora Pictures) 17 min.

Lockout/Tagout Safety Procedures V0142

Designed to help employers and employees understand requirements for the standard that applies to the control of energy during maintenance and servicing. Slides to video format. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1992 Department of Labor and Industries, State of Washington) 17 min.

What Is Electricity? V0762

Designed to train both qualified and non-qualified employees. Includes: How electricity works; Associated hazards; Personal protective equipment; Fundamentals of grounding; Determining energized parts, Determining nominal voltage, Lockout and tagout procedures; Equipment start-up and operation; and Safe usage. (©1994 Summit Training Source, Inc.) 14 min.

Working Safely With Electricity. Part 3 : The Importance Of Grounding V0443

Defines grounding. Explains proper grounding and the color-code system of identifying electrical wires. Describes ground fault circuit interrupters. Demonstrates use of multimeter - solenoid-type tester. Introduces Lockout/Tagout procedures. (©1992 Bergwall Productions Inc.) 15 min.

VIDEO TIP:

Training booklets provided must be returned.

LOGGING AND FOREST PRODUCTS

Blasting Alternative V0112

This Canadian produced video describes and demonstrates various safe ways to blast trees that would otherwise be a danger if it were attempted to cut them down in logging situations. (© Workers' Compensation Board of British Columbia) 9 min.

Carpal Tunnel Syndrome & Other Upper Extremity Disorders In the Logging Industry V0971

Describes how to prevent musculoskeletal disorders while performing typical logging activities. Gives examples of early symptoms and suggestions to correct problems before a severe injury develops. (©1998 Forest Industry Safety & Training Alliance, Inc.) 13 min.

Chainsaw Maintenance And Safety V0217

Includes components of the chainsaw; selection and sharpening; and maintenance functions of sharpening, depth gauge, guide bar, chain assembly and tension. Personal and operational safety training is also covered. (©1993 Safetycare, Inc.) 16 min.

Chainsaw Safety V0176

A two part video on the safe use of chainsaws in sawmills. Discusses tips to safe chainsaw use in: saw selection, inspection, operations and hazards and PPE. Part 2 covers: hazardous environments in sawmills; log decks, edgers, conveyors and sorters. (©1993 Workers' Compensation Board of British Columbia) 20 min.

Christmas Tree Harvest Safety V0962

An innovative "silent movie" designed to reach workers of all languages. Shows the day in the life of a harvester beginning with work preparations and ending with loading processed trees for transport. Includes: work clothing, cutting, movement of trees and personnel, processing and loading. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. DISCLAIMER: Drop starting as seen in the video is prohibited. Riding in

truck bed as seen in video is prohibited. High visibility vest is required during helicopter operation.

(©2002 Department of Consumer Business & Services, Oregon OSHA) 20 min.

Every Twelve Seconds V0084

Takes a candid look at how accidents changed the lives of five permanently disabled workers associated with the FOREST INDUSTRY. Shows that accidents can be prevented and the workers need to take responsibility for their actions. (©1987 Workers' Compensation Board of British Columbia) 29 min.

Hazard V0124

Eleven threatening hazards are created and avoided in this "real life" training program. Loggers are shown face to face with some of the most common and deadly problems confronting modern production cutters. Realistic solutions and suggestions for each hazard make the program appealing. (©1987 Northern Woods Safety Foundation) 18 min.

Put'er There! V0125

Presents four excellent reasons to learn and use directional felling techniques: profit, save time, save wood, and prevent injury. Reveals that the techniques demonstrated share five important felling rules and keys to successful felling. (©1989 Northern Woods Safety Foundation) 22 min.

Rigging and Landing Safety For Managers and Supervisors V0082

Covers improving safety in Alaska's timber and logging industry. Emphasizes the manager's responsibility for the logging crew's safety. Discusses: Reducing accidents; Policy enforcement; Personal Protective Equipment; and Safety Hazards. Specific safety tips for landing and rigging are given. (©1988 Department of Labor, State of Alaska) 20 min.

MACHINE AND TOOL SAFETY

Arc Welding : Safety And Operations V0025

Describes the arc welder and emphasizes safety procedures including PPE. Names the five types of electrodes and tells how to put the electrodes into the holder. Correct and faulty welds are shown.

(©1970 AIMS Media) 13 min.

Backhoe Safety V0152

Focusing on tractor-loader backhoes (rubber tired with a front loading bucket), this program puts the emphasis on safe operation techniques such as: Pre-inspection/start-up hazards; Problems to look for and how to handle them; Safely loading and unloading trailers; Proper positioning of the backhoe; Digging techniques near underground and overhead utilities; and Safe work practices for crew personnel when working around a backhoe.

(©1992 Zomar Productions, Ltd) 18 min.

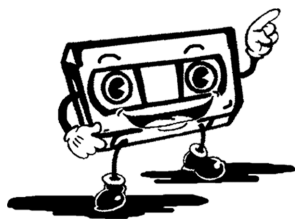

Chainsaw Maintenance And Safety V0217

Includes components of the chainsaw; selection and sharpening; and maintenance functions of sharpening, depth gauge, guide bar, chain assembly and tension. Personal and operational safety training is also covered.

(©1993 Safetycare, Inc.) 16 min.

VIDEO TIP:

*Faxing your request?
A confirmation fax will
be sent back. Do check
the dates!*

Chainsaw Safety V0176

A two part video on the safe use of chainsaws in sawmills. Discusses tips to safe chainsaw use in: saw selection, inspection, operations and hazards and PPE. Part 2 covers: hazardous environments in sawmills; log decks, edgers, conveyors and sorters.

(©1993 Workers' Compensation Board of British Columbia) 20 min.

Electric Circular Handsaws V0107

Provides on-the-job examples safe operations of various types of saws and their accessories. Basic instruction for novice and experienced users on the residential construction jobsite or in the shop.

(©1986 International Film Bureau Inc.) 19 min.

Equipment And Machine Guarding V0680

Shows the risks associated with mechanical hazard and safe work procedures.

Describes fixed guards, distant guards, adjustable guards, self-adjusting guards, interlocked guards, and trip devices. (©1996 Safetycare, Inc.) 13 min.

Ergonomic Tools V0487

(Humorous) In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders. Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series.

Suggested to supplement or as refresher training. CC

(©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Ergonomics : Your Body At Work V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. CC

(©1991 Coastal Video Communications Corp.) 20 min.

Ergonomics: Taking Matters into Your Own Hands V0769

Describes cumulative trauma disorder injuries to the arms, wrists and hands. In an industrial work environment, stresses neutral positions, workstation modification, and proper hand tools. Demonstrates techniques to minimize force, reduce repetition and eliminate direct pressure.

Includes wrist and hand exercises. CC (©1995 Coastal Video Communications Corp.) 14 min.

Give Safety A Hand : Knife And Blade Safety V0568

Describes safe procedures in office and industrial environments when handling knives, blades, and box cutters.

(©1994 Coastal Video Communications Corp.) 9 min.

Groundskeeping Safety : Be A Pro! V0646

A professional groundskeeper knows that maintaining lawns, trees, and shrubs day-after-day requires use of potentially dangerous equipment and chemicals.

Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and push mowers; trim and brush cutting equipment and blowers; checklist for hazardous materials.

(©1996 Coastal Video Communications Corp.) 17 min.

Groundskeeping Safety : Be a Pro! V0997

Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and pushmowers; trim and brush cutting equipment and blowers; checklist for hazardous materials. CC version CC

(©1996 Coastal Video Communications Corp.) 17 min.

High Impact : Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. Warning! May be too graphic for some audiences.

(©1995 ERI Safety Videos) 19 min.

High-Impact : Metal Working Safety V0670

Re-creates ten industrial accidents involving metal working to illustrate the necessity of following proper safety procedures. Reviews safety issues that are important for operating brake presses, grinders, metal cutting shears and other machines. Major points: Understand machine operations and potential hazards; Receive training and authorization before operating any tool or machine; Use the appropriate PPE; and observe operating procedures at all times. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 22 min.

Low-Power Lasers : Be Aware Of The Hazards V0479

Designed to provide employees with an awareness of the potential hazards of low power lasers. Reviews the hazard categories of lasers, describes the specific hazards of Class 2 and 3a lasers and explains the safety precautions that should be exercised when using them.

(©1995 Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min.

Machine Cutting, Grinding And Sanding V0489

Don't get caught in the Hazard Zone! Discusses unique hazards in operating heavy equipment. Shows preventative measures for ensuring safe operation of grinding, cutting, and sanding equipment. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Machine Guarding V0252

Emphasizes individual responsibility when working on or around machines and equipment. Demonstrates lockout/tag-out, machine guarding requirements and personal responsibility.

(©1993 Long Island Productions) 13 min.

Machine Shop Safety V0160

Basic shop safety including PPE, clean work area, recognizing and avoiding mechanical, electrical and chemical hazards; and correct work practices.

(©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 20 min.

Machine Shop Safety V0519

Covers the hazards associated with machine shops; emphasizes safe work practices; wearing appropriate personal protective clothing and stresses good housekeeping practices. Safety Watch Series. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Mechanical Power Press Safety : Don't Press Your Luck V0578

It happens almost daily. Experienced machine operators lose a finger, a hand, or worse, all because they cut corners and their luck runs out. Motivates workers to follow proper safety procedures, comply with OSHA's Mechanical Power Press Safety Standard, and reviews safety tips for operators. Covers: Types of presses; Safeguarding devices; Safely operating a press; and Inspection and maintenance. (©1996 Coastal Video Communications Corp.) 19 min.

On Your Guard : Power Tool Safety V0907

Discusses general safety precautions for working with power tools. Covers the circular saw, radial arm saw, table saw, portable drill, portable sanders, bench grinder, angle grinder, and reciprocating saw. Construction site environment. (©1992 Comprehensive Loss Management, Inc.) 14 min.

Oxy Acetylene Welding : Safety And Operations V0024

Defining gas welding, this video explains: procedures for opening regulator valves; and preparing a torch for use. (©1970 AIMS Media) 15 min.

Pneumatic & Hydraulic Tools V0599

Alerts viewers to know the difference between pneumatic and hydraulic tools, their hazards, and limitations. Safety Watch Series.

(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Portable Hand Tools V0393

(Humorous) Join Tom, the Tool Guy, and his assistant, Bob, for a touch of humor while reviewing the basics of using hand tools. Emphasizes proper use and transporting tools correctly, PPE, inspection, types of hand tools (hammers, screw drivers, pliers), ergonomics, and choosing the proper tool for the job. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Portable Power Tools V0353

(Humorous) A humorous game show is the setting for learning the do's and don'ts of using portable power tools. Discusses common sense but sometimes forgotten procedures to perform before and during your use of power tools. Safety Watch Series. Suggested to supplement or as refresher training.

(©1994 Primedia Workplace Learning, Safety Watch) 10 min.

Powder Actuated Fastening Tools V0761

Demonstrates the use of explosive powered hand held fastening tools. Covers: Tool characteristics - direct acting standard velocity tools and indirect acting low velocity tools; Explosive charges; Personal Safety; PPE; Operational safety; Preparing a low velocity and standard velocity tools for use; Firing the tool; Fasteners and their selection; Fixing to concrete; and Fixing to steel. (©1992 Safetycare, Inc.) 14 min.

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use such as screwdrivers, pliers, wrenches, hammers, tools. Demonstrates the correct methods of use and PPE. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home.

(©1987 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Power Fastening Safety and You: A Partnership V0916

Testimonials to a safety attitude with air power tools in the residential construction work environment. Stresses the importance of using the correct trigger system for the job, keeping the finger off the trigger, wearing safety goggles, reading and heeding the instructions.

(©2001 International Staple, Nail and Tool Association) 15 min.

Power Press Safety V0992

Shows power press safe operations for full revolution and part revolution presses. Outlines potential hazards, PPE, injury prevention, barrier guards, two-handed controls, foot controls, presence-sensing devices, pullbacks or pullouts, and restraints. CC

(©2003 Summit Training Source, Inc.) 11 min.

Powered Hand Tool Safety: Handle with Care V0839

Emphasizes the basic safety principles with direct application to powered hand tools on and off the job. Discusses: Hazards and safety measures; Proper use of PPE; and Tool pre-inspection. Specific tools include saws, drills, pneumatic tools, and powder-actuated tools. CC

(©2000 Coastal Video Communications Corp.) 22 min.

Safe And Effective Grinding V0218

Shows how to operate an off-hand grinding machine safely and efficiently. Includes: Types of grinding machines; Components of a grinding machine; Types of abrasive wheels; Abrasive wheel identification; Inspecting abrasive wheels; Fitting a new wheel; Personal safety; Dressing and truing abrasive wheels; How to use an off-hand grinding machine; and Sharpening a twist drill.

(©1991 Safetycare, Inc.) 18 min.

Safety On The Job : Manual Load Handling In The Warehouse V0133

About two-thirds of warehouse injuries are caused by improper lifting, carrying, or handling materials. Describes how to correctly inspect a load. Provides safety rules for using special tools in the warehouse.

(©1990 AIMS Media) 12 min.

Safety On The Job : Working With Electricity V0241

Details the hazards associated with using electricity on the job. Illustrates the importance of knowing standard procedures for common electrical problems. Common hazards explored in this program: insufficient wire insulation, faulty breakers, dirty casings, overloaded outlets, and work with power tools around water. Work environments include warehouses, manufacturing plants, and construction areas.

(©1989 AIMS Media) 16 min.

Welding Safety V0170

Shows how to recognize hazards that accompany various welding work situations. Discusses precautions and protective devices to safeguard the welder and others in the workplace.

(©1986 Beacon Films) 11 min.

Welding Safety V0219

Today welders use highly technical welding processes that can create dangerous conditions in the workplace. Shows: How to identify welding hazards; Evaluating hazards in the workplace; Workshop controls; Work practice controls; and Personal Protective Equipment.

(©1990 Safetycare, Inc.) 16 min.

MACHINE GUARDING

Equipment And Machine Guarding V0680

Shows the risks associated with mechanical hazard and safe work procedures. Describes fixed guards, distant guards, adjustable guards, self-adjusting guards, interlocked guards, and trip devices.

(©1996 Safetycare, Inc.) 13 min.

Hazards of Long Hair, Loose Clothing, and Jewelry V0834

Rotating shafts, moving machinery and other objects in industrial operations can unexpectedly "bite" much like a creature in the wild. Shows how to reduce the chance of such an injury by controlling long hair, not wearing loose clothing, dangers of gloves, and hazard awareness of wearing jewelry at work.

(©1999 ERI Safety Videos) 10 min.

High Impact : Hand Safety V0330

This "Real World" video was produced on factory floors of the following industries: Paper Making, Meat Packing, Metal Working, Heavy Assembly, Foundry Operations, Sheet Metals Forming, and Industrial Maintenance. Topics covered: Pinch points; Hot surfaces; Arm Protectors; Long hair; Lock-out; Pinch points; Hot running nips; Loose clothing; and Guards. Warning! May be too graphic for some audiences.

(©1994 ERI Safety Videos) 19 min.

Machine Guarding V0252

Emphasizes individual responsibility when working on or around machines and equipment. Demonstrates lockout/tag-out, machine guarding requirements and personal responsibility.

(©1993 Long Island Productions) 13 min.

Machine Guarding V0402

A dramatic presentation in which the safety officer shows the company nurse the principles of machine guarding and examples of different types of guards. Discusses the critical components of effective guard designing. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 8 min.

VIDEO TIP:

Remove the UPS shipping sticker on the back of the shipping box before shipping videos back to us. We want your videos to come back to us and not back to you!

Machine Guards & Safety Devices V0882

Demonstrates various machine guards and safety devices designed to protect workers from flying particles, debris, chemical splashes, and injury. Fixed, adjustable and self adjusting machine guards are shown. Also discussed: Interlocks, pressure sensitive mats and photoelectric devices such as light curtains. Use of PPE is reviewed. (©1999 BNA Communications Inc.) 20 min.

Maintenance Person Safety V0685

The definition of a maintenance person goes like this: "An individual who is expected to do the impossible, in the shortest time, at the least expense, and to keep doing it day-after-day, year-after-year, without complaining, and never achieving the recognition deserved for keeping the organization in good operating condition." Covers: Hazardous materials; MSDS; PPE; Machine guarding; Lockout/Tagout; Electrical safety; and Fire prevention. (©1989 Long Island Productions) 6 min.

Mechanical Power Press Safety : Don't Press Your Luck V0578

It happens almost daily. Experienced machine operators lose a finger, a hand, or worse, all because they cut corners and their luck runs out. Motivates workers to follow proper safety procedures, comply with OSHA's Mechanical Power Press Safety Standard, and reviews safety tips for operators. Covers: Types of presses; Safeguarding devices; Safely operating a press; and Inspection and maintenance. (©1996 Coastal Video Communications Corp.) 19 min.

Power Press Safety V0992

Shows power press safe operations for full revolution and part revolution presses. Outlines potential hazards, PPE, injury prevention, barrier guards, two-handed controls, foot controls, presence-sensing devices, pullbacks or pullouts, and restraints. CC (©2003 Summit Training Source, Inc.) 11 min.

MATERIAL SAFETY DATA SHEETS (MSDS)

Chemical Emergency Preparedness & Procedures V0613

Describes chemical spill emergencies and procedures including reporting the incident, location of spill control equipment and first aid, MSDS, and cleanup. Safety Watch Series. Suggested to supplement or as refresher training. (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Chemical Handling : General Principles V0611

An in-depth training program on safe work practices for handling hazardous chemicals. Covers: Safety procedures; Flammables, corrosives, and solvents. This video can be used to help satisfy training requirements of the Hazard Communication Standard. (©1996 Coastal Video Communications Corp.) 16 min.

Chemical Hazard Communication : Your Right To Know V0040

Divided into three parts, this video covers: Part 1: (8 min.) Right-to-Know. Discusses Chemical Hazard Communication Programs, MSDS, and labeling. Part 2: (12 min.) Material Safety Data Sheets. Part 3: (18 min.) Hazardous Materials Identification System. Old production, poor technical quality. (©1986 Department of Social and Health Services & the Department of Corrections) 38 min.

Chemical Safety V0247

Excellent refresher course for those that have had "chemical right-to-know" training. Demonstrates the use of Material Safety Data Sheets and other forms of recordkeeping. (©1990 Industrial Training, Inc.) 21 min.

Chemical Safety : Hazard Communication V0081

Refresher course for those that have had "chemical right-to-know" training. Demonstrates the use of Material Safety Data Sheets and other forms of recordkeeping. (©1988 Industrial Training, Inc.) 21 min.

Common Toxicology Terms Of An MSDS V0601

The study of how different materials affect the human body is known as toxicology. Describes terms such as toxicity, LD 50, LC 50, exposure limits, and physiological effects. Emphasizes the importance of Material Safety Data Sheets. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Handling Hazardous Materials V0400

Offers tips for the safe use of hazardous materials emphasizing the importance of proper containers, container labeling, and storage of flammable and corrosive materials. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Hazard Communication : Learning The System V0013

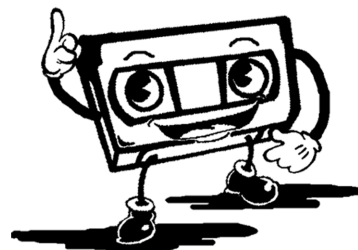

Introduction to the hazard communication act for employees. Stresses: individual responsibility, identification of dangerous chemicals, labeling, MSDS's, physical & health hazards, and routes of absorption. (©1986 Comprehensive Loss Management, Inc.) 16 min.

Hazard Communication : Signs of Safety V1010

Catchy intro music will stick with workers as they learn to identify chemical warning labels, review chemical hazards, signs and the elements of Material Safety Data Sheets. CC (©2003 Summit Training Source, Inc.) 13 min.

VIDEO TIP:

Easy returns! The backside of your shipping box label has the Safety & Health Video Library address; just turn it over.

Hazard Communication : The Right-To-Know, The Right-To-Understand, Part 1 : Awareness And Identification V0732

OSHA's standard 1910.1200 is about communication: Part One covers chemical inventory, a written Hazard Communication Program, employee training responsibilities, basic hazards associated with blocks of chemicals — Flammables, combustibles, oxidizers, reactives, and heavy concentration of interpreting labels and labeling.

(©1995 Industrial Training, Inc.) 9 min.

Hazard Communication : The Road To Safety V0647

Outlines the training requirements of the HAZCOM standard. Explains various physical and health hazards, using warning labels and MSDSs, and identifies potential hazards. CC

(©1995 Coastal Video Communications Corp.) 16 min.

Hazard Communication Standard For Construction : 29 CFR 1926.59 V0174

Describes a typical hazardous communication inspection. Procedures include: identification of all hazardous chemicals on site; all containers properly labeled; MSDS for chemicals are available to employees; and awareness training in hazards of the chemicals.

(©1993 National Technical Information Service) 14 min.

Hazardous Materials V0666

Defines hazardous materials. Gives thorough presentation of MSDS information and use of labels. Covers: PPE; rules for use & storage of flammables and fuels; spill and accident procedures including fire safety; and special shop/maintenance fluids and materials: batteries, solvents, corrosives, glues, paint, exhaust, and metal grindings.

(©1997 Long Island Productions) 23 min.

HAZCOM : Labels & MSDSs V0351

Identifies the pieces of information needed for all hazardous chemical labels and discusses the benefits of these labels. Details the specific informational requirements of the MSDS document. Emphasizes the importance of each

individual knowing where the MSDS sheets can be found at the jobsite and how to use them. Safety Watch Series. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

HAZCOM Case Histories : Learn From Their Mistakes V0336

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." Spanish version on V0799

(©1994 Coastal Video Communications Corp.) 19 min.

HAZWOPER : Role Of The First Responder V0488

Overview of Hazcom requirements and the specific responsibilities of the first responder. To be successful in this role, the first responder must be prepared for emergencies, be familiar with all hazardous materials on site, be observant of the environment and use the proper PPE when responding to a problem. Safety Watch Series. CC

(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Historias des Casos sobre la Comunicación del Peligro

HAZCOM Case Histories : Learn From Their Mistakes V0799

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." English version V0336.

(©1994 Coastal Video Communications Corp.) 19 min.

Housekeeping : It Ain't Like The Movies V0574

Reviews the importance of good housekeeping and what to look for in your facility. CC

(©1995 Coastal Video Communications Corp.) 15 min.

Line Breaking : Use A Permit! V0432

Every day lines and equipment must be opened for different reasons. Safely managing the materials flowing through that pipeline system is the focus of this program. Covers: Line and equipment opening (LEO);

establishing an effective safety program; LEO permits; Lockout/Tagout; line breaking procedures/post procedures; and emergency response.

(©1994 Coastal Video Communications Corp.) 16 min.

Meaningful Hazard Communication : The Hazard Communication Standard : West Program Unit 18 V0090

Clearly explains the OSHA Hazard Communication Standard. Covers: MSDS; Labeling; and Right-to-know. Construction work environment.

(©1989 National Construction Association) 10 min.

MSDS : Read It Before You Need It V0650

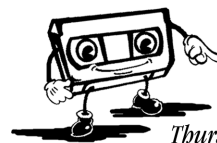

Explains the organization of Material Safety Data Sheet format by sections and includes product information; exposure situations; hazard prevention and personal protection; toxicology, ecology, and disposal; transportation; and regulatory information. CC

(©1993 Coastal Video Communications Corp.) 19 min.

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Gives health and safety information for veterinary employees and encourages their involvement in an ongoing health and safety program. Covers: Hazards and hazardous materials; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1994 Department of Consumer Business & Services, Oregon OSHA) 15 min.

VIDEO TIP:

Thurston County residents must pick up and drop off videos at the Service Location Lobby in Tumwater.

Right To Know : Workers & The Community V0476

In an old television sitcom format describes how the local Emergency Planning Committee can tell what chemicals are in the community and how to respond to a chemical emergency. Companies must provide MSDS's to the local fire departments on all chemicals that meet or exceed the EPA's threshold reporting criteria. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Safe Handling Of Gases V0203

Compressed gas cylinders supply a wide variety of gases for a multitude of different industrial, medical, and domestic purposes. Covers: types of gases, hazards; safe handling and storage of gases; transportation of cylinders; leak testing; emergency procedures; and Material Safety Data Sheets.

(©1992 Safetycare, Inc.) 19 min.

Safety Training For Handling And Transporting Hazardous Materials : A Safety Training Program For DOT HMCC26F V0244

Safety training section of the regulation for employees. Covers: Materials Safety Data Sheets review before moving hazardous materials, accident prevention, personal protection equipment; and emergency first aid. (©1993 AIMS Media) 19 min.

Trabajando de manera Segura con los Pesticidas Working Safely With Pesticides V0269

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents.

(©1989 University of Arizona, Cooperative Extension College of Agriculture) 17 min.

Warning Labels And Signs : Get The Message V0656

Identifies and defines various signs & tags. Describes HAZCOM, NFPA, HMIS, HAZMAT, SMARTRTK labeling systems.

(©1996 Coastal Video Communications Corp.) 17 min.

What's Wrong With This Picture? V0012

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. For Closed Caption version see: V0783. (©1989 Aurora Pictures) 17 min.

What's Wrong With This Picture? V0783

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. Training topics include reading container labels, understanding MSDS, selection and use of proper PPE, proper storage of chemicals, health effects of exposures, routes of entry, emergency evacuation and warning signs. CC (©1989 Aurora Pictures) 17 min.

Working Safely With Pesticides V0248

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents. Spanish version V0269.

(©1989 University of Arizona, Cooperative Extension College of Agriculture) 18 min.

You're In Control : A Hazard Communication Review V0205

A refresher for employees previously trained on right-to-know hazard communication or as initial hazard communication training for new employees. Includes basic responsive procedures: container labels and the MSDS; hazards associated with the chemicals; controlling the hazards; and emergency preparedness.. (©1992 Comprehensive Loss Management, Inc.) 18 min.

MINE SAFETY

You Are My Sunshine V1045

A detailed documentary of the Sunshine Mine Disaster of 1972. The video explores what happened, what went wrong and lessons learned. Survivors discuss how their lives were changed. Information is applicable for emergency response workers or those potentially exposed to carbon monoxide or working in confined spaces. (©2002) 69 min.

MOTIVATIONAL SPEAKERS

Accidents Aren't Just One of Those Things V1061

If you missed the 2003 Governor's Safety & Health Conference in Seattle, you can still hear the message from keynote speaker, Martin Lesperance in this program! A 20 year veteran firefighter and paramedic, Martin passionately speaks from the emergency medic's point of view on life changing accidents that didn't have to happen. Some of the tragic accidents that didn't have to happen: a paralyzing fall off a ladder; electrocution; head injury and other construction fatalities.

(©2003) 20 min.

Charlie Answers the Tough Questions V0836

"What would have made you wear your safety equipment?" and "what do you think of firing someone for a safety violation?" These are just two of the provocative questions Charlie Morecraft answers in this compelling video. Charlie's attitude and behavior, before, and after his accident, motivate employees to act more responsibly.

(©1997 Long Island Productions) 23 min.

Charlie Morecraft Story V0324

A compelling true story. Charlie Morecraft almost died in an industrial fire accident. There were times when he wished he had. He tells his story in 20 minutes — it seems like only 10. Charlie explains that — regardless what your job may be — you can't afford an accident, your family can't afford an accident, and your company can't afford an accident. "So now — whenever you do a job — step back, take a look at it and if it isn't safe, — don't do it."

(©1989 Media Resources Inc.) 20 min.

I Felt Comfortable V0460

The tragic true story of Randy Fellhoelter and his narrow escape from death. Randy tells his dramatic story to an audience of co-workers. Safety shortcuts escalate to near misses and up to major or fatal accidents. Taking risks can affect our lives and those of loved ones. Scenes of Randy's injuries were taken at the hospital and during his recovery. For all employees, supervisors, and managers. Warning! May be too graphic for some audiences. (©1994 National Resource Safety Center Inc.) 23 min.

Injuries Don't Take Holidays V1062

Martin Lesperance, veteran firefighter and paramedic, speaks about careless actions resulting in tragedy, especially around the winter holidays. Show this to encourage a safety minded holiday for your workers. Topics are fire safety, driving safety and alcohol abuse. (©2003) 19 min.

Remember Charlie V0707

Charlie tells his story. He was an oil refinery worker who was critically injured in an explosion that burned 45% of his body. Those who hear him speak will discard their attitudes of "accidents don't happen to me" and "safety is management's responsibility" and take personal responsibility for their own safety and the safety of their co-workers. (©1994 Summit Training Source, Inc.) 56 min.

Safety - Everyone's Responsibility (Charlie Morecraft) V0918

Keynote speaker to Governor's Safety Conference 2000 and 2001, Charlie Morecraft, motivates workers and management to work as a team to create a safer work environment. Charlie is dynamic in inspiring viewers to take responsibility for their own actions and their own safety, because it affects to lives of everyone around them. Powerful follow up to "Remember Charlie" V0707 or "Charlie Morecraft Story." (©1995 Phoenix Safety Management) 48 min.

MUSCULOSKELETAL DISORDERS**Back Protection : Defending Your Safety Zone V0694**

Compares the physical rigors on the job to the physical challenges of professional athletes. Describes: Safe lifting; Proper posture; Exercises; and preventing back injuries. Bonus add-on: a short description on the use of back belts. CC (©1997 Coastal Video Communications Corp.) 22 min.

CTD Prevention for Employees V0131

Helps employees to understand cumulative trauma disorders, their causes and, most importantly, how to prevent the injury from occurring. Discusses the elements of good job design, proper body mechanics and the importance of physical fitness. Recommended for awareness training. CC version. Formerly: Cumulative Trauma : Reducing The Risk CC (©1990 Comprehensive Loss Management, Inc.) 16 min.

Elements of Ergonomics : Basics of Ergonomics V0848

General awareness video educates employees and management on basic ergonomics in the workplace. Pairs with V0849 which is for managers and supervisors establishing an ergonomics program. Covers the risk factors of awkward posture, repetition, vibration, high hand force, and contact stress. CC (©2001 Comprehensive Loss Management, Inc.) 9 min.

Ergonomic F.I.T. : Looking At The Signals, Video 2 V0782

Explores the signs, symptoms and solutions for common ergonomic-related injuries. Tells workers to develop an ergonomic eye to recognize risk factors and physical signs in order to preventing injuries and take action early. Shows office and industrial environments. CC (©1995 CoreMedia Training Solutions) 13 min.

Ergonomic F.I.T. : Picturing the Process, Video 1 V0781

Explains the seven key actions that guide a successful ergonomics program. These include creating a team which includes employee participation, keeping open channels of communication, a strategy to determine most serious jobs, locate the causes and develop solutions. Motivational. CC (©1995 CoreMedia Training Solutions) 17 min.

Ergonomic Programs that Work V0681

Ergonomics is the science of designing the workplace and work organization to fit the worker or the employee. Key elements of a successful ergonomics program are: Management commitment; Worker involvement; Worksite analysis; Medical management; Training & education; and Ongoing evaluation. This video may be duplicated. CC (©1998 U.S. Department of Labor, Occupational Safety and Health Administration) 21 min.

Ergonomic Tools V0487

(Humorous) In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as work related musculoskeletal disorders. Host Tom, the Tool Guy, and his assistant, Hal, show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

VIDEO TIP:

Need a loan extension? Call 1-800-574-9881 to extend for up to a week.

Ergonomics : A Weight Off Your Shoulders V0877

Instructs employees to use the science of ergonomics to develop safe lifting techniques and limit repetitions. Includes stretching exercises. Industrial work environment. CC

(©1995 Coastal Video Communications Corp.) 13 min.

Ergonomics : Break the RMI Habit V0768

Focuses on repetitive motions of the shoulders, back, arms, wrists and hands which may cause injuries. Gives suggestions for modifying workstations and minimize excessive movement in the industrial and office environments. Demonstrates five stretches. CC

(©1997 Coastal Video Communications Corp.) 13 min.

Ergonomics : Your Body At Work V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. CC

(©1991 Coastal Video Communications Corp.) 20 min.

Ergonomics: Taking Matters into Your Own Hands V0769

Describes cumulative trauma disorder injuries to the arms, wrists and hands. In an industrial work environment, stresses neutral positions, workstation modification, and proper hand tools. Demonstrates techniques to minimize force, reduce repetition and eliminate direct pressure. Includes wrist and hand exercises. CC

(©1995 Coastal Video Communications Corp.) 14 min.

Hand, Wrist And Finger Safety V0602

In the "Safety Watch News" format, covers activities that involve constant, repetitive motion of the hands, fingers, or wrists that can result in injury to those extremities over time. Also, covers machine guards, following lockout/tagout procedures; and using proper personal protective equipment. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1997 Primedia Workplace Learning, Safety Watch) 14 min.

Industrial Ergonomics V0361

Discusses causes and symptoms of cumulative trauma disorders (or work related musculoskeletal disorders — WMSDs) Gives specific ergonomic strategies for reducing risk factors or caution zone jobs. Shows both employer and individual employees need to consider ergonomics in arranging work environment and scheduling tasks with risk factors. Solutions oriented for the light manufacturing workplace. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Office Ergo V1017

Brief overview including the science of ergonomics; musculoskeletal disorders associated with the office environment and best safety practices to reduce exposure to injury. Short version follow up to V1002.

(©2001 Summit Training Source, Inc.) 5 min.

Office Safety (Ergonomics) V1002

Focus is on ergonomic risk factors that may be present in workstations. Outlines preventative measures to avoid musculoskeletal injury. Briefly touches on recognizing other hazards in the office including falls, electrical cords, and using office equipment safely. CC

(©2001 Summit Training Source, Inc.) 12 min.

Prevenga Los Trastornos Musculo-esqueléticos Understanding Musculoskeletal Disorders V0925

Spanish Version. Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to the Washington Rule. Includes industrial, light manufacturing and construction workplaces. English version V0898.

(©2001 Comprehensive Loss Management, Inc.) 15 min.

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment. Focus is on the impact of system and environmental design of daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques.

(©1989 CoreMedia Training Solutions) 13 min.

Understanding MSDs (Musculoskeletal Disorders) V0898

Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to Washington.

Includes industrial, light manufacturing and construction workplaces. Highly recommended. Spanish version V0925 CC

(©2001 Comprehensive Loss Management, Inc.) 15 min.

Vibration Syndrome V0144

Discusses the hazards of hand held vibrating tools such as chainsaws and jackhammers. Covers: Etiology; Symptomatology; Assessment; and Treatment. Includes a brief introduction to the physics of vibration, and an examination of different assessment techniques.

Produced for medical professionals. Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1981 National Technical Information Service) 27 min.

Working With Display Screen Equipment V0276

Details on the following points: Basic Ergonomics; Layout and Working Environment; Common Hazards; Musculoskeletal problems, Visual fatigue, and Stress.

(©1993 Safetecare, Inc.) 17 min.

Workplace Ergonomics: A Better Way to Work V0559

Employee education. Covers four common cumulative trauma disorders, causes, and early symptoms and steps to take to minimize the risk factors associated with cumulative trauma disorders.

(©2000 Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min.

OFFICE SAFETY

see also Ergonomics - Office Environment

Employee Education : Safety In The Office V0228

General Office safety focusing on preventing falls, loading file cabinets safely, identifying tripping hazards. Discusses the importance of emergency evacuation, fire safety, and observing electrical safety with appliances and machines. Dated, but essential information.

(©1990 AIMS Media) 13 min.

Goofy's Office Safety Championships V0139

(Humorous) Discusses several specific preventive measures and vital concepts of safety awareness and personal responsibility, including how to avoid eye and arm strain, cuts and burns, and fires.

(©1990 Disney Educational Productions) 12 min.

How To Have An Accident At Work (Humorous) V0063

(Humorous) See how Donald Duck's bad on-the-job safety habits make him a walking hazard to himself and others. This amusing program gives viewers an important safety message about taking care in everyday tasks. Animated.

(©1959 Coronet/MTI Film & Video) 8 min.

Office Ergonomics : It's Your Move V0878

Intended audience: office workers. Defines musculoskeletal disorders. Describes signs of MSDs, risk factors and solutions to correct them. CC

(©2001 Coastal Video Communications Corp.) 17 min.

Office Health and Safety V0842

Training in office safety and workplace health. Topics include: housekeeping, emergencies, hazards in the workplace, chemical hazards, ergonomics, security, safe lifting and handling loads.

(©1999 American Training Resources, Inc.) 10 min.

Office Safety V0183

Hazards covered include: Slips, trips, and falls, misuse of chairs and file cabinets; deficient lighting; cuts from sharp objects, including paper; the dangers of electricity and office machines including photocopiers and computers; and fire hazards. Very dated. Good basic information.

(©1991 International Film Bureau Inc.) 15 min.

Office Safety V0941

Covers MSD's, proper lifting, slips, trips and falls, fire, flammable materials, Emergency Action Plan, and stress. Wraps up with an emphasis on hazard recognition.

(©2002 Coastal Video Communications Corp.) 9 min.

Office Safety V1018

For office workers. Supports hazard recognition and gives techniques to avoid slips and falls; points out dangers of clutter and misuse of office equipment; briefly touches on ergonomic issues. Short version follow up to V1002.

(©2001 Summit Training Source, Inc.) 5 min.

Office Safety (Ergonomics) V1002

Focus is on ergonomic risk factors that may be present in workstations. Outlines preventative measures to avoid musculoskeletal injury. Briefly touches on recognizing other hazards in the office including falls, electrical cords, and using office equipment safely. CC

(©2001 Summit Training Source, Inc.) 12 min.

Office Safety V0516

(Humorous) A zany dramatization. Foster Safewell, fictional world renown Office Safety Expert from the British Isles, discusses how people survive in such an untamed environment as the office. Shows how to spot and take corrective action to remove office hazards. Safety Watch Series.

Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Oop's Your Office Is Showing : An Office Safety Program V0147

Designed to help office personnel identify office accident causes and hazards.

Teaching points include: Office accident causes; Workstation design; and Proper lifting techniques. Slides to video format.

(©1992 Department of Labor and Industries, State of Washington) 15 min.

Preparing Your Office for an Earthquake V1040

Training identifies hazards and mitigates damage in the office with simple preventative measures. Lists items for emergency kits. Has clips showing damage from the 2001 Nisqually Earthquake. CC.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. CC

(©2001) 7 min.

Putting Your Best Foot Forward V0103

(Humorous) Illustrates the common sense approach to combating accidents caused by slips and falls in the office, warehouse, snow and ice, and in the parking lot. Some animation with D. Duck, Goofy and Mickey.

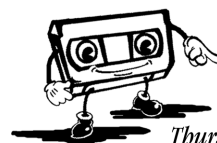

(©1988 Coronet/MTI Film & Video) 16 min.

Risky Business V0093

(Humorous) A hilarious look at the serious business of office safety. Entertaining yet informative format. A stuntman poses as an office worker to expose hazards in the office through the course of a routine day.

(©1989 CoreMedia Training Solutions) 20 min.

VIDEO TIP:

Thurston County residents must pick up and drop off videos at the Service Location Lobby in Tumwater.

Safe Workstation Is No Accident V0254

By following these guidelines, comfortable working environment is created to help reduce the risks of serious body aches or eyestrain.

(©1993 Executect Office Services, Inc.)
14 min.

Safety On The Job : Preventing Back Injury V0234

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Dated, but classic. Spanish version V0235

(©1987 AIMS Media) 24 min.

Safety On The Job : Slips Trips & Falls V0027

Concise narration and dramatic vignettes teach employees and their supervisors how to eliminate the causes of falls, and to cooperate in correcting or reporting potential hazards.

(©1985 AIMS Media) 17 min.

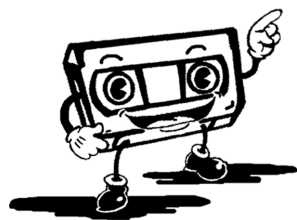

Stretchout : A Guide To Stretching In The Workplace V0120

Avoid muscle pulls, discomfort caused by repetitive motion, and strain due to tedious assembly work by teaming the basics of stretching. Explains the physiology of stretching, and illustrates the benefits of a regular stretching program. Includes 12 minute program with 17 minute demonstration.

(©1989 CoreMedia Training Solutions)
27 min.

VIDEO TIP:

*Faxing your request?
A confirmation fax will
be sent back. Do check
the dates!*

Way We Work : A User's Guide To Office Ergonomics and Body Mechanics V0169

Explains Cumulative Trauma Disorders; identifies risk factors of repetition, force and posture; and shows how to analyze and correct problems at the workstation.

(©1991 Comprehensive Loss Management, Inc.) 18 min.

Working With Display Screen Equipment V0276

Details on the following points: Basic Ergonomics; Layout and Working Environment; Common Hazards; Musculoskeletal problems, Visual fatigue, and Stress.

(©1993 Safetyscare, Inc.) 17 min.

OFF-THE-JOB SAFETY

ATV Rider's Guide To Safety V0031

Designed to introduce the correct and safe use of all-terrain vehicles (ATVs) to both the novice and the experienced rider. Offers tips on operating on all terrain vehicles. (800-447-4700)

(©1986 Specialty Vehicle Institute of America) 19 min.

Back Injury Prevention V0365

Discusses what each person can do to reduce the risk of back injury, showing the importance of stretching, maintaining good posture, strengthening back and stomach muscles, and lifting properly. Demonstrates simple yet effective stretching and strengthening exercises. Also available on V0382. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 11 min.

Beat The Heat : Preventing & Treating Heat Disorders V0551

For those workers who must perform their jobs in the heat. Heat can cause bodily illness or injury, worksite accidents and even death. Covers: Thermo-regulation of the body; Importance of replenishing fluids; and Prevention and treatment.

(©1995 Coastal Video Communications Corp.) 17 min.

Cold Stress V0406

Offers many tips for avoiding cold stress, recognizing symptoms of cold stress, and recovering from cold stress. Also suggests clothing choices for protection against cold, wet, or windy conditions. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Drivers Alert : Over-the-Counter & Prescription Medications and Impaired Driving V0890

Addresses the growing problem of driving under the influence of legal medications.

(©1995 Washington Traffic Safety Commission) 13 min.

Drowsy Driving : Shattered Lives V0858

Fatigue is a major cause of fatal collisions in Washington State. Along with testimonials from victims of drivers asleep at the wheel, this video explores issues related to drowsiness and driving, including sleep disorders.

(©1998 Washington Traffic Safety Commission) 13 min.

DUI : Choices And Consequences V0340

This dramatization on the consequences of drunk driving features Jack Hamilton, a young college student who decides to unwind from the pressures of school, work and family life by having "a few beers."

(©1993 AIMS Media) 33 min.

Earthquake : Some Were Prepared V0057

Uses the aftermath of the October, 1989 earthquake in the San Francisco area as a background for this discussion of earthquake preparedness. Outlines plans specific ways in which families and communities can prepare for the possibility of earthquakes. Shows what people should do if they are in their home, car or large structure when an earthquake occurs.

(©1990 R M Distributors - Aims) 30 min.

Electricity - Handle With Care! V0064

Discusses basic safety precautions surrounding the use of electricity in the home. Describes circuit breakers and fuses, proper wiring, the principle of grounding, and the problems of extension cords. Although dated, the principles are presented with clarity.
(©1988 Handle Film Corporation) 19 min.

Emergency Preparedness V0359

Stresses the importance of a comprehensive disaster planning phase to improve the response phase and reduce stress at the time of disaster. Discusses the need to have plans in place and roles defined for all types of business and geographical area. Outlines the major considerations in creating a disaster plan as well as the essential actions to take during a disaster. Safety Watch Series.
(©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Ergonomics : Solving the Puzzle V0835

Describes the signs, causes, and symptoms of musculoskeletal disorders and gives common solutions to prevent injury. Covers the proposed OSHA standard 64 FR 65767. CC
(©2000 Coastal Video Communications Corp.) 19 min.

Ergonomics : The 24-Hour Body V0825

Teaches employees how to use the ergonomic principles learned at work when working at home. Covers: Practical solutions to potential strains and Off-the-job safety procedures. CC
(©1998 Coastal Video Communications Corp.) 20 min.

Fire Safety In The Home V0537

"Fire Marshal Bob" (Jim Carrey look alike) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 13 min.

First Aid In The Wilderness V0032

Explains basic first aid procedures when medical help is not immediately available after an outdoor accident. Dramatizations demonstrate the essential primary steps, proper emergency care and carefully planned evacuation of the injured person in two different situations.
(©1984 Beacon Films) 22 min.

Groundskeeping Safety : Dealing With Bugs And Critters V0806

Designed especially for public works, utility, government employees or anyone whose job function includes grounds maintenance or outdoor responsibilities, is essential for a safe work environment where you are exposed to pests — flying, creeping, crawling critters that can bite, sting and cause serious harm. Covers: Basic PPE; Snakes, wasps, bees, fire ants; Poison ivy/oak; Hantavirus; and First aid. CC
(©1999 Coastal Video Communications Corp.) 16 min.

Hágase usted una Promesa: Estado de Preparación en Contra de Terremotos para Usted y su Comunidad Make Yourself a Promise : Earthquake Preparedness For You V0342

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making your home/workplace earthquake safe; and Organizing a neighborhood response plan.
(©1990 TODCO) 27 min.

Holiday Safety V1000

Humorous dramatization of a team applauded for their excellent safety record on the job as they head home to holiday preparations with disastrous results. One by one, they arrive in the emergency room for treatment of eye, back, and strain injuries reporting to Nurse Crabbitch. Emphasizes ladder safety, eye protection, seatbelt safety and safe lifting procedures away from the job.
(©1994 Summit Training Source, Inc.) 14 min.

Holiday Safety : At The Top Of Your List V0572

Includes a 25 item holiday checklist: Christmas trees; Christmas lights; Decorations; Using your fireplace safely; Other fire hazards; Holiday food preparation; Alcohol and the holidays; Holiday traveling; Shopping safely; and Holiday stress. CC
(©1994 Coastal Video Communications Corp.) 17 min.

Hotel Safety : A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back.
(©1996 Coastal Video Communications Corp.) 30 min.

How To Have An Accident In The Home V0077

(Humorous) Donald Duck arrives home believing he is safe. Donald's home, however, is a masterpiece of safety hazards. By the end of the film Donald has experienced most of them. Animated.
(©1956 Coronet/MTI Film & Video) 8 min.

Hypothermia V0326

Explains how to recognize and treat hypothermia. Shows the major symptoms, step-by-step instructions for treating the victim, and the "help" and "body-to-body warming" methods. May be duplicated.
(©1983 National Technical Information Service) 15 min.

Hypothermia : Outdoor Enemy #1 V0011

Two case study dramatizations reveal the causes, symptoms and dangers of hypothermia. Covers preventative measures and treatment of a hypothermia. For anyone who engages in outdoor activities. Sensible outdoor tips for all seasons are offered.
(©1984 Beacon Films) 24 min.

VIDEO TIP:

Please rewind your videos.

Injuries Don't Take Holidays V1062

Martin Lesperance, veteran firefighter and paramedic, speaks about careless actions resulting in tragedy, especially around the winter holidays. Show this to encourage a safety minded holiday for your workers. Topics are fire safety, driving safety and alcohol abuse. (©2003) 19 min.

Make Yourself A Promise : Earthquake Preparedness For Yourself And Your Community V0341

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making your home/workplace earthquake safe; and Organizing a neighborhood response plan. (©1990 TODCO) 27 min.

Making Healthy Choices : Safe & Healthy Lifestyles V0421

Outlines some of the keys to selecting a healthy diet such as reading nutrition labels, limiting fat intake, and increasing complex carbohydrates. Shows the benefits of exercise. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Off The Job Safety V0414

A camping trip illustrates the importance of being safety-conscious in off-the-job situations. Being prepared for potential emergencies and knowing how to safely use recreational equipment can help make your vacation less stressful and less dangerous. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Off The Job Safety V0515

Covers: Toxic Hazards; Food preparation and handling; Fire safety; Slips and falls; Electrical safety; Carbon monoxide; and Fire arms safety. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Off the Job Safety : Fun in the Sun V1006

Nurse Crabitch appears at Crosby Metals Safety meeting to give tips on how to stay out of the emergency room. Covers: water sports safety; fireworks hazards; preventing heat stress; sun exposure; warm up and cool down from physical activities. Humorous dramatization. Summer followup to V1000. (©1997 Summit Training Source, Inc.) 13 min.

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use such as screwdrivers, pliers, wrenches, hammers, tools. Demonstrates the correct methods of use and PPE. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home. (©1987 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Preventing Hantavirus Disease V0527

See a still presentation of this video at <http://www.cdc.gov/ncidod/diseases/hanta/html/hv94cont.htm> During 1993, a new hantavirus was identified in the United States. The virus causes Hantavirus Pulmonary Syndrome (HPS) and is transmitted by the Deer Mouse and the Cotton Rat. Doctors and scientists discuss facts covering the following topics: Symptoms; Transmission; Risk factor; Treatment; and Prevention. Produced for the general public. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1994 Center for Disease Control and Prevention) 26 min.

Recreational Safety V0226

Emphasizes the importance of performing warm-up exercises, using the right type of equipment, and wearing suitable clothing. Provides safety rules for hiking, climbing, and other sports activities, and demonstrates proper procedures for using trailers, motor homes, and recreational vehicles. Includes first aid tips and a list of organizations to consult for information on recreational safety issues. (©1988 AIMS Media) 20 min.

Recreational Safety : On Milligan's Island V0522

Milligan, Chipper, the Protector, and Kerri Jan discuss how recreational activities on "Milligan's Island" can pose the same types of hazards as found in the work environment. Covers PPE and basic safety practices. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Safer State at .08 : Washington's New Drunk Driving Laws V0857

The legal blood alcohol limit has been reduced to .08 for drivers in Washington. Other Washington Laws include tougher penalties for repeat DUI offenders, fines, and the possibility of doing jail time or being subjected to home monitoring. (©1999 Washington Traffic Safety Commission) 10 min.

Stress In The Workplace V0401

Identifies signs of stress overload, suggests ways for individuals to change their reactions to stressful events and shows various other stress management strategies. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Stress Management : A Practical Approach V0676

Compares the stress of a roller coaster ride to the ups and downs experienced during a busy day. Follows the stress coping challenges of several people and shows how they might handle those challenges. Helps to increase employees understanding of the ways unmanaged stress affects their health, productivity, and personal lives and to give them tools to take control of their stress levels. (©1997 American Training Resources, Inc.) 19 min.

Summer Safety V0126

Trains employees in emergency situations during the summer, both on and off-the-job. Covers: drowning, sunburns, heat exhaustion, poisonous plants, snake bites, and insect bites and stings. (©1990 Primedia Workplace Learning, Tel-A-Train, Inc.) 10 min.

Summer Sports : Safety Wins! V0713

Through demonstrations and interviews with athletes and experts, explains how to enjoy the maximum benefits of sports, exercise, and avoid injuries. Demonstrates proper warm-up techniques. CC (©1997 Coastal Video Communications Corp.) 13 min.

Survival! V0592

Reviews hypothermia and heat stress, hiking and backpacking, and four-wheeling. (©1980 Coastal Video Communications Corp.) 28 min.

Surviving The Big One V0328

Henry Johnson, fire and safety specialist with the Los Angeles City Fire Department, visits major earthquake sites from California to Alaska and shows how the key to survival is knowing what to do before, during and after a major quake. Discusses: disaster planning; disaster supplies kit, hazards; utilities; and preparing family members. CC (©1989 KCET Videofinders) 58 min.

Surviving The Cold V0066

A winter safety film including: recognizing and treating hypothermia; prepaing the home for winter emergencies; winter travel; and blizzard survival. (©1984 Pyramid Film & Video) 16 min.

Take Electricity Seriously : Shock - Fire - Explosion : Developing Awareness V0803

Increases awareness of electrical hazards and builds positive safety attitudes toward electricity at work and at home. Discusses positive safety attitudes toward electricity, electrical incident and injury reduction, and increased safety performance. (©1993 E. I. Du Pont De Nemours) 14 min.

Task Exposure Analysis : Beginning The Pro-Active Safety Process V0593

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. CC

(©1995 Coastal Video Communications Corp.) 19 min.

Vacation Safety : Play It Safe V0714

Covers the basics of planning and enjoying a safe vacation. Covers some safety tips you can take with you, in the car and at the airport. CC (©1997 Coastal Video Communications Corp.) 11 min.

Washington Disasters: Are You Ready ? V0788

How to prepare before the emergency. Covers: Earthquakes; Fires; Wind storms; Winter storms; Hazardous materials spills; Volcanic eruptions; and Flooding. CC (©1994 Department of Community, Trade & Economic Development) 80 min.

When Lightning Strikes V0331

Presents specific actions and precautions employees can take to avoid hazardous lightning and electrical storm conditions including lightning warning signals, conditions for lightning, safe and unsafe locations; and emergency treatment for victims. (©1992 ERI Safety Videos) 14 min.

Winter Safety V0391

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Covers: Signs of hypothermia and frostbite; Treatment; and Off-the-job winter safety. (©1993 Coastal Video Communications Corp.) 14 min.

Without Power : How to Understand and Cope with Electric Outages V0859

Describes the electrical distribution system to businesses and homes. Gives suggestions for disaster preparedness measures in case of a power shutdown. (©1997 Washington Water Power) 19 min.

OLDIES, BUT GOODIES (CLASSICS)

Backfire V0049

Covers correct lifting, carrying and general back health, while showing the consequences of a back injury. A classic video. (©1983 Altschul Group Corporation) 15 min.

Communication : Barriers And Pathways V0017

A comprehensive look at communication barriers. This video teaches how to open pathways to communication. Offers suggestions for overcoming barriers rather than just identifying them. (©1979 AIMS Media) 16 min.

Goofy's Plant Safety Championships V0083

(Humorous) Features potential safety hazards and specific preventive measures to avoid serious accidents or injury in plant settings. Goofy as safety trainer, turns the real workplace into an athletic competition to illustrate the techniques for safe loading, emergency procedures for heavy lifting, avoiding slips and falls, handling chemical spills, and dealing with fires. Some animation. (©1990 Disney Educational Productions) 13 min.

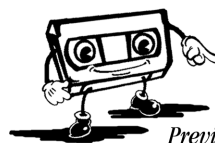

How To Have An Accident At Work V0063

(Humorous) See how Donald Duck's bad on-the-job safety habits make him a walking hazard to himself and others. This amusing program gives viewers an important safety message about taking care in everyday tasks. Animated. (©1959 Coronet/MTI Film & Video) 8 min.

How To Have An Accident In The Home V0077

(Humorous) Donald Duck arrives home believing he is safe. Donald's home, however, is a masterpiece of safety hazards. By the end of the film Donald has experienced most of them. Animated. (©1956 Coronet/MTI Film & Video) 8 min.

VIDEO TIP:

Preview your video before presenting to others! You will get your video 2 days before your show date.

Putting Your Best Foot Forward V0103

(Humorous) Illustrates the common sense approach to combating accidents caused by slips and falls in the office, warehouse, snow and ice, and in the parking lot. Some animation with D. Duck, Goofy and Mickey. (©1988 Coronet/MTI Film & Video) 16 min.

Safe And Awake V0062

Using humor as a vehicle for motivating employees, this video demonstrates lifting techniques, good housekeeping habits, and a proper attitude. Industrial work environment. (©1981 Long Island Productions) 15 min.

Safety On The Job : Preventing Back Injury V0234

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Dated, but classic. Spanish version V0235. (©1987 AIMS Media) 24 min.

Seguridad en el Trabajo : Prevención de Lastimaduras de Espalda

Safety On the Job : Preventing Back Injury V0235

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Mostly industrial setting, but brief segment in office environment. English version V0234 (©1987 AIMS Media) 24 min.

Silver Stretch V0048

Kathy Norman, a nationally certified instructor and trainer and founder of Aeroflex, suggests this daily stretching program intended to increase your flexibility and range of motion as well as reduce the chance of injury. To receive booklets addressed in the video call the current phone number: 800-352-5173. (©1990 Purple Cross, Prairie States Life Insurance) 20 min.

That Moment in Time V0068

Shows dramatically how there is a "moment in time" when a person may choose to do the "safe" thing instead of an action that is convenient but not safe. Motivates viewers to break the link in the chain of events leading up to an accident. Industrial and office work environments. (©1988 Charthouse International Learning Corp) 20 min.

OPEN CAPTIONED

Governor's Industrial Safety And Health Conference V0625

The conference is rooted in a rich tradition of helping to make people aware of the latest ideas and technology in the fields of accident prevention and industrial hygiene. Here's a close-up look showing how safety and health experts can help you with your questions. Open Captioned. (©1997 Governor's Industrial Safety and Health Advisory Board, Department of Labor and Industries) 6 min.

Making Claims Work V0529

Informs injured workers about the workers' compensation claims process. Tells the responsibilities of injured workers covered by the State Fund and the responsibilities of the Washington State Department of Labor and Industries to the claimant. Emphasizes partnership between the workers, employers, providers and the department necessary to help workers return to their jobs. Open captioned. Spanish version V0530. May be duplicated. (©1996 Department of Labor and Industries, State of Washington) 12 min.

Nursing Homes : Hazards and Solutions) V0692

Covers nursing home dangers: lost work time; over-exertion; other potential hazards. Demonstrates procedures to lift and move residents, suggested ergonomic improvements; OSHA inspections and evaluations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1998 U.S. Department of Labor, The Division of Audiovisual, Communication Services with Oppix & Hider,) 16 min.

Que es lo que debe de Saber de su Reclamo - Subtitulada Making Claims Work V0530

Informs injured workers about the workers' compensation claims process. Tells the responsibilities of injured workers covered by the State Fund and the responsibilities of the Washington State Department of Labor and Industries to the claimant. Emphasizes partnership between the workers, employers, providers and the department necessary to help workers return to their jobs. Open captioned. English Version V0529. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1996 Department of Labor and Industries, State of Washington) 12 min.

PERSONAL PROTECTIVE EQUIPMENT

see also: Eye Safety, Foot Protection, Head Protection, Hearing Conservation, or Respirator Safety

Best Strategy : Personal Protective Equipment V0906

Stresses the responsibility of safety for using PPE. Covers head protection, hearing conservation, eye protection, respiratory protection, hand protection, fall protection and life jackets at the construction site. (©1995 Comprehensive Loss Management, Inc.) 11 min.

Danger Zone Personal Protective Equipment : The Danger Zone V0267

Stresses hazard assessment and proper selection of personal protective equipment to prevent injury. Demonstrates proper use and care of Hard Hats, Safety Glasses, Goggles, Respirators, Hazardous Materials Clothing, Gloves, and Shoes. Motivational. (©1990 Summit Training Source, Inc.) 13 min.

Hand Protection V0356

Discusses the uses of gloves for hazard protection, illustrating a wide variety of glove designs suited for many different circumstances. Describes the situations which call for cleaning and storing gloves for future use. Also covers the basics of glove care for all situations. Safety Watch Series.

(©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Personal Protective Equipment V0461

Personal protective equipment is used in a wide variety of applications. Covers: Head protection; Hearing protection; Eye protection; Eye and face protection; Respiratory protection; Hand and arm protection; Foot and leg protection; Skin protection; Trunk and abdomen protection; and Whole body protection.

(©1995 Safetycare, Inc.) 18 min.

Personal Protective Equipment : Create the Barrier V1009

Describes types of PPE; how to select proper PPE for the job; using and maintaining PPE and proper storage. CC (©2003 Summit Training Source, Inc.) 12 min.

Personal Protective Equipment : Real, Real-Life V0711

Overview of all types of PPE with an emphasis on safety awareness and attitude. CC (©1997 Coastal Video Communications Corp.) 16 min.

Personal Protective Equipment : Simple Things (Employee Module) V0206

This companion video was produced to motivate employees to choose the correct Personal Protective Equipment for the task and to wear it properly.

(©1991 CoreMedia Training Solutions) 7 min.

Personal Protective Equipment : Supervisor Training In Hazard Assessment V0207

Trains supervisors in a five-step Hazard Assessment process to ensure the correct Personal Protective Equipment is used for each employee task.

(©1991 CoreMedia Training Solutions) 12 min.

Personal Protective Equipment : The Race to Safety V0697

NASCAR driver Ted Musgrave knows what it takes to be a winner. Compares the extreme dangers of auto racing to the industrial hazards workers encounter every day on the job. Discusses all aspects of PPE including safe use and maintenance, body protection and hazard assessment. Covers: eye and face protection; hearing conservation; head protection; safety shoes; full protective covering; and limitations of PPE. CC

(©1996 Coastal Video Communications Corp.) 20 min.

Personal Protective Equipment : Win The Race To Safety V0810

Compares the dangers of auto racing to industrial hazards. Features NASCAR star, Bobby Labonte, to motivate use of PPE. Covers safe use and maintenance of PPE, total body protection, and hazard assessment. Revised version of V0697. CC V0989

(©1999 Coastal Video Communications Corp.) 20 min.

Personal Protective Equipment : Win the Race to Safety (Rev. ed) V0989

Compares the dangers of auto racing to industrial hazards. Features NASCAR star, Bobby Labonte, to motivate use of PPE. Covers safe use and maintenance of PPE, total body protection, and hazard assessment. Revised and CC version of V0697 and V0810. CC

(©1999 Coastal Video Communications Corp.) 19 min.

Personal Protective Equipment In General Industry V0447

Examines the use of PPE to prevent eye, head, hand, and foot injuries. Discusses training requirements in 29 CFR 1910.132. Reviews the use of respirators, hearing protection, and protective clothing. (©1994 ERI Safety Videos) 17 min.

PPE : Electrical V0477

Basic rules when working with electricity. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 12 min.

PPE : Put It On V0471

Uses an old television sitcom format to emphasize certain hazards in the work environment that require the use of PPE. Includes hearing protection, gloves, proper footwear, goggles, hard hats, and respirators. Suggested to supplement or as refresher training. CC

(©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Protective Clothing V0503

The four levels of protective clothing, per EPA definitions, are defined and illustrated. Gives tips on inspecting high level protective clothing. Also shows and discusses use of accessories such as helmets, aprons, gloves, goggles, and footwear. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Recognition Evaluation And Control Of Hazards V0678

This program's object is to examine the options available and suggest strategies that can be used in all work places. Areas covered are: Recognition; Evaluation; and Control. With the control measure the following points are covered: Elimination; Substitution; Administrative controls; Engineering controls; and Personal protective equipment.

(©1991 Safetycare, Inc.) 14 min.

Safety Magazine Presents : The Use and Care Of Personal Protective Equipment V0459

Monica Burdern and Kacy Phillips do a little investigative reporting for Safety Magazine on PPE (Personal Protective Equipment) by touring a safety supply store. Training designed to provide employees with an overview of PPE is, its importance, and proper use. Key points covered are Personal Protective Equipment, Head Safety, Eye Safety, Ear Safety, Clothing, Hand Safety, Foot Safety, Respirators, and a general wrap-up. (29 CFR 1910.132)
(©1994 CoreMedia Training Solutions)
26 min.

PESTICIDES

Drifting Toward Extinction Or ...? V0731

Narrated by Wayne Handley, Ag and Aerobatics pilot. Discusses the problem of spray drifting by ag aviation pilots when they are applying chemical pesticides to crops.
(©1997 National Agricultural Aviation Research and Education Foundation)
20 min.

El Nuevo Trabajo de Jorge : La Importancia del Analisis de la Cholinesterasa Jorge's New Job : The Importance of Colinesterase Testing V1033

Explains the reasons for and the importance of cholinesterase testing for pesticide handlers. Addresses common questions asked by people who work with pesticides and clears up some of the misconceptions regarding cholinesterase testing. Viewers are cautioned that references are to California law not Washington State requirements. English and Spanish version V0948.
(©1994) 11 min.

EPA Worker Protection Standard Rules V0747

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English /Spanish version V0749. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Groundskeeper Safety Including Pesticides V0509

Many safety issues for groundskeepers are discussed, including working in hot and cold weather, working with power equipment, using appropriate PPE, lifting correctly, avoiding insect bites, and working with pesticides. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Groundskeeping Safety : Be A Pro! V0646

A professional groundskeeper knows that maintaining lawns, trees, and shrubs day-after-day requires use of potentially dangerous equipment and chemicals. Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and push mowers; trim and brush cutting equipment and blowers; checklist for hazardous materials.
(©1996 Coastal Video Communications Corp.) 17 min.

Groundskeeping Safety : Be a Pro! V0997

Explains general ground rules and safe work practices for the chemicals and equipment. Covers: proper clothing; personal protective equipment; general checklist for safety; tractors, riding and pushmowers; trim and brush cutting equipment and blowers; checklist for hazardous materials. CC version CC
(©1996 Coastal Video Communications Corp.) 17 min.

Harvest Of Danger Season Of Hope V0221

Explores causes of farm-related injuries and illnesses. Features interviews with experts in agricultural safety and rural health; farmers and farm workers. Suggests strategies for reducing the effects of numerous work-related problems ranging from stress to pesticide poisoning.
(©1993 MIBH/NYCAMH/FPP/MARY Imogene Basset Hospital) 18 min.

Jorge's New Job: The Importance of Cholinesterase Testing El Nuevo Trabajo de Jorge: La Importancia del Analisis de la Colinesteras V0948

Explains the reasons for and the importance of cholinesterase testing for pesticide handlers. Addresses common questions asked by people who work with pesticides and clears up some of the misconceptions regarding cholinesterase testing. Viewers are cautioned that references are to California law not Washington State requirements. Spanish only version available on V1033.

(©1994 University of California, Agriculture & Natural Resources) 19 min.

Manejadores de Pesticidas y el Estándar de Protección de Trabajador Pesticide Handlers and the Worker Protection Standard V0845

Meets the Federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some key points: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing & loading pesticides; Cleaning up spills; Cleaning & disposal of pesticide containers; Pesticide application; Cleaning up; and Working safely with pesticides. (English version V0844)
(©1994 Michigan State University Extension) 50 min.

Pesticide Handlers and the Worker Protection Standard V0844

Meets the federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some of the segments: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing and Cleaning up spills; Cleaning and disposal of pesticide containers; Applying pesticides; Cleaning up; and Working safely with pesticides. Spanish version V0845. (©1994 Michigan State University Extension) 50 min.

Pesticide Safety : Worker Protection Seguridad con los Pesticidas: Protección del Trabajador : Trabajadores V0249

Intended to help meet the requirements set by the EPA for training Agricultural Workers and Pesticide Handlers under the new Worker Protection Standard's regulations. Divided into two sections: Part 1 is for both the Agricultural Worker and Pesticide Handler. Part 2 has additional information for Pesticide Handlers and Early-Entry Workers. (©1993 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 66 min.

Protection From Exposure : Important Information For Pesticide Applicators V0246

Discusses the development of better equipment and more efficient methods of application for protecting ourselves from exposure to pesticides. If pesticides are used improperly they have the potential of causing severe health problems even death. Identifies how and where exposure occurs, Personal Protective Equipment (PPE), and proper methods of application. (©1993 Department of Agriculture, Pesticide Management Division) 14 min.

Reglas del Estándar para la Protección del Trabajador – EPA Worker Protection Standard Rules V0748

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English version V0747. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1996 Department of Consumer Business & Services, Oregon OSHA) 20 min.

Reglas del Estándar para la Protección de Trabajador – EPA Worker Protection Standard Rules V0749

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1996 Department of Consumer Business & Services, Oregon OSHA) 36 min.

Trabajando de manera Segura con los Pesticidas Working Safely With Pesticides V0269

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents. (©1989 University of Arizona, Cooperative Extension College of Agriculture) 17 min.

Training Greenhouse Workers To Handle Pesticides Safely V0298

Stresses alertness to the four ways horticultural workers might come into contact with pesticide chemicals. Covers: Handling; Equipment; Mixing; Application; Cleaning; Clothing; Safety gear; and First aid. (©1986 Visual Media, University of California) 16 min.

Working Safely With Pesticides V0248

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents. Spanish version V0269. (©1989 University of Arizona, Cooperative Extension College of Agriculture) 18 min.

PROCESS SAFETY MANAGEMENT

Line Breaking : Use A Permit! V0432

Every day lines and equipment must be opened for different reasons. Safely managing the materials flowing through that pipeline system is the focus of this program. Covers: Line and equipment opening(LEO); establishing an effective safety program; LEO permits; Lockout/Tagout; line breaking procedures/post procedures; and emergency response. (©1994 Coastal Video Communications Corp.) 16 min.

Process Safety Management : It's Just Good Business V0265

Provides an overview of OSHA's new Process Safety Standard to help companies with their compliance efforts. The key aspect of the Standard are described and examples are shown. This valuable tool enables managers, supervisors and other plant personnel to understand their responsibilities under the law. (©1992 Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min.

Process Safety Management : Process Safety Information V0191

Provides practical information about the types of information needed and where to get it. Includes aspects of toxicity, MSDS, thermal and chemical stability. (©1993 Video Training Source) 17 min.

Spiral to Disaster V0840

Re-enacts the tragic series of events resulting in the loss of 165 lives and the destruction of one of the largest off-shore oil and gas production platforms in the North Sea, platform Piper Alpha. Covers procedures and equipment to prevent or mitigate the outcome. Discusses Emergency Action Plan (EAP). Work permit systems, risk analysis, and communication break downs. CC
(©2000 Coastal Video Communications Corp.) 25 min.

RECORDKEEPING

OSHA Recordkeeping : On the Record V0993

Describes how to properly record incidents and keep in compliance with 29 CFR 1904 including up-to date requirements. Less complex and most satisfactory for small business with few employees. CC
(©2001 Summit Training Source, Inc.) 18 min.

Recordkeeping : True to Form V0974

Gives overview of new OSHA recordkeeping forms 300,300-A and 301, how and when to fill them out. Covers: recordable injuries; documentation procedures; and employee privacy safeguards. All work environments. CC
(©2002 Coastal Video Communications Corp.) 30 min.

Recordkeeping For Healthcare : True To Form V0966

Gives overview of OSHA recordkeeping forms 300,300-A and 301; defines recordable injuries; documentation procedures; and employee privacy safeguards. Health workers version. CC
(©2002 Coastal Video Communications Corp.) 30 min.

RESPIRATOR SAFETY

Atmosphere Supplying Respirators V0702

Explains proper use, care and maintenance of atmosphere-supplying respirators. Defines the terms: "Constant flow," "Demand," "Pressure demand," "Oxygen deficient atmosphere," "Service life" and "IDLH." Identifies situations that require use of atmosphere-supplied respirators. (©1998 Primedia Workplace Learning, Industrial Training Systems Corporation) 16 min.

Breathe Easy V0759

A training video covering respiratory protection for workers in nurseries. Shows how to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. Spanish Version V0760.
*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Choosing The Correct Respirator V0547

Defines working environments with hazardous air quality or conditions that require workers to wear respirators. Gives an overview of air purifying respirators (APR); supplied air respirators (SA), and self breathing apparatus along with various filters and cartridges and what types of protection they provide. Tells how lung and bodily damage can be prevented by using the right kind of air purifying respirator. Safety Watch Series.
(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Confined Space : Using Chemicals V0415

Explains the dangers of chemicals in confined spaces and the steps to take before entering any confined space. Describes monitoring entry procedures, ventilation, and types of respirators (SCBA, airpurifying, supplied air, and powered air purifying), and other personal protection. Safety Watch Series. Suggested to supplement or as refresher training.
(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Health & Safety Training For The Painting Environment V0744

Produced in partnership with International Brotherhood of Painters and Allied Trades to provide accurate information relative to the health hazards of the painting profession. Discusses the diagnosis of occupational toxic conditions. Focuses on the hazards and symptoms of overexposure, the use of personal protective equipment (PPE), the hierarchy of hazard control, and the proper selection, fit and maintenance of respirators. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 44 min.

Manejadores de Pesticidas y el Estándar de Protección de Trabajador Pesticide Handlers and the Worker Protection Standard V0845

Meets the Federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some key points: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing and loading pesticides; Cleaning up spills; Cleaning and disposal of pesticide containers; Pesticide application; Cleaning up; and Working safely with pesticides. English version V0844.
(©1994 Michigan State University Extension) 50 min.

Monitoring Airborne Contaminants V0303

Reliable measurements of airborne contaminants are useful for selecting personal protective equipment, delineating areas where protection is needed, assessing potential health effects of exposure; and determining specific medical monitoring. Covers: measuring instruments; direct-reading instruments; onsite and perimeter monitoring; periodic, personal, and variable monitoring.
(©1993 Long Island Productions) 10 min.

Pesticide Handlers and the Worker Protection Standard V0844

Meets the federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some of the segments: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing and Cleaning up spills; Cleaning & disposal of pesticide containers; Applying pesticides; Cleaning up; and Working safely with pesticides. (Spanish version V0845) (©1994 Michigan State University Extension) 50 min.

Play It Smart, Play It Safe V0917

Promotes safe work practices for contractors and workers who handle fiberglass, rock and slag wool insulation products. Lively format uses two insulation installers, fresh off the basketball court. Endorsed by OSHA. (©2000 North American Insulation Manufacturers Association) 16 min.

Respirator Care and Use V0600

Illustrates how various types of respirators protect workers from airborne contaminants; shows proper fit; correct storage and maintenance techniques to keep respirators in good working order. SafetyWatch Series. CC (©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Respirator Fit Testing Face It V0498

Use of a respirator is vital to workers survival in oxygen-deficient or toxic atmospheres. Gives employees a solid understanding of the different types of respirators, while demonstrating the proper care and fitting of respirators. Covers: Respiratory protection; How the lungs work; Respiratory hazards; Types of respirators; Fitting a respirator; and Inspection, cleaning, and storage. (©1995 Coastal Video Communications Corp.) 18 min.

Respirator Maintenance V0367

Covers the essential components of thorough inspection, cleaning, maintaining, and proper storage of respirators. Emphasizes the need for inspections before and after each use and demonstrates what to look for in these inspections. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 6 min.

Respiratory Protection V0344

Reviews characteristics of air-supplied respirators and air-purifying respirators, shows steps for inspecting respirators for proper fit and function. Safety Watch Series. Suggested to supplement or as refresher training. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

Respiratory Protection : Another World V0499

When respiratory protection is needed, be sure to use the right respirator for each job. Covers: Your lungs and how they work; Respiratory hazards; Types of respirators; Emergency use of respirators; Respirator fit testing; Respirator maintenance; Inspections; Decontamination; and Storage. (©1995 Coastal Video Communications Corp.) 19 min.

Respiratory Protection : Air Purifying Respirators (Revised 1998) V0724

Deals with the application of air purifying respirators in a respiratory protection program. Trains employees in selection, fit testing, function, limitations and maintenance. (©1998 Summit Training Source, Inc.) 10 min.

Respiratory Protection : Air Supplying Respirators (Revised 1998) V0725

Teaches employees the importance of protecting their respiratory system from dangerous contaminants and oxygen deficient environments. Covers types of air supplying respirators, qualitative and quantitative fit testing, correct use, inspection, maintenance and storage, and respirators limitations. (©1998 Summit Training Source, Inc.) 11 min.

Respiratory Protection : The Invisible Hazard V0723

Trains workers to respect potential respiratory hazards and motivates them to use the proper equipment. Describes types of respirators and their functions, and the importance of qualitative and quantitative fit testing. (Revised 1998) (©1998 Summit Training Source, Inc.) 12 min.

Respire Fácilmente Breathe Easy V0760

A training video covering respiratory protection for workers in nurseries. Shows: How to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. English version V0759. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Safety Watch Series, Vol. 1, No. 1, April 1994 V0378

Contains these four segments on safety issues: WORKING IN CONFINED SPACES (V0343), RESPIRATORY PROTECTION (V0344), ELECTRICAL HAZARDS (V0345), and SAFE LIFTING (V0346). For descriptions of each segment, refer to specific titles and title numbers as listed here. (©1994 Primedia Workplace Learning, Safety Watch) 29 min.

SCBA Care & Maintenance The Time Is Now V0500

Gives employees a solid understanding of the different types of respirators, while demonstrating the proper care and fitting of respirators. Covers: SCBA component descriptions; Disassembly/Disinfecting; Inspection; Reassembly/Testing; and Proper equipment fit. (©1991 Coastal Video Communications Corp.) 15 min.

TB Respiratory Protection : Administrator's Review V0922

Thorough overview of the requirements of the TB respirator/protection program. Supplements NIOSH publication TB respiratory protection and health care facilities administrators guide. Includes CD. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Center for Disease Control and Prevention) 24 min.

RETAIL SAFETY

Is It Worth Your Life? V0148

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-832-200 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated. (©1992 Department of Labor and Industries, State of Washington) 18 min.

Is It Worth Your Life? V0531

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-24CC0203 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated. CC (©1992 Department of Labor and Industries, State of Washington) 18 min.

Retail Employee Safety V0658

Individual awareness and elimination of unsafe acts will help your employees achieve a great safety record. Highlights: Retail hazards; Slips and falls hazards; Broken glass, pins and scissors; Cardboard cutting safety; Ladder, stair and escalator safety; Electrical and fire safety; Safe stocking practices; and Accidents and emergencies. (©1995 Long Island Productions) 16 min.

Smart Lift V0742

Designed to reduce the number, incidence and severity of lifting and twisting injuries in the retail industry through an updated, accurate program to educate employees in proper and safe techniques for lifting and moving heavy objects. *Permission is granted to duplicate this tape in its entirety

only for non-commercial purposes. (©1993 Department of Consumer Business & Services, Oregon OSHA) 8 min.

Targeting Workplace Violence : A Video For Front-line Workers V0630

Ann Schatz, a KOIN-TV news anchor reports her part in a workplace violence story. A lone gunman entered the Coin Tower where her station was located and held a number of hostages on the ground floor. Challenges viewers to identify factors leading up to a violent incident and ways to avoid or defuse it. Appropriate for retail and public workers, especially those who deal with high stress situations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1997 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Violence In The Workplace : Learn To Play It Safe V0632

Produced in Oregon to help retailers and their employees obtain the skills necessary for dealing with potentially violent individuals. Gives key points on communication skills for workers dealing with difficult situations. (©1997 Department of Consumer Business & Services, Oregon OSHA) 14 min.

Workplace Violence V0411

Statistics (in 1995) reveals robbery is the most common form of workplace violence. Identifies high-risk occupations (retail, hotel, hospital, taxi drivers) and gives tips for recognizing potentially violent behavior in situations involving external customers. Also describes warning signals of potential internal violence in situations involving company personnel. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

VIDEO TIP:

Preview your video before presenting to others! You will get your video 2 days before your show date.

RIGGING SAFETY

Rigging and Lifting with Mobile Construction Equipment V0951

Includes proper load rigging techniques on the jobsite such as PPE and pre inspection. Shows correct rigging and handling when excavation and earthmoving equipment are used to sling and move loads. (©1997 R M Distributors - Vista) 28 min.

Rigging and Lifting with Small Hydraulic Cranes V0952

Specific to the training of the rigger working with the crane operator. Rigging techniques using one and two parts of line. Lists the responsibilities of the rigger, estimating load weights, center of gravity; techniques for odd shaped loads, and referencing load charts. (©1998 R M Distributors - Vista) 23 min.

Rigging Safety : Selection & Care Of Rigging Equipment V0121

Introduces slings and hardware commonly used for overhead lifting in industrial situations. The program covers characteristics of the equipment and proper care and handling to protect the equipment from damage. (©1989 Primedia Workplace Learning, Tel-A-Train, Inc.) 15 min.

Tips from the Pros : Rigging and Lifting V0950

Gives tips on how to estimate weight and center of gravity for large or odd shaped loads. Overview of analyzing loads, sling placement, and lift points. (©2001 R M Distributors - Vista) 28 min.

Flagging: You're the Director V0730

Reviews vital flagging procedures, proper clothing and equipment, flagger position, stopping, releasing traffic and slowing traffic and unusual situations. CC (©1994 Coastal Video Communications Corp.) 18 min.

Hearing Conservation for At Risk Workers V0895

Focuses on hearing protection in road construction. Extensive supplemental materials including tests and PowerPoint presentation on CD-ROM. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2001 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Highway Construction And Maintenance Safety V0511

Gives guidelines for safe traffic control and safe work practices for flaggers and all other workers close to roadways. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Highway Work Zone Safety : Moving Operations / Maintenance Safety V0861

For road construction workers. Features safety tips and proper maintenance checks before starting out in emergency situations. Emphasizes the hazards of operating plows in snow removal, operating heavy construction vehicles on the road, and operating landscaping tools along the road in conditions where traffic control procedures are at a minimum. Note: Some footage contains Washington State Code violations! (©1998 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 13 min.

Highway Work Zone Safety : One Step From Death V0862

Safety Awareness and general orientation for road construction workers. Through a series of dramatizations of accidents causing injury or death, the program emphasizes the importance of personal responsibility for safety in road construction work zones. Emphasizes the hazards of heavy equipment, work vehicles, and on coming traffic. Note: Some footage contains Washington State Code violations! (©1995 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 11 min.

Highway Work Zone Safety : Paving Safety V0863

For road construction workers. Discusses the common hazards of asphalt cement concrete (ACC) and Portland cement concrete (PCC) paving operations. Includes hazards of night paving, loading and unloading paving equipment; working in adverse weather conditions and PPE. Note: Some footage contains Washington State Code violations! (©1998 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 11 min.

Highway Work Zone Safety : Plant Site Safety V0864

For road construction workers. Shows hazards of on site processing plants, such as concrete mixing or asphalt preparation, increased traffic, heavy equipment, chemicals and flammable materials. Note: Some footage contains Washington State Code violations! (©1995 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 10 min.

Highway Work Zone Safety : Traffic Control Safety V0865

Procedures for installing & maintaining effective traffic control through a highway work zone. Alerts construction workers to dangerous situations related to traffic movement. Note: Some footage contains Washington State Code violations! (©1996 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 10 min.

Highway Work Zone Safety : Utility Safety in Work Zones V0866

For Road Construction worker training. Shows the different marking indications for telecommunications, electric, gas, water, and sewer lines. Note: Some footage contains Washington State Code violations! See also V0838 Gopher Guide to Dig Safety. (©1999 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 14 min.

Traffic Control Thru Work Zones V0445

Shows set up traffic controls for short-term jobs. Clear and simple demonstrations explain step-by-step installation of the five traffic control areas, including: basic flagging techniques; safe taper lengths; positioning of channelizing devices; flashing arrow signs; and detailed work practices. Please note production date and check current rules. (©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Washington Give 'em a Brake V0868

Washington State Law regarding Flaggers. Contains a clip of the Public Service Announcement for driver's awareness to safety throughout road construction zones. WORK ZONE SAFETY SERIES. (©1995 Washington State Department of Transportation; RXL Pulitzer) 9 min.

ROAD RAGE

Modern Driving Hazards : Road Rage, Cell Phones & Other Hazards V0831

Analyzes the four stages of road rage and the steps drivers can take to keep themselves from becoming a victim of violence. Covers: use of cellular phones, other devices and distractions while driving and stresses the importance of safe driving for those who drive company vehicles. (©2000 American Training Resources, Inc.- ERI) 20 min.

Road Rage V0817

Identifies the term road rage and potential hazards. Gives steps for reducing the risk and what actions to take if confronted by an aggressive driver. (©1999 Summit Training Source, Inc.) 16 min.

VIDEO TIP:

Please rewind your videos.

Road Rage : Combating Aggressive Driving in Washington State V0856

Law enforcement officers across Washington state are using innovative approaches to combat increasing acts of road rage and aggressive driving. Viewers learn the consequences of road rage, plus driving strategies to employ when encountering aggressive driving. View online at www.wa.gov/wtsc/videos-/RoadRage/wmv (©2000 Washington Traffic Safety Commission) 11 min.

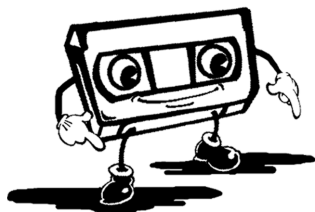

Road Rage And Aggressive Driving : A View From The Driver's Seat V0809

Hosted by Maury Hannigan, Commissioner Emeritus, California Highway Patrol. Addresses road rage from the perspective of the driver. Gives tips for preventing highway violence. (©1998 American Training Resources, Inc.—Aims) 20 min.

Safe Driving : A State of Mind V1051

Produced for Washington State workers who drive on the job or to the job. See three powerful stories behind tragic driving accidents that emphasize the need to minimize distractions and remain fully focused on driving and the conditions of the road. Outlines trip plans to make driving safer. Applicable to business and personal travel. May be duplicated. View online at <http://www.ofm.wa.gov/rmd-/loss/videos.htm> CC (©2004) 16 min.

VIDEO TIP:

If a videotape is damaged, don't attempt to fix it yourself. Please call the Video Library promptly.

SAFETY ATTITUDE

Attitude Awareness V0293

A new approach in helping all employees identify how their attitude affects their job performance. You will see how their attitude affects their behavior; how it contributes to an accident, and how, in the end, they recognize the responsibility they each hold for their own actions. (©1988 CoreMedia Training Solutions) 27 min.

Close Calls : The Wake Up Call V0555

Clearly demonstrates through scenarios how close calls ignored turn into accidents. Shows how to recognize close calls and "wake up" to the dangers they represent. Emphasizes attitude, awareness and personal responsibility. The message: Pay attention to close calls and take steps to prevent them from becoming serious incidents. (©1995 Aurora Pictures) 14 min.

Coaching Safe Behavior, Part One V0542

Reviews safety strategies that should be considered on-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Coaching Safe Behavior, Part Two V0548

Positive work and safety attitudes benefit everyone. Be informed of the hazards of the job, unsafe practices and follow other precautions. Awareness of one's own actions and others will lead to correcting unsafe practices. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Department Of Labor and Industries Videos (11 Programs) V0457

Contains eleven Department of Labor and Industries produced videos: Back Your Back : Back & Muscle Injury Prevention; Building Your Business in Washington State; Governor's Safety and Health Conference; Is It Worth Your Life? (CC and non CC); Lockout Tagout Safety Procedures; Making Claims Work (Open Captioned and Spanish

Version - Que Debe De Saber De Su Reclamo); Oop's Your Office Is Showing: An Office Safety Program; Staying a Step Ahead; and Taking Charge of Claims for Your Business. For descriptions of each segment, refer to specific titles. You may make a copy of them or send 2 blank videos (VHS 120) and we will make a copy of all for you. * Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1999 Department of Labor and Industries, State of Washington) 161 min.

Department Of Labor And Industries Videos (3 Programs) V0456

Contains the first three Dept. of Labor and Industries produced videos: Back Your Back : Back & Muscle Injury Prevention; Lockout Tagout Safety Procedures; and Oop's Your Office Is Showing : An Office Safety Program. For descriptions of each segment, refer to specific title. You may make a copy of them for your convenience or send a blank video (VHS 120) and we will make a copy for you. (©1992 Department of Labor and Industries, State of Washington) 51 min.

Every Twelve Seconds V0084

Takes a candid look at how accidents changed the lives of five permanently disabled workers associated with the FOREST INDUSTRY. Shows that accidents can be prevented and the workers need to take responsibility for their actions. (©1987 Workers' Compensation Board of British Columbia) 29 min.

Hazard Alert : Safety Is Number One V0272

Discusses a comprehensive program to encourage safe behavior and to make every employee aware of the high priority given to Health and Safety. Covers the parts to include in a safety program; training; rules and procedures; control measures; protective equipment; safety inspections; and emergency procedures. (©1989 Primedia Workplace Learning, Industrial Training Systems Corporation) 6 min.

High Impact : Industrial Safety Attitudes (Life and Death Series) V0886

Drama from the perspective of three EMT's responding to industrial accidents to review safety basics. Stresses the importance of preventing accidents by anticipating unsafe situations; adhering to company safety rules, keeping a positive attitude; and taking responsibility for personal safety of self and others. Warning! May be too graphic for some audiences.

(©2000 ERI Safety Videos) 19 min.

High Impact : Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. Warning! May be too graphic for some audiences.

(©1995 ERI Safety Videos) 19 min.

High Impact : Safety Awareness V0671

Covers 24 specific safety topics from ladder safety to lockout; stresses employee responsibility for personal safety; proper training and authorization for designated tasks; following procedures and company policy. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 21 min.

How To Have An Accident At Work V0063

(Humorous) See how Donald Duck's bad on-the-job safety habits make him a walking hazard to himself and others. This amusing program gives viewers an important safety message about taking care in everyday tasks. Animated.

(©1959 Coronet/MTI Film & Video) 8 min.

How To Have An Accident In The Home V0077

(Humorous) Donald Duck arrives home believing he is safe. Donald's home, however, is a masterpiece of safety hazards. By the end of the film Donald has experienced most of them. Animated.

(©1956 Coronet/MTI Film & Video) 8 min.

I Felt Comfortable V0460

The tragic true story of Randy Fellhoelter and his narrow escape from death. Randy tells his dramatic story to an audience of co-workers. Safety shortcuts escalate to near misses and up to major or fatal accidents. Taking risks can affect our lives and those of loved ones. Scenes of Randy's injuries were taken at the hospital and during his recovery. For all employees, supervisors, and managers. Warning! May be too graphic for some audiences.

(©1994 National Resource Safety Center Inc.) 23 min.

Industrial Safety Overview V0892

New employee orientation or quick refresher. Covers thirty industrial safety topics from crane safety to MSDS to PPE to welding. Stresses safety attitude.

(©2000 Long Island Productions) 11 min.

It's Up To Me V1023

Follow up program to "I Chose to Look the Other Way" V0956. Through several injury scenarios, meshed with stanzas from D. Merrell's powerful poem, viewers will see both the right way and wrong way to respond to unsafe situations. After watching this video, employees will be compelled to report or correct unsafe situations and understand that an injury-free workplace is "up to me." Scenes include lockout, guarding, eye protection, and construction sites. Warning! May be too graphic for some audiences.

(©2003 ERI) 14 min.

Pro-Active Safety : The Total Quality Approach V0735

Covers the five keys to a pro-active attitude toward safety awareness: accidents don't have to happen; safety is an ongoing process; management support is imperative; safety training at all levels; safety committees and job safety analysis essential in spotting potential hazards. CC (©1993 Coastal Video Communications Corp.) 18 min.

Pro-Active Safety Attitudes : Looking Out For Number One V0580

Underscores the importance of safety and safety training, using PPE, safety habits, and all employees take personal responsibility for safety. Covers: Safety affects workers and their families; Re-enactments of real-life

accidents motivating workers to take precautions; and interviews with workers. CC (©1994 Coastal Video Communications Corp.) 15 min.

Safe And Awake V0062

Using humor as a vehicle for motivating employees, this video demonstrates lifting techniques, good housekeeping habits, and a proper attitude. Industrial work environment.

(©1981 Long Island Productions) 15 min.

Safety - Everyone's Responsibility (Charlie Morecraft) V0918

Keynote speaker to Governor's Safety Conference 2000 and 2001, Charlie Morecraft, motivates workers and management to work as a team to create a safer work environment. Charlie is dynamic in inspiring viewers to take responsibility for their own actions and their own safety, because it affects the lives of everyone around them. Powerful follow up to "Remember Charlie" V0707 or "Charlie Morecraft Story".

(©1995 Phoenix Safety Management) 48 min.

Safety Watch Series, Vol. 1, No. 3, June 1994 V0380

Contains these four segments on safety issues: HAZCOM : LABELS AND MSDS (V0351), HEARING PROTECTION : HCP & PPE (V0352), PORTABLE POWER TOOLS (V0353), and GROUNDS KEEPING : LAWN MOWER SAFETY (V0354). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 35 min.

Safety Watch Series, Vol. 1, No. 5, August 1994 V0382

Contains these four segments on safety issues: EMERGENCY PREPAREDNESS (V0359), LOCKOUT/TAGOUT (V0360), INDUSTRIAL ERGONOMICS (V0361), and ASBESTOS AWARENESS (V0362). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 31 min.

Safety Watch Series, Vol. 1, No. 6, September 1994 V0383

Contains these four segments on safety issues: HAZMAT SPILLS : ARE YOU READY? (V0363), EYE PROTECTION (V0364), BACK INJURY PREVENTION (V0365), and LEAD AWARENESS (V0366). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 34 min.

Safety Watch Series, Vol. 1, No. 7, October 1994 V0384

Contains these four segments on safety issues: RESPIRATOR MAINTENANCE (V0367), BASIC FIRST AID (V0368), HAZARDOUS WASTE AWARENESS (V0369), and LOCKOUT/TAGOUT : THE BASICS (V0370). For descriptions of each segment, refer to specific titles and titles numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 28 min.

Safety Watch Series, Vol. 1, No. 8, November 1994 V0385

Contains these four segments on safety issues: HAZARD RECOGNITION (V0371), FOOT PROTECTION (V0372), ELECTRICAL HAZARDS : COMMON MISTAKES (V0373), and FIRE SAFETY REVIEW (V0374). For descriptions of each segment, refer to specific title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 29 min.

Safety Watch Series, Vol. 1, No. 9, December 1994 V0386

Contains these four segments on safety issues: FIRE SAFETY : EXTINGUISHERS (V0387), WHY PERMITS ARE IMPORTANT (V0388), FORKLIFT SAFETY (V0389), and WELDING AND CUTTING (V0390). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1994 Primedia Workplace Learning, Safety Watch) 34 min.

Safety Watch Series, Vol. 1, No. 10, January 1995 V0396

Contains these four segments on safety issues: FIRST AID : HANDS AND FINGERS (V0392), PORTABLE HAND TOOLS (V0393), ELECTROMAGNETIC FIELD AWARENESS (V0394), and CONFINED SPACES : YOUR TRAINING (V0395). For descriptions of each segment, refer to

specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 29 min.

Safety Watch Series, Vol. 1, No. 11, February 1995 V0398

Contains these four segments on safety issues: SLIPS, TRIPS & FALLS (V0399), HANDLING HAZARDOUS MATERIALS (V0400), STRESS IN THE WORKPLACE (V0401), and MACHINE GUARDING (V0402). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 37 min.

Safety Watch Series, Vol. 2, No. 5, August 1995 V0451

Contains these four segments on safety issues: CONFLICT RESOLUTION (V0452), SMOKING AT WORK (V0453), HEAD PROTECTION (V0454), and LOCKOUT/TAGOUT: JUST DO IT (V0455). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 30 min.

Safety Watch Series, Vol. 2, No. 6, September 1995 V0464

Contains these four segments on safety issues: PERSONAL FALL PROTECTION SYSTEMS (V0465), BLOODBORNE PATHOGENS : POST EXPOSURE FOLLOW UP (V0466), WORKPLACE SECURITY (V0467), SURVIVING THE COLD AND FLU SEASON - HUMOROUS (V0468). For descriptions of each segment, refer to specific titles and title numbers as listed here.

(©1995 Primedia Workplace Learning, Safety Watch) 13 min.

That Moment in Time V0068

Shows dramatically how there is a "moment in time" when a person may choose to do the "safe" thing instead of an action that is convenient but not safe. Motivates viewers to break the link in the chain of events leading up to an accident. Industrial and office work environments.

(©1988 Charthouse International Learning Corp.) 20 min.

Think About This V0830

Safety meeting starter. Graphic accidents reenacted in the program lead employees to think about the personal consequences of

unsafe acts and how those actions also affect the lives of loved ones. Warning! May be too graphic for some audiences.

(©2000 ERI Safety Videos) 5 min.

Wheel Of Misfortune. Grave Remarks V0545

In game show format, "Wheel of Misfortune," serves to remind us that for every action there are a set of prescribed outcomes. "Grave Remarks" represents worst-case scenarios of losses and accidents... that lead to their final "resting places." Safety Watch Series. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

SAFETY INSPECTIONS

Confined Space Safety Part 3 : Working Inside Confined Spaces V0194

(Revised Version) Concentrates on safe work practices when working in confined spaces. Demonstrates ways avoidance of common hazards such as falls, noise, and temperature extremes. Purging, ventilation and PPE are covered.

(©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 22 min.

Pro-Active Safety : The Self-Inspection V0582

Teach employees how to stay safe and healthy by teaching them how to keep an eye out for danger signals on the job. Covers: Identification; Assessment; Intervention; Maintenance; Task exposure analysis; Self-inspection during the maintenance step; and Making the most of self-inspections.

(©1996 Coastal Video Communications Corp.) 15 min.

VIDEO TIP:

Need a loan extension? Call 1-800-574-9881 to extend for up to a week.

Protecting Workers : How OSHA Conducts Inspections V0327

Go with an OSHA compliance officer through an inspection consisting of the opening conference, the employer representative, the actual inspection, the closing conference, and reporting the findings to the area director who determines the appropriate citations and penalties. Different violations are discussed: serious, willful, repeat, other than serious violations; and failure to abate. Also, steps to contest citations and OSHA's benefits to employers. (©1994 National Technical Information Service) 18 min.

Task Exposure Analysis : Beginning The Pro-Active Safety Process V0593

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. CC (©1995 Coastal Video Communications Corp.) 19 min.

SAFETY MANAGEMENT - SUPERVISION

Biological and Chemical Threats - Closing the Door V0935

For safety management and supervisory personnel, an awareness video describes the potential of biological and chemical attacks. Host Phillip Michael Thomas describes symptoms, and preventative measures for Anthrax, Smallpox, Botulism, Plague, Tularemia and Viral Hemorrhagic Fever. Gives examples of security measures for biological contaminants, air quality, and intrusion by dangerous chemicals. Stresses the importance of developing policies and evacuation plans and procedures. (©2001 Coastal Video Communications Corp.) 17 min.

Building Your Business...In Washington State (Open Captioned) V0517

Information about setting up a new business in Washington State. To hire workers, contractors or subcontractors there are certain legal requirements to meet. Covers: Business Application; Maintaining records, quarterly reports, and workers' compensation premium payments; Written accident prevention program, Review of minimum wage, overtime and child labor laws, Assistance from your local L&I service center, and bonding and insurance, contractor registration form and meeting prevailing wage requirements for public works projects. (©1996 Department of Labor and Industries, State of Washington) 12 min.

Coaching Safe Behavior, Part One V0542

Reviews safety strategies that should be considered on-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Coaching Safe Behavior, Part Two V0548

Positive work and safety attitudes benefit everyone. Be informed of the hazards of the job, unsafe practices and follow other precautions. Awareness of one's own actions and others will lead to correcting unsafe practices. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Communication : Barriers And Pathways V0017

A comprehensive look at communication barriers. This video teaches how to open pathways to communication. Offers suggestions for overcoming barriers rather than just identifying them. (©1979 AIMS Media) 16 min.

Contractor Safety : Building A Partnership V0200

Provides a step-by-step process designed to open lines of communication between facility owner's employees and contractors and to develop a mutually supportive approach to safety. Based on OSHA's regulation for Process Safety Management of Highly Hazardous Chemicals, techniques

can be applied successfully to a wide range of jobs where contractors are used. (©1992 CoreMedia Training Solutions) 23 min.

Do Your Employees Understand The Importance Of Safety? V0622

The "Drill Sergeant" and his "Recruits" stress that safety is a function of every employee, not just the Safety Department. Shows how to improve employee awareness with signs, posters and labels plus hazards-specific training. Supports Job Safety Analysis to identify hazardous activities and prevent injury. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 11 min.

SAFETY MEETINGS / COMMITTEES

Employee Performed Safety Inspections V0623

Cid Cisco "In Harm's Way" game show host and game show participants; Carol Simmons, Paul Dodson, and Martin Lewis attempt to tell us why employee participation provides buy-in to the safety program by employees. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Ergonomics : Job Safety Analysis V0507

(Humorous) The Safety Watch Squares game show has ergonomic Q&A to recognize potential problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 15 min.

Fire Awareness V0563

Appropriate for all audiences. Covers the nature, causes, and behavior of fire with emphasis on fire safety management. (©1995 Safetecare, Inc.) 18 min.

Incident Investigation : Proactive Prevention V0438

Designed for supervisors and managers, provides in-depth training on the methods and techniques investigative teams need to discover the true causes of an incident. Explains how to identify and recommend effective corrective actions.

(©1995 Summit Training Source, Inc.) 18 min.

Industry Hygiene For The Safety Manager V0614

The terms "recognize," "evaluate," and "control," represent a conceptual framework that the Industrial Hygienist uses to deal with hazardous agents. "Recognize" addresses the ability to anticipate hazardous conditions. "Evaluate" addresses assessment by using monitoring tools. "Control" considers conditions to remove agents harmful to workers. Safety Watch Series. Suggested to supplement or as refresher training.

(©1997 Primedia Workplace Learning, Safety Watch) 5 min.

Listening : The Key To Problem Solving V0042

Identifies the causes of poor listening habits and the reasons for improving them. Different techniques for developing listening skills are demonstrated.

(©1979 AIMS Media) 22 min.

Maintaining A Drug-Free Workplace : A How-To-Guide For Supervisors V0706

Part 1: It's Up To Us; Part 2: Document, Don't Diagnose; Part 3: Step By Step; Part 4: How Testing Works; Part 5: You're Talkin' To Me. A manager's view and responsibility on identifying, creating and defending a drug free workplace.

(©1997 American Training Resources, Inc.) 33 min.

Personal Protective Equipment : Supervisor Training In Hazard Assessment V0207

Trains supervisors in a five-step Hazard Assessment process to ensure the correct Personal Protective Equipment is used for each employee task.

(©1991 CoreMedia Training Solutions) 12 min.

Policy is Not Enough : Leading a Respectful Workplace V0854

Specifically tailored to managers and supervisors, this focuses on their leadership role in establishing a comfortable and respectful workplace. Issues addressed include sexual and other forms of harassment; investigating complaints and preventing retaliation. Good companion to With All Due Respect (V0855) which is for employees.

(©2000 American Training Resources, Inc.) 17 min.

Pro-Active Safety : The Self-Inspection V0582

Teach employees how to stay safe and healthy by teaching them how to keep an eye out for danger signals on the job. Covers: Identification; Assessment; Intervention; Maintenance; Task exposure analysis; Self-inspection during the maintenance step; and Making the most of self-inspections.

(©1996 Coastal Video Communications Corp.) 15 min.

Pro-Active Safety : The Total Quality Approach V0735

Covers the five keys to a pro-active attitude toward safety awareness: accidents don't have to happen; safety is an ongoing process; management support is imperative; safety training at all levels; safety committees and job safety analysis essential in spotting potential hazards. CC

(©1993 Coastal Video Communications Corp.) 18 min.

Pro-Active Safety Attitudes : Looking Out For Number One V0580

Underscores the importance of safety and safety training, using PPE, safety habits, and all employees take personal responsibility for safety. Covers: Safety affects workers and their families; Re-enactments of real-life accidents motivating workers to take precautions; and interviews with workers. CC

(©1994 Coastal Video Communications Corp.) 15 min.

Pro-Active Safety Attitudes: Target Zero V0651

The aggressive pursuit of Zero Accidents in the workplace relies not only on knowledge of safe operating procedures and principles, but also in the right attitude among all workers. Covers: Vision and initiative; Creating expectations; Accident prevention; Building trust; and Maintaining leadership. CC

(©1996 Coastal Video Communications Corp.) 18 min.

Pro-Active Safety Committee : A Team For Success V0581

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for effective safety committee.

(©1995 Coastal Video Communications Corp.) 13 min.

Pro-Active Safety Committee : A Team for Success V0885

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for an effective safety committee.

Viewers also get an inside look at how some of the country's most successful safety teams work. Closed captioned CC

(©1996 Coastal Video Communications Corp.) 13 min.

Process Safety Management : It's Just Good Business V0265

Provides an overview of OSHA's new Process Safety Standard to help companies with their compliance efforts. The key aspect of the Standard are described and examples are shown. This valuable tool enables managers, supervisors and other plant personnel to understand their responsibilities under the law.

(©1992 Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min.

Protecting Workers : How OSHA Conducts Inspections V0327

Go with an OSHA compliance officer through an inspection consisting of the opening conference, the employer representative, the actual inspection, the closing conference, and reporting the findings to the area director who determines the appropriate citations and penalties. Different violations are discussed: serious, willful, repeat, other than serious violations; and failure to abate. Also, steps to contest citations and OSHA's benefits to employers. (©1994 National Technical Information Service) 18 min.

Rigging and Landing Safety For Managers and Supervisors V0082

Covers improving safety in Alaska's timber and logging industry. Emphasizes the manager's responsibility for the logging crew's safety. Discusses: Reducing accidents; Policy enforcement; Personal Protective Equipment; and Safety Hazards. Specific safety tips for landing and rigging are given. (©1988 Department of Labor, State of Alaska) 20 min.

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment. Focus is on the impact of system and environmental design of daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques. (©1989 CoreMedia Training Solutions) 13 min.

Safety for Sale : The Role of Incentives in Safety Culture V0832

Explains the elements of a strong safety culture, how to elevate the strengths and weaknesses of incentive programs; tells how incentive programs can reinforce or undermine safety culture; and motivates viewers to explore changes to incentive programs. (©1998 Coastal Video Communications Corp.) 28 min.

Safety On Trial V0485

Drama. Developed to assist project superintendents and project managers in the difficult tasks of establishing work rules to prevent violations of safety and health regulations and to communicate these rules to their employees. Assists the general contractor on multiemployer worksites to better understand their roles and responsibilities toward worker safety including the employees of subcontractors. Dramatically demonstrates how small incidents on a construction site can devastatingly alter one worker's life and that of his family. May be duplicated. (©1994 Department of Labor and Industries, State of Washington) 35 min.

Solving Chemical Dependency Problems V0690

Supervisors have a unique role of freeing the workplace of chemical dependency. Covers: Symptoms of cocaine or other drug use on the job, particular during shift work; Complete drug policy notification; and Documentation for chemical dependency problems. (©1993 Long Island Productions) 7 min.

Staying A Step Ahead V0149

To acquaint employers and employees with WISHA guidelines and how to set up a safety program. Describes the elements of a safety program: management planning, hazard assessment, hazard correction, safety training, emergency procedures, and new employee orientation. For all workplaces, but mainly industrial. May be duplicated (©1992 Department of Labor and Industries, State of Washington) 18 min.

Stress Management : A Practical Approach V0676

Compares the stress of a roller coaster ride to the ups and downs experienced during a busy day. Follows the stress coping challenges of several people and shows how they might handle those challenges. Helps to increase employees understanding of the ways unmanaged stress affects their health, productivity, and personal lives and to give them tools to take control of their stress levels. (©1997 American Training Resources, Inc.) 19 min.

Supervisor's Role In Safety V0604

On a movie setting, the reasons why a supervisor should lead-by-example are discussed. When employees see the supervisor wearing appropriate personal protective equipment, following standard safety practices, safety becomes a non-negotiable issue with employees. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 14 min.

Task Exposure Analysis : Beginning The Pro-Active Safety Process V0593

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. CC (©1995 Coastal Video Communications Corp.) 19 min.

Under The Influence : Alcohol In The Workplace V0427

Describes the problems of alcohol abuse related to work situations. Impaired judgment, unsteady actions, mood swings, and other effects of alcohol jeopardize not only the safety of the individual abusing alcohol but also the safety of co-workers. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Violence : Reducing Your Risk V0278

How to avoid potentially violent situations and form a plan of action for escape or defense if violence occurs. Experts in personal safety and law enforcement demonstrate simple yet effective methods everyone can use to reduce their risk and defuse threatening situations. (©1994 Video Training Inc.) 28 min.

Violence In The Workplace V0439

To prevent violence recognize the problem, define the cause and recognize early signs. Gives instructions on dealing with violence in the workplace and personal security. (©1995 American Training Resources, Inc.) 10 min.

Violence In The Workplace : A Strategy For Prevention V0446

How to spot and defuse potentially explosive situations. (©1995 Visionquest Films) 14 min.

What The ISO Standards Mean To Safety Managers V0618

The International Organization for Standardization is a non-governmental organization that sets standards so that participating countries can count on materials, products, processes and services to meet a specified standard in the global market. Describes the concepts, focus, and benefits. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 10 min.

Whose Job Is It Anyway? V0102

Produced in Canada, this video shows a supervisor on a construction site where good housekeeping habits are ignored and the consequences. Gives solutions for a safe workplace. (©1988 International Film Bureau Inc.) 12 min.

With All Due Respect V0855

Designed to promote a respectful workplace, this program is for all employees. Through a variety of scenarios it gives a good overview of all types of sexual harassment with brief coverage of diversity and other forms of harassment. Gives guidance on intervention / resolution strategies. (©2000 American Training Resources, Inc.) 20 min.

Working Safely With Radiation : Fundamentals Of Ionizing Radiation Protection V0595

Basic orientation for laboratory and other technical personnel who will be working with or around radiation sources on the job. Covers the biological effects of radiation, monitoring and dosimetry, techniques for limiting personal exposure, special considerations for pregnant workers, and regulations. (©1995 Business Training Systems Inc.) 19 min.

Working Together For Safety V0596

Explains the relationship between unsafe acts and accidents. Covers a variety of typical safety topics such as personal protective equipment, lockout/tagout, hazard communication, inspections, rules and procedures, accident reporting, protective devices, control measures, accidents and emergencies. (©1996 Business Training Systems Inc.) 19 min.

Working With Stress V0986

Overview of job stress and how it affects job productivity. Can be used as orientation video for administrators and supervisors. Produced by CDC. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2002 Center for Disease Control and Prevention) 16 min.

Workplace Violence : First Line Of Defense V0277

Interviews a convicted perpetrator and dramatization to show the impact of violence. Increases awareness of the warning signs, examines the legal issues in dealing with these individuals, and outlines steps to manage these situations. Shows how to protect employees through a managed organizational response. (©1994 Video Training Inc.) 30 min.

Workplace Violence : Recognizing And Defusing Aggressive Behavior V0633

Familiarizes supervisors and managers with the warning signs of dysfunctional behavior that can lead to violence. Teaches intervention techniques for supervisors to approach troubled employees. Suggests techniques and tactics for defusing

immediate threats of violence.

(©1994 R M Distributors – Aims) 26 min.

Workplace Violence : The Calm Before The Storm V0335

Increases awareness of the warning signs which may lead to workplace violence. Author/expert Joseph A. Kinney interviews a victim of workplace violence. Covers: characteristics of a potentially violent employee; establishing a violence prevention program; stress management, conflict resolution; hiring and firing; and response. Does not give intervention techniques. CC (©1994 Coastal Video Communications Corp.) 25 min.

Youth Safety in the Workplace V0860

Overview of occupational safety and health topics including blade safety, forklifts, PPE, confined space, lifting, and emergency procedures. Produced by Associated Oregon Industries and OR-OSHA. Whenshowing this program be aware that specific regulations to Oregon State Law may be different in the state of Washington. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Consumer Business & Services, Oregon OSHA) 19 min.

SAFETY MEETINGS / COMMITTEES

Employee Performed Safety Inspections V0623

Cid Cisco "In Harm's Way" game show host and game show participants; Carol Simmons, Paul Dodson, and Martin Lewis attempt to tell us why employee participation provides buy-in to the safety program by employees. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 12 min.

Hazard Recognition V0371

Shows examples of using teamwork to solve safety problems such as employees helping co-workers maintain safe attitudes and employers responding to safety issues raised by employees. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 7 min.

How To Conduct A Safety Meeting : A Part Of Your Job V0130

Designed for supervisors and mid-management. Covers the essential points for planning and conducting a safety meeting, including agenda, scheduling, preparations, notification, and follow-up after the meeting. (©1990 Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min.

How to Develop an Effective Safety Program V0900

Emphasizes the importance of training for supervisors and employees. Includes components of a safety program, safety committees and suggested resources. Shows footage of warehouse, retail and construction workplaces. Revision of V0186. (©1995 R M Distributors) 20 min.

How To Develop And Implement An Effective Safety Program V0186

Designed for supervisors and mid-management. Explains, step-by-step, how to provide safety leadership in a manufacturing environment. The steps, when implemented, have reduced accidents and injuries by 50 - 75%. (©1990 Cinema Safety Products) 18 min.

Pro-Active Safety Committee : A Team For Success V0581

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for effective safetycommittee. (©1995 Coastal Video Communications Corp.) 13 min.

Pro-Active Safety Committee : A Team for Success V0885

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for effective safetycommittee. Viewers also get an inside look at how some of the country's most successful safety teams work. Closed captioned CC (©1996 Coastal Video Communications Corp.) 13 min.

Right To Know : Workers & The Community V0476

In an old television sitcom format describes how the local Emergency Planning Committee can tell what chemicals are in the community and how to respond to a chemical emergency. Companies must provideMSDS's to the local fire departments on all chemicals that meet or exceed the EPA's threshold reporting criteria. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

Safety Committee : Problem Or Solution? V0532

Designed to provide safety committee members with techniques and procedures for an effective safety committee. Demonstrates the disaster of an unorganized safety meeting and offers suggestions for improvement. Outlines the functions and benefits of a safety committee, suggests ways to build committee members' confidence, and indicates procedures to follow in planning and conducting a successful safety meeting. (©1993 Primedia Workplace Learning, Industrial Training Systems Corporation) 31 min.

Safety Committee Participation : A Safety Carol V0470

The Ghost of Safety Committees Past arrives after the members of the safety committee die of boredom. Gives tips for making the safety meetings come alive and productive. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Safety Meetings : Give 'em What They Want V0919

Shows managers and team leaders the elements of safety meetings. Gives tips on presentations, planning meetings, and adult learning. (©2000 Coastal Video Communications Corp.) 15 min.

SAFETY ORIENTATION

Do Your Employees Understand The Importance Of Safety? V0622

The "Drill Sergeant" and his "Recruits" stress that safety is a function of every employee, not just the Safety Department. Shows how to improve employee awareness with signs, posters and labels plushazards-specific training. Supports Job Safety Analysis to identify hazardous activities and prevent injury. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 11 min.

Goofy's Plant Safety Championships V0083

(Humorous) Features potential safety hazards and specific preventive measures to avoid serious accidents or injury in plant settings. Goofy as safety trainer, turns the real workplace into an athletic competition to illustrate the techniques for safe loading, emergency procedures for heavy lifting, avoiding slips and falls, handling chemical spills, and dealing with fires. Some animation. (©1990 Disney Educational Productions) 13 min.

Health and Safety Orientation : The Competitive Edge V0570

New employee orientation or refresher training for seasoned workers, provides an overview of OSHA-required health and safety practices and procedures. Covers: Personal protective equipment; Sign, tags, and labels; Confined spaces; Lockout/tagout; Hazardous materials; Safe lifting; Housekeeping; Emergency preparedness; and Fire protection. CC (©1994 CoreMedia Training Solutions) 24 min.

Incident Reporting : You Can Save A Life V0576

Discusses work standard expectations, controlling hazards, reporting incidents, and avoiding accidents.

(©1996 Coastal Video Communications Corp.) 16 min.

Industrial Safety Overview V0892

New employee orientation or quick refresher. Covers thirty industrial safety topics from crane safety to MSDS to PPE to welding. Stresses safety attitude.

(©2000 Long Island Productions) 11 min.

Maintenance Person Safety V0338

Covers many topics briefly. Reviews: personal protective equipment and clothing, housekeeping, electrical safety, fire protection, and working with flammable materials. Also, safe lifting, ladders, hand and power tools.

(©1989 ERI Safety Videos) 16 min.

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Gives health and safety information for veterinary employees and encourages their involvement in an ongoing health and safety program. Covers: Hazards and hazardous materials; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Retail Employee Safety V0658

Individual awareness and elimination of unsafe acts will help your employees achieve a great safety record. Highlights: Retail hazards; Slips and falls hazards; Broken glass, pins and scissors; Cardboard cutting safety; Ladder, stair and escalator safety; Electrical and fire safety; Safe stocking practices; and Accidents & emergencies.

(©1995 Long Island Productions) 16 min.

Safety Orientation V0587

New employee orientation, industrial work environment. Topics include responsibilities, warning signs, hazard communication, process systems, machine guards, lockout/tagout, forklift and pallets, housekeeping, emergency eyewash and shower stations reporting injuries, work permits, emergencies and prohibited activities.

(©1996 Visionquest Films) 14 min.

Safety Orientation : Don't Be a Zombie V0772

Spooky Dramatization; industrial setting. Covers: PPE; Back injuries; Slips, trips and falls; Hazard communication; Bloodborne pathogens; Lockout-tagout; and Fire safety.

CC
(©1996 Coastal Video Communications Corp.) 23 min.

Safety Orientation : It Takes A Winning Attitude V0588

Reviews safety procedures to protect employees from the most common industrial hazards. Topics outlined: Hazard communication; Lockout/tagout; Bloodborne pathogens; Personal protective equipment; Back safety; and Fire safety.

(©1996 Coastal Video Communications Corp.) 18 min.

Safety Orientation : Millennium Edition V1008

Covers general safety rules, PPE, Electrical safety, emergency action procedures, housekeeping procedures, fire prevention, fire extinguishers (PASS) system, accident reporting and safe lifting. Good for new employee orientation, industrial environment.

(©2000 R M Distributors - Safety Source) 13 min.

Wheel Of Misfortune. Grave Remarks V0545

In game show format, "Wheel of Misfortune," serves to remind us that for every action there are a set of prescribed outcomes. "Grave Remarks" represents worst-case scenarios of losses and accidents... that lead to their final "resting places." Safety Watch Series. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Working Together For Safety V0596

Explains the relationship between unsafe acts and accidents. Covers a variety of typical safety topics such as personal protective equipment, lockout/tagout, hazard communication, inspections, rules and procedures, accident reporting, protective devices, control measures, accidents and emergencies.

(©1996 Business Training Systems Inc.) 19 min.

Your Safety In The Fruit Packing Plant V0745

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA, Fruit Growers League of Jackson County) 10 min.

SAFETY PROGRAMS

Coaching Safe Behavior, Part One V0542

Reviews safety strategies that should be considered on-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Creating The Safety Plan, Part One V0521

Dramatization 1950's style, with Sam Diamond and Lauren McCall discussing developing a safety plan and leading employees' involvement in a safety plan. Elements of programs: Appropriate Action-motivator, Behavior, and Consequences (ABC). (Black & White) Suggested to supplement or as refresher training. Safety Watch Series. CC

(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

VIDEO TIP:

*Observe the
copyright laws.
Videos may not
be copied!*

Creating The Safety Plan, Part Two V0526

Sam Diamond and Lauren McCall continue their discussion on effective safety programs. These safety programs get everyone involved in the safety process to identify problems and produce solutions. Three essential areas to a safety plan include: conducting successful safety meetings, observing employee work behaviors, and developing a functional safety committee. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Elements of an Ergonomics Program V0849

For managers and supervisors establishing an ergonomics program, this video shows the steps in designing an action plan, goals, communication and training. CC
(©2001 Comprehensive Loss Management, Inc.) 14 min.

Emergency Action Plan - Crisis Under Control V0933

Reviews the elements of effective emergency plans, employee training and cooperation with law enforcement and fire departments. Emergencies covered include terrorism. (©2001 Coastal Video Communications Corp.) 20 min.

Ergonomic F.I.T. : Focusing on the Action Tools, Video 4 V0913

A training video for ergonomic solutions. Presents nine jobs for job analysis. Viewers can then practice identifying risk factors and solutions. CC
(©1995 CoreMedia Training Solutions) 46 min.

Ergonomic F.I.T. : Seeing with an Ergonomic Eye, Video 3 V0912

The Action Team works to identify work risk factors by job analysis, gathering data, and record keeping. Training for employers. CC
(©1995 CoreMedia Training Solutions) 13 min.

Hazard Alert : Safety Is Number One V0272

Discusses a comprehensive program to encourage safe behavior and to make every employee aware of the high priority given to Health and Safety. Covers the parts to include in a safety program; training; rules and procedures; control measures; protective equipment; safety inspections; and emergency procedures.
(©1989 Primedia Workplace Learning, Industrial Training Systems Corporation) 6 min.

How To Develop And Implement An Effective Safety Program V0186

Designed for supervisors and mid-management. Explains, step-by-step, how to provide safety leadership in a manufacturing environment. The steps, when implemented, have reduced accidents and injuries by 50 - 75%.
(©1990 Cinema Safety Products) 18 min.

Safety for Sale : The Role of Incentives in Safety Culture V0832

Explains the elements of a strong safety culture, how to elevate the strengths and weaknesses of incentive programs; tells how incentive programs can reinforce or undermine safety culture; and motivates viewers to explore changes to incentive programs.
(©1998 Coastal Video Communications Corp.) 28 min.

Spiral to Disaster V0840

Re-enacts the tragic series of events resulting in the loss of 165 lives and the destruction of one of the largest off-shore oil and gas production platforms in the North Sea, platform Piper Alpha. Covers procedures and equipment to prevent or mitigate the outcome. Discusses Emergency Action Plan (EAP), work permit systems, risk analysis, and communication break downs. CC

(©2000 Coastal Video Communications Corp.) 25 min.

Staying A Step Ahead V0149

To acquaint employers and employees with WISHA guidelines and how to set up a safety program. Describes the elements of a safety program: management planning, hazard assessment, hazard correction, safety training, emergency procedures, and new employee orientation. For all workplaces, but mainly industrial. May be duplicated
(©1992 Department of Labor and Industries, State of Washington) 18 min.

Task Exposure Analysis : Beginning The Pro-Active Safety Process V0593

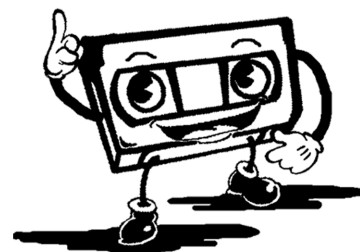

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. CC
(©1995 Coastal Video Communications Corp.) 19 min.

Why Star Quality V0828

Hosted by former ABC Anchor Steve Bell. An intensive overview of OSHA's Voluntary Protection Programs. Covers elements of VPP: Management Leadership, Employee Involvement, Hazard Recognition and control, and Safety and Health Training.
(©1998 Voluntary Protection Programs Participants' Association, Inc.; VPPPA) 45 min.

VIDEO TIP:

*If a video is lost in transit, you must
provide proof of shipping within seven
days of the return due date.*

SAFETY TRAINING

Adult Learning V0715

Especially for companies who are striving to improve performance. Provides tips for success when teaching adults including the concept of "just in time training."

(©1998 Coastal Video Communications Corp.) 14 min.

Evaluation V0716

Tips for evaluation as a tool. Discusses individual evaluation, formative and summative evaluations, sampling the individual, qualitative data (questionnaires, observations, interviews, skills tests), and application of evaluation findings.

(©1998 Coastal Video Communications Corp.) 14 min.

Listening : The Key To Problem Solving V0042

Identifies the causes of poor listening habits and the reasons for improving them. Different techniques for developing listening skills are demonstrated.

(©1979 AIMS Media) 22 min.

Making Learning Stick V0717

Covers the principles of adult learning; Immediacy, Relevancy, Involvement; and Feedback.

(©1998 Coastal Video Communications Corp.) 17 min.

Needs Assessment And Objectives V0718

Shows steps to develop that exceptional employee. Includes how to conduct a needs assessment, four different ways to uncover performance problems, observations, interviews, questionnaires, and group meetings. Also covers how to write training objectives, terminal objectives, enabling objectives, and why objective are an important component in training.

(©1998 Coastal Video Communications Corp.) 15 min.

Planning And Designing V0719

Designing the learning event. Begin with a needs assessment and a clearly written training objectives. Covers learning environments, presentation techniques, and setting standards.

(©1998 Coastal Video Communications Corp.) 15 min.

Presentation Skills V0720

Stresses the importance of presentation as part of the training process and will help to sharpen your skill. Covers the basics of good communication: professional appearance, proper body language, an interesting voice and receiving feedback from your audience. Discusses the trainer's role as a leader.

(©1998 Coastal Video Communications Corp.) 14 min.

Training With Media V0721

Provides tips on how to use media and visual aids to your advantage by including it in your training program. Covers visual images, handouts, diagrams, posters, handbooks, blackboards, dry erase boards, flipcharts, overhead projectors, computer enhanced projection systems, and training videos and multimedia products.

(©1998 Coastal Video Communications Corp.) 14 min.

SCAFFOLDS

Elevated Work Safety V0520

(Humorous) Safety hero, "Captain Safetyman," points out elevated work surface hazards, and the use of a fall protection plan. Overview of various elevated platforms, scaffolds and roofs. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Safety Guidelines For Tube & Clamp/System Scaffolds V0141

An instructional tool for learning the basic safety guidelines for using, erecting, and dismantling tube and clamp/system scaffolds.

(©1991 Scaffold Industry Association) 20 min.

Scaffolding V0736

Footage shot at actual jobsites is used to demonstrate proper scaffolding techniques. Covers OSHA's new scaffolding regulations; reviews rules on the selection and construction of scaffolding; the creation of foundations, footings and platforms; and the use of guardrails and ladders. CC

(©1997 J. J. Keller & Associates, Inc.) 17 min.

Scaffolds : Safety At All Levels V0653

Covers the OSHA Revised Standard 1926.450-454. Reviews the role of the competent person, pre-assembly inspection, assembly, pre-shift inspection, safe work practices, and fall protection.

(©1997 Coastal Video Communications Corp.) 19 min.

Series de la Construcción Residencial - La Seguridad en el Acabado de Tablas de Forro, También Conocido Como "Siding"

Residential Construction : Siding Safety V0813

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. English version V0811. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

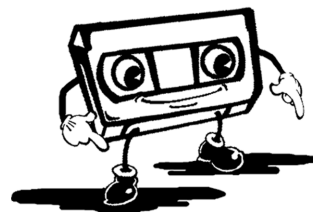

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Stationary Scaffolds in Construction V0654

Provides training in proper scaffold use covering stationary scaffold assembly, the role of the competent person, recognizing hazards and proper materials handling.

(©1997 Coastal Video Communications Corp.) 12 min.

VIDEO TIP:

You are financially responsible for any materials that are damaged or lost while checked out.

Suspension Scaffolds In Construction V0655

Provides training in scaffold assembly, the role of the competent person, inspection, hoisting, electrical hazards, access, fall protection, and safe work practices. Each section looks at recognizing hazards and proper materials handling.

(©1997 Coastal Video Communications Corp.) 11 min.

Walking & Working Surfaces : Watch Your Step! V0286

Outlines methods of personal fall protection and safe work practices for elevated surfaces. Complies with OSHA 1910.23-25; Bonus construction segment (1926.1050, 60); Set-up and use; Inspection and maintenance; Ramps, scaffolds and platforms.

(©1991 Coastal Video Communications Corp.) 19 min.

SEXUAL HARASSMENT

Harassment : Keeping It Out Of The Workplace V0763

A series of vignettes helps communicate the destructive nature of workplace harassment, including discrimination, medical harassment, sexual harassment, electronic harassment, deliberant exclusion, and racism. Discusses how the added burden of harassment for the organization has an affect on morale, productivity, and the profitability of the company.

(©1998 American Training Resources, Inc.) 18 min.

Policy is Not Enough : Leading a Respectful Workplace V0854

Specifically tailored to managers and supervisors, this focuses on their leadership role in establishing a comfortable and respectful workplace. Issues addressed include sexual and other forms of harassment; investigating complaints and preventing retaliation. Good companion to With All Due Respect (V0855) which is for employees.

(©2000 American Training Resources, Inc.) 17 min.

Sexual Harassment : Serious Business V0693

Shows all employees that preventing or eliminating sexual harassment in the workplace will benefit them and their organization. It shows the negative impact of a hostile work environment on the team, how to deal with quid pro quo harassment, and how to confront a harasser and tell him/her to stop the unwelcome behavior.

(©1993 Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min.

With All Due Respect V0855

Designed to promote a respectful workplace, this program is for all employees. Through a variety of scenarios it gives a good overview of all types of sexual harassment with brief coverage of diversity and other forms of harassment. Gives guidance on intervention / resolution strategies.

(©2000 American Training Resources, Inc.) 20 min.

SHIPYARD SAFETY

B. P. Oil Shipyard Safety V0729

Provides a broad overview of shipyard health and safety hazards so that shipyard personnel and ship crews can recognize and control them. Covers enclosed and confined space entry, fire prevention, health hazards and PPE, and emergency response procedures.

(© B.P. Oil Shipping Co., USA) 30 min.

Examining Fatal Shipyard Accidents V0949

Depicts actual fatal accidents, examines what went wrong and shows subsequent hazard abatement recommendations. Shows a wide range of shipyard accidents including rigger crushed by crane, confined space fire, scaffolding collapse, workbench grinder wheel shatters, and electrocution. Animated, but graphic. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2002 U.S. Department of Labor, Occupational Safety and Health Administration) 14 min.

Shipyard Ergonomics V1014

Filmed in Seattle. Covers ergonomic solutions to prevent injuries in a variety of tasks in the shipyard environment, including welding, confined spaces, and lifting. Identifies risk factors of awkward posture, repetition, forces and weight, vibration, duration, static muscle loading, contact stress, and environment.

(©2003 Shipbuilders Council of America) 27 min.

Shipyard Safety Orientation V0915

Three part presentation. Part 1: Preparing to work. Describes work environment and instruction on PPE, respirators, welding, general housekeeping, etc. Part 2: Prevention - Proper handling yourself, products and materials such as load handling, rigging loads, Dog or Pad-Eye, pinch points, etc. Part 3 Potential Environmental & Health Hazards including heat exposure, frostbite, MSDS, noise, hotwork, confined space, "near miss" situations, footwear, etc.

(©2000 Shipbuilders Council of America) 38 min.

SHOP SAFETY

Hand Safety V0096

Includes interviews with actual victims, and a medical expert to point out dangers to hands when using equipment improperly. Discusses the hazards of pinch points, hot spots, rotating surfaces, automated machinery and jewelry / loose clothing. Explains proper use of hand tools, wrenches, screwdrivers, and knives. Emphasises the safety of machine guards. (©1987 Coastal Video Communications Corp.) 15 min.

Machine Cutting, Grinding And Sanding V0489

Don't get caught in the Hazard Zone! Discusses unique hazards in operating heavy equipment. Shows preventative measures for ensuring safe operation of grinding, cutting, and sanding equipment. SafetyWatch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 7 min.

Machine Guarding V0252

Emphasizes individual responsibility when working on or around machines and equipment. Demonstrates lockout/tag-out, machine guarding requirements and personal responsibility.
(©1993 Long Island Productions) 13 min.

Machine Guarding V0402

A dramatic presentation in which the safety officer shows the company nurse the principles of machine guarding and examples of different types of guards. Discusses the critical components of effective guard designing. Safety Watch Series. Suggested to supplement or as refresher training.
(©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Machine Shop Safety V0160

Basic shop safety including PPE, clean work area, recognizing and avoiding mechanical, electrical and chemical hazards; and correct work practices.
(©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 20 min.

Machine Shop Safety V0519

Covers the hazards associated with machine shops; emphasizes safe work practices; wearing appropriate personal protective clothing and stresses good housekeeping practices. Safety Watch Series. Suggested to supplement or as refresher training.
(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

On Your Guard : Power Tool Safety V0907

Discusses general safety precautions for working with power tools. Covers the circular saw, radial arm saw, table saw, portable drill, portable sanders, bench grinder, angle grinder, and reciprocating saw. Construction site environment.
(©1992 Comprehensive Loss Management, Inc.) 14 min.

Pneumatic & Hydraulic Tools V0599

Alerts viewers to know the difference between pneumatic and hydraulic tools, their hazards, and limitations. Safety Watch Series.
(©1996 Primedia Workplace Learning, Safety Watch) 8 min.

Portable Hand Tools (Humorous) V0393

(Humorous) Join Tom, the Tool Guy, and his assistant, Bob, for a touch of humor while reviewing the basics of using hand tools. Emphasizes proper use and transporting tools correctly, PPE, inspection, types of hand tools (hammers, screw drivers, pliers), ergonomics, and choosing the proper tool for the job. Safety Watch Series. Suggested to supplement or as refresher training.
(©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Portable Power Tools V0353

(Humorous) A humorous game show is the setting for learning the do's and don'ts of using portable power tools. Discusses common sense but sometimes forgotten procedures to perform before and during your use of power tools. Safety Watch Series. Suggested to supplement or as refresher training.
(©1994 Primedia Workplace Learning, Safety Watch) 10 min.

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use such as screwdrivers, pliers, wrenches, hammers, tools. Demonstrates the correct methods of use and PPE. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home.
(©1987 Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min.

Proper Use Of Compressed Air V0510

Gives safety tips for using both breathable and work-related compressed air. Shows proper transporting, storing, and use of compressed air tanks. Offbeat opening when substitute teacher, Mr. Tylor, decides to show his film on compressed air safety, instead of the literature lesson. Silly. Suggested to supplement or as refresher training. CC
(©1996 Primedia Workplace Learning, Safety Watch) 7 min.

SILICA

Conciencia De La Silicosis En Sitios De Construcción Silicosis Awareness on the Construction Site V1025

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. English version is V1012 *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Plain Talk About A Serious Problem... Silicosis V0636

Millions of workers throughout the United States are exposed to a serious disabling lung disease, silicosis. It is caused from inhaling dust containing silica. Covers: Dust; Four factors/Silicosis (particle size, percent of free silica; length of safe exposure, individual susceptibility); and Silicosis... three basic stages. Narration by Andy Griffith.
(©1983 Mine Safety & Health Administration) 13 min.

Silica V0046

Identifies common types of silica and the health problems that can result from exposure. Work processes that can create airborne silica include: Tunneling; Metal foundries; Stone; Clay; Glass production; and Abrasive cleaning or sandblasting. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1990 National Technical Information Service) 22 min.

Silicosis V1026

Describes silicosis disease and sources of silica exposure. Demonstrates PPE to control risk of silica and other harmful dusts.
(©1994 R M - Safety Shorts) 5 min.

Silicosis Awareness on the Construction Site V1012

Training for prevention of silicosis among cement masons. Defines silicosis and risk factors. Describes hazardous working conditions, safety procedures, and PPE. Produced by Oregon and SW Washington Cement Masons Apprenticeship Program. May be duplicated. Spanish version V1025 (©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

SLIPS AND FALLS

Don't Fall For It : Preventing Slips, Trips And Falls V0109

Demonstrates simple effective procedures for reducing work-related accidents and injuries utilizing professional stunt men and women. Discusses hazards related to faulty equipment and the results of deliberate unsafe acts and horseplay. (©1989 Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min.

Employee Education : Safety In The Office V0228

General Office safety focusing on preventing falls, loading file cabinets safely, identifying tripping hazards. Discusses the importance of emergency evacuation, fire safety, and observing electrical safety with appliances and machines. Dated, but essential information. (©1990 AIMS Media) 13 min.

Housekeeping : It Ain't Like The Movies V0574

Reviews the importance of good housekeeping and what to look for in your facility. CC (©1995 Coastal Video Communications Corp.) 15 min.

Housekeeping For Safety V0416

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Housekeeping For Safety V0627

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

It Only Takes a Second - Discussion Version V0911

A series of scenarios showing unsafe acts or conditions vs. the safe way. Topics include: driving safely, PPE, slips, trips and falls, machine guarding, and safe operating procedures. Expanded version of V0926. (©2001 Aurora Pictures) 24 min.

Kitchen Safety V0159

Addresses hygiene, personal protective equipment, manual handling, use of knives, slips, trips, and falls, dealing with kitchen fires and general hazards. (©1990 Safetycare, Inc.) 15 min.

Preventing Slips, Falls And Lifting Injuries : Program 3 (Restaurant Safety) V0794

Covers: Preventing slips and falls, reducing hazards, Lifting techniques; Ladder safety. Food Service work environment. (©1992 National Restaurant Association, The Educational Foundation) 13 min.

Putting Your Best Foot Forward V0103

(Humorous) Illustrates the common sense approach to combating accidents caused by slips and falls in the office, warehouse, snow and ice, and in the parking lot. Some animation with D. Duck, Goofy and Mickey. (©1988 Coronet/MTI Film & Video) 16 min.

Safety On The Job : Slips Trips & Falls V0027

Concise narration and dramatic vignettes teach employees and their supervisors how to eliminate the causes of falls, and to cooperate in correcting or reporting potential hazards. (©1985 AIMS Media) 17 min.

Slips, Trips & Falls V0615

In the "Safety Crusaders" TV panel format. Discusses the three laws of science addressing slips, trips and falls which are friction, momentum, and gravity. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 18 min.

Slips, Trips & Falls V0399

(Humorous) A visiting congressman tours a worksite and nearly destroys the company's excellent safety record as he tries to help employees do their work. Safety precautions for avoiding commonplace accidents are shown. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Slips, Trips and Falls : Keeping a Step Ahead V0996

Outlines the common causes of falls in the workplace, ladder and stair safety. Alerts viewers to watch for slippery floor surfaces and shows non-skid footwear. Examines fall protection equipment and safety techniques to prevent injury. CC (©2001 Summit Training Source, Inc.) 12 min.

Trips and Falls V1016

For front line workers. Shows how to prevent common slips, trips and falls in all workplaces. Shorter version of V0996 Slips, Trips and Falls. (©2001 Summit Training Source, Inc.) 5 min.

Work Surface Safety V0475

Everyday housekeeping is important to work surface safety. Training points: work surface areas must be clear of obstructions; spills must be cleaned up quickly and marked with warning signs. Emphasizes the importance of monitoring and keeping the work surfaces clean and clear. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1995 Primedia Workplace Learning, Safety Watch) 6 min.

STEVEDORES - LONGSHOREMEN

B. P. Oil Shipyard Safety V0729

Provides a broad overview of shipyard health and safety hazards so that shipyard personnel and ship crews can recognize and control them. Covers enclosed and confined space entry, fire prevention, health hazards and PPE, and emergency response procedures.

(© B.P. Oil Shipping Co., USA) 30 min.

Let's Talk About Safety V0708

A safety video designed for hard-boiled longshoremen. Half of all longshoremen are numb to safety messages yet work in one of the most dangerous environments on earth. This video was shown to them and they loved it. The unique approach to safety training woke the sleepers and actually got them talking about safety.

(©1998 CSI Multimedia, Gonzer Video Division) 18 min.

Shipyard Safety Orientation V0915

Three part presentation. Part 1: Preparing to work. Describes work environment and instruction on PPE, respirators, welding, general housekeeping, etc. Part 2: Prevention — Proper handling yourself, products and materials such as load handling, rigging loads, Dog or Pad-Eye, pinch points, etc. Part 3: Potential Environmental and Health Hazards including heat exposure, frostbite, MSDS, noise, hotwork, confined space, "near miss" situations, footwear, etc.

(©2000 Shipbuilders Council of America) 38 min.

STRESS ON-THE-JOB

Combating Stress V0506

Not all stress is bad, yet too much stress can lead to health and job performance difficulties. Follow the tips provided in this video for maintaining a healthy balance. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Controlling High Blood Pressure V0616

Describes in a drama the ways to reduce the risk of high blood pressure, reduce stress, exercise options and choosing a healthier lifestyle. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 13 min.

Prevention Is Proactive : Part I The Support Process, Part II Attitudes In Action, Part III The Power Of Stress V0754

Discusses an introductory training program on crisis prevention that examines staff values and stress reactions and the techniques of diffusing a crisis situation in which an individual is threatening the safety of himself and others with severe aggressive, destructive, or self-abusive behaviors. The support process covers: Steps in the support process; Who is involved, and The process for each individual. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 26 min.

Prevention Is Proactive : Part IV - Crisis Diffusion V0755

Discusses strategies to diffuse a crisis. Main goals of crisis intervention: To assure the safety of everyone involved; and To help the person in crisis regain control of himself. Designed to reduce the incidence of on-the-job injuries sustained by rehabilitation staff working with people having physical, mental, or emotional impairments.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 22 min.

Seguridad en el Trabajo: Causas Y Prevención Del Accidente - 2nd edition **Safety On the Job : Accident Causes and Prevention** V0229

A series of dramatizations show how a person's mental or physical condition can affect on-the-job performance and lead to accidents. Stresses identification of risk-producing behaviors to reduce the chance of injury. Illustrates warning signs staff and

supervisors should be alert to. Suggests employee assistance programs for help or advice. English Version V0243 (©1984 AIMS Media) 16 min.

Stress In The Workplace V0401

Identifies signs of stress overload, suggests ways for individuals to change their reactions to stressful events and shows various other stress management strategies. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Stress Management : A Practical Approach V0676

Compares the stress of a roller coaster ride to the ups and downs experienced during a busy day. Follows the stress coping challenges of several people and shows how they might handle those challenges. Helps to increase employees understanding of the ways unmanaged stress affects their health, productivity, and personal lives and to give them tools to take control of their stress levels. (©1997 American Training Resources, Inc.) 19 min.

Stress Relief : The Heimlich Method V0026

Dr. Heimlich explains what stress is, how it works, and gives strategies for cooling off stressful situations and changing habits that invite stress.

(©1983 AIMS Media) 18 min.

Working With Stress V0986

Overview of job stress and how it affects job productivity. Can be used as orientation video for administrators and supervisors. Produced by CDC. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2002 Center for Disease Control and Prevention) 16 min.

VIDEO TIP:

*Training booklets
provided must be
returned.*

Workplace Stress V0659

(Revised V0184) Shows employees the powerful force of stress and its causes. Teaches how to control, eliminate stress factors, and relieve stress through relaxation and simple exercises. (©1994 Long Island Productions) 13 min.

Workplace Stress V0184

(Similar to V0659) Shows employees the powerful force of stress and its causes. Teaches how to control, eliminate stress factors, and relieve stress through relaxation and simple exercises. (©1992 International Film Bureau Inc.) 15 min.

STRUCTURAL STEEL HANDLING

Handling Structural Steel - Unloading, Sorting, Rigging V0953

For steel workers. Shows unloading, sorting and making the lifts. Covers various hitches, hooks and their load limits. Effectively demonstrates the dangers of shortcutting safety procedures. (©1999 R M Distributors - Vista) 26 min.

SUMMER SAFETY

Beat The Heat : Preventing & Treating Heat Disorders V0551

For those workers who must perform their jobs in the heat. Heat can cause bodily illness or injury, worksite accidents and even death. Covers: Thermo-regulation of the body; Importance of replenishing fluids; and Prevention and treatment. (©1995 Coastal Video Communications Corp.) 17 min.

Groundskeeper Safety Including Pesticides V0509

Many safety issues for groundskeepers are discussed, including working in hot and cold weather, working with power equipment, using appropriate PPE, lifting correctly, avoiding insect bites, and working with pesticides. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Off the Job Safety : Fun in the Sun V1006

(Humorous) Nurse Crabitch appears at Crosby Metals Safety meeting to give tips on how to stay out of the emergency room. Covers: water sports safety; fireworks hazards; preventing heat stress; sun exposure; warm up and cool down from physical activities. Humorous dramatization. Summer followup to V1000. (©1997 Summit Training Source, Inc.) 13 min.

Recreational Safety V0226

Emphasizes the importance of performing warm-up exercises, using the right type of equipment, and wearing suitable clothing. Provides safety rules for hiking, climbing, and other sports activities, and demonstrates proper procedures for using trailers, motor homes, and recreational vehicles. Includes first aid tips and a list of organizations to consult for information on recreational safety issues. (©1988 AIMS Media) 20 min.

Summer Safety V0126

Trains employees in emergency situations during the summer, both on and off-the-job. Covers: drowning, sunburns, heat exhaustion, poisonous plants, snake bites, and insect bites and stings. (©1990 Primedia Workplace Learning, Tel-A-Train, Inc.) 10 min.

Summer Sports : Safety Wins! V0713

Through demonstrations and interviews with athletes and experts, explains how to enjoy the maximum benefits of sports, exercise, and avoid injuries. Demonstrates proper warm-up techniques. CC (©1997 Coastal Video Communications Corp.) 13 min.

TARPING

Tarp Smart : Protect Your Load... And Ourselves V0738

Covers safe tarping procedures for square and odd shaped loads. Illustrates several different hazards to which drivers are exposed during tarping procedures and how to eliminate or minimize the hazards. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1995 Department of Consumer Business & Services, Oregon OSHA) 11 min.

TRACTOR SAFETY/HEAVY EQUIPMENT

see also Crane Safety

Dump Truck Safety V0662

Topics: Pre-startup inspection checklist; Startup checklist and tests; Vehicle controls and instruments; Refueling safety; and Receiving and dumping loads. Also, covers defensive driving, handling when loaded, and poor site conditions. Effective 6/1/2004 in Washington State, in addition to the back-up alarm, dump-truck drivers must have either an observer signaling when it is safe to back up or a device such as a video camera that provides the driver with a full view of the area behind the dump truck. (©1991 R M Distributors - Safety Source) 15 min.

Farm And Ranch Equipment Safety

Seguridad con el Equipo en la Granja y en el Rancho V0296

Covers ranch and farm equipment accident prevention. Narrated by Bob Tallman, famous rodeo personality and voice of "The American Farmer" radio program. Emergency Medical Technicians describe accident situations with equipment. Communication strategies for farm and ranch workers are also discussed. Recommended training for all workers on farms and ranches. (©1990 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 36 min.

VIDEO TIP:

*Having trouble finding a video?
Do a keyword search with our
online catalog.*

Farm Safety : Getting Down To Business V0758

Covers: Hazard Communication; Safety committees; A lockout/tagout program; Emergency planning; Guarding; Tractor & Combine safety equipment; Oxygen/Acetylene bottle storage; Fire extinguishers; Grinder rests and guarding; Eye protection; Electrical precautions; Hand tool maintenance; Chemical hazards; Labeling; and Grain storage units. Produced by Oregon OSHA and Oregon Wheat Grower League. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1993 Department of Consumer Business & Services, Oregon OSHA) 23 min.

Harvest Of Danger Season Of Hope V0221

Explores causes of farm-related injuries and illnesses. Features interviews with experts in agricultural safety and rural health; farmers and farm workers. Suggests strategies for reducing the effects of numerous work-related problems ranging from stress to pesticide poisoning.
(©1993 MIBH/NYCAMH/FPP/MARY Imogene Basset Hospital) 18 min.

Hood River Tractor Safety Seminar For The Tree Fruit Industry, Part I, II, III V0750

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. Spanish version V0751. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 42 min.

It's Not Gonna Happen To Me V0318

Covers safety practices for tractor operators. Includes pre-operation checks, transporting tractors, operation checks, tractor mishaps and how to avoid them and procedures to follow in the event of an accident. Spanish version V0319.
(©1990 Visual Education Productions) 24 min.

No me va a Suceder a Mi It's Not Gonna Happen To Me V0319

Covers safety practices for tractor operators. Includes pre-operation checks, transporting tractors, operation checks, tractor mishaps and how to avoid them and procedures to follow in the event of an accident. English version V0318.
(©1990 Visual Education Productions) 24 min.

Safe Tractor And Machinery Operation V0322

Topics include: Proper clothing and footwear for tractor operation; Pre-operation safety checks; and proper mounting/dismounting procedures. Videotaped seminar. Spanish Version V0323
(©1992 University of Florida, IFAS Publications) 33 min.

Seguridad durante la Operación del Tractor y la Maquinaria

Safe Tractor and Machinery Operation V0323

Topics include: Proper clothing and footwear for tractor operation; Pre-operation safety checks; and proper mounting/dismounting procedures. Videotaped seminar. English Version V0322
(©1992 University of Florida, IFAS Publications) 33 min.

Seminario de Seguridad para el uso del Tractor en la Industria del Arbol Frutal, Partes I, II, III

Hood River Tractor Safety Seminar for the Tree Fruit Industry V0751

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. English version V0750. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 52 min.

Snow and Ice Control V0891

A training tape in three parts for DOT road maintenance personnel; also applicable to other snow removal operators, primarily municipality and county workers. Part 1 (11 minutes) Preparation and Basic Information. Part 2 (15 minutes) Equipment checks and maintenance. Part 3 (21 minutes) Snow and Ice, plowing, applying sand and anti-icers. Updated in 1999.
(©1989 Washington State Department of Transportation) 47 min.

Tarp Smart : Protect Your Load... And Ourselves V0738

Covers safe tarping procedures for square and odd shaped loads. Illustrates several different hazards to which drivers are exposed during tarping procedures and how to eliminate or minimize the hazards. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1995 Department of Consumer Business & Services, Oregon OSHA) 11 min.

TRAINING GRANT PROGRAMS DEPOSITED FROM OR-OSHA

Bloodborne Pathogens : Preparation, Safety and Training (For Public Transportation Drivers) V1052

Produced by Oregon OSHA with the Ride Connection specifically for community transportation drivers. Covers exposure hazards to bloodborne pathogens, HIV, HBV and HCV; prevention, clean up procedures. Note: Program highlights Oregon OSHA rules which are different than requirements in Washington state.
(©2003) 16 min.

Breathe Easy V0759

A training video covering respiratory protection for workers in nurseries. Shows how to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. Spanish Version V0760. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Carga y Elevación: Una Guía para la Seguridad en la Elevadora de Horquilla Agrícola

Load & Lift : A Guide To Agricultural Lift Truck Safety V0741

In Spanish, covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre-inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. English version V0740. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Conciencia De La Silicatosis En Sitios De Construcción Silicosis Awareness on the Construction Site V1025

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. English version is V1012. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Dairy Safety : Now, More Than Ever V0739

Developed to assist employers and employees in the dairy industry to become more aware of occupational hazards on dairy farms. Experience an inspection of a dairy farm inspection with an Oregon OSHA inspector to learn what a safe farm looks like. Lists ten most cited violations for 1991, solutions to fix the problems and the consequences. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 18 min.

EPA Worker Protection Standard Rules (English) V0747

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English /Spanish version V0749. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Farm Safety : Getting Down To Business V0758

Covers: Hazard Communication; Safety committees; A lockout/tagout program; Emergency planning; Guarding; Tractor & Combine safety equipment; Oxygen/Acetylene bottle storage; Fire extinguishers; Grinder rests and guarding; Eye protection; Electrical precautions; Hand tool maintenance; Chemical hazards; Labeling; and Grain storage units. Produced by Oregon OSHA and Oregon Wheat Grower League. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 23 min.

Health & Safety Training For The Painting Environment V0744

Produced in partnership with International Brotherhood of Painters and Allied Trades to provide accurate information relative to the health hazards of the painting profession. Discusses the diagnosis of occupational toxic conditions. Focuses on the hazards and symptoms of overexposure, the use of personal protective equipment (PPE), the hierarchy of hazard control, and the proper selection, fit and maintenance of respirators. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 44 min.

Hearing Conservation for At Risk Workers V0895

Focuses on hearing protection in road construction. Extensive supplemental materials including tests and PowerPoint presentation on CD-ROM. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2001 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Hood River Tractor Safety Seminar For The Tree Fruit Industry, Part I, II, III V0750

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. Spanish version V0751. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 42 min.

Load & Lift : A Guide To Agricultural Lift Truck Safety V0740

Covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. Spanish version V0741.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 21 min.

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Gives health and safety information for veterinary employees and encourages their involvement in an ongoing health and safety program. Covers: Hazards and hazardous materials; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Patógenos transmitidos Por La Sangre: Preparación, Seguridad y Entrenamiento Bloodborne Pathogens : Preparation, Safety and Training for Public Transportation Drivers V1053

Produced by Oregon OSHA with the Ride Connection specifically for community transportation drivers. Covers exposure hazards to bloodborne pathogens, HIV, HBV and HCV; prevention, clean up procedures. Note : Program highlights Oregon OSHA rules which are different than requirements in Washington state. (©2003) 16 min.

Prevention Is Proactive : Part I The Support Process, Part II Attitudes In Action, Part III The Power Of Stress V0754

Discusses an introductory training program on crisis prevention that examines staff values and stress reactions and the techniques of diffusing a crisis situation in which an individual is threatening the safety of himself and others with severe aggressive, destructive, or self-abusive behaviors. The support process covers: Steps in the support process; Who is involved, and The process for each individual. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 26 min.

Prevention Is Proactive : Part IV - Crisis Diffusion V0755

Discusses strategies to diffuse a crisis. Main goals of crisis intervention: To assure the safety of everyone involved; and To help the person in crisis regain control of himself. Designed to reduce the incidence of on-the-job injuries sustained by rehabilitation staff working with people having physical, mental, or emotional impairments.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 22 min.

Primero la Seguridad: La Seguridad es Importante Safety First : Safety Is Important V0757

Pictograms For The Food Processing Plant. A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. English version V0756.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 5 min.

Reglas del Estándar para la Protección del Trabajador EPA Worker Protection Standard Rules V0748

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English version V0747.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 20 min.

Reglas del Estándar para la Protección de Trabajador EPA Worker Protection Standard Rules V0749

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA) 36 min.

Respire Fácilmente Breathe Easy V0760

A training video covering respiratory protection for workers in nurseries. Shows: How to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. English version V0759.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Returning the Injured Worker to the Job V1048

Shows how six Oregon employers turned around attitudes and cut compensation costs. Dramatic stories of injured workers returning to work in a new capacity.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993) 20 min.

Safety First : Safety Is Important V0756

(Pictograms For The Food Processing Plant). A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. Spanish version V0757. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 5 min.

Seminario de Seguridad para el uso del Tractor en la Industria del Arbol Frutal, Partes I, II, III Hood River Tractor Safety Seminar for the Tree Fruit Industry V0751

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. English version V0750. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 52 min.

Smart Lift V0742

Designed to reduce the number, incidence and severity of lifting and twisting injuries in the retail industry through an updated, accurate program to educate employees in proper and safe techniques for lifting and moving heavy objects. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 8 min.

Su seguridad en la Planta de Empaque de Frutas Your Safety in the Fruit Packing Plant V0746

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries in the workplace. English version V0745.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 10 min.

Targeting Workplace Violence : A Video For Front-line Workers V0630

Ann Schatz, a KOIN-TV news anchor reports her part in a workplace violence story. A lone gunman entered the Coin Tower where her station was located and held a number of hostages on the ground floor. Challenges viewers to identify factors leading up to a violent incident and ways to avoid or defuse it. Appropriate for retail and public workers, especially those who deal with high stress situations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1997 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Tarp Smart : Protect Your Load... And Ourselves V0738

Covers safe tarping procedures for square and odd shaped loads. Illustrates several different hazards to which drivers are exposed during tarping procedures and how to eliminate or minimize the hazards. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1995 Department of Consumer Business & Services, Oregon OSHA) 11 min.

Today's Workplace : Workplace Traffic Safety V0784

Does traffic safely play an important role in the workplace? "Today's Workplace" investigates this question. By interviewing seven experts and taking an in-depth look at the key areas of traffic safety: environment, operation and maintenance, other drivers, trucks, passengers, "Today's Workplace" finds some interesting answers. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

Trabajando Inteligentemente - no con más Dificultades: Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices. English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Violence In The Workplace : Learn To Play It Safe V0632

Produced in Oregon to help retailers and their employees obtain the skills necessary for dealing with potentially violent individuals. Gives key points on communication skills for workers dealing with difficult situations.

(©1997 Department of Consumer Business & Services, Oregon OSHA) 14 min.

Watch That Dog! V0743

Explains basic protection and provides insight into the mannerisms of various types of dogs. Tells how to protect yourself from possible attack and injury. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1995 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Working Smarter - Not Harder : Ergonomics In Agriculture V0801

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts.

Demonstrates correct work practices. Spanish version V0802. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1998 Department of Consumer Business & Services, Oregon OSHA) 16 min.

Your Safety In The Fruit Packing Plant V0745

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 10 min.

Youth Safety in the Workplace V0860

Overview of occupational safety and health topics including blade safety, forklifts, PPE, confined space, lifting, and emergency procedures. Produced by Associated Oregon Industries and OR-OSHA.

Whenshowing this program be aware that specific regulations to Oregon State Law may be different in the state of Washington.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Consumer Business & Services, Oregon OSHA) 19 min.

TUBERCULOSIS AWARENESS

Mantoux Tuberculin Skin Test V0987

Provides a clear detailed demonstration of the steps involved in administering and reading the Mantoux tuberculin skin test. For health care professionals. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©2002 Center for Disease Control and Prevention) 30 min.

Respirators: Your TB Defense V0938

The use of respirators in health care is an important step in preventing the transmission of tuberculosis. Narrator, Loretta Swit, gives an overview of TB in the past and describes the use of various air-purifying and atmosphere-supplying respirators. Describes elements required in a training program. *Permission is granted

to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Center for Disease Control and Prevention) 16 min.

TB Respiratory Protection : Administrator's Review V0922

Thorough overview of the requirements of the TB respirator/protection program.

Supplements NIOSH publication TB respiratory protection and health care facilities administrators guide. Includes CD.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Center for Disease Control and Prevention) 24 min.

Tuberculosis Awareness V0290

Since 1985 the Center for Disease Control has reported a resurgence of TB. Gives general information about exposure, prevention and treatment of tuberculosis. Also covers: symptoms of TB infection; who is at risk; and drug-resistant TB.

(©1994 Coastal Video Communications Corp.) 16 min.

Tuberculosis In The First Responder Environment V0313

Discusses: Epidemiology of TB: Latent, Active and Multi-Drug Resistant; Signs and symptoms of TB; High risk Groups and the reasons for the rise in TB cases. Regulatory aspects of TB: CDC Guidelines and OSHA Enforcement Policy; Workplace risks: Modes of transmission, Post-Exposure Management; and Exposure Control Plan.

(©1994 Long Island Productions) 20 min.

UTILITIES SAFETY

Climbing Poles Safely V0329

This program explains: Hitch-Hiking" and "Free Hand" climbing methods; Electrical Hazards while climbing and working on poles; Inspecting poles and equipment; and the importance of your "Safety Attitude."

(©1992 ERI Safety Videos) 14 min.

Confined Space Safety V0189

Training intended for workers, contractors, supervisors and work monitors. Highlights are: Work monitoring a work-site inspection; Environmental containment testing and ventilation; Pre-entry atmospheric testing; Avoiding toxic gas and fire hazards; Emergency rescue; and

Monitoring for heat stress.

(©1993 Video Training Source) 21 min.

Dog Bite Prevention V0893

Illustrates techniques for recognizing dangerous dogs and how to avoid confrontation.

(©1998 Long Island Productions) 5 min.

Electrical High Voltage : Know The Hazards V0558

"There were three of us down there. My friend was closer to the breaker — all of a sudden he was a ball of flames..." So begins this video program describing OSHA's Electric Power Generation, Transmission and Distribution Standard. For workers in electrical utilities operations. Covers: PPE and fall protection; Overhead lines; Enclosed spaces; Proper use of tools; Working on or near exposed energized parts; and Testing and test facilities.

(©1996 Coastal Video Communications Corp.) 28 min.

Gopher Guide to Dig Safety V0838

Digging safely requires knowledge of precautions and advance notice requirements. Lists a variety of additional materials made available by Washington State to promote worker and utility safety. Potential safety hazards to excavation work such as fiber optic cables, gas and telephone lines, are dramatized with safe procedures demonstrated. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Washington Utilities Coordinating Council) 8 min.

Highway Work Zone Safety : Utility Safety in Work Zones V0866

For Road Construction worker training. Shows the different marking indications for telecommunications, electric, gas, water, and sewer lines. Note: Some footage contains Washington State Code violations! See also V0838 Gopher Guide to Dig Safety. (©1999 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 14 min.

Pole Topping Safety (High Voltage Electrical Pole Topping Safety) V0887

For public and private utility workers, and linemen. Shows examples of acceptable and effective safe pole top removal practices.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Labor and Industries, State of Washington) 10 min.

Temporary Grounding Seminar V0677

Classroom instruction by Lonnie Bell, hot line tools specialist and demonstrator, covers single-point, dual point and personal grounding practices in Part 1 - Principles and Development of Methods, and Part 2 - Equipment Selection, Research Testing and Application Simulations on a working model of a three-phase line.

(© Hubbell Power Systems) 50 min.

Valve Safety V0871

Describes the different types of valves and associated hazards; importance of risk assessment. Reviews use of PPE and safety measures. Special emphasis on ergonomics; avoiding awkward postures and demonstrating proper lifting techniques. Program footage with scenes on site at a refinery and ships. The content is applicable to any industrial environment utilizing valves and pipes such as water, utilities, or petroleum. (©2001 Summit Training Source, Inc.) 17 min.

Watch That Dog! V0743

Explains basic protection and provides insight into the mannerisms of various types of dogs. Tells how to protect yourself from possible attack and injury. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1995 Department of Consumer Business & Services, Oregon OSHA) 15 min.

Winter Driving V0594

Teaches driver training techniques for utility and truck drivers. Uses live video sequences to illustrate loss of control situations. Covers winter driving techniques and preparation of vehicles for winter travel. (©1995 Video Training Source) 18 min.

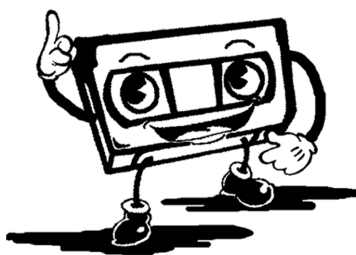

Working Back : A Guide For Municipal Workers V0140

A guide to back care, with specific focus on work situations faced by municipal workers. Two previously-injured workers share their experiences, while five individual segments address potential back injury hazards.

(©1990 Workers' Compensation Board of British Columbia) 24 min.

VIDEO TIP:

If a video is lost in transit, you must provide proof of shipping within seven days of the return due date.

WAREHOUSE SAFETY

Bicycle Safety In Plants & Factories V0535

Bicyclists training for rules, warning gear for bikes, maintenance, and defensive attitude while biking. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Color Of Danger V0053

Uses stop-action and coloring book techniques to give forklift operators a solid indoctrination on safe practices and the consequences of not looking for possible danger. Shows the dangers of poor forklift operation in various industrial settings, including docks, sawmills and warehouses. (©1968 Barr Films) 16 min.

Goofy's Plant Safety Championships V0083

(Humorous) Features potential safety hazards and specific preventive measures to avoid serious accidents or injury in plant settings. Goofy as safety trainer, turns the real workplace into an athletic competition to illustrate the techniques for safe loading, emergency procedures for heavy lifting,

avoiding slips and falls, handling chemical spills, and dealing with fires. Some animation.

(©1990 Disney Educational Productions) 13 min.

How to Develop an Effective Safety Program V0900

Emphasizes the importance of training for supervisors and employees. Includes components of a safety program, safety committees and suggested resources. Shows footage of warehouse, retail and construction workplaces. Revision of V0186. (©1995 R M Distributors) 20 min.

Materials Handling & Storage V0484

In a news show format, "Wide World of Safety," Howard Containment and Paula Prevention highlight the hazards of materials handling and storage. Improper storage can lead to spills, tripping conditions, and slipping conditions. These conditions can result in injury to humans and damage to materials being stored. Suggested to supplement or as refresher training. Safety Watch Series. CC (©1995 Primedia Workplace Learning, Safety Watch) 9 min.

Putting Your Best Foot Forward V0103

(Humorous) Illustrates the common sense approach to combating accidents caused by slips and falls in the office, warehouse, snow and ice, and in the parking lot. Some animation with D. Duck, Goofy and Mickey. (©1988 Coronet/MTI Film & Video) 16 min.

Safe Lifting For The Trucking & Warehouse Industry V0665

Covers: Back mechanics: structure and function; Lifting principles and techniques: load and counterload, 10 to 1 ratio, palm grip, load in close, leg power; and Techniques for awkward positions. (©1996 Long Island Productions) 9 min.

Safe Lifting in the Warehouse V0852

Purpose: to prevent back injury in the warehouse environment by using proper lifting techniques, back exercises, warm-ups, and stretching. Various solutions in brief scenarios. Risk Analysis and suggested workstation modification.

(©1998 VOCAMM) 22 min.

Safe Use Of Hand Trucks, Dollies, And Pallet Jacks V0586

Demonstrates safe use of hand trucks, large-item hand trucks, drum handlers, piano and furniture dollies, pallet trucks and jacks, platform trucks, and service carts. Includes procedures for loading, operating and moving large items.

(©1992 Media Resources Inc.) 20 min.

Safety On The Job : Manual Load Handling In The Warehouse V0133

About two-thirds of warehouse injuries are caused by improper lifting, carrying, or handling materials. Describes how to correctly inspect a load. Provides safety rules for using special tools in the warehouse.

(©1990 AIMS Media) 12 min.

Safety On The Job : Powered Equipment In The Warehouse V0134

Illustrates proper techniques for handling equipment on loading docks, including checking trailer wheels, inspecting dock boards, working inside a rail car, operating forklifts and conveyor belts. Safety rules for stacking and picking orders are reviewed. Gives tips for the safe operation of hoists and conveyors. Motivates workers to wear appropriate PPE and utilize chemical safety precautions.

(©1990 AIMS Media) 12 min.

Safety On The Job : Working With Electricity V0241

Details the hazards associated with using electricity on the job. Illustrates the importance of knowing standard procedures for common electrical problems. Common hazards explored in this program: insufficient wire insulation, faulty breakers, dirty casings, overloaded outlets, and work with power tools around water. Work environments include

warehouses, manufacturing plants, and construction areas.

(©1989 AIMS Media) 16 min.

Warehouse Safety V0504

Focuses on careful use of industrial powered trucks and also shows tips for avoiding fire and other hazards that may be found in warehouse settings. Safety Watch Series. Suggested to supplement or as refresher training. Note: Forklift drivers must wear seatbelts.

(©1996 Primedia Workplace Learning, Safety Watch) 9 min.

Warehouse Safety : It's No Mystery V0773

An orientation of warehouse hazards and safety precautions including housekeeping, ladder safety, hazard communication, personal protective equipment, ergonomics, safe material handling, back safety, forklift safety, and loading dock safety. CC (©1996 Coastal Video Communications Corp.) 22 min.

WELDING SAFETY

Arc Cutting And Gouging V0814

Covers: Shielded metal-arc cutting; Air carbon-arc cutting and gouging; Plasma arc cutting; and Safety rules.

(©1989 Safetycare, Inc.) 14 min.

Arc Welding V0210

Shows safe welding techniques. Includes: Arc Welding Process, workshop, personal and equipment safety, striking the Arc, making a Weld Run, welding faults, and tack welding. Also covers a variety of welds including: Square Edge Butt, Joint Fillet Weld, Outside Corner joint, Lap Joint Weld, Single V-Butt; and Weaving Technique. This program is for all operators as well as students.

(©1989 Safetycare, Inc.) 23 min.

Arc Welding : Safety And Operations V0025

Describes the arc welder and emphasizes safety procedures including PPE. Names the five types of electrodes and tells how to put the electrodes into the holder. Correct and faulty welds are shown.

(©1970 AIMS Media) 13 min.

Confined Space Hotwork : Checklist To Safety V0698

Describes the hazards of confined space hotwork and the proper precautions.

Covers: The hotwork permit; atmosphere testing; preparation of confined space; safety equipment; fire watch; and emergency rescue.

(©1993 Coastal Video Communications Corp.) 20 min.

Containers And Confined Spaces V0079

Recognizes hazards in various work situations. Demonstrates precautions and protective devices to safeguard the welder. Discusses the potential dangers encountered in welding on containers and in confined spaces.

(©1986 Beacon Films) 11 min.

Cutting Torch Safety V0664

Trains employees about hazards associated with cutting torches. Covers: Safe cutting locations and ventilation concerns; Confined space and compressed gas cylinders; Personal Protective Equipment; Fire prevention and safety tips; and Equipment: parts, threading of attachments, inspection, and procedures.

(©1995 Safety Source) 10 min.

Fumes & Gases V0076

The application of intense heat and light to metals can produce harmful fumes and gases. Explains how fumes are produced, the effects on the body and how to avoid the fumes.

(©1986 Beacon Films) 15 min.

High Impact : Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. Warning! May be too graphic for some audiences.

(©1995 ERI Safety Videos) 19 min.

High Impact : Welding Safety V0672

Illustrates the hazards that apply to welding and safety procedures. Covers: Areas where welding may be prohibited; Sparks and fire prevention; Hazardous fumes in breathing zones; Maintaining healthy breathing zones; Eye protection; Personal protective equipment; Safeguards for electrical arc welding; Conducting oxy-fuel operations safely; and General welding safety tips. Warning! May be too graphic for some audiences.

(©1996 ERI Safety Videos) 17 min.

Oxy Acetylene Welding : Safety And Operations V0024

Defining gas welding, this video explains: procedures for opening regulator valves; and preparing a torch for use.

(©1970 AIMS Media) 15 min.

Oxy-Acetylene Cutting V0208

Shows the safe use of oxy-acetylene cutting equipment. Includes: equipment and workshop safety; gas and gas cylinders, types and flow rates; cutting torch types and applications of the tips; equipment knowledge and maintenance. Also includes techniques for setting-up, cutting of metals, and closing down.

(©1989 Safetycare, Inc.) 14 min.

Oxy-Acetylene Welding V0209

Describes the Oxy-acetylene process; workshop and equipment safety; components of the Welding Unit; flame types; backfires and flashback; running a bead with and without a rod. Shows correct procedure for a variety of welds including: edge welds, corner welds, butt welds, fillet welds; and safe procedures for closing down. Training for professional operators and trainees as an operational guide on the use of Oxy-acetylene Welding Equipment.

(©1989 Safetycare, Inc.) 25 min.

Welding & Cutting Safety V0541

Describes the correct personal protective equipment (PPE) for welding/cutting operations. Covers hazards, Material Safety Data Sheets (MSDSs), protective measures and emergency procedures associated with these operations. Safety Watch Series. Suggested to supplement or as refresher training.

(©1996 Primedia Workplace Learning, Safety Watch) 10 min.

Welding And Cutting V0390

Points out the dangers specific to welding and cutting tasks which take place both in and outside of a welding shop. Shows essential PPE and other safety precautions for avoiding injuries. Safety Watch Series. (©1994 Primedia Workplace Learning, Safety Watch) 8 min.

Welding Safety V0170

Shows how to recognize hazards that accompany various welding work situations. Discusses precautions and protective devices to safeguard the welder and others in the workplace.

(©1986 Beacon Films) 11 min.

Welding Safety V0219

Today welders use highly technical welding processes that can create dangerous conditions in the workplace. Shows: How to identify welding hazards; Evaluating hazards in the workplace; Workshop controls; Work practice controls; and Personal Protective Equipment.

(©1990 Safetycare, Inc.) 16 min.

Welding Safety : Safe Work with Hotwork V0998

Describes hazards and engineering controls of hotwork. Covers PPE, safe work practices and worksite safety. Reviews inspection and equipment maintenance for arc and oxy fuel welding. CC

(©2003 Coastal Video Communications Corp.) 18 min.

WELLNESS

Combating Stress V0506

Not all stress is bad, yet too much stress can lead to health and job performance difficulties. Follow the tips provided in this video for maintaining a healthy balance. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Controlling High Blood Pressure V0616

Describes in a drama the ways to reduce the risk of high blood pressure, reduce stress, exercise options and choosing a healthier lifestyle. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1997 Primedia Workplace Learning, Safety Watch) 13 min.

Diet For Energy V0621

"June Honda" and "Roseanne" explain how to have balance in diet and exercise. Discusses weight maintenance, the importance of maintaining good habits for eating and exercise. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 8 min.

Electromagnetic Field Awareness V0394

The research on Electromagnetic fields (EMF) is inconclusive. Discusses what objects emit EMF when in use and the ways to limit exposure to EMF. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 5 min.

Hepatitis C : Diagnosis, Clinical Management, Prevention V0691

Dan Rutz moderates this live satellite video conference from the CDC Atlanta. Covers: Epidemiology and screening; Clinical Evaluation and Management; Specialist's workshop; Prevention and Counseling. Describes: history; risk factors; serological and laboratory tests; treatment options; and effective methods to counsel patients. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1997 Center for Disease Control and Prevention) 150 min.

Making Healthy Choices : Safe & Healthy Lifestyles V0421

Outlines some of the keys to selecting a healthy diet such as reading nutrition labels, limiting fat intake, and increasing complex carbohydrates. Shows the benefits of exercise. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 13 min.

VIDEO TIP:

Late videos must be shipped by overnight delivery service.

Medical Monitoring : How It Works V0483

Discusses why it is important to have a healthy body both on and off-the-job. Safety Watch Series. Suggested to supplement or as refresher training. CC
(©1995 Primedia Workplace Learning, Safety Watch) 8 min.

Personal Health & Fitness V0544

In this "Rocky" spin-off, physical fitness expert "Stocky" tells Pauly and Adrian why good exercise serves at least three important purposes: Maintaining or increasing strength and endurance; Preparing musculoskeletal frame for work demands through proper stretching; and Strengthening the mind and body connection. Safety Watch Series. Suggested to supplement or as refresher training. (©1996 Primedia Workplace Learning, Safety Watch) 13 min.

Reducing The Risk V0796

Hepatitis B is a potential killer. Three health care workers speak candidly about Hepatitis B and describe this debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced. Vaccinations are available. (©1988 SmithKline Beckman Corp.) 13 min.

Safety Watch Series, Vol. 2, No. 3, June 1995 V0419

Contains these four segments on safety issues: HAZCOM : CORROSIVES (V0420), MAKING HEALTHY CHOICES : SAFE AND HEALTHY LIFESTYLES (V0421), ELECTRICAL MAINTENANCE (V0422), and FORKLIFT LOADING (V0423). For descriptions of each segment, refer to specific titles numbers as listed here. (©1995 Primedia Workplace Learning, Safety Watch) 38 min.

Silver Stretch V0048

Kathy Norman, a nationally certified instructor and trainer and founder of Aeroflex, suggests this daily stretching program intended to increase your flexibility and range of motion as well as reduce the chance of injury. To receive booklets addressed in the video call the current phone number: 800-352-5173. (©1990 Purple Cross, Prairie States Life Insurance) 20 min.

Stress In The Workplace V0401

Identifies signs of stress overload, suggests ways for individuals to change their reactions to stressful events and shows various other stress management strategies. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Stress Management : A Practical Approach V0676

Compares the stress of a roller coaster ride to the ups and downs experienced during a busy day. Follows the stress coping challenges of several people and shows how they might handle those challenges. Helps to increase employees understanding of the ways unmanaged stress affects their health, productivity, and personal lives and to give them tools to take control of their stress levels. (©1997 American Training Resources, Inc.) 19 min.

Stress Relief : The Heimlich Method V0026

Dr. Heimlich explains what stress is, how it works, and gives strategies for cooling off stressful situations and changing habits that invite stress. (©1983 AIMS Media) 18 min.

Surviving The Cold And Flu Season - Humorous V0468

Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Surviving The Cold And Flu Season V0819

(Humorous) Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Workplace Stress V0659

Shows employees the powerful force of stress and its causes. Teaches how to control, eliminate stress factors, and relieve stress through relaxation and simple exercises. (Revised V0184.) (©1994 Long Island Productions) 13 min.

Workplace Stress V0184

Shows employees the powerful force of stress and its causes. Teaches how to control, eliminate stress factors, and relieve stress through relaxation and simple exercises. (Similar to V0659.) (©1992 International Film Bureau Inc.) 15 min.

WINTER SAFETY

Cold Stress V0406

Offers many tips for avoiding cold stress, recognizing symptoms of cold stress, and recovering from cold stress. Also suggests clothing choices for protection against cold, wet, or windy conditions. Safety Watch Series. Suggested to supplement or as refresher training. (©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Defensive Driving : Prepared for the Worst V0643

Covers conditions which create hazardous driving situations — snow, ice, rain and fog; preventive maintenance; precautionary measures; breakdown basics; accidents; road construction zones; and personal security. CC (©1996 Coastal Video Communications Corp.) 18 min.

Groundskeeper Safety Including Pesticides V0509

Many safety issues for groundskeepers are discussed, including working in hot and cold weather, working with power equipment, using appropriate PPE, lifting correctly, avoiding insect bites, and working with pesticides. Safety Watch Series. Suggested to supplement or as refresher training. CC (©1996 Primedia Workplace Learning, Safety Watch) 12 min.

Highway Work Zone Safety : Moving Operations / Maintenance Safety V0861

For road construction workers. Features safety tips and proper maintenance checks before starting out in emergency situations. Emphasizes the hazards of operating plows in snow removal, operating heavy construction vehicles on the road, and operating landscaping tools along the road in conditions where traffic control procedures are at a minimum. Note: Some footage contains Washington State Code violations!

(©1998 Iowa Department of Transportation; Associated General Contractors of Iowa: US Dept of Transportation) 13 min.

Holiday Safety V1000

Humorous dramatization of a team applauded for their excellent safety record on the job as they head home to holiday preparations with disastrous results. One by one, they arrive in the emergency room for treatment of eye, back, and strain injuries reporting to Nurse Crabbitch. Emphasizes ladder safety, eye protection, seatbelt safety and safe lifting procedures away from the job.

(©1994 Summit Training Source, Inc.) 14 min.

Holiday Safety : At The Top Of Your List V0572

Includes a 25 item holiday checklist: Christmas trees; Christmas lights; Decorations; Using your fireplace safely; Other fire hazards; Holiday food preparation; Alcohol and the holidays; Holiday traveling; Shopping safely; and Holiday stress. CC

(©1994 Coastal Video Communications Corp.) 17 min.

Hypothermia V0326

Explains how to recognize and treat hypothermia. Shows the major symptoms, step-by-step instructions for treating the victim, and the "help" and "body-to-body warming" methods. May be duplicated. (©1983 National Technical Information Service) 15 min.

Hypothermia : Outdoor Enemy #1 V0011

Two case study dramatizations reveal the causes, symptoms and dangers of hypothermia. Covers preventative measures and treatment of a hypothermia. For anyone who engages in outdoor activities. Sensible outdoor tips for all seasons are offered. (©1984 Beacon Films) 24 min.

Icy Road Ahead V1022

Extensive winter driving demonstrations show how to control and correct a skid on ice, and the importance of tire grip and traction, vehicle behavior, driving techniques, and emergency techniques. The program supplements Driver Education and Driver Training courses, covering rules, safety and techniques.

(©1995 R M Distributors – Aims) 23 min.

Injuries Don't Take Holidays V1062

Martin Lesperance, veteran firefighter and paramedic, speaks about careless actions resulting in tragedy, especially around the winter holidays. Show this to encourage a safety minded holiday for your workers. Topics are fire safety, driving safety and alcohol abuse.

(©2003) 19 min.

Safe Driving In Hazardous Conditions V0270

Defines techniques for driving in rain, fog, snow and ice.

(©1991 Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min.

Safe Winter Driving V0339

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Topics include basic emergency equipment, rain, snow and icy conditions, what to do when stopped and stranded.

(©1993 Coastal Video Communications Corp.) 17 min.

Snow and Ice Control V0891

A training tape in three parts for DOT road maintenance personnel; also applicable to other snow removal operators, primarily municipality and county workers. Part 1 (11 minutes) Preparation and Basic Information. Part 2 (15 minutes) Equipment checks and maintenance. Part 3 (21 minutes) Snow and Ice, plowing, applying sand and anti-icers. Updated in 1999.

(©1989 Washington State Department of Transportation) 47 min.

Surviving The Cold V0066

A winter safety film including: recognizing and treating hypothermia; preparing the home for winter emergencies; winter travel; and blizzard survival.

(©1984 Pyramid Film & Video) 16 min.

Surviving The Cold And Flu Season V0468

(Humorous) Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training.

(©1995 Primedia Workplace Learning, Safety Watch) 11 min.

Surviving The Cold And Flu Season V0819

(Humorous) Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Safety Watch Series. Suggested to supplement or as refresher training. CC

(©1996 Primedia Workplace Learning, Safety Watch) 11 min.

Top Driver: Defensive Driving Skills V0820

A comprehensive driving course in eight parts, about ten minutes each. Interest is heightened by tips from professional racers and stunt drivers. Covers driving basics, safety checks, driver attitude, rules and signs, over and understeering, hydroplaning, anti-lock braking systems, driving distractions, rural driving, bad driving conditions (snow, ice, wet, night), and handling dangerous situations. Parts can be used separately.

(©1998 Group 7, Inc.) 75 min.

Winter Driving V0594

Teaches driver training techniques for utility and truck drivers. Uses live video sequences to illustrate loss of control situations. Covers winter driving techniques and preparation of vehicles for winter travel.

(©1995 Video Training Source) 18 min.

Winter Driving V1020

Refresher training gives tips on driving hazards in snowy conditions. Gives vehicle inspection checklist for winter condition driving and tips on winter driving skills. (©1998 Summit Training Source, Inc.) 8 min.

Winter Driving Tactics V0036

Winter drivers in Minnesota are used as examples in dangerous driving situations. Techniques for handling a skid, use of snow tires, and adjusting to different driving conditions are shown. (©1975 AIMS Media) 16 min.

Winter Driving Update V0179

There are many safety precautions, preventive measures, and tactics to learn before driving in wintery conditions. Methods for driving safely in snow and ice are demonstrated. The importance of being prepared in the event of a breakdown is emphasized. (©1991 AIMS Media) 15 min.

Winter Safety V0391

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Covers: Signs of hypothermia and frostbite; Treatment; and Off-the-job winter safety. (©1993 Coastal Video Communications Corp.) 14 min.

WORKERS' COMPENSATION

Building Your Business... In Washington State V0517

Information about setting up a new business in Washington State. To hire workers, contractors or subcontractors there are certain legal requirements to meet. Covers: Business Application; Maintaining records, quarterly reports, and workers' compensation premium payments; Written accident prevention program, Review of minimum wage, overtime and child labor laws, Assistance from your local L&I service center, and bonding and insurance, contractor registration form and meeting prevailing wage requirements for public works projects. Open Captioned. (©1996 Department of Labor and Industries, State of Washington) 12 min.

Making Claims Work V0529

Informs injured workers about the workers' compensation claims process. Tells the responsibilities of injured workers covered by the State Fund and the responsibilities of the Washington State Department of Labor and Industries to the claimant. Emphasizes partnership between the workers, employers, providers and the department necessary to help workers return to their jobs. Open captioned. Spanish version V0530. May be duplicated (©1996 Department of Labor and Industries, State of Washington) 12 min.

Que es lo que qebe de Saber de su Reclamo - Subtitulada Making Claims Work V0530

Informs injured workers about the workers' compensation claims process. Tells the responsibilities of injured workers covered by the State Fund and the responsibilities of the Washington State Department of Labor and Industries to the claimant. Emphasizes partnership between the workers, employers, providers and the department necessary to help workers return to their jobs. Open captioned. English Version V0529. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1996 Department of Labor and Industries, State of Washington) 12 min.

Return to Work for Employees V1049

Pro-active Early Return to Work from the employees perspective. Gives reasonable and realistic ways to look at and think about early return to work. Should also be viewed by managers, supervisors, and medical providers. (©1996) 17 min.

Return to Work for Supervisors V1050

Training for managers and supervisors perspective. Employees, medical providers, workers' comp case managers, and risk management will also benefit by learning realistic options for Reasonable Accommodation and transitional employment during the recovery process. (©1996) 16 min.

Returning the Injured Worker to the Job V1048

Shows how six Oregon employers turned around attitudes and cut compensation costs. Dramatic stories of injured workers returning to work in a new capacity. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1993) 20 min.

Taking Charge Of Claims For Your Business V0631

The mandatory workers' compensation law provides no fault insurance in case of industrial injury, occupational illness, or death. Employers in Washington State are required to carry workers' compensation insurance for their workers. Shows how employers can keep their workers' compensation premiums as low as possible by preventing injuries on the job and effectively managing claims. May be duplicated. Open Captioned. (©1997 Department of Labor and Industries, State of Washington) 14 min.

Workers' Compensation Fraud V0619

Elaborates on workers' compensation costs, compensation insurance premiums, and indirect costs involved with worker injuries. Safety Watch Series. CC (©1997 Primedia Workplace Learning, Safety Watch) 13 min.

WORKPLACE VIOLENCE

Conflict Resolution V0452

Produced in the style of "Home Improvement." Shows several ways to resolve differences of viewpoint, including strategies of compromise, accommodation, collaboration, avoidance and competition and suggests the circumstances under which each strategy may be most effective. Safety Watch Series. (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Conflict Resolution V1007

Produced in the style of "Home Improvement." Shows several ways to resolve differences of viewpoint, including strategies of compromise, accommodation, collaboration, avoidance and competition and suggests the circumstances under which each strategy may be most effective. Safety Watch Series. Same as V0452 but CC (©1995 Primedia Workplace Learning, Safety Watch) 10 min.

Facility Security - The Critical Link V0936

Designed to create an awareness of threats and danger in the workplace. Includes how to eliminate the opportunity of cyber crime, bomb and biological threats, industrial espionage, and arson. Intended for general audiences.

(©2001 Coastal Video Communications Corp.) 18 min.

Homicide In The Workplace V0256

Statistics are outdated, but clearly explains the dangers homicide in the workplace. Good for safety committees, supervisors, and employees.

(©1993 Long Island Productions) 17 min.

Is It Worth Your Life? V0148

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-832-200 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated.

(©1992 Department of Labor and Industries, State of Washington) 18 min.

Is It Worth Your Life? V0531

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-832-200 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated. CC

(©1992 Department of Labor and Industries, State of Washington) 18 min.

Prevention Is Proactive : Part I The Support Process, Part II Attitudes In Action, Part III The Power Of Stress V0754

Discusses an introductory training program on crisis prevention that examines staff values and stress reactions and the techniques of diffusing a crisis situation in which an individual is threatening the safety of himself and others with severe aggressive, destructive, or self-abusive behaviors. The support process covers: Steps in the support process; Who is involved, and The process for each individual. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 26 min.

Prevention Is Proactive : Part IV - Crisis Diffusion V0755

Discusses strategies to diffuse a crisis. Main goals of crisis intervention: To assure the safety of everyone involved; and To help the person in crisis regain control of himself. Designed to reduce the incidence of on-the-job injuries sustained by rehabilitation staff working with people having physical, mental, or emotional impairments. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1991 Department of Consumer Business & Services, Oregon OSHA) 22 min.

Targeting Workplace Violence : A Video For Front-line Workers V0630

Ann Schatz, a KOIN-TV news anchor reports her part in a workplace violence story. A lone gunman entered the Coin Tower where her station was located and held a number of hostages on the ground floor. Challenges viewers to identify factors leading up to a violent incident and ways to avoid or defuse it. Appropriate for retail and public workers, especially those who deal with high stress situations. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1997 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Violence : Reducing Your Risk V0278

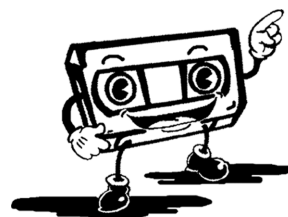

How to avoid potentially violent situations and form a plan of action for escape or defense if violence occurs. Experts in personal safety and law enforcement demonstrate simple yet and effective methods everyone can use to reduce their risk and defuse threatening situations. (©1994 Video Training Inc.) 28 min.

Violence In The Workplace V0439

To prevent violence recognize the problem, define the cause and recognize early signs. Gives instructions on dealing with violence in the workplace and personal security. (©1995 American Training Resources, Inc.) 10 min.

YOUNG WORKERS

A Sudden Change of Plans V1055

Intended for teen driver education with emphasis on driving safety through road construction work zones.

(©1998) 7 min.

Is It Worth Your Life? V0148

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-832-200 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. May be duplicated.

(©1992 Department of Labor and Industries, State of Washington) 18 min.

Restaurant Safety : Preventing Lifting and Carrying Injuries

Previendo Lesiones al Levantar y Cargar Cosas Pesadas V0946

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers techniques for safe lifting of trays, boxes and other objects. Teen appeal. CC in English version only. CC

(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Preventing Slips, Trips, and Falls

Previendo Resbalones, Trozones y Caidas V0945

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers awareness of potential hazards, attention to details; proper footwear; safe lifting tips; hand washing, cleaning up spills, keeping pathways free of obstacles, and safety attitude. Teen appeal. CC in English version only. CC

(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Robbery Prevention and Awareness Cómo Prevenir Robos V0947

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers security precautions, closing procedures and presents several scenarios to show proper actions to take during robbery.

These safety principles also apply in convenience stores or other businesses.

Teen appeal. CC in English version only. CC (©2000 National Restaurant Association, The Educational Foundation) 22 min.

Teens Teaching Teens : Food Service Safety Tips V0961

Locally produced by Washington Restaurant Association with the WRA Education Foundation and L&I. Excellent orientation program by teens covering and the essentials of food service work environment. Includes teen rights, slips and falls, safe lifting, proper footwear, knife and blade safety, preventing burns.

(©2002 National Restaurant Association / Washington Restaurant Association) 10 min.

Your Work: Keepin' It Safe (Young Worker / Power Project) V0920

Designed to teach teens about hazards they may experience at work. Emphasizes the importance of working with co-workers and supervisors to prevent injuries and illnesses. Discusses worker rights to a safe and healthful workplace, to be free from sexual harassment and protections under child labor laws in California.

(©1997 UCLA Labor Occupational Safety & Health Program) 12 min.

Youth Safety in the Workplace V0860

Overview of occupational safety and health topics including blade safety, forklifts, PPE, confined space, lifting, and emergency procedures. Produced by Associated Oregon Industries and OR-OSHA.

When showing this program be aware that specific regulations to Oregon State Law may be different in the state of Washington. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Consumer Business & Services, Oregon OSHA) 19 min.

Zero Tolerance : You Don't Have To Be Buzzed To Be Busted V0889

Intended for the teen audience. However, parents of teens should also view this video's drama of teens getting caught with alcohol in the car and the legal and financial consequences.

(©1999 Washington Traffic Safety Commission) 11 min.

Videos in Spanish or English/Spanish

Alto Impacto : Montacargas Entrenamiento de Operadores High Impact : Forklift Operator Training V1043

Forklift accidents re-created in this video show operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. English version V0778. Warning! May be too graphic for some audiences.

(©1998) 9 min.

Alto Impacto El Seguridad De Los Ojos

High Impact : Eye Safety V1042

Graphic incidents motivate workers to wear proper eye protection. Covers: different types of eye protection, using eyewashes and emergency care for eye injuries. Intended for safety meetings. English version V1041. Warning! May be too graphic for some audiences.

(©1998) 6 min.

Because It's Your Foot V0964

Designed as a meeting opener for a foot protection or PPE presentation. Grabs attention, is fast paced, and has no spoken script. Visual. Industrial and construction work environments.

(©2001 Aurora Pictures) 4 min.

Carga y Elevación: Una Guía para la Seguridad en la Elevadora de Horquilla Agrícola

Load & Lift : A Guide To Agricultural Lift Truck Safety V0741

In Spanish, covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. English version V0740

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA, Oregon Dairy Farmers Association, Oregon A) 21 min.

Christmas Tree Harvest Safety V0962

An innovative "silent movie" designed to reach workers of all languages. Shows the day in the life of a harvester beginning with work preparations and ending with loading processed trees for transport. Includes: work clothing, cutting, movement of trees and personnel, processing and loading. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. DISCLAIMER: Drop starting as seen in the video is prohibited. Riding in truck bed as seen in video is prohibited. High visibility vest is required during helicopter operation.

(©2002 Department of Consumer Business & Services, Oregon OSHA) 20 min.

Conciencia De La Silicatosis En Sitios De Construcción Silicosis Awareness on the Construction Site V1025

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. English version is V1012 *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Consumer Business & Services, Oregon OSHA) 15 min.

El Nuevo Trabajo de Jorge : La Importancia del Analisis de la Cholinesterasa

Jorge's New Job : The Importance of Colinesterase Testing V1033

Explains the reasons for and the importance of cholinesterase testing for pesticide handlers. Addresses common questions asked by people who work with pesticides and clears up some of the misconceptions regarding cholinesterase testing. Viewers are cautioned that references are to California law not Washington State requirements.

(©1994) 11 min.

Farm And Ranch Electrical Safety

Seguridad con la Electricidad en la Granja y en el Rancho V0150

Narrated by Wey Simpson, this video demonstrates many daily farm practices with the potential of electrical shocks. Includes handling irrigation equipment, wiring and grounding electrical systems, and emergency procedures.

(©1992 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 19 min.

Farm And Ranch Equipment Safety

Seguridad con el Equipo en la Granja y en el Rancho V0296

Covers ranch and farm equipment accident prevention Narrated by Bob Tallman, famous rodeo personality and voice of "The American Farmer" radio program. Emergency Medical Technicians describe accident situations with equipment. Communication strategies for farm and ranch workers are also discussed. Recommended training for all workers on farms and ranches.

(©1990 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 36 min.

Forklift Training Video Video de Entrenamiento para la Elevadora de Horquilla V0429

Discusses the proper procedures of safe forklift operations. The forklift operator is responsible for inspection of the forklift and for reporting necessary maintenance. Recommended equipment inspection involves going through a pre shift checklist: engine and operator compartments; controls; and gauges.

(©1995 Northwest Environmental Services & Training) 20 min.

Hágase usted una Promesa: Estado de Preparación en Contra de Terremotos para Usted y su Comunidad Make Yourself a Promise : Earthquake Preparedness For You V0342

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making your home/workplace earthquake safe; and Organizing a neighborhood response plan. (©1990 TODCO) 27 min.

He's Not the Man I Married.. Could it be Lead ?

No es el Hombre con quien Me Case..Sera el plomo V0894

Bi-lingual video in drama format illustrates the hazards of lead in the industrial workplace. (©1991 California Department of Health Services) 17 min.

Historias des Casos sobre la Comunicación del Peligro HAZCOM Case Histories : Learn From Their Mistakes V0799

Details true stories of HAZCOM accidents. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." English version V0336. (©1994 Coastal Video Communications Corp.) 19 min.

Jorge's New Job: The Importance of Cholinesterase Testing

El Nuevo Trabajo de Jorge: La Importancia del Analisis de la Colinesteras V0948

Explains the reasons for and the importance of cholinesterase testing for pesticide handlers. Addresses common questions asked by people who work with pesticides and clears up some of the misconceptions regarding cholinesterase testing. Viewers are cautioned that references are to California law not Washington State requirements. Spanish only version available on V1033.

(©1994 University of California, Agriculture & Natural Resources) 19 min.

La Protección del Systema Auditivo : Tiene Sentido Hearing Protection : It Makes Sense V0973

Teaches workers the hazards of noise and how to protect themselves from hearing loss. Covers: The human ear; how hearing loss occurs; audiometric testing; engineering and administrative controls; and PPE. English version V0699. (©1995 Coastal Video Communications Corp.) 22 min.

Life is for the Living V0965

Safety meeting opener gives graphic coverage to 21 accidents that could have been prevented. Dramatically reminds viewers of the long-term consequences. Impact is visual. No spoken words. (©2000 Aurora Pictures) 4 min.

Llamadas y Perdidas Cercaras Close Calls and Near Misses V1024

Demonstrates to employees the importance of reporting close call incidents correcting hazards, unsafe conditions, emergency response, controlling emotions, and avoiding complacency in safety procedures. Industrial work environment. Short version. English version is V0957. (©2000 R M Distributors - Hi 5) 9 min.

Los Patógenos De La Sangre : ¡Protéjase usted Mismo! Bloodborne Pathogens : Protect Yourself V1004

For all employees. Covers basic bloodborne precautions; HBV, HIV, AIDS and HCV, first aid precautions, decontamination procedures; and housekeeping. Does NOT cover pre-exposure HBV vaccination or the BBP standard. English version is V1003. (©2000 Coastal Video Communications Corp) 15 min.

Los Primeros Auxilios en el Trabajo : Reacción Inicial First Aid On the Job : Initial Response V0533

Designed specifically for those who may not be first-aid certified, but may be first on the scene of an accident. Covers moving a victim, stopping bleeding, and precautions against bloodborne pathogens. Hosted by Bobby Sherman. English version V0567. (©1994 Coastal Video Communications Corp.) 27 min.

Manejadores de Pesticidas y el Estándar de Protección de Trabajador

Pesticide Handlers and the Worker Protection Standard V0845

Meets the Federal Worker Protection Standard training requirements for pesticide handlers. Divided into 16 segments 2-5 minutes in length. Some key points: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing and loading pesticides; Cleaning up spills; Cleaning and disposal of pesticide containers; Pesticide application; Cleaning up; and Working safely with pesticides. English version V0844. (©1994 Michigan State University Extension) 50 min.

No me va a Suceder a Mi It's Not Gonna Happen To Me V0319

Covers safety practices for tractor operators. Includes pre-operation checks, transporting tractors, operation checks, tractor mishaps and how to avoid them and procedures to follow in the event of an accident. English version V0318 (©1990 Visual Education Productions) 24 min.

Patógenos transmitidos Por La Sangre: Preparación, Seguridad y Entrenamiento Bloodborne Pathogens : Preparation, Safety and Training for Public Transportation Drivers V1053

Produced by Oregon OSHA with the Ride Connection specifically for community transportation drivers. Covers exposure hazards to bloodborne pathogens, HIV, HBV and HCV; prevention, clean up procedures. Note : Program highlights Oregon OSHA rules which are different than requirements in Washington state. (©2003) 16 min.

Pesticide Safety : Worker Protection (English/Spanish)

Seguridad con los Pesticidas: Protección del Trabajador

:Trabajadores Agrícolas/Manejadores y Trabajadores de Entrada Reciente V0249

Intended to help meet the requirements set by the EPA for training Agricultural Workers and Pesticide Handlers under the new Worker Protection Standard's regulations. Divided into two sections: Part 1 is for both the Agricultural Worker and Pesticide Handler. Part 2 has additional information for Pesticide Handlers and Early-Entry Workers.

(©1993 University of Idaho, Agricultural Communications Center, Cooperative Extension System) 66 min.

Prevención De Caídas High Impact : Fall Prevention V0777

The 10 accidents are shown to remind workers about short cuts and other common safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aeriallifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. English version V0669

(©1997 ERI Safety Videos) 19 min.

Prevenga Los Trastornos Musculoesqueléticos Understanding Musculoskeletal Disorders V0925

Spanish Version. Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to the Washington Rule. Includes industrial, light manufacturing and construction workplaces. English version V0898.

(©2001 Comprehensive Loss Management, Inc.) 15 min.

Primero la Seguridad: La Seguridad es Importante Safety First : Safety Is Important V0757

Pictograms For The Food Processing Plant. A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. English version V0756.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA, Northwest Food Processors Association) 5 min.

Que es lo que debe de Saber de su Reclamo - Subtitulada Making Claims Work - Open Captioned V0530

Informs injured workers about the workers' compensation claims process. Tells the responsibilities of injured workers covered by the State Fund and the responsibilities of the Washington State Department of Labor and Industries to the claimant. Emphasizes partnership between the workers, employers, providers and the department necessary to help workers return to their jobs. Open captioned. English Version V0529. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Labor and Industries, State of Washington) 12 min.

Reglas del Estándar para la Protección del Trabajador EPA Worker Protection Standard Rules V0748

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. English version V0747.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 20 min.

Reglas del Estándar para la Protección de Trabajador - EPA Worker Protection Standard Rules

(Spanish/English) EPA Worker Protection Standard Rules V0749

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1996 Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 36 min.

Respire Fácilmente Breathe Easy V0760

A training video covering respiratory protection for workers in nurseries. Shows: How to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. English version V0759.

*Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA, Oregon) 19 min.

Restaurant Safety : Preventing Lifting and Carrying Injuries Previniendo Lesiones al Levantar y Cargar Cosas Pesadas V0946

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers techniques for safe lifting of trays, boxes and other objects. Teen appeal. CC in English version only. CC

(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Preventing Slips, Trips, and Falls

Previendo Resbalones, Tropezones y Caídas V0945

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers awareness of potential hazards, attention to details; proper footwear; safe lifting tips; hand washing, cleaning up spills, keeping pathways free of obstacles, and safety attitude. Teen appeal. CC in English version only. CC

(©2000 National Restaurant Association, The Educational Foundation) 22 min.

Restaurant Safety : Robbery Prevention and Awareness

Cómo Prevenir Robos V0947

Animated video with both English and Spanish versions. Nano learns safety lessons in a virtual restaurant from Sage. Covers security precautions, closing procedures and presents several scenarios to show proper actions to take during robbery. These safety principles also apply in convenience stores or other businesses. Teen appeal. CC in English version only. CC (©2000 National Restaurant Association, The Educational Foundation) 22 min.

Seguridad durante la Operación del Tractor y la Maquinaria

Safe Tractor and Machinery Operation V0323

Topics include: Proper clothing and footwear for tractor operation; Pre-operation safety checks; and proper mounting/dismounting procedures. Videotaped seminar. English Version V0322. (©1992 University of Florida, IFAS Publications) 33 min.

Seguridad en el Trabajo : Extinguidores de Incendio

Safety on the Job : Fire Extinguishers V0231

Shows the four different types of fires and fire extinguishers and the five main types of extinguishing agents. Instructions for safe operation of extinguishers and other fire emergency procedures. English version V0230.

(©1987 AIMS Media) 23 min.

Seguridad en el Trabajo : Los Peligros en el Abuso de Sustancias

Safety On The Job : The Hazards Of Substance Abuse V0238

The program shows how alcohol and other drugs impair coordination and perception and can cause workers to make risky choices, endangering the life of the substance abuser and the lives and limbs of co-workers. Dated. English Version V0044. (©1984 AIMS Media) 18 min.

Seguridad en el Trabajo : Manejando la Camioneta y el Camión

Safety On The Job : Van and Truck Driving V0240

The program teaches drivers the fundamentals of pro-driving procedures habits that anyone who drives for a living should adopt. Stresses safety attitude. English Version V0239 (©1986 AIMS Media) 23 min.

Seguridad en el Trabajo : Operación de la Elevadora de Orquilla

Safety On the Job : Forklift Operation v0233

Covers proper techniques for: pre-check; stopping and driving in reverse; stacking loads; carrying loads up and down a grade; lowering loads; and handling emergency situations. English version V0786 and V0182. (©1988 AIMS Media) 19 min.

Seguridad en el Trabajo : Prevención de Lastimaduras de Espalda

Safety On the Job : Preventing Back Injury V0235

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Mostly industrial setting, but brief segment in office environment. English version V0234.

(©1987 AIMS Media) 24 min.

Seguridad en el Trabajo : Primeros Auxilios para Accidentes

Safety On The Job : First Aid For Accidents V0232

Through a series of vignettes, illustrates first aid treatment of some of the most serious accidents occurring in the workplace. The injuries include broken legs, broken backs, bleeding, head wounds, burns and electric shock requiring CPR. (©1985 AIMS Media) 20 min.

Seguridad en el Trabajo : Respirador Purificante de Aire

Safety On the Job : The Air-Purifying Respirator V0236

Explains the air-supplied respirator, the different kinds of respirators, how they work, and the situations each type is designed for. Shows step-by-step rules for using air-supplied respirators. English version V0237. (©1988 AIMS Media) 13 min.

Seguridad en el Trabajo : Trabajando con Maquinaria

Safety On The Job : Working With Machinery V0242

Procedures are shown that safeguard against injury from forklifts and any machine that shears, rotates, presses, or grabs. Demonstrates possible results of shortcutting safety. English version V0168. (©1986 AIMS Media) 17 min.

Seguridad en el Trabajo: Causas Y Prevención Del Accidente - 2nd edition

Safety On the Job : Accident Causes and Prevention V0229

A series of dramatizations show how a person's mental or physical condition can affect on-the-job performance and lead to accidents. Stresses identification of risk-producing behaviors to reduce the chance of injury. Illustrates warning signs staff and supervisors should be alert to. Suggests employee assistance programs for help or advice. English Version V0243. (©1984 AIMS Media) 16 min.

Seguridad en la Cosecha de la Manzana

Apple Harvest Safety V0309

Covers the equipment used in harvesting apples. Details tractor/trailer and forklift operation, unloading bins, general orchard safety, proper lifting techniques and ladder safety. English version V0297.

(©1993 University of Arizona, Agricultural Health Promotion System) 16 min.

Seguridad en la Escalera

Ladder Safety V0299

Incorrectly used, a ladder can be one of the most dangerous tools in the workplace. This program offers a few guidelines for safe ladder use. English version V0314. (©1990 Safety Short Production, Inc.) 5 min.

Seguridad en las Grúas durante Impactos Altos

High Impact : Crane Safety V0776

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. English version V0775.

(©1998 ERI Safety Videos) 18 min.

Seguridad en las Operaciones Agrícolas

ATV Safety For Agricultural Operations V0376

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common Safety Rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards. English version V0490.

(©1993 Visual Education Productions) 14 min.

Seminario de Seguridad para el uso del Tractor en la Industria del Árbol Frutal, Partes I, II, III

Hood River Tractor Safety Seminar for the Tree Fruit Industry V0751

Provides training on the safe use and maintenance of orchard tractors. Covers Oregon OSHA tractor safety rules; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; accident hazards; and implementing safety standards. English version V0750. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1994 Department of Consumer Business & Services, Oregon OSHA) 52 min.

Series de la Construcción Residencial - La Seguridad en el Acabado de Tablas de Forro, También Conocido Como "Siding"

Residential Construction : Siding Safety V0813

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs and safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. English version V0811. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - La Seguridad en el Techado

Residential Construction : Roofing Safety V0785

Intended to help provide employees and employers with the tools to make the residential workplace safe. Provides examples to meet to safety requirements. The construction employer is required to provide a safety program tailored to the operation and types of hazards involved; safety meetings; first aid training and kits; personal protective equipment necessary to

do the job safely; code requirements; and how to work safely during the roofing phase of residential construction. Covers: Job prep; Walk-around safety inspection; Ladder safety/safe access; Anchorages; Roofing; and Job completion. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1999 Department of Labor and Industries, State of Washington) 13 min.

Series de la Construcción Residencial - Seguridad en el Armazón

Residential Construction : Framing Safety V0851

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials and web version available at: Videos.LNI.wa.gov. English version V0850. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©2000 Department of Labor and Industries, State of Washington) 13 min.

Su seguridad en la Planta de Empaque de Frutas

Your Safety in the Fruit Packing Plant V0746

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries in the workplace. English version V0745. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.

(©1993 Department of Consumer Business & Services, Oregon OSHA) 10 min.

Workers Exposed : Avoiding Exposure To Infectious Diseases In The Workplace V0263

Focuses exclusively on non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contact with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. English version V0262. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. (©1993 Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min.

Trabajando de manera Segura con los Pesticidas

Working Safely With Pesticides

V0269

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents.

Trabajando Inteligentemente - no con más Dificultades: Ergonomía en la Agricultura Working Smarter - Not Harder : Ergonomics In Agriculture V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve

flexibility. Gives solutions to minimize stress and strain on various body parts.
Demonstrates correct work practices.
English version V0801. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes.
(©1998 Department of Consumer Business & Services, Oregon OSHA) 17 min.

Tripod Orchard Ladder Safety Seguridad en la Huerta usando la Escalera Trípoide V0295

As a training aid, this program covers:
Ladder safety inspection; Proper setting on
level and sloping ground; and proper
clothing. Demonstrates how to inspect and
set up tripod orchard ladders.
(©1990 Oregon State University, Extension
Service) 10 min.

Notes:

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

**SAFETY AND HEALTH
VIDEO LIBRARY**
AGREEMENT FORM

To open an account and borrow videos, please fill out this form. **FAX ONE PAGE ONLY.**

Name	Phone	Fax	
Business Name	Internet <input type="checkbox"/> Yes <input type="checkbox"/> No	Email Address	
Physical Street Address (<i>must be a Washington address</i>)	City	State WA	Zip+4
PO Box Number	City	State WA	Zip+4
Thurston County residents must pick up videos. Other users must designate <input type="checkbox"/> Pick Up Only <input type="checkbox"/> Ship Only. Once the selection is made, it may not be changed.			

TERMS AND CONDITIONS:

1. Copyrighted materials are loaned subject to the condition that **any form of duplication is strictly prohibited** in accordance with Title 17 of the United States Code of Federal Regulations. Unauthorized duplication of copyrighted materials will result in immediate cancellation of borrowing privileges.
2. **Materials are loaned for a period of five working days.** When videos are borrowed, the shipping label has the return date printed on it. This is the date the videos must leave your office. Three late returns will result in immediate cancellation of borrowing privileges.
3. **Borrower accounts are established by individuals.** There is no limit to accounts per business. However, a borrower may not loan materials to any person. Example of prohibited loans: consultant to client; corporate office to corporate office. You must return phone calls within 2 days.
4. **The borrower is responsible for any loss or damage** of library materials, including video and shipping cases, and agrees to pay full replacement costs for any items lost or damaged during the loan period.
5. **The borrower is responsible for the cost of return shipping.** Unless programs are hand-delivered by the borrower, return shipping must be through a **TRACEABLE SHIPPING SERVICE** e.g. *United Parcel Service*, or *Media Mail with Delivery Confirmation*. Return by untraceable means will result in borrower liability in the event of loss and late return. Returning videos to an L&I Field Office or other facility is prohibited.
6. Accounts must be designated as Pick Up Only or Ship Only. Thurston County users are required to pick up and return materials to the L&I Service Location lobby in Tumwater.

I have read and understand the terms and conditions listed on next page. As a condition of my participation in the Washington State Department of Labor & Industries, Safety and Health Video Library, I agree to comply with them. I have kept a copy of this agreement for my records. I certify that I am a Washington Resident.

Safety & Health Video Library

Department of Labor & Industries

Library Policy

Videos must be returned on time.

Three late returns will result in *immediate and permanent* cancellation of borrowing privileges. You must return videos by traceable carrier. Also, please return phone call messages from us within two business days.

The "Only You" Rule:

Videos are checked out only to you. Don't loan them out. All transactions must be made through the Safety & Health Video Library.

The Traceable Shipping Rule:

Your only cost is the return shipping by traceable carrier such as United Parcel Service or Airborne. Or if you prefer the US Postal Service, use media mail with delivery confirmation. Late videos *must* be shipped by guaranteed overnight delivery service.

Respect the Copyright

Unless specifically noted in the catalog and on the materials themselves, all library materials are fully protected by copyright under Title 17 of the United States Code of Federal Regulations.

• **Unauthorized duplication of copyrighted materials will result in immediate cancellation of borrowing privileges.**

Library Procedures

The 5 – 5 Rule:

You can borrow up to five videos for five days.

The 6 Month Rule:

You can schedule videos up to six months in advance.

The One Week Rule:

Please give us one week notice before you want to show videos. The videos will arrive 1-2 business days before your show date.

The Fine Print

Be aware that the average cost of videos in our collection is \$500. If you or your shipper loses the video(s) *you* are responsible for their full replacement cost. When shipping by UPS or some other commercial shippers your package is automatically insured for \$100. You may want to purchase full coverage.

If you choose to use the US POSTAL SERVICE, you may send by Media Mail with Delivery Confirmation. Purchasing insurance is your recommended, but not required. Please use the PO BOX address:

Department of Labor & Industries,
Safety & Health Video Library
PO Box 44607
Olympia, WA 98504-4607

Many employees of state agencies borrow videos from the Safety & Health Video Library. They, too, must use a traceable shipper to return videos.

You will be charged for items not returned.

Please be sure to rewind all videos, and to place each one *correctly* in its proper case. Videos can be easily damaged by being forced into cases backwards or upside-down.

Protect videos from inclement weather during shipment.

We require you to **reserve videos at least one week prior to your show date** to allow time for shipping to any city out of the greater Olympia area.

Thurston County residents must pick up and return videos in person. Allow at least two days for scheduling and one day for pick-up.

Now you can search all the newest videos online at <http://videos.lni.wa.gov>

- The earlier you request, the more likely you are to get your reservations.
- Plan early for seasonal topics. You can book up to 6 months in advance.
- Processing your video request requires one week advance notice.
- Videos may not be shipped out of Washington State.
